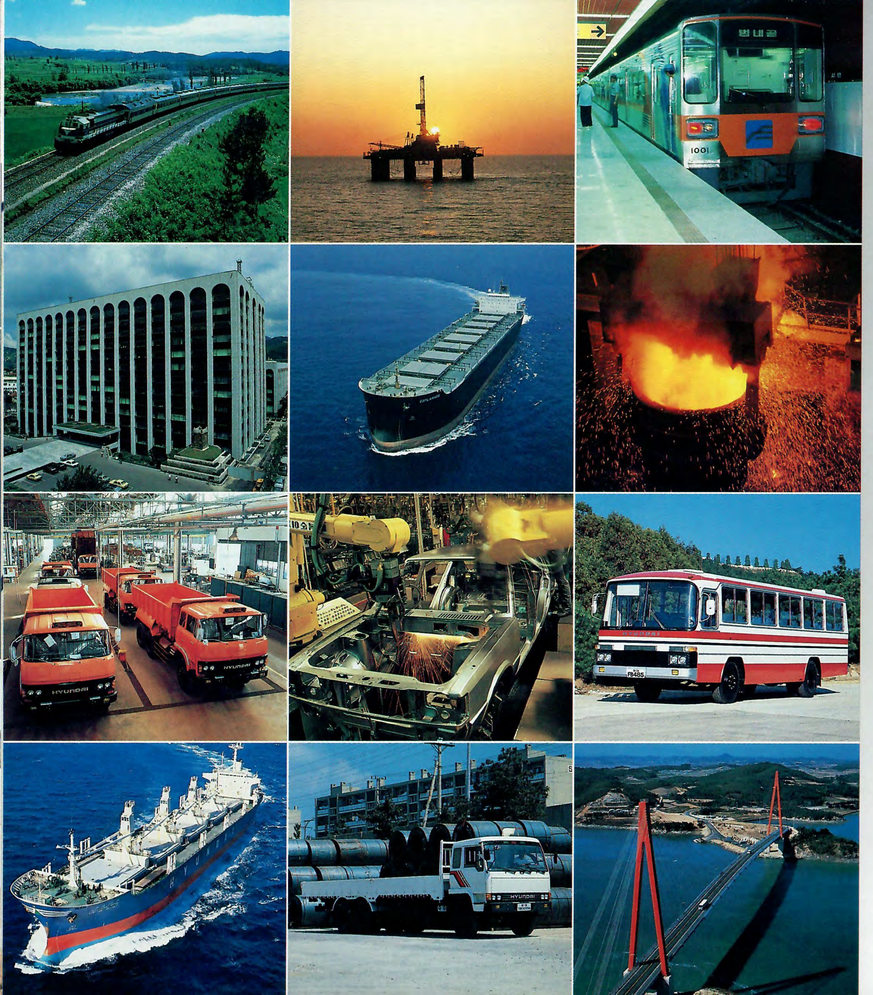
HYUNDAI
Cars that make sense.



Hyundai. It rhymes with "Sunday." And although the name may not be familiar, Hyundai products and services already benefit people in scores of countries. Including this one.

The Hyundai Group is a huge multinational enterprise, ranking 39th among the FORTUNE International 500. Total sales for the Group approached $11 billion for the last fiscal year. And each of its 24 diverse companies shares a widely recognized reputation for quality.

In several areas around the world, Hyundai power plants provide energy and light. State-of-the-art generating technologies are employed by Hyundai engineers to produce low-cost electricity.

Hyundai builds ships. Its mammoth shipyard is the largest in the world, and can manufacture up to 80 vessels every year. Computerized design and control systems ensure optimum efficiency and economy.

Hyundai uses sophisticated robotics in many of its manufacturing procedures. And designs and produces the robots, too.

Electronics and semiconductors are yet more areas in which Hyundai is deeply involved. With cassette recorders. Cordless telephones. Highly advanced personal computers.

And Hyundai has been immensely successful in its endeavors. Because Hyundai is committed to providing excellent products and services at very reasonable prices.

So it's not surprising that Hyundai's considerable experience and technology have been put to use in creating world-class automobiles. With remarkable value, style and comfort.

Introducing the 1986 Hyundai Excels. Cars that make sense.

GLS FOUR-DOOR SEDAN

©1986 HYUNDAI MOTOR AMERICA

Hyundai cars and trucks are now marketed in more than 65 countries. And demand continues to increase.

