We Took A Great Idea And Flew With It.

Most car companies design cars to appeal to the greatest number of people. At Eagle, we took a different approach. Our goal was to design a family of cars not for everyone. So, we designed the new Summit Coupe and Sedan not only to get you from here to there, but to appeal to those individuals who genuinely enjoy the drive as well.

The results are impressive: two new fun-to-drive companions to our already-successful Summit Wagon.

We invite you to see for yourself.

Eagle Summit. Not Intended For The General Public.

Eagle Summit ES Coupe

Its New Looks Aren't The Only Thing That'll Stop You In Your Tracks.

As you can easily see, the all-new Eagle Summit has been beautifully redesigned. But its beauty is far more than skin deep.

In addition to standard front-wheel drive, Eagle Summit ES Sedan is available with an anti-lock brake system (ABS). This option is designed to help prevent brake lockup on slippery surfaces, allowing the driver to maintain steering control during sudden braking.

Summit's inner beauty includes a standard 1.5 litre 12-valve powerplant for spirited yet economical performance. On Sedan models, there's an even more powerful 1.8 litre 16-valve engine (standard on ES; optional on DL).

To harness this power, Summit is available with a choice of transmissions. Standard is a responsive 5-speed manual transmission. Or choose the convenience of an optional 3-speed automatic on ES coupe, or a 4-speed automatic transmission on Sedan models

The 1.8 litre fuel-injected engine delivers 113 hp @ 6000 rpm and 116 lb-ft of torque @ 4500 rpm.

