

2015 MIRAGE

At Mitsubishi, we believe not all drivers are created equal. So we build our vehicles for a different breed of driver, the fearless ones who take pride in what they drive, and refuse to drive more of the same. It's obvious to us that people who truly want distinctive styling and the latest technology see past the procession of bland imitations. We believe that every vehicle we make should stand for something. Something more than expected. And that's why we don't build Mitsubishi cars for stereotypes. We build them for you.

MITSUBISHICARS.COM 1.888.MITSU2015 NATLBRO-15-003

GO BIG.

Are there parts of your own city you haven't explored? Maybe a road trip or two you've been putting off? Waiting for the perfect time? Well, it's time to start thinking big. Go out and expand your comfort zone. Find your impulsive side. The Mitsubishi Mirage isn't just one of the most affordable cars in the country, it's also one of the most fuel efficient. Which means you can fill it up and put your hard-earned money to use exploring every flea market, karaoke bar, or late-night diner within almost 400 miles of you...yes, on a single tank. So check out the new restaurant on the other side of town. Get living in the 2015 Mirage. It's a small car for a big life.

 DESIGN

FUN ISN'T COMPLICATED

It's true, the Mirage was designed for efficiency, but above all, it was designed for fun. Inside and out, Mirage offers a clean and playful design. Its compact size and nimble handling make it ideal for navigating any city. Plus, there's plenty of space to bring along your friends or your stuff — or both. And with eight exciting colors to choose from, Mirage is as playful as your sense of style.

FILL WITH FRIENDS

Despite its compact size, Mirage is capable of accommodating up to five people. How did we manage it? We started by optimizing the layout, finding subtle ways to carve out more room. Next, we optimized certain components of the engine to reduce the amount of space needed in the engine compartment. That allowed us to effectively nudge the cabin's front wall forward. Those small adjustments add up to 103.3 cubic feet of space.

A BIG LIFE DESERVES A BIG VIEW

It stands to reason that a more expansive life leads to a broader perspective. As it happens, Mirage's canopy design offers extra tall windows, which help you gain that perspective with exceptional visibility.

STANDARD REAR SPOILER

Sometimes it's the small details that make the biggest difference. Take this rear spoiler, for example. Sure, it looks cool, but it also enhances aerodynamic performance by reducing air turbulence on the rear of the vehicle.

SPLIT FOLDING REAR SEAT

Adding versatility to the hospitality, this convenient feature helps you accommodate large or oddly shaped items in the back. Like, say, a bike or a Great Dane.

 **ECOLOGY**

RETHINK GREEN

Enjoy efficient performance without the excessive price. By dramatically reducing vehicle weight and by optimizing its aerodynamics, our engineers were able to decrease Mirage's moving resistance and achieve its class-leading combined fuel-efficiency. In fact, it's the most fuel-efficient non-hybrid gasoline car in America, boasting a combined mileage rating of 40 mpg¹. What's more, those big mileage numbers are complemented by a small carbon footprint, as Mirage's CO₂ emissions rating is one of the best in its class².

SCIENTIFICALLY SLEEK

Don't let a thing like wind slow you down. With the help of computer-aided design software, our designers sculpted a simple, aerodynamic shape that slips easily through the atmosphere. How easily? In a wind tunnel Mirage's exterior achieved a low 0.28 coefficient of drag.

MITSUBISHI INNOVATIVE VALVE TIMING ELECTRONIC CONTROL

The Mirage features the latest generation of Mitsubishi Innovative Valve timing Electronic Control (MIVEC). This advanced variable valve-timing system helps maximize fuel efficiency, while greatly minimizing smog-forming exhaust emissions.