In Canada, first-year sales exceeded the initial projection by over four times. Hyundai Auto Canada proceeded to become the leading automobile importer in only a year and a half.

One reason for this phenomenal success is a fundamental Hyundai philosophy: Combine state-of-the-art technology with time-tested ideas and talent. The results possess a rare blend of reliability, efficiency and affordability.

Not to mention plenty of style. And the 1986 Excel is certainly no exception.

GLS FOUR-DOOR SEDAN

Its smooth, sleek lines and graceful contours are the creation of famed Italian designer Giorgetto Giugiaro. So the Excel shares the handsome European flair of cars costing many times as much.

But the Excel's great looks aren't only pleasing to the eye. They're also quite aerodynamically efficient.

Excel incorporates such wind-slicing features as a sharply sloping windshield. Flush, hidden drip rails at the roof line. Door edges that blend into the body. A front air dam to reduce turbulence.

It all adds up to an extremely low coefficient of wind drag, which pays off in greater operating efficiency and fuel economy. As well as significantly reduced wind noise at higher speeds.

The Excel's front and rear bumpers are even cleanly integrated with the sheet metal. And, unlike many new cars, they're designed to absorb impacts of over twice the governmental standard without major damage.

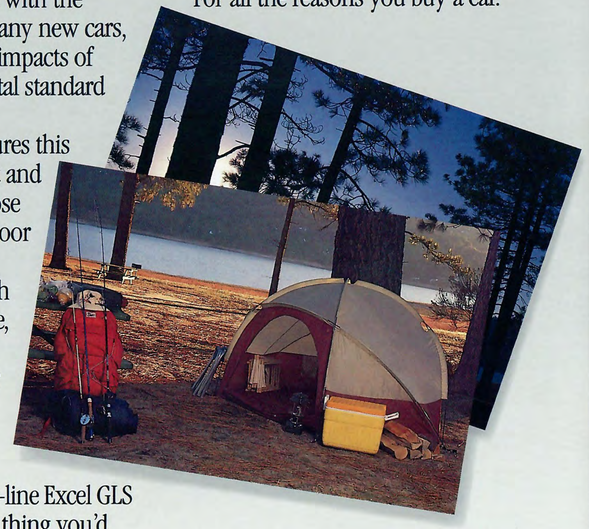
Every Excel model features this high degree of forethought and quality. Whether you choose from the two Excel Four-Door Sedans or the three Excel Five-Door Hatchbacks. Each Excel has front-wheel drive, four-wheel independent suspension, five Goodyear Corsa GT all-season steel-belted radial tires and much more.

And with the top-of-the-line Excel GLS models, you get one more thing you'd never expect in a car this affordable.

Luxury.

As you'll see in the following pages, all Excels are loaded with standard features at remarkably low prices, for extraordinary value. They all provide plenty of room for five in a very reliable package. And they're all designed to make sense.

For all the reasons you buy a car.



GLS FOUR-DOOR SEDAN INTERIOR

The 1986 Excel is a model of roominess and comfort for five. Its front-wheel-drive design and transverse-mounted engine leave plenty of room for you and yours.

The Excel GLS seats are upholstered entirely in plush velour. Its reclining front buckets have two-way headrests, and the six-way driver's seat features height and lumbar-support adjustments.

Rear passengers benefit from a wide, accommodating bench seat. With dual integral headrests, of course. And since the GLS is also available as a five-door hatchback, you can have the added versatility of split fold-down rear seats and a hatch. As well as a fully carpeted cargo area and a standard cargo cover.

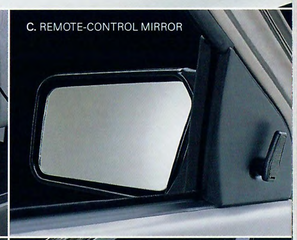
The full center console, illuminated lockable glove box and passenger-side underseat storage tray give you ample capacity and convenience, too. Because it makes sense to be able to take the things you need with you.

A. The sky's the limit with the available power sliding sunroof.
B. Front-seat passengers can see themselves clearly in the standard GLS glove-box vanity mirror.
C. Remote-control rearview mirrors make adjustment easy.
D. Keep odds and ends close at hand and out of sight with the standard underseat storage tray on GLS models.
E. In addition to headrests that adjust up and down as well as forward and back, GLS front bucket seats fully recline. And the six-way driver's seat has adjustable height and lumbar-support, too.
F. A Panasonic® AM/FM stereo cassette system, standard on GLS models, features electronic tuning and auto tape reverse.