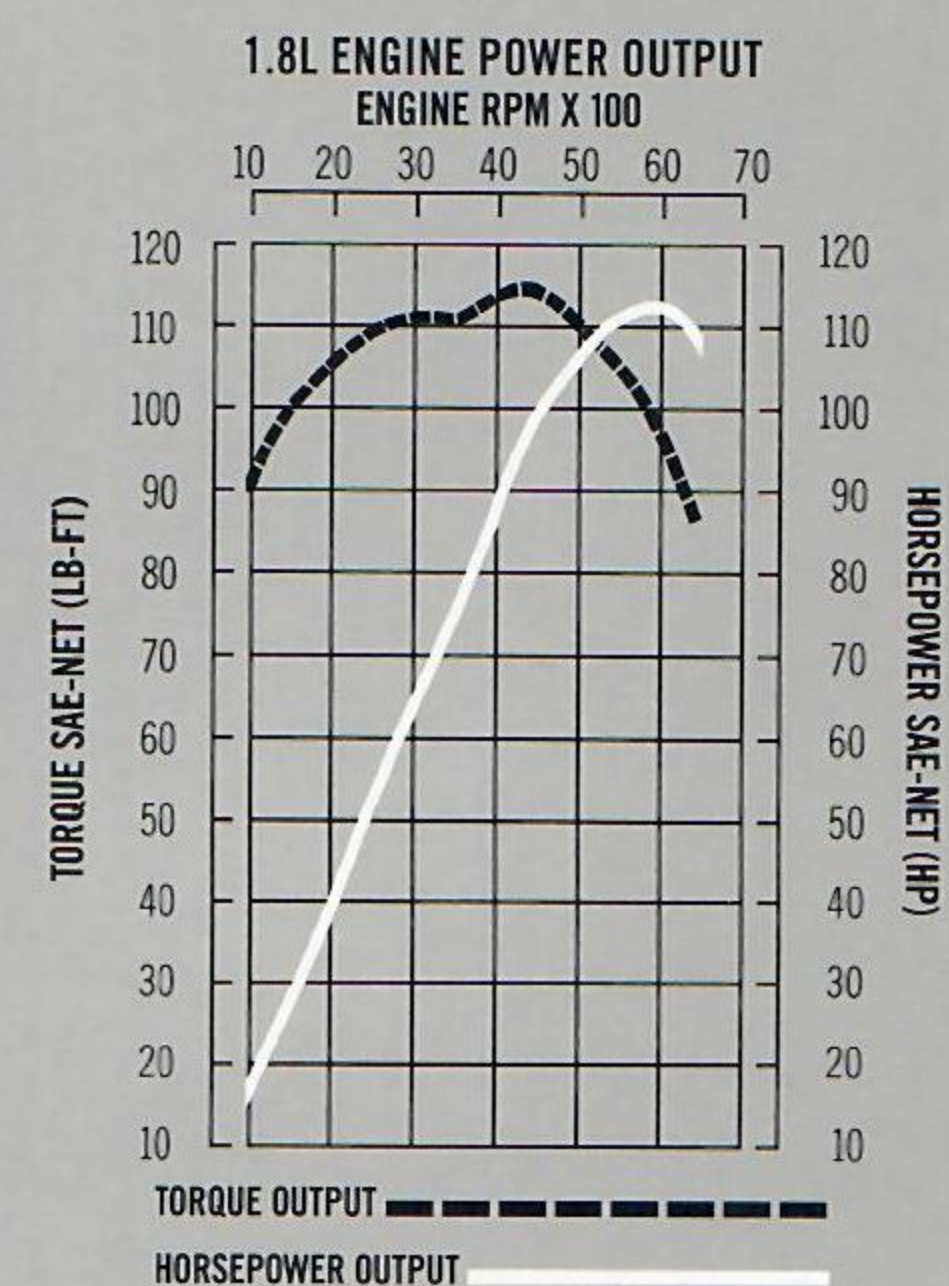

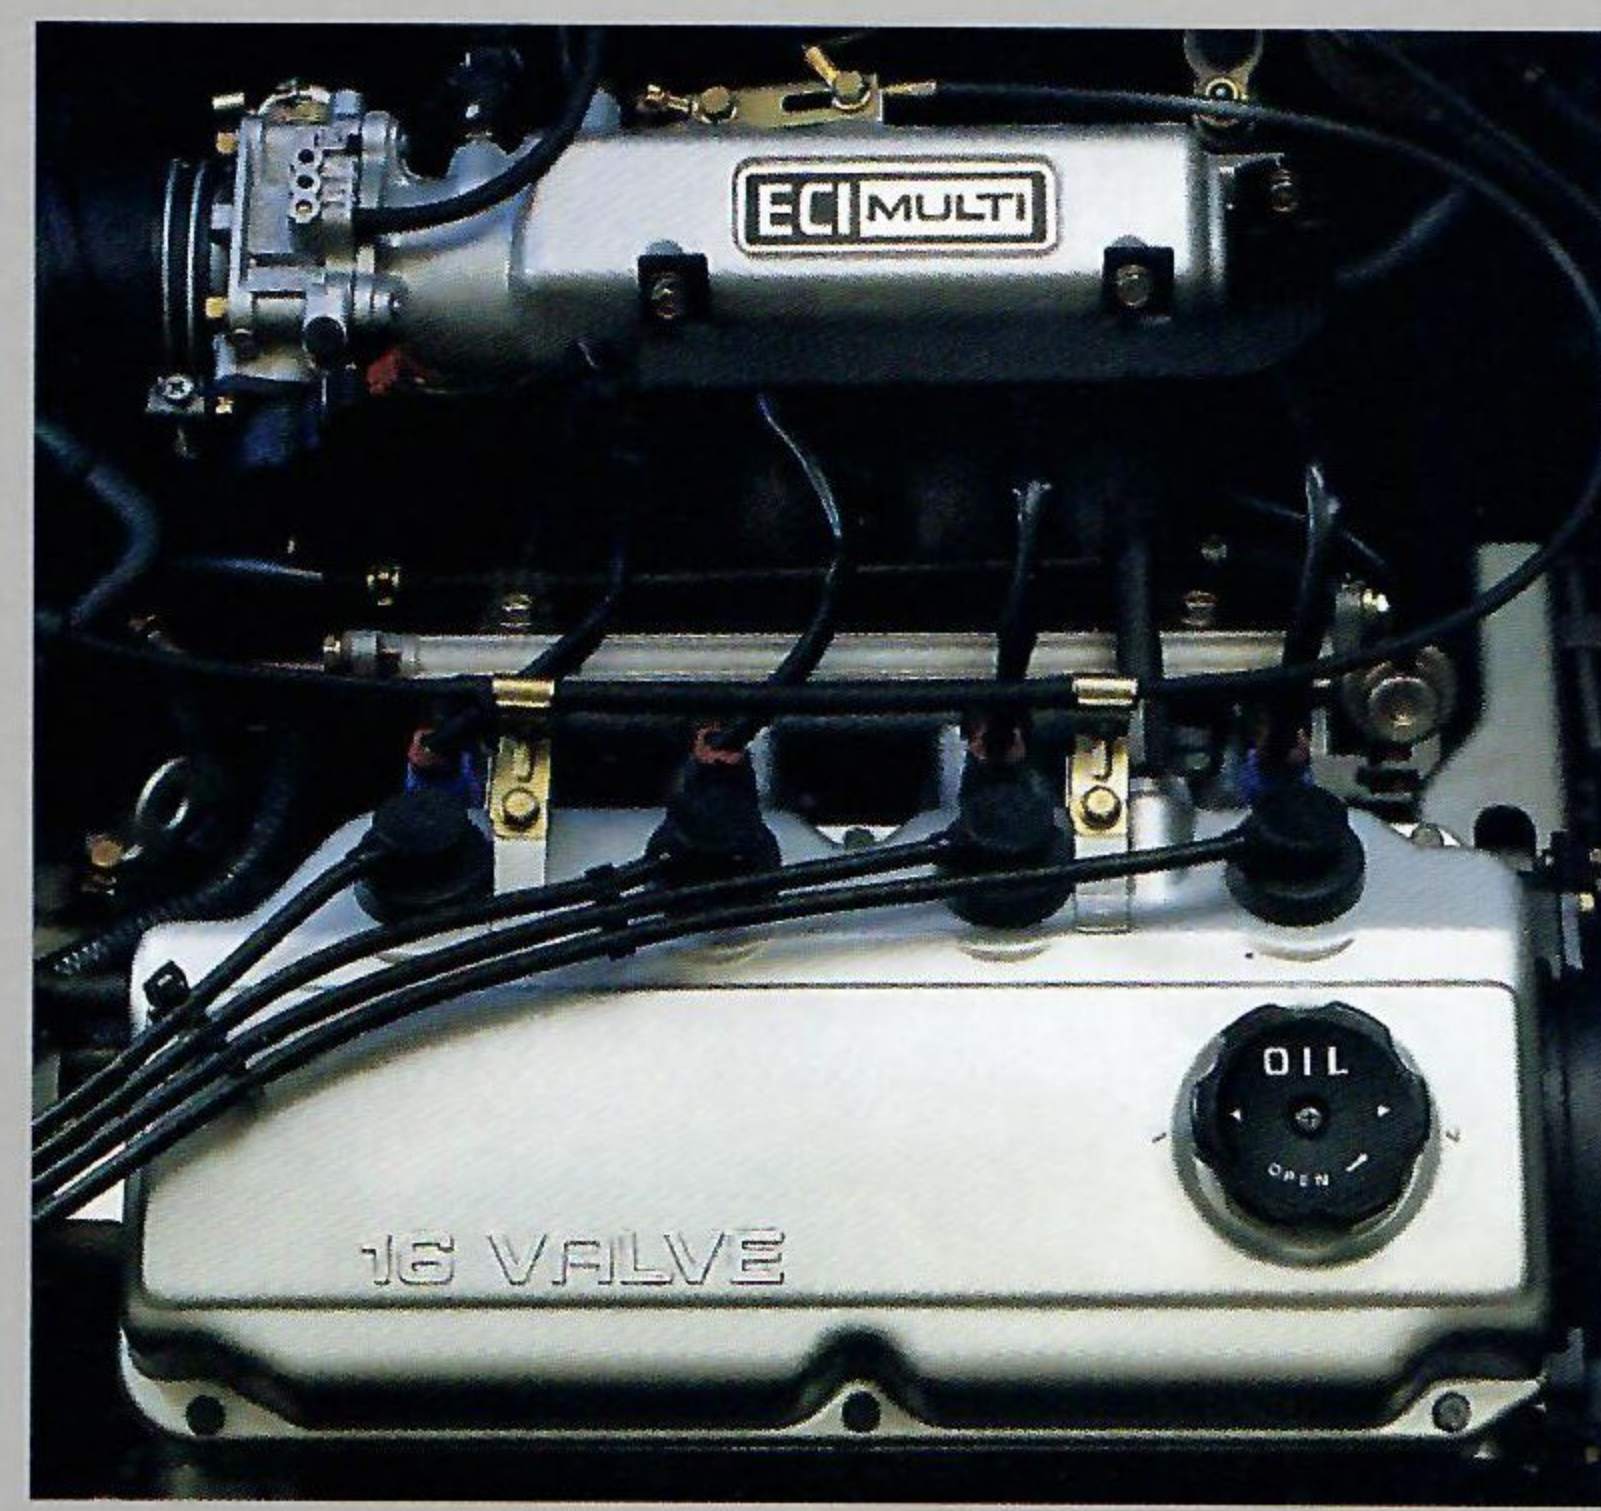

Eagle Summit ES Sedan features optional anti-lock brakes.

An optional ABS system "pumps" brakes automatically, helping to prevent wheel lockup, allowing the driver to maintain more steering control during sudden and unexpected braking (ES Sedan only).

