

SIMPLY CLEVER

ŠKODA

The New ŠKODA Octavia

Effective: October 2013

Welcome to the new Octavia

After eight years of success, the second generation Octavia is making way for the third generation, a car that pushes the boundaries of technology, safety, space and efficiency like no ŠKODA before it.

Available in both hatch and estate, new Octavia is more spacious and luxurious than its predecessor and is full of clever technology to provide the most comfortable and dynamic driving experience yet. All this is packaged elegantly into the timeless angles and lines showcasing ŠKODA's new design language.

Now raising the bar for sporty hatches the world over is the new Octavia vRS. All new TSI and TDI engines offer phenomenal torque whilst the vRS's best ever fuel economy figures means that power doesn't compromise efficiency. With class leading space, fresh technology and aggressive styling, it's undoubtedly Octavia and unmistakably vRS.

Read on to learn how Octavia can fit perfectly into your life.

Rewriting the rules,
changing the game.

Model shown is not UK spec.

“We look for the combination of light and shadow, that attracts not only the brain, but especially the heart.”

Jozef Kaban, ŠKODA Chief Designer

Model shown is not UK spec.

Design

With strong lines and sharp angles, the new Octavia's design promises to remain timeless and elegant in years to come. Whilst the broad fascia brings a strong road presence, the streamlined side profile hides the cavernous space within.

Proudly wearing ŠKODA's new black and chrome logo, the interplay of light and darkness continues throughout the exterior of the car. The strong, dynamic shoulder line is complimented by the unique flourish at the base of the window line, creating the shape of an aeroplane tail fin on the hatch, which hints towards the advanced technology found inside.

The vRS has been designed with performance in mind and differentiates itself from rest of the Octavia range with a rear spoiler, front and rear diffusers and twin stainless steel exhaust pipes along with Bi-Xenon lights with LED daytime running lights. All of which hint at the performance capability of the new vRS.

Precise and dynamic

Octavia

EXTERIOR

- BI-XENON LAMPS
- CORNERING FOG LIGHTS
- ADAPTIVE FRONT LIGHT SYSTEM
- PRECISE AND ELEGANT

Clear halogen lights and broad fog lights can be upgraded to **Bi-Xenon lights** with **AFS** (adaptive front light system), black cornering fog lights and LED daytime running lights. The Octavia vRS features Bi-Xenon lights with AFS and LED daytime running lights as standard.

Bi-Xenon lights. The optimal illumination of the Bi-Xenon lights is enhanced by the AFS which changes the light setting depending of the car's speed and weather conditions. Bi-Xenon headlights provide 2.5 times the illumination of halogen headlights.

Telescopic front headlight washers. Standard on Elegance and vRS, optimise your front lights' range by keeping the front panels clean of dirt and debris.

LED Lights. The two rear bands of light creating the distinctly ŠKODA "C" shape can be enhanced with LED's. Standard on vRS and optional on SE and Elegance.

Ice scraper. All Octavias come with an ice scraper in the lockable fuel filler cap.

Dynamic lines. Octavia hatch's unique rear window line reflects the line of an aircraft's tail fin, just a nod to the advanced technology that lies within. The window surround on all trim levels is black, chrome surround is currently unavailable.

Uncompromising comfort

Steering wheels. Height and reach adjustable, high quality leather steering wheels are standard across the Octavia range, with controls for the radio and telephone standard on Elegance and vRS. For an added sporty feeling and drive on models equipped with DSG, a 3 spoke steering wheel with paddles can be ordered, allowing you to control both entertainment and gear shift.

Air conditioning. Depending on trim, your Octavia will either be equipped with air conditioning or dual-zone air conditioning with humidity control. Dual-zone allows the driver and front seat passenger to set different temperatures for optimal comfort whilst the humidity sensor directs the airflow as required to keep the windscreen fog free.

INTERIOR

- HIGH QUALITY SEATING
- LEATHER STEERING WHEELS
- AIR CONDITIONING
- INNOVATIVE STORAGE

The average Briton spends **3 years** of their life in their car[†]. Don't compromise on comfort. Octavia's high quality interior and ergonomic design will let you focus on the drive and enjoy the journey.

For maximum comfort on long journeys, both **front and rear armrests** are available*. The adjustable front armrest is combined with a **handy storage box**, whilst the rear armrest features **adjustable cup holders** and also **load-through access into the boot**.