A. OPTIONAL POWER SLIDING SUNROOF

B. GLOVE-BOX VANITY MIRROR

C. REMOTE-CONTROL MIRROR



D. PASSENGER UNDERSEAT TRAY

E. SIX-WAY DRIVER'S SEAT

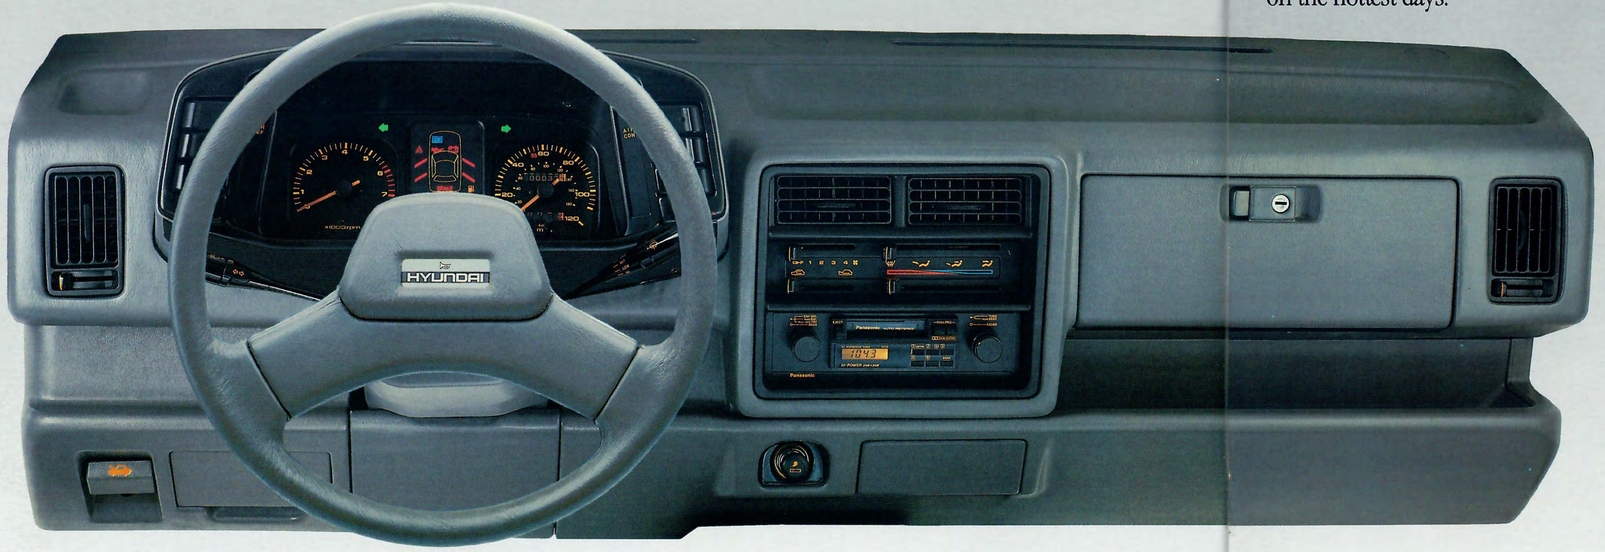
F. PANASONIC® AM/FM STEREO SYSTEM

To keep you fully apprised, Excel GLS models come equipped with accurate, fast-reading instrumentation. Including a tachometer and digital quartz clock.

The luxury steering wheel, headlight and signal switches, and the two-speed windshield wiper and washer control with variable intermittent function are designed for convenient use. As are the remote releases for the fuel filler, trunk lid on the Four-Door Sedan and hatch on the Five-Door. So driving the Excel is as easy as it is fun.

To make things even more enjoyable, Excel GLS models also come with a quality Panasonic® electronically tuned AM/FM stereo cassette system with auto-reverse for superb audio entertainment. There's also an optional Panasonic® High-Power stereo with all of the above, four speakers and Dolby® NR, too.