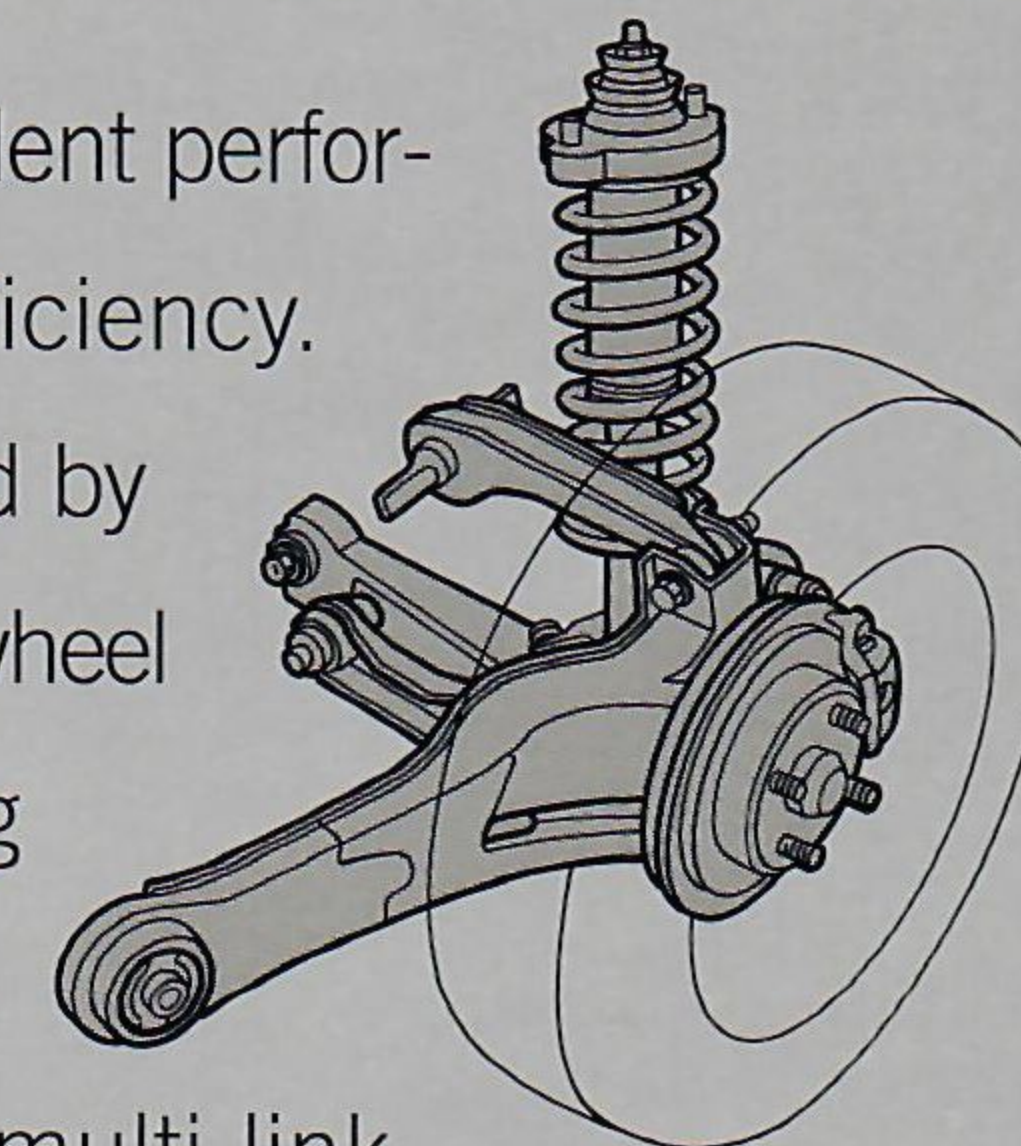

Summit is available with a variety of wheels and tires. Shown here is the optional aluminum wheel included in the Sport Appearance Package (available on ES Sedan only).