Adjustable driver's seat. To allow you to get as safe and comfortable as possible, your Octavia will have a height adjustable driver's seat. The different trim levels then have additional features (some standard, some optional) such as height adjustable passenger seat, lumbar support, electric adjustments and materials ranging from durable cloth through to sumptuous leather.

Front: standard on Elegance and vRS, optional on SE. Rear: standard on Elegance, vRS and estate SE, optional on hatch SE

[†] Source The Telegraph, 2011.

SPACE

- MORE LEG ROOM
- CLEVER STORAGE SOLUTIONS
- CLASS LEADING LUGGAGE SPACE
- LONGER WHEELBASE

Within Octavia's sleek design is hidden class leading **luggage space**. The hatch boasts **590 litres*** of space, all easily accessible through the large hatch boot opening. This phenomenal space becomes cavernous with the rear seats folded down, expanding to **1,580 litres***. The estate offers **610 litres*** of space with seats up and **1,740 litres*** with seats down. To help secure your cargo in this vast boot, a number of **nets and fixings** are available.

Leg room. With a wheelbase 108mm longer than the previous generation, passenger space has been further maximised, ensuring your rear-seat passengers have more knee room than in any other car in the same segment – a perfect environment for business associates or growing families!

Simply Clever optional features. Those with an active family are sure to appreciate the waste bin that slots in the door panel, or the reversible boot floor available on hatch, offering a carpeted side and a waterproof non-slip side.

Innovative storage solutions. As ŠKODA drivers have come to expect, Octavia is full of Simply Clever storage areas and designs to offer you solutions that fit your life.

Class leading space

Octavia Hatch Elegance with ivory 'Alcantara' upholstery and optional wood decor and metallic paint.

* Volume is 20 litres less when a spare wheel is fitted.

INFOTAINMENT

- CAPACITIVE TOUCH SCREENS
- PROXIMITY SENSORS
- SOUND SYSTEMS
- USB CONNECTION
- BLUETOOTH®+
- TRIP COMPUTERS

The all-new infotainment systems on Octavia are a significant step forward in the field of multimedia systems. The car stereo, navigation system and trip computer are no longer standalone devices, but are wrapped up in one system giving the driver access to the vehicle setup, drive assistant systems and comfort functions through a single device. Proximity sensors recognise when a hand is moving toward the touchscreen and bring up the function buttons ready to be used, whilst intuitive swiping and pinching movements allow the user to scroll menus and zoom into maps easily.

Device connectivity.

All Octavias come with a USB and aux-in socket so you can play music from your mp3 player through the car's speakers. With many players, the USB will allow you to control the device through the car's touchscreen system and also to charge. Should you wish to control an Apple device through the touchscreen, you can either use Bluetooth® to stream or swap the USB and aux-in for an optional Mitsumi Apple connectivity socket.

'Bolero'

'Amundsen'

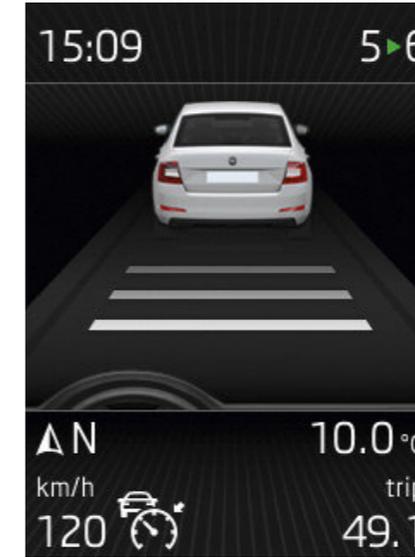

'Columbus'

Bluetooth® connectivity to make hands-free calls and stream music is standard across Octavia. Unlike the previous generations this Bluetooth® system is capable of remembering up to 20 Bluetooth® devices that have been previously paired including 4 phones. The internal phone book can store 2,000 contacts for each phone, with up to 5 numbers for each contact – ensuring your social life really is at your fingertips. For those who want an upgraded reception or struggle with battery life, Bluetooth®+ is available. By placing your phone in the special Bluetooth®+ compartment in front of the gear stick, the signal is boosted through the car's aerial, benefiting reception and prolonging battery life.

Trip computers. A number of trip computer options are available in the Octavia range. The comprehensive trip computer on S trim which details fuel consumption, average speed and distance until the fuel tank is empty can be enhanced to Maxi DOT in the SE and vRS trim. Maxi DOT with its larger display provides additional information such as the oil temperature and details of the vehicle's status as well as the ability to display phone, audio, assistant system or navigation data. Elegance trim further enhances this with a colour Maxi DOT showing clearer, colour displays.