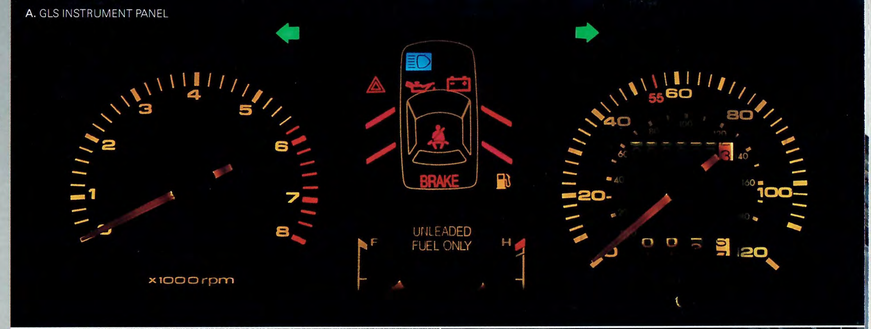
Excel's highly efficient heating and ventilation system with a four-speed fan allows you to maintain the environment you desire. There are additional ducts just for your rear-seat passengers, too. And you can also choose the available air conditioning system to cool you off on the hottest days.



A. The easy-to-read GLS instrument panel keeps you up-to-date on all the car's functions.
B. Get timely information from the standard GLS digital quartz clock.
C. A handsome full console is a great place to keep change and other small items handy.

D. For your favorite tunes and talk, choose the optional Panasonic® High-Power AM/FM stereo cassette system for your GL or GLS. Along with electronic tuning and auto-reverse, this premium system gives you Dolby® noise reduction, four speakers and 25 watts per channel.

A. GLS INSTRUMENT PANEL



B. DIGITAL QUARTZ CLOCK

C. FULL CENTER CONSOLE

D. PANASONIC® HIGH-POWER STEREO SYSTEM

The Excel GL Five-Door Hatchback combines sedan comfort with the practical versatility of a hatch. As well as loads of convenience features, too.

Seat surfaces are covered in supple velour upholstery. The analog quartz clock gives you the time of day. A large center console and front-door map pockets provide additional storage. The split rear seat folds down to reveal a carpeted cargo area. And tinted glass all around helps cut down on the glare.

Outside, the bumpers are color-keyed to the sheet metal. Handsome hub covers and trim rings dress up the Goodyear all-season steel-belted radials. Body side moldings provide extra parking-lot protection. And the dual remote control rearview mirrors can be adjusted with ease.

But if you'd like all this in a car with the added security of a trunk, you're in luck. Because the Excel GL comes in a sedan version, too. And when it comes to value, these two cars are hard to beat.

GL FIVE-DOOR HATCHBACK

GL FIVE-DOOR INTERIOR

The word "value" is used a lot these days. Often by manufacturers that don't have much to back it up. But our most affordable Excel Five-Door Hatchback shown here puts it all together in one stylish, versatile package with one of the lowest price tags in the business.

You'd have a hard time finding all the Excel's standard features on some other low-priced cars. A full-size Goodyear steel-belted radial spare tire. Electric rear window defroster. Lockable, illuminated glove box. Locking fuel filler door. And these are just a few.

The Five-Door's hatchback design makes loading and unloading a breeze. Along with the split fold-down rear seat, you get a wide variety of passenger and cargo combinations. For greater comfort, the rear seat backs are adjustable to three positions, too. There's also a standard cover to keep precious items out of sight in the fully carpeted cargo area.

The Excel Five-Door's good looks on the outside are complemented by a very good view from the inside. With a broad expanse of window area all around the car. And on those warm days when you want to let in the wind, the rear windows roll all the way down, just like the front.

EXCEL FIVE-DOOR HATCHBACK

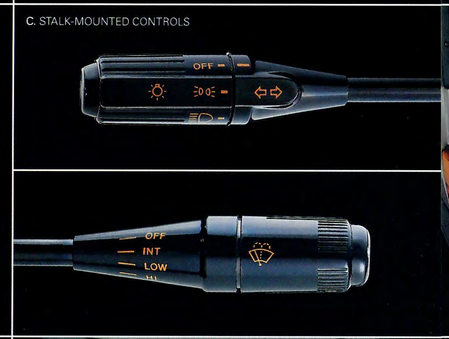
EXCEL FIVE-DOOR INTERIOR

A car with a few standards and lots of options isn't very sensible. So every Hyundai Excel is loaded with standard features. And these are only a few.