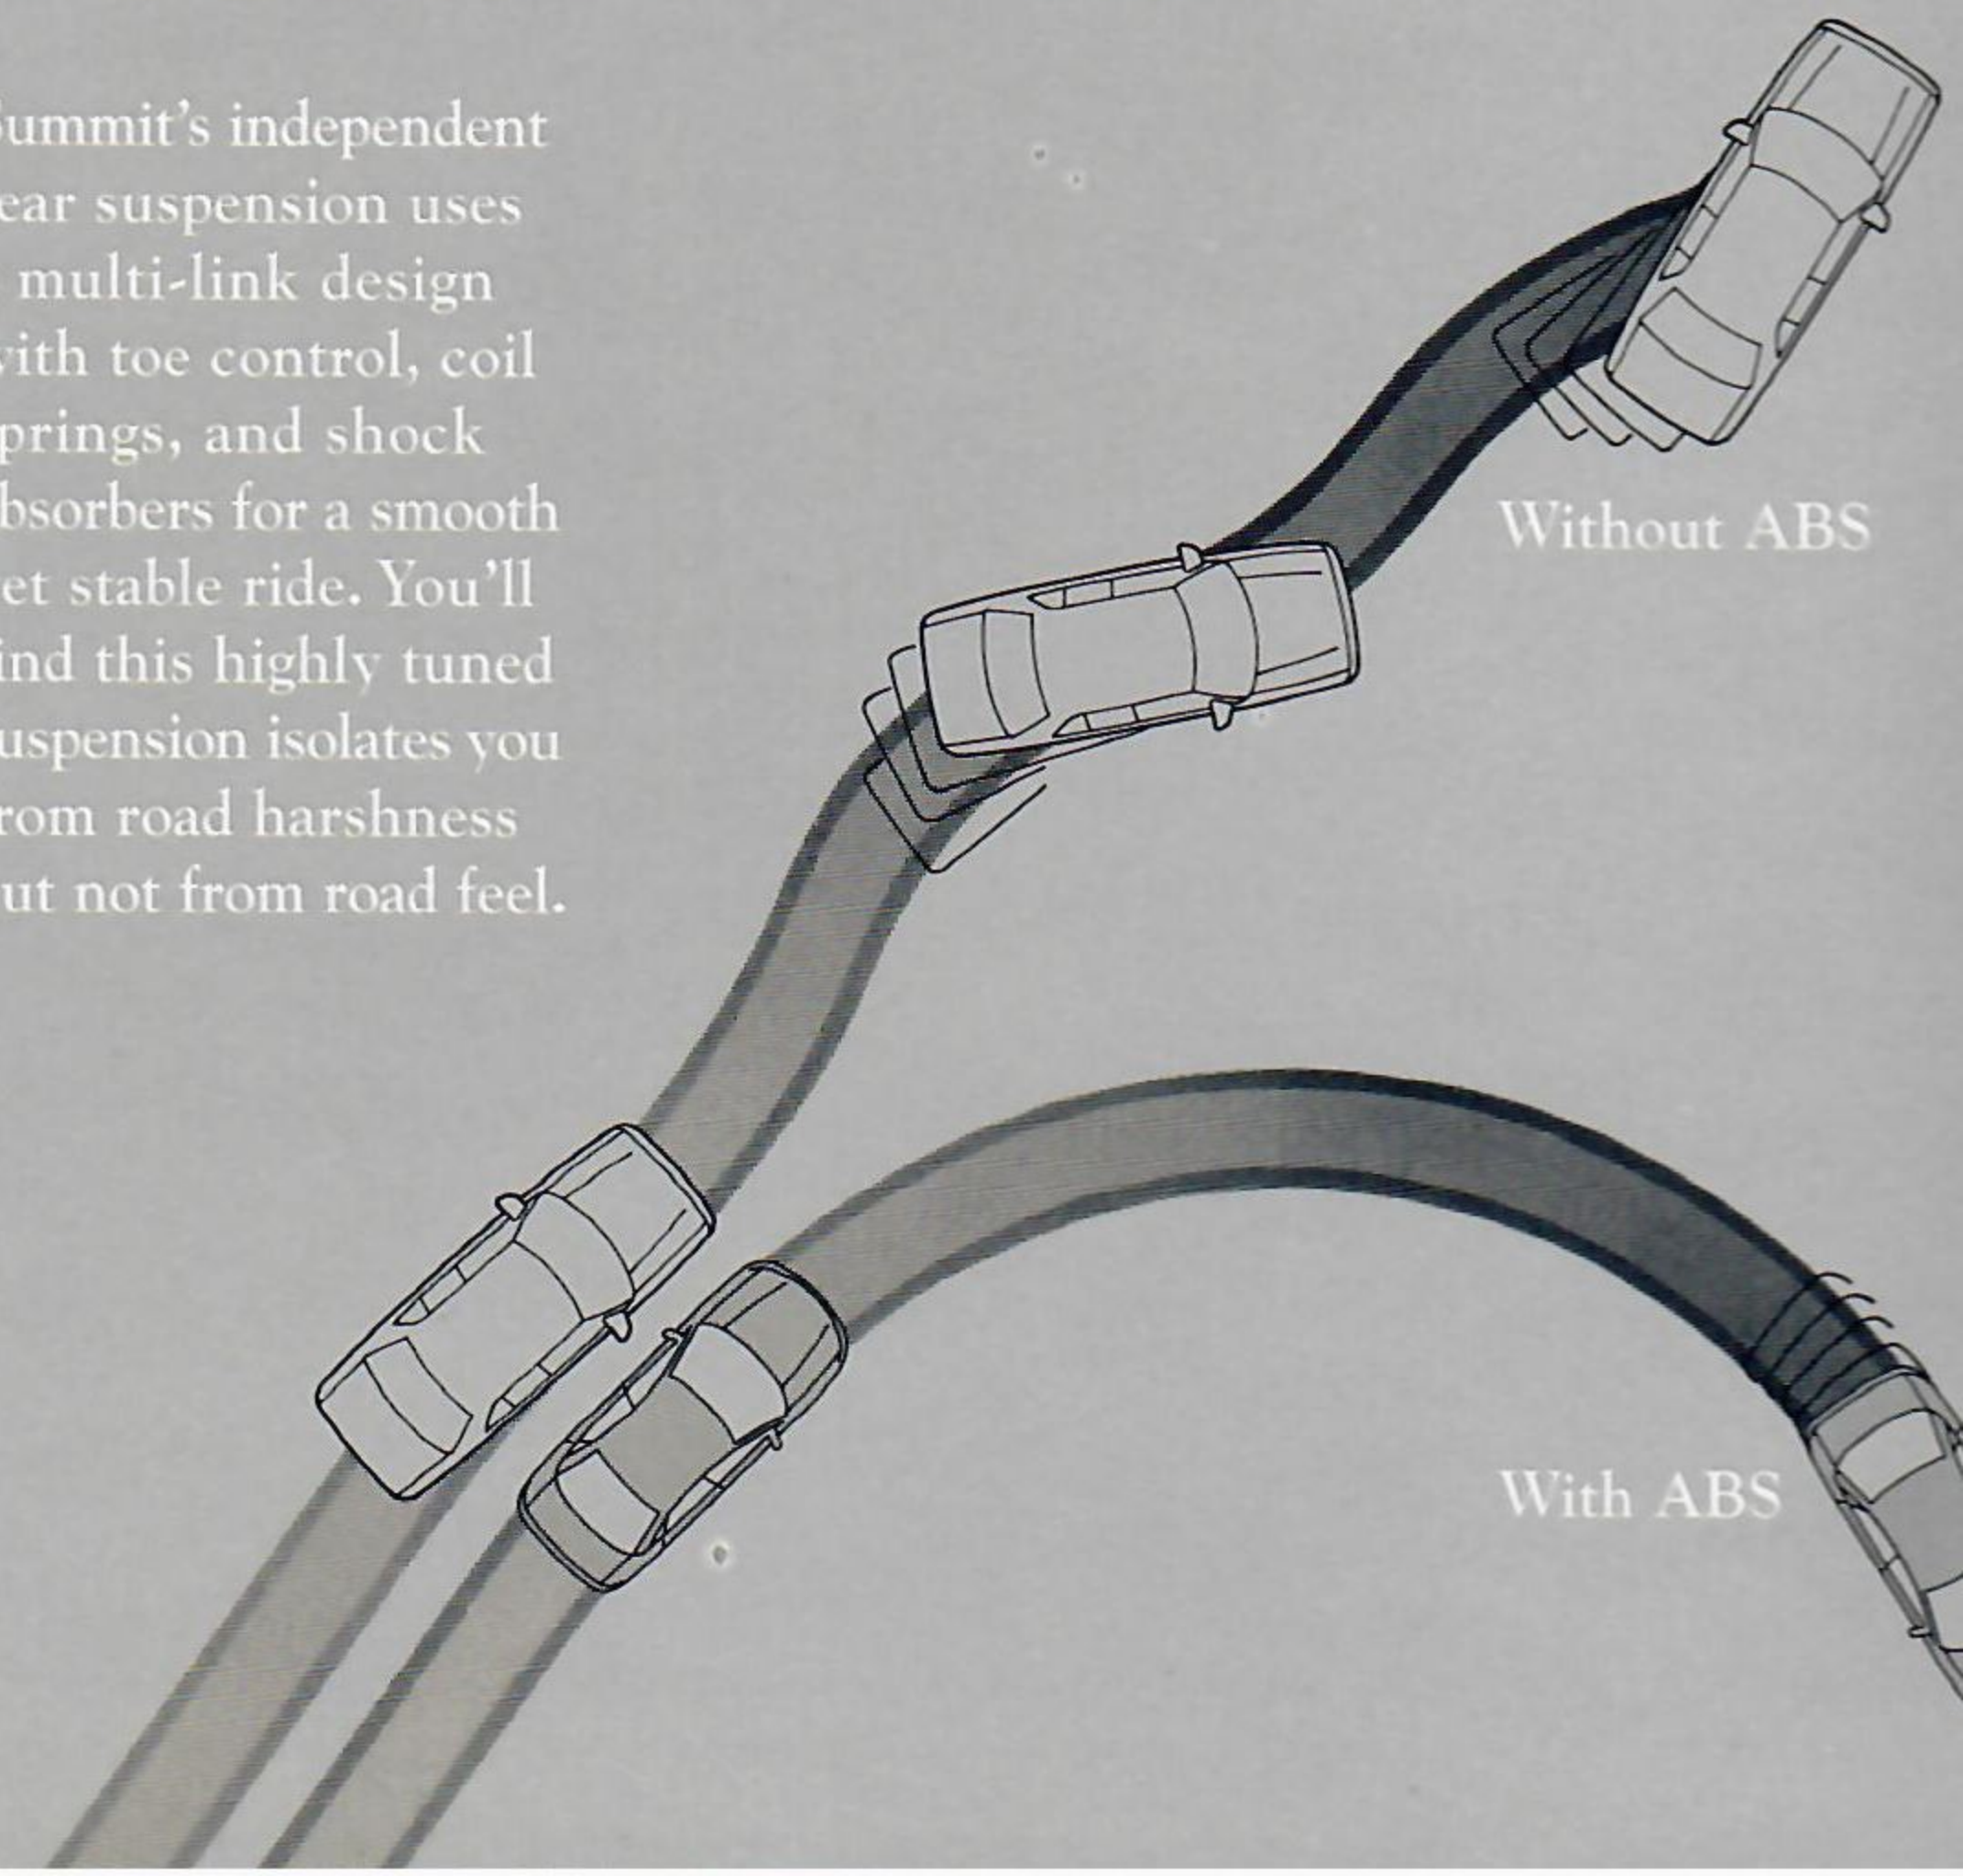

with shift points set to deliver excellent performance without sacrificing fuel efficiency.