Innovative technology

Sound system. For those who love their music, the standard 8 speaker sound system on Octavia can be upgraded to a Canton sound system which adds a central speaker to the dash and a subwoofer in the boot. Canton also adds a digital equaliser and sound level controls allowing spacial optimisation for all or individual occupants, vehicle noise cancellation and when added in combination with a 'Columbus' satellite navigation, the ability to play Dolby 5.1 surround sound.

Smart protection

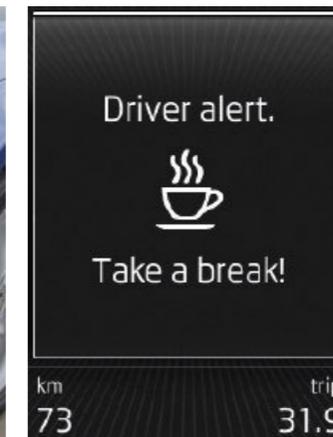

SAFETY

- CREW PROTECTION ASSISTANT
- FATIGUE SENSOR
- 7 AIRBAGS
- PREFILLED BRAKING SYSTEM
- ESC
- FRONT ASSISTANT

Octavia features **7 airbags** as standard, located at the front, front side, curtain and driver's knee area. Should you wish, you can also add rear side airbags with Crew Protection Assistant.

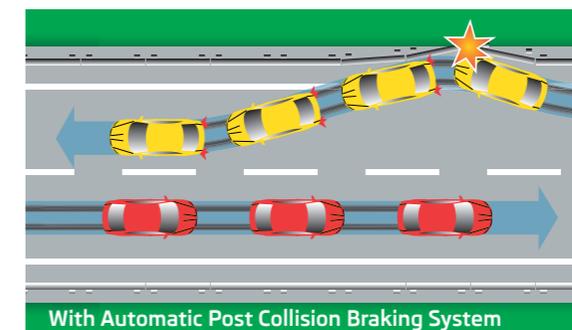

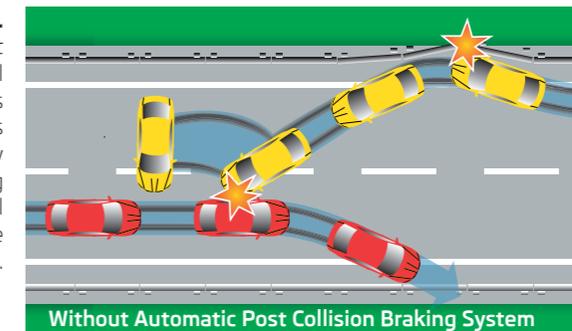

Crew Protection Assistant, uses information from the car's braking and electronic systems to recognise when there is a high chance of a collision. If this is detected, the front seatbelts will tighten and the sunroof and windows will close (leaving a 55mm gap) to help keep the car's occupants in the optimum position for airbag deployment and reduce items flying into the car. Sporty drivers who prefer to desensitise the Crew Protection Assistant can change these settings on their touchscreen display.

Fatigue Sensor. Standard from SE is a Driver Fatigue Sensor. This monitors the movement of the driver through the steering wheel and if the driver begins to display signs of tiredness, the car will audibly alert the driver with a tone and show a break recommendation alert on the Maxi DOT.

Automatic Post Collision Braking System. In the event of a crash, the Automatic Post Collision Braking System, standard on all Octavias, will be activated. This recognises when an impact has occurred and brakes the car to prevent it being uncontrollably propelled into oncoming traffic, reducing the risk of further crashes. The car will brake to 6mph and also activate the hazard and brake lights.