CONTINUOUSLY VARIABLE TRANSMISSION

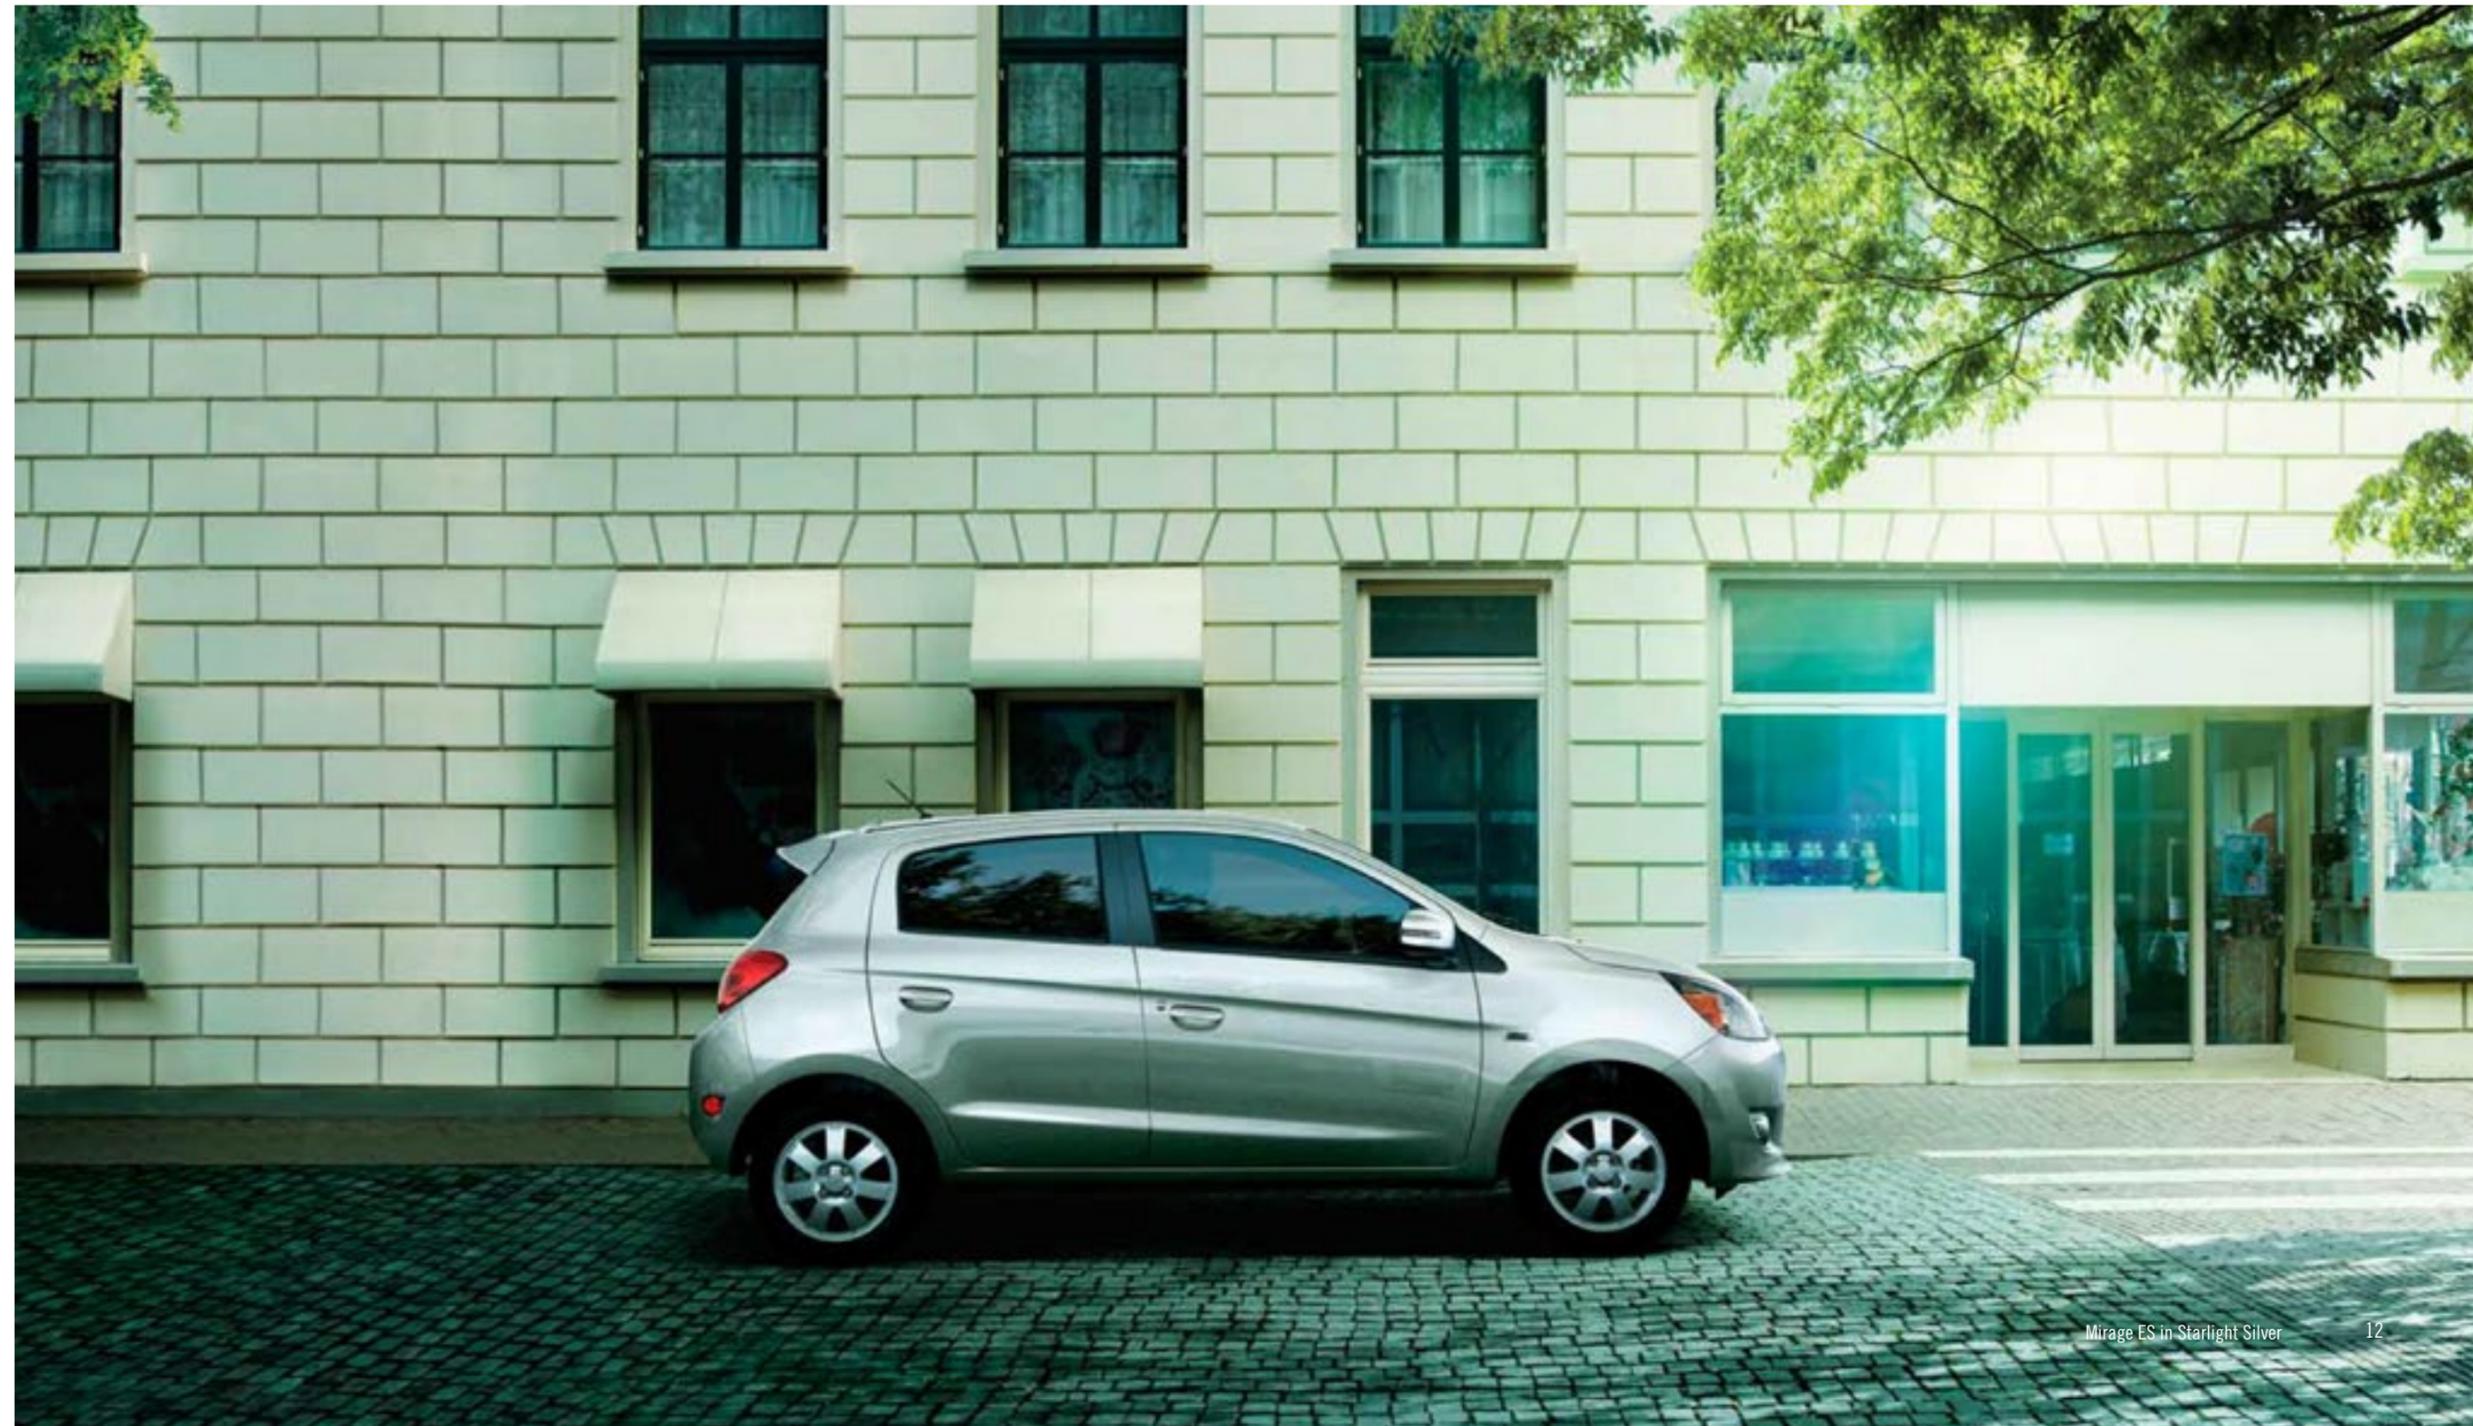

An advanced Continuously Variable Transmission (CVT) with Idle Neutral Logic helps the engine run as smoothly and efficiently as possible. Because it operates on a pulley system that allows infinite variability between the highest and lowest ratios, the CVT automatically optimizes effective torque on the fly. It's a huge reason why Mirage saves you money at the pump.

1.2-LITER ENGINE

Mirage is equipped with a 1.2-liter 3-cylinder DOHC engine that produces a balanced 74 horsepower and 74 lb.-ft. of torque. Coupled with either a smooth shifting 5-speed manual transmission or an available Continuously Variable Transmission (CVT), this small power plant plays big.