A. Every Excel Five-Door Hatchback is equipped with split, 60/40 fold-down rear seats. So you can carry one, two or three rear-seat passengers, and up to 16.7 cu. ft. of cargo.
B. An unlighted glove-box doesn't make much sense at night. So the Excel has an illuminated glove box that locks.
C. Stalk-mounted windshield wiper control features variable intermittent function for those misty, drizzly days. And headlight controls are right at your fingertips, too.
D. When you buy a Hyundai, forget those temporary-spare blues. Because every Excel comes with a full-size Goodyear steel-belted radial spare tire.

A. SPLIT FOLD-DOWN REAR SEAT

B. LOCKABLE ILLUMINATED GLOVE BOX



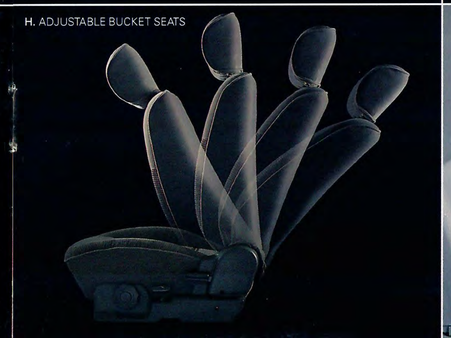
C. STALK-MOUNTED CONTROLS

D. FULL-SIZE GOODYEAR SPARE TIRE

E. GOODYEAR STEEL-BELTED RADIAL TIRES

F. REAR WINDOW DEFROSTER

G. DAY/NIGHT MIRROR

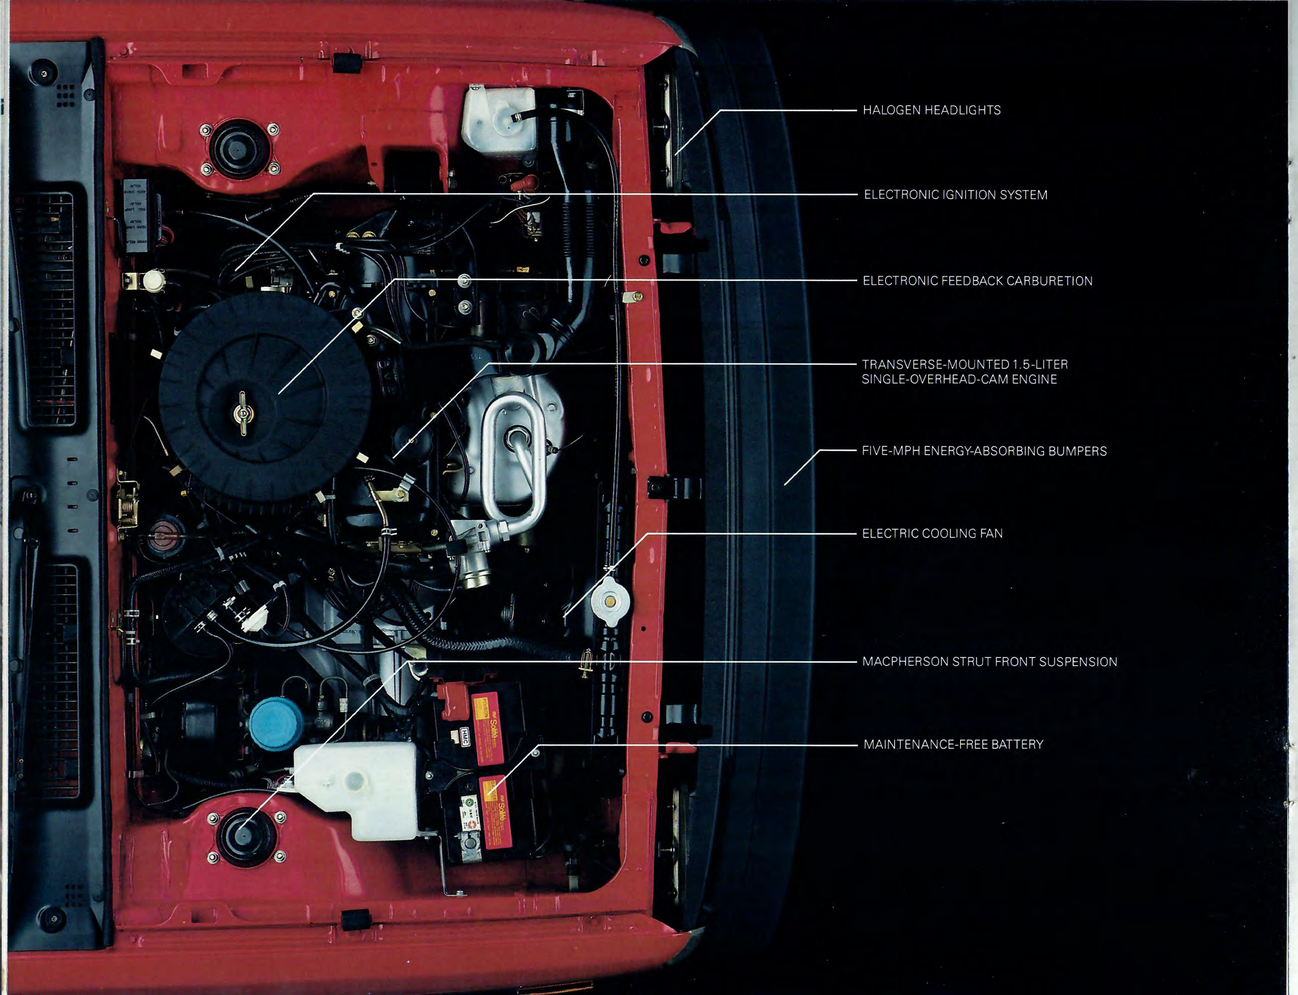


H. ADJUSTABLE BUCKET SEATS

I. THREE-POSITION REAR SEAT

J. CHILD-PROTECTION LOCKS

E. Goodyear all-season steel-belted radial tires provide great traction on every Excel.
F. The electric rear window defroster knows when to shut itself off. (The rear window wiper/washer is standard on GLS and GL Five-Doors.)
G. You'll always be able to see what's behind you with the standard Excel day/night rearview mirror.
H. The ergonomic front bucket seats on all Excels recline fully for optimum comfort.
I. And that's not all. The Five-Door's rear seat backs are adjustable to three positions for greater comfort.
J. Childproof door locks on the rear doors help ensure small children don't open doors when they're not supposed to.