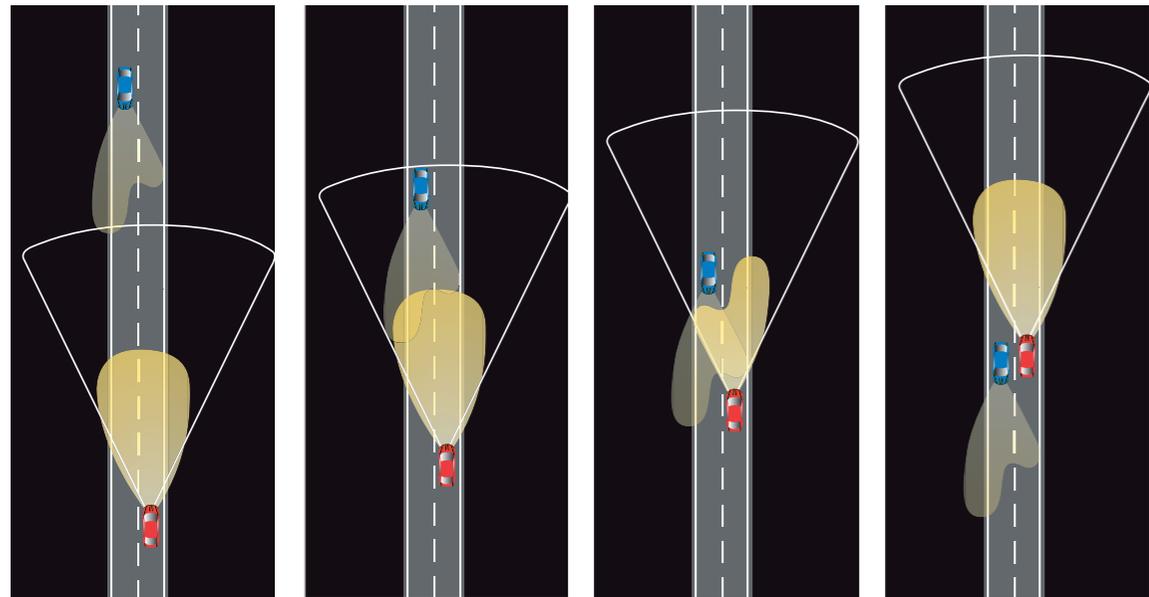

Prefill, a smart element of the ESC system is the prefill feature. Your Octavia will recognise when your foot has been abruptly lifted off the accelerator and anticipates that this may be followed by a sharp depression of the brake pedal. To prepare for this braking, the car automatically increases pressure in the brake system by "prefilling" the brake hydraulics with fluid. It also brings the brake pads closer to the discs. This speeds up the braking effect for optimal stopping.

ESC Electronic Stability Control is standard in new Octavia and delivers a number of systems to help maintain the car's stability in braking and emergency situations. For information on all the features within the ESC system, please see page 46.

DRIVING ASSISTANT SYSTEMS

- INTELLIGENT LIGHT ASSISTANT
- PARKING ASSISTANT
- KESSY
- LANE ASSISTANT

Intelligent Light Assistant*. Using a camera mounted behind the rear view mirror, the Intelligent Light Assistant* monitors light levels and determines what level of lighting is required. The car then turns on the headlights or if required, the high beams. Should another vehicle's lights be spotted by the camera (either in front or moving in the opposite direction) or the light levels improve sufficiently, the car will automatically turn down the high beams. To activate this function the headlight switch must be sent to "auto" and the left stalk on the steering column be moved forwards.

The oncoming vehicle is outside the area monitored by the Intelligent Light Assistant.

The oncoming vehicle is now in the area monitored by the Intelligent Light Assistant, but still far away enough that the high beams need not be dipped.

The oncoming vehicle is now so close that its driver could be dazzled, so the Intelligent Light Assistant automatically switches to low beam.

The oncoming vehicle has left the area monitored by the Intelligent Light Assistant for more than a second, so the car switches to high beam again.

Keyless Entry and Start System (KESSY) can be added to Octavia to allow the driver to lock and unlock the car and start and stop the engine without having to insert or even handle the key. As long as the key is within 1.5m of the sensor, the system will work and a number of clever features ensure you can check the lock, prevent you from locking the key inside and stop unwanted access.

* Standard on Elegance, optional on SE and vRS.

Please note that all assistant systems are a driver's aid and do not replace human judgement. The driver must be in full control of the vehicle at all times and has full responsibility for the car.

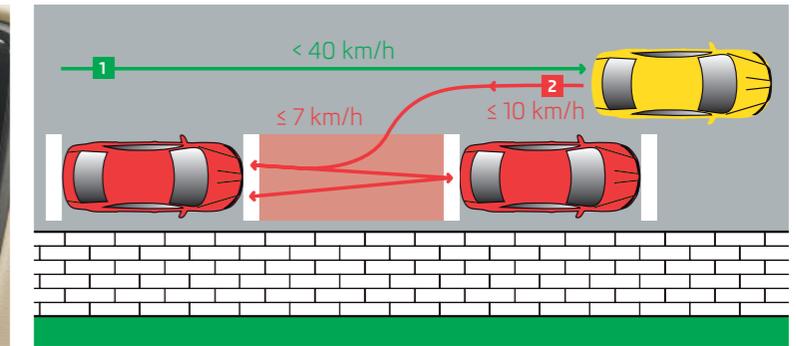

Intelligent assistance

Driving Mode Selection. Standard from SE, Driving Mode Selection allows the driver to adapt the car's behaviour to their preference or needs. Four driving modes are available, normal, sport, eco and individual (allowing the driver to configure their own settings). The car will then adapt the engine torque, accelerator sensitivity, power steering, headlight control (where AFS is fitted), DSG transmission, and air conditioning to suit the profile selected.