ELECTRIC POWER STEERING

Mirage's Electric Power Steering system not only offers a superior turning radius, but can also improve your gas mileage. Without the burden of a belt-driven hydraulic pump, the engine doesn't have to work as hard and runs more efficiently. Whether you're parking or traveling at freeway speed, the system ensures a predictable and comfortable driving experience.

 **TECHNOLOGY**

INNER FULFILLMENT

You'll not only be comforted by the interior features in Mirage, you'll be amazed. In fact, it's one of the most well equipped vehicles in its class. Along with its many high-tech features, you'll also find a wealth of the thoughtful touches, including ergonomically designed driver controls and rich, high-gloss piano black trim on the center console.

TOUCHSCREEN ENTERTAINMENT WITH NAVIGATION

Sometimes a big life needs a little direction. That's why the Mirage ES offers an available touchscreen Mitsubishi Multi Entertainment System (MMES) with navigation. This system features a 7-inch touchscreen that allows control of the navigation feature and the many entertainment options, and several vehicle functions, such as the handy rearview camera.

AUTOMATIC CLIMATE CONTROL

Fussing around with AC controls is so last year. To help keep Mirage's cabin comfy, this standard feature automatically monitors the temperature, fan speed and air source.

140-WATT AUDIO SYSTEM

Your life deserves an epic soundtrack. The Mirage delivers a 140-watt audio system with 4 speakers. The dynamic system features AM/FM/CD/MP3 capability and USB/iPod® input³.

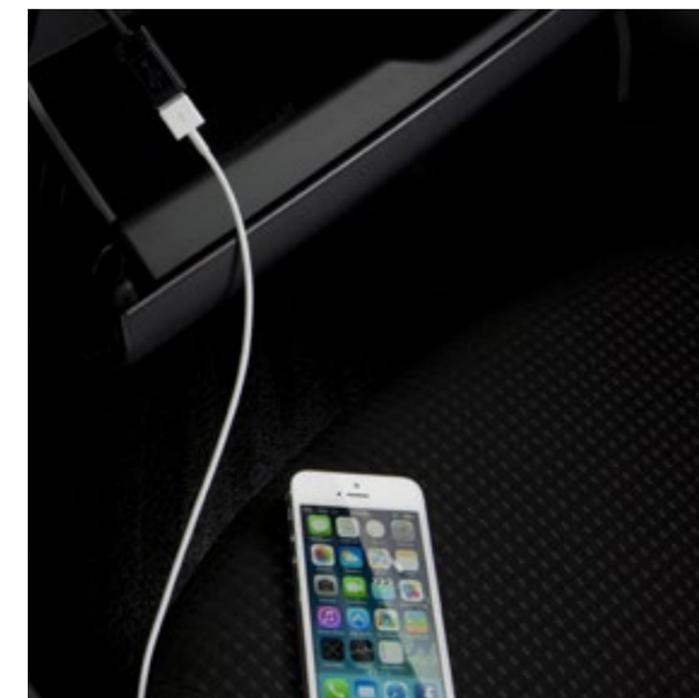

FAST-KEY SYSTEM

Mirage's available Freehand Advanced Security Transmitter (FAST-Key) makes it feel like you have super powers. Or at least a super advanced set of keys. With FAST-Key you can unlock the front door with the keys tucked safely in your pocket or purse, and also start the engine with the push of a button.

BLUETOOTH® TECHNOLOGY

To help you concentrate on the road ahead, Mirage is equipped with available Bluetooth technology⁴. This advanced feature lets you make phone calls hands-free, and play music from your Bluetooth-enabled phone, iPod®, or other MP3 player and USB devices.

SAFETY

COMPACT CONFIDENCE

Your wellbeing is always top of mind with our engineers. That's why the small Mirage is so big on safety. It's loaded with active safety features to help you stay out of harm's way, and passive safety features to help protect you should trouble prove unavoidable. We believe the unexpected should never catch you unprepared.