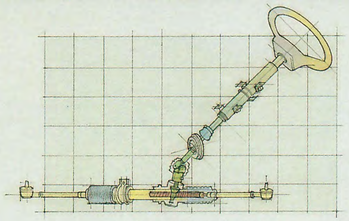
The Hyundai Excel has all the performance and handling to make driving the good time it should be. Its advanced engineering is evident in every aspect.

Each Excel model is amply powered by a 1.5-liter overhead-cam engine. For reduced maintenance, its ignition system is electronic. And its carburetion system is also electronically controlled for quick starting and smooth operation.

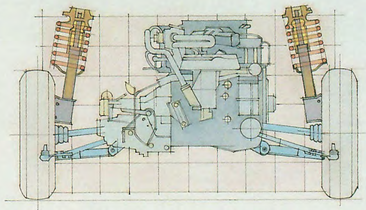
An easy-shifting four-speed manual transmission sends the power along on the Excel. A five-speed manual overdrive does the job on the Excel GL and GLS. Or you can choose the available three-speed automatic transmission to handle the shifting for you. It all reaches the ground with front-wheel-drive traction.

Nimble, road-hugging handling comes from the Excel's four-wheel independent suspension system. MacPherson struts up front and the trailing arm design in the rear smooth the ride with accurate response to the surface. Front and rear stabilizers help keep things under control.

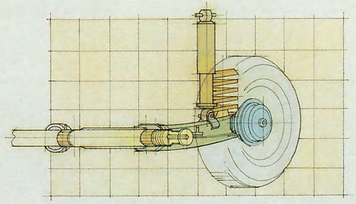
Precise rack-and-pinion steering translates your every input to action. And it all moves with Goodyear all-season steel-belted radial tires mounted



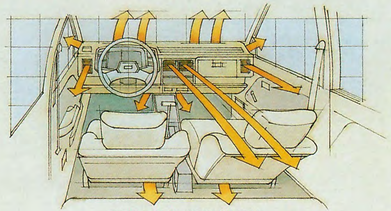
RACK-AND-PINION STEERING



FRONT-WHEEL DRIVE & MACPHERSON STRUT FRONT SUSPENSION



INDEPENDENT TRAILING ARM REAR SUSPENSION



EXCEL VENTILATION SYSTEM

on styled steel wheels. Or you can equip your Excel GL and GLS with handsome aluminum alloy wheels and even beefier Goodyear P175/70R-13 radials.