Lane assistant*. The Lane assistant uses the camera behind the rear view mirror to recognise lane markings and help keep the driver within the lane, preventing drifting and potential collisions. When adequate lane markings are identified the dashboard light will turn green and the car will be kept in the centre of the lane, even through corners, with small corrections of the steering wheel. Should the driver wish to move out of the lane, the system will recognise the indicator and movement and allow the corrections to be overridden. The system can be deactivated partially or fully using the touchscreen display.

Performance Mode Selection. The Driving Mode Selection has been further enhanced for vRS with the introduction of a Performance Sound Generator. When vRS mode is selected this will also change the car's sound generator levels. It spreads vibrations directly through the vehicle body and windscreen. The frequency and volume is dependent on the mode selected, rotation speed, car speed and accelerator position.

Automatic Parking Assistant. For those wishing to make both parallel parking and bay parking easier than ever, an Automatic Parking Assistant can be added to Octavia. With a press of a button, the system will begin searching for a parking space in a line of cars or other obstacles. When a suitable space is found (the car's length + 60cm is all the space needed), the car will steer itself into the space whilst the driver controls the pedals. This system will now also steer the car out of a line of cars from its parking space and with two presses of the same button, the car will search for and manoeuvre into a bay parking space.

* Standard on vRS.

A car that pushes the boundaries of technology, safety, space and efficiency.

Personalisation with ŠKODA Genuine Accessories

Rubber boot mat - This heavy duty rubber load liner fits perfectly into the boot of the Octavia providing a protective layer to the boot. This boot liner is waterproof, easy to clean and quick to install or remove. **£60**

Netting system - This practical 3-piece netting system for the boot of the car will help to stop items from moving around in the vast boot. Invaluable for keeping shopping in place or separating lighter and heavier items. Available in red or black. **£50**

Door sill covers (Alu silver) - Not only do these sill guards protect your Octavia from scuffs whilst getting in and out of the vehicle, they also add an extra touch of style. **£95**

Decals (hatch) - Your car's exterior colour is not the only way to express your individuality. These decals add a finishing flourish for a sporty vibe. **£145**

Front mud flaps - Mudflaps aren't just about cleanliness. They prevent stones, grit and road spray from ruining your precious bodywork. This custom design is moulded to fit snugly into the contours of the wheel arches, helping to ensure your paintwork stays tip-top. Works well in conjunction with the standard fit rear mudflaps. **£45**

Alloy rim 18" Turini - Alloy wheels are a simple way of making an individual style statement that speaks volumes about you. Also available in silver. **£185**

Chrome boot strip (hatch) - A touch of chrome always says "quality" and this trim is no exception, making the rear view of your vehicle even more attractive. **£95**

Connecting cable for Mitsumi MDI
Play music and charge your Apple device via this useful cable. **£50**

Roof Bars (hatch) - Roof bars to increase your carrying capacity or to add a bike carrier. **£175**

Decorative strip for front bumper - black gloss adds an element of style to your vehicle and this trim is no exception, making the front view of your vehicle even more attractive. **£80**

These products are ŠKODA Genuine Accessories. You can also find information on the complete assortment of accessories at your authorised ŠKODA retailer. Prices include VAT.

Price includes fitting.

ŠKODA Solutions. Your journey, your choice.

ŠKODA Finance like to do things a little differently, that's why for many years we've specialised in providing simple and convenient funding options for ŠKODA drivers. It's what we know.

ŠKODA Solutions is all about you; a flexible, competitive fixed-rate plan designed around you and your budget, putting you firmly in the Octavia driving seat.

Solutions is different because you defer a proportion of the car's value until the end of the agreement, giving you significantly lower monthly repayments than if you'd taken out a loan...ever heard of a bank being so imaginative?

Solutions is totally flexible. You get to choose the size of your deposit (from as little as one monthly payment), and a repayment period which suits you and at the end of the term you have 3 options to choose from.

- 1  Part-exchange the car for a new ŠKODA on a new Solutions contract.
- 2  Pay the optional final payment so that you own the car.*
- 3  Circumstances changed? Return the car to us (subject to terms and conditions).