REINFORCED IMPACT SAFETY EVOLUTION BODY

Utilizing high-tensile steel, Reinforced Impact Safety Evolution Body (RISE) engineering provides occupant protection in the event of a collision. RISE combines energy-absorbing front and rear structures with a super-rigid occupant cell, along with reinforcing bars in the doors and energy-absorbing materials in the side pillars.

SEVEN STANDARD AIRBAGS

Mirage features a standard Supplemental Restraint System (SRS) that provides seven airbags, including dual-stage front airbags, front side airbags, side curtain airbags and a driver's knee airbag⁵.

ANTI-LOCK BRAKE SYSTEM

The standard 4-wheel Anti-lock Brake System (ABS) with Electronic Brake-force Distribution (EBD) and Brake Assist is a key active safety feature on Mirage. ABS helps prevent brakes from locking up by pulsing brake pressure to help you stay in control in emergency braking situations.

ACTIVE STABILITY CONTROL AND TRACTION CONTROL

One of the most reassuring advancements ever developed, Active Stability Control (ASC) with Traction Control Logic (TCL) helps drivers maintain control in adverse driving conditions and during emergency maneuvers. Sensors monitor traction and activate the anti-lock braking system when it detects skidding and/or a loss of traction. Applying the brakes on specific wheels, the system helps the vehicle track in the driver's intended direction.

AVAILABLE REARVIEW CAMERA

Don't let anything sneak up on you. Mirage offers an available rearview camera that displays an image of the area directly behind the vehicle on the navigation screen to help prevent you from backing into any surprises.

TIRE PRESSURE MONITOR SYSTEM

Proper tire pressure is always important for safe driving and fuel efficiency. The Tire Pressure Monitoring System (TPMS) evaluates the pressure of the tires and issues a warning if the pressure becomes low.

HILL START ASSIST

When you're accelerating from a standstill on a steep incline, Hill Start Assist (HSA)⁶ helps prevent the vehicle from rolling backward. When activated, the feature holds the brakes for approximately two seconds as you switch from the brake pedal to the accelerator.

10-YEAR/100,000-MILE POWERTRAIN LIMITED WARRANTY

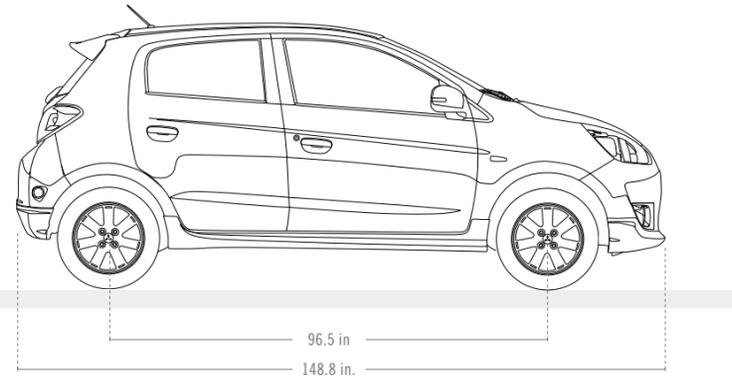

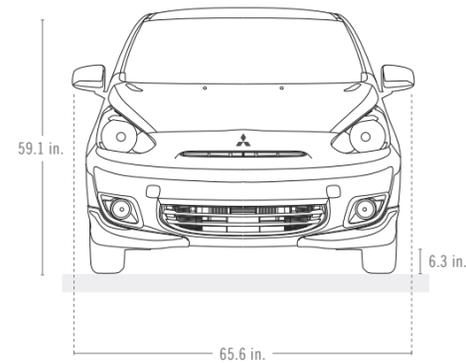

Mirage's 10-year/100,000-mile powertrain limited warranty and roadside assistance is one of the most comprehensive plans in the industry. How can we offer it? Easy: We've been building some of the world's best-engineered automobiles for nearly a century. It's one more way the compact Mirage inspires big confidence.
