## COMFORT AND ELEGANCE ARE ADDED TO THE BRAUNY, BUILT-TO-LAST CHECKER

The 40th Anniversary Checker is an ultra-simple, quality-inspired car with an amazing record of safety, durability and stamina. The "compact limousine" is finding increased acceptance among professional and business people as well as for all-around family use. The reason? Checker's lower operating costs—Checker's V.I.P. styling and living room-size interiors. These days you see more and more Checkers being driven by salesmen and by executives . . . by doctors and by engineers . . . by people who understand and appreciate Checker's costlier construction details and six-cylinder savings . . . Checker's wider doors and flat rear floors. Over 200 riding, styling and mechanical improvements were made in the 1962 Checker—none, however, that would obsolete last year's car.

The 40th Anniversary models maintain their dignity . . . and their worth by concentrating improvements on the inside, where they mean more. New styling appointments, increased performance . . . a softer, safer, more luxurious ride is only part of the story; Checker's low, low price tag provides more good news. Make sense to you, too?

# **CHECKER AEROBUS**

**The Fleet-Proven  
Station Wagon  
"LIMO"  
That's Built-To-Last!**

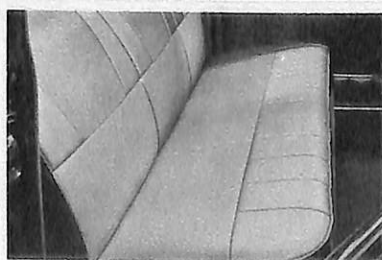

Checker's new Aerobus combines the luxury and comfort of a limousine with the economy and durability of a taxi. Built with pride by the makers of the famed Checker cab, the Aerobus is available in 9 and 12 passenger models, 6 door or 8 door. Reflecting Checker's 40 year tradition of quality, maintenance and repair costs are remarkably low...the

life of the Aerobus is incredibly long. This purpose-built Station Wagon "Limo" will give years of trouble-free, payload performance.

Ideal low cost 9 and 12 passenger transportation for airlines, railroads, employee "pick up," supplementary bus lines, schools, hotels, resorts and hundreds of other commercial applications.

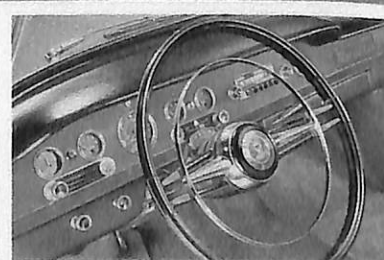

Remarkably durable, highest quality vinyl is used unsparingly throughout the handsomely designed "VIP" interior of the Aerobus.

Seats of deep, comfortable, foam are covered with highly durable, color coordinated, scuff-resistant vinyl.

The Aerobus luggage compartment can be partitioned off from the passenger area for additional passenger comfort and load carrying convenience. Horizontal and vertical strips of stainless steel prevent damage to windows and to the luggage (optional).

Standard equipment includes power steering, power brakes, safety padded dashboard. (Dual range automatic transmission available on 9 passenger model.)