Scan the QR code above for our latest Solutions finance offers or contact your local ŠKODA retailer for a personalised quotation today

DEPOSIT

As little as one repayment

BALANCE

A flexible repayment period (18-42 months)

OPTIONAL FINAL PAYMENT

3 choices at the end of the agreement

ŠKODA Finance also offers hire purchase, contract hire and service and maintenance plans.

Speak to your ŠKODA retailer for your personalised quotation today

Free Insurance for 3 years.

Another great benefit of being a ŠKODA driver. If your ŠKODA was damaged in an accident, wouldn't you want it fixed by a ŠKODA trained technician using only genuine ŠKODA parts?

Insurance is ŠKODA's accident and repair cover which does exactly that. It works alongside your main comprehensive motor insurance policy no matter who you are insured with, to make sure you get the quality repair and service you would want. If you're involved in an accident or your car is stolen, just make one call to us and we'll look after your claim from start to finish ensuring your ŠKODA is restored to the highest standard.

Get Insurance and benefit from:

- > A guarantee that your ŠKODA will be repaired in a ŠKODA Insurance approved repairer, by ŠKODA trained technicians, using only genuine ŠKODA parts and paints
- > A dedicated Claims Manager available 24-hours a day to manage your claim, liaising with your insurer and the repairer, so you don't have to
- > Help to recover any uninsured losses using our Legal Expenses Cover
- > Online claims tracking so you can keep up to date with the status of any claim

Insurance is free to all ŠKODA customers for three years and it only takes a minute to get cover.

You only need to make one call, Insurance deals with the rest...

Your car is **guaranteed** to be repaired by a ŠKODA Insurance approved repairer. Only **genuine ŠKODA parts will be used.**

For more information and to take out cover today visit skoda-ensurance.co.uk

ŠKODA Insurance motor insurance is sold, underwritten and administered by Allianz Insurance plc.

*Subject to payment of the option to purchase fee. An offer of finance depends on certain conditions. Subject to status, indemnities may be required. Available to over 18's in the UK only. ŠKODA Finance. ŠKODA Finance is a trading name of Volkswagen Financial Services (UK) Limited, Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR. Registered in England number 2835230.

Owning a ŠKODA

We make sure it's easy, fun, and stress-free.

ŠKODA customer service is officially award-winning. We have been voted Number 1 in four of the last five Auto Express Driver Power Surveys.

Network capability

You can enjoy our award-winning customer service through our network of around 165 Authorised Repairers.

As a ŠKODA customer, you will be looked after by your retailer from the moment you walk through the door and throughout the life of your ŠKODA. Your new Octavia will be serviced and maintained to the highest standards by specially trained ŠKODA technicians. And when you need a spare part, you'll be happy to know that most are held in stock, or can be ordered within 24 hours.

The ŠKODA Customer Promise is a commitment from our retailers to offer:

- > Care and consideration for you and your car
- > A flexible and convenient service
- > Expertise and attention to detail
- > A clear explanation of our work

Roadside Assistance

A three year, European-wide, unlimited mileage ŠKODA Assistance policy comes free of charge with every new ŠKODA provided by the RAC through a dedicated team.

Provided through the RAC, there's a team of specially trained Technicians carrying the right diagnostic equipment and parts to get you back on the road as quickly as possible in the unfortunate event of a breakdown. They'll even help you if you fill up with the wrong fuel, lose your car keys, or get a puncture.

Warranty

When you buy your new ŠKODA through our authorised retailer network, it is automatically covered by a three year, 60,000 mile manufacturer's warranty.

There's no mileage limit on the warranty in the first two years and for additional peace of mind there's a 12 year body protection warranty.

You can even extend your warranty to four or five years, see the option page for prices and page 47 for further details.

Warranty cover from new			
First 2 years	First 3 years	4-5 years	Up to 12 years
Unlimited mileage	3 years or 60,000 miles, whichever is sooner	Optional Extended Warranty	Body Protection Warranty

Further information

You can find lots of additional information about owning a ŠKODA on our website at www.skoda.co.uk. Our retailers are always happy to help with any questions, backed up our dedicated Customer Service Centre. We look forward to hearing from you soon.

 Open 8.30am - 5.30pm

Infotainment devices

The new Octavia delivers a significant step forward in the field of multimedia systems. While the car radio and navigation components continue to form the core of the multimedia system, it is now much more interconnected with the car itself. The car stereo, navigation system and trip computer are no longer standalone devices, but are wrapped up in an infotainment or multimedia information system (MIB). This system gives the driver access to the vehicle setup, drive assists and comfort functions via a single device.