Sure stops are provided by the power-assisted, dual-diagonal braking. With discs in front and drums in the rear.

To keep your new Excel looking new, several steps are taken before the paint is applied. The sheet metal is extensively prepared. Sound deadeners are sprayed on. The body is completely primed and surface-coated. Then lustrous paint is laid on with an electro-spray process. Metallic paints get a clear coat on top.

Inside, the Excel has a highly efficient heating and ventilation system. In addition to the complete array of front vents, rear-seat passengers also have their very own ducts. So everyone can enjoy the Excel's accommodating environment.

The Excel is such a complete value, the spare tire is a full-sized steel-belted radial instead of the temporary kind found on other makes. There's even a maintenance-free battery, too.

Because for a car to make sense, it can't just be a great value to buy.

It's got to be a great value to own.

1986 Hyundai Excel Specifications

Engine	
Type	4-cylinder inline, SOHC
Displacement	1.5 liter (1468 cc)
Bore & Stroke	2.97 x 3.23 inches (75.5 x 82.0 mm)

Options and Accessories.

In addition to a fine group of popular options, Hyundai also offers a high-quality line of accessories for the Excel. The fit and finish of each item make it a perfect complement to your new car. So you can add those personal touches that make a new Excel your Excel.

A. Make little nicks and scratches disappear with genuine Hyundai touch-up paint.
B. These high-quality, color-keyed floor mats will protect your carpet and look good at the same time.
C. Give your arm a rest on this padded console with a built-in storage space and drink holder.
D. Increased security is available in the form of a passive alarm system. It arms itself automatically, and helps guard against theft of the vehicle and its contents. So if someone opens the door or hood, the siren wails and the headlights flash.
E. Wider P175/70R-13 Goodyear all-season steel-belted radial tires and a set of handsome aluminum alloy wheels can dress up your Excel.
F. Air conditioning is available for all Excel models. So you can keep your cool when the going gets hot.
G. A power sliding sunroof can let the sunshine in.
H. If you'd rather not change your gears, equip your GL or GLS with the optional three-speed automatic transmission.
I. A quality Panasonic® AM/FM stereo cassette system offers entertainment on the go. It's got electronic tuning and auto reverse.
J. The Panasonic® High-Power stereo system has all of the above in a four-speaker, 25-watt-per-channel package with Dolby® noise reduction for sound that surrounds.

Warranty.

Hyundai is proud of the fine products it builds. And that pride is backed by excellent warranty coverage.* The engine, transmission and differential are protected for 24 months or 24,000 miles, whichever comes first, by the New Vehicle Powertrain Limited Warranty. The New Vehicle Limited Warranty covers the entire car for a period of 12 months or 12,500 miles. There's even a 36-month, unlimited-mileage Corrosion Perforation Limited Warranty against rust-through of any body sheet metal panel. So you can drive your new Excel with the confidence that Hyundai stands behind what it sells.

Seatbelts make sense.

Every Hyundai Excel is equipped with seatbelts for five people. Time and again, testing and experience have shown that wearing seatbelts greatly reduces the incidence of injury or fatality in the event of an accident. So wear your seatbelt, and make sure all your passengers do, too. It's the only sensible way to drive.

*FOR COMPLETE DETAILS OF THESE WARRANTY PROGRAMS, SEE YOUR DEALER FOR A COPY OF THE WARRANTY STATEMENT.

Parts and Service.

No matter where you drive your new Hyundai, quality Hyundai parts and service won't be far away. Because Hyundai Motor America is establishing a complete network of full-service dealerships throughout the U.S. Hyundai service technicians receive extensive, hands-on factory training. And Hyundai parts departments are linked to Regional Parts Distribution Centers by computer, so orders can be placed efficiently.

Yet another benefit of buying a new Hyundai Excel is automatic membership in the Hyundai Cross Country Motor Club. Some of the many features of this plan include a national toll-free hotline for help and information; emergency towing service and trip-interruption expenses; registered keychain and key retrieval system; and discounts on rental cars and hotels. See your Hyundai dealer for complete details of this excellent program.