Navigation and map data	2D or 2.5D (birds eye) navigation Map data stored on SD card with free updates for 3 years		2D, 2.5 D "bird's eye perspective", 3D City model for selected cities, spoken street names in manoeuvres, real intersection display when crossing, low fuel alerts – option of navigating to the nearest/a selected petrol station Map data stored in device's internal memory with free updates for 3 years
Internal memory			64 GB (12 GB freely accessible to users; the rest is reserved for navigation data and the Gracenotes database)
Other features			Media library (internal memory file management), voice control, image viewer, video player, Gracenotes database
Car menu	Car function and display settings		Car comfort function display and settings
Power output	4 x 20W		

Model shown is not UK spec.

Technical glossary

ABS: the anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

Elements of the ABS System :-

• **Dual Rate Vacuum Brake Boosters**: increases brake effort under emergency braking conditions.

• **EBC**: Electronic brake control. The engine brake torque control regulates the power supply by intervening with the engine management system.

• **EBD** (aka EBV): Electronic Brake Distribution automatically distributes different pressures to the front and rear brakes to stop the rear wheels from locking up under heavy braking. It also compensates for loaded and unloaded vehicles therefore doing away with the need for a Load Sensing Valve on the rear axle.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

Fuel cut-out: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

Trip Computer: the trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multifunction touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.

DPF: diesel particulate filter is part of the exhaust system responsible for cleaning the engine exhaust gases before they enter the atmosphere. The DPF catches soot particles emitted in the exhaust gas and it works in conjunction with the catalytic converter, which reduces the amount of harmful gases entering the atmosphere. The DPF must periodically be emptied of the soot particles, a process known as regeneration. This involves elevated exhaust system temperatures. A driving style is required during regeneration, where a constant vehicle speed above 37 mph must be maintained. This does not always suit customers who make frequent short journeys or experience stop/start driving or drive within inner-city or urban areas.

Bi-Xenon lights: Bi-Xenon lights produce about 2.5 times the light of standard Halogen lights with 35% less energy consumption.

CR: All Octavia's diesel engines are built on a system of Common-Rail fuel injection. The diesel engines have a high-pressure common rail direct injection fuel system and four-valve technology. As a result, the new engines are much quieter, more refined in their operation and consume less fuel, compared to the Pump Duse engines available previously and significantly reduce emissions.

AFS: Adaptive front light system is a feature of Bi-Xenons and allows the light beam to adapt to the car's speed, direction and the weather conditions. Urban driving emits a shorter, wider beam whilst faster driving emits a longer beam. Cornering function sees the beam turn up to 15 degrees in direction of the steering wheel's turn. The beam will also adjust according to car load, acceleration and wet weather to prevent dazzling oncoming vehicles.

ESC: Electronic Stability Control is designed to stabilise the dynamic handling response of the vehicle by counteracting any tendency towards oversteer or understeer. The ESC constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESC reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine's output.

Elements of ESC system:-

• **ASR**: anti-slip regulation traction control ensures the Octavia's stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

• **MSR**: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

• **EDS**: the electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

• **HBA**: Hydraulic brake assistant increases the optimal build-up of brake power. It ensures complete use of the brake system potential, thus shortening the braking distance.

• **DSR**: Driver Steering Recommendation – in a crisis situation it helps the driver stabilize a skid by making a slight intervention in the steering.

• **ESBS**: Electronic Stability Brake System – targeted interventions in the braking process improve the handling of a car as it brakes when passing round a bend and keeps it from veering.

• **XDS**: XDS provides neutral balance in dynamic driving when accelerating through corners. By applying a slight braking pressure on the inner wheel, torque is increased on the outer wheel. This prevents wheel spinning and reduces any tendency to under steer, allowing the driver to experience a more agile, precise and calming driving experience with better traction out of bends.

Warranty

Exclusions and limitations

Wear and tear components will only be considered under the terms of the warranty for the first of six months or 6,500 miles, whichever is soonest. These include, but are not limited to brake linings and disc pads, clutch release bearings, clutch pressure plates and centre plates, tyres, wiper blades, seat and backrest covers, floor coverings, spark plugs, batteries for key fobs and alarms, light bulbs and shock absorbers.

Mechanical adjustments including but not limited to adjustments to doors, flaps, boot lids, bonnets and sunroof, brake adjustment, clutch adjustment, v belt adjustment, ignition adjustment, headlight adjustment, steering geometry adjustments and wheel balancing are excluded.

Damage (including but not limited to the following) is excluded:

➤ Damage caused by your failure to take all reasonable steps to prevent mechanical damage from occurring.
➤ Damage or defects caused by not having the vehicle serviced in accordance with the manufacturer’s guidelines.
➤ Damage or defects caused by improper use of the vehicle, neglect or use of the vehicle for motor sports activities.
➤ Damage caused by an accident.
➤ Damage to paintwork or chrome caused by external influences, such as climatic, chemical or industrial pollution.
➤ Damage resulting from the use of non-original replacement parts.

Routine maintenance and servicing is not covered by the warranty. Incidental or consequential costs such as hotel charges, car hire, loss of personal effects or income are not recoverable under the terms of the warranty.

Service Intervals

When you order your Octavia, you can choose whether your car is on a fixed or a flexible service regime. Your retailer will help you decide which regime suits how your car will be driven, enabling your car to stay in the best possible shape.

Fixed regime: Service every 10,000 miles or one year (whichever comes first). This is recommended if the vehicle is likely to be used in the following way:

➤ Driven fewer than 10,000 miles per annum **and/or**
➤ Mainly short journeys, drive mostly in towns or cities **and/or**
➤ High vehicle loading/towing and frequent hill climbs **and/or**
➤ Heavy accelerating and braking, using high revs

Flexible regime: Sensors in the engine detect when a service is needed. You will be informed of this by a service light which will show at any point between 9,000 and 20,000 miles, up to 24 months (whichever comes first).

The flexible service regime is recommended for vehicles with a daily mileage of more than 25 miles where the vehicle is driven regularly and mainly at a constant speed with minimum vehicle and engine loading, minimal towing and driven in an economical manner.

Motability

People in receipt of the Higher Mobility Component of the Disability Living Allowance receive special help from ŠKODA. Preferential prices on low cost Contract Hire are available through your local approved Motability retailer. For full details, contact your retailer.

Calculating your tax liability

To find out how much tax you will pay, simply take the P11D value, then multiply this figure by the BIK percentage. Then simply multiply this figure by 20% or 40% depending on the level of income tax that you pay.

Please note if your employer provides you with free fuel, this is treated as an additional taxable benefit.

For more information on company car taxation please visit the HM revenue and customs website www.hmrc.gov.uk

BIK calculation example - Octavia Hatch S 1.6 TDI CR 105PS DPF	
P11D value	£17,985
Company Car BIK tax based on CO ₂ emission level	14%
Taxable BIK (for 2013/2014 tax year): 14% of £17,985	£2,517.90
Annual company car tax (2013/14)	
20% Income Tax: 20% of £2,517.90	£503.58
40% income Tax: 40% of £2,517.90	£1,007.16
Monthly company car tax (2013/14)	
20% Income Tax: £503.58 divide by 12 months	£41.97
40% income Tax: £1,007.16 divide by 12 months	£83.93

Band	CO₂ (g/km)	First 12 Months'¹	Standard VED ²	OTR (Recommended On The Road) * Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £55), and apply to the United Kingdom only.
A	Up to 100	£0	£0	
B	101 - 110	£0	£20	
C	111 - 120	£0	£30	
D	121 - 130	£0	£105	
E	131 - 140	£125	£125	
F	141 - 150	£140	£140	
G	151 - 165	£175	£175	
H	166 - 175	£285	£200	
I	176 - 185	£335	£220	
J	186 - 200	£475	£260	
K	201 - 225	£620	£280	
L	226 - 255	£840	£475	
M	Over 255	£1,065	£490	

VED (Vehicle Excise Duty)

** All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO₂ figures may differ on these vehicles if taken from current ŠKODA UK stock. The VED bands are shown in the table opposite.

¹First year vehicle licence rates for petrol and diesel cars purchased on or after 1st April 2013. First year rate or 'showroom tax' applies to new car purchases only.

² Rate reverts to the Government's applicable Standard VED rate in subsequent years.

Edition: UK 1st April 2013. VAT is calculated at 20%. Please confirm figures with your ŠKODA retailer.

Company car tax is based on your cars carbon dioxide emissions. The higher the car's emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes.

To help you work out your tax liability please refer to page 46

P11D (Expenses and Benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BIK (Benefit in Kind)
The BIK percentage value is based on the CO₂ emissions of the vehicle for the tax year 2013/2014.