Driver confidence is enhanced by rack-and-pinion steering and a four-wheel independent suspension featuring MacPherson struts and coil springs in the front and an independent multi-link rear suspension with toe control design.

Summit's independent rear suspension uses a multi-link design with toe control, coil springs, and shock absorbers for a smooth yet stable ride. You'll find this highly tuned suspension isolates you from road harshness but not from road feel.

Without ABS

With ABS

ERGONOMICS

An Accelerated Course In Advanced Ergonomics.

Ergonomics. The applied science of designing machines so that you can interact with them efficiently. Or more simply, it's the science of making a car easy to drive.

Inside the new Summit, you'll discover the interior to be highly functional yet pleasing to the senses. The environment is relaxing

yet, at the same time, exhilarating. Gauges and controls have been reorganized and rethought

to make them more accessible to the driver in real-world conditions.

You'll find that the elegant simplicity of the design extends to the car's operation as well. Expansive windows provide optimum visibility. The seats provide firm yet comfortable support for the driver as well as the passengers. In the Summit Sedan, you'll find that passenger volume of 89.3 cubic feet puts five

people in civilized comfort. A split-folding rear seat can be folded on either side to accommodate people and cargo (standard on ES Sedan; optional on ES Coupe).

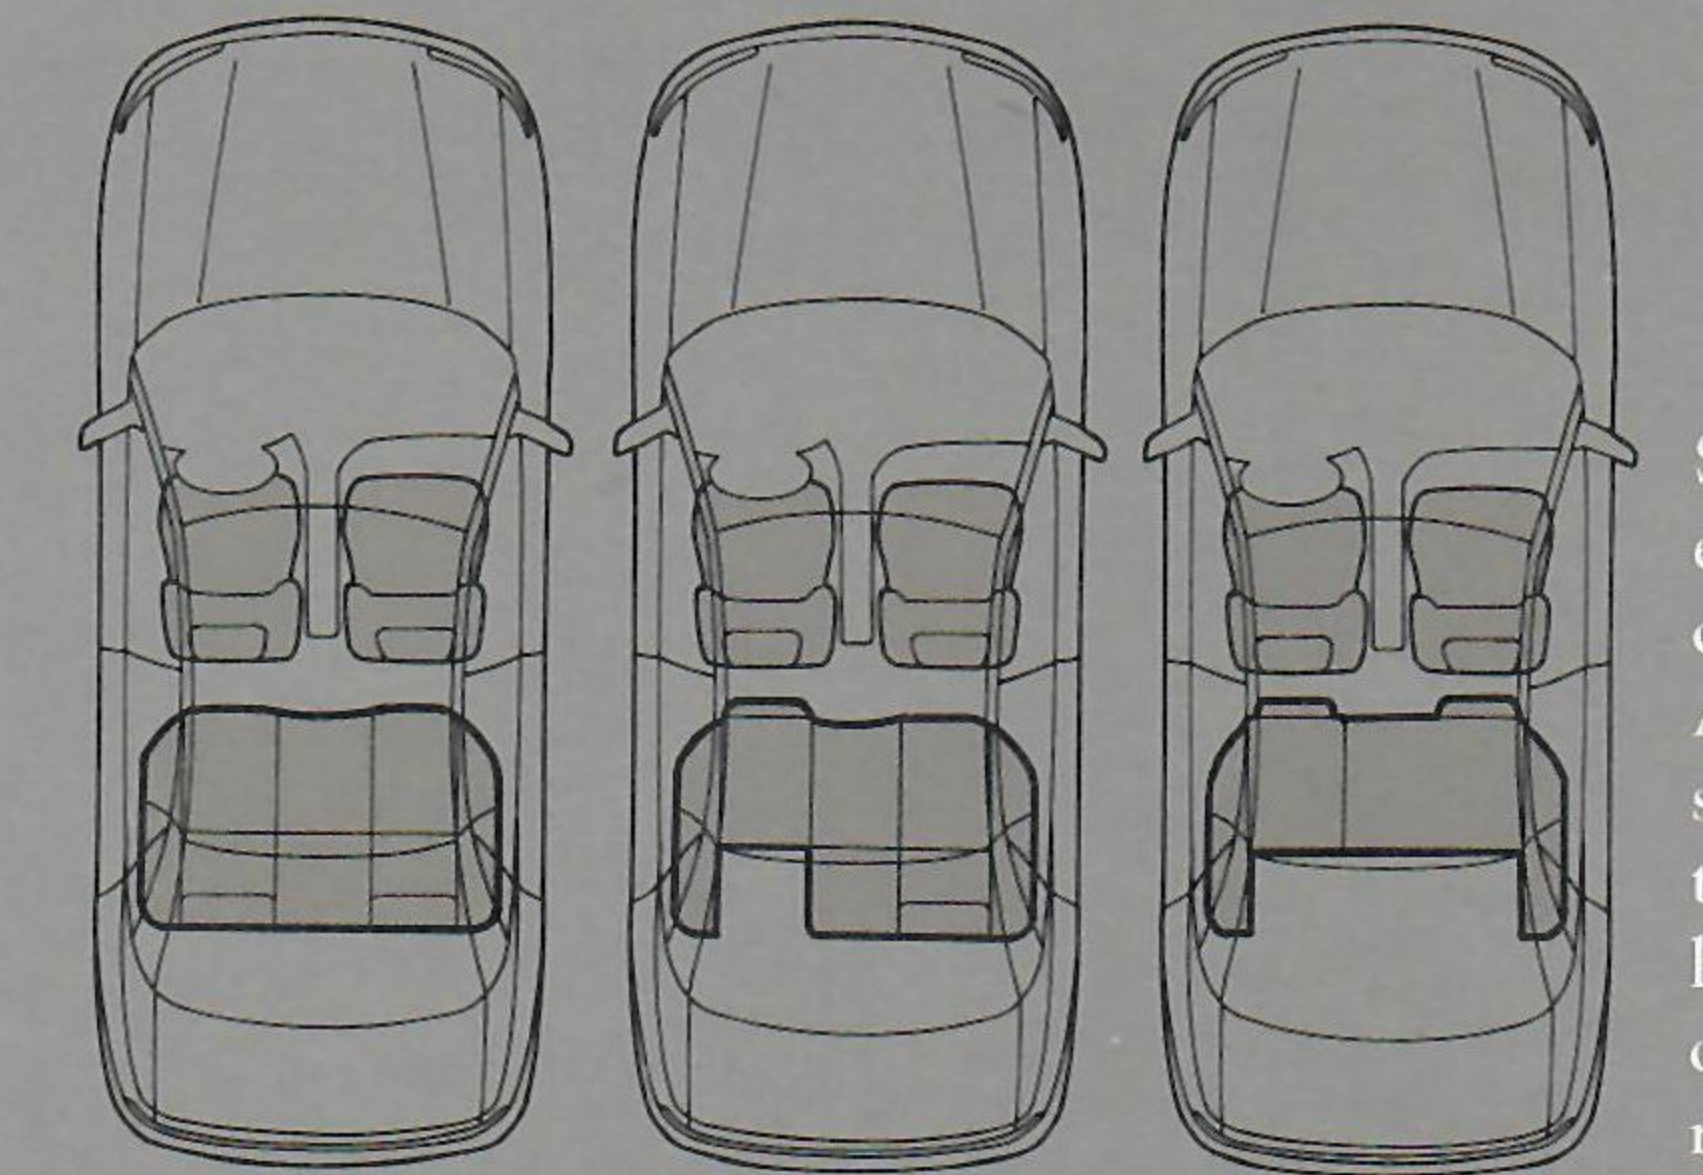

Options like air conditioning and your choice of audio systems make being a passenger in the new Eagle Summit almost as enjoyable as being the driver.

EAGLE SUMMIT COUPE & SEDAN

Summit's trunk has 10.5 cubic feet of cargo space. The lid opens all the way to the bumper to allow easy access for loading or unloading.

Eagle Summit ES Sedan interior

Summit ES offers several different seating/cargo arrangements. A split-folding rear seat allows for pass-through stowage of larger cargo items with one or both sides of the rear seat folded down.

Your choice of sound systems includes an AM/FM stereo cassette with four speakers.

Gauges and controls have been positioned to make them more accessible to the driver in real-world driving conditions.

Eagle Summit AWD Wagon

Talking Is The Last Thing We Did About The Weather.

When it came to battling the elements, the engineers of Summit Wagon wanted to be sure you won.

That's why in addition to standard front-wheel drive, Summit Wagon is available with all-wheel drive (AWD) and an advanced anti-lock brake system (ABS). The full-time all-wheel drive system on Eagle Summit AWD Wagon automatically adjusts to changing weather and road conditions, providing optimum driving control and confidence.

The ABS option is designed to help prevent brake lockup on slippery surfaces and provide increased steering control during sudden and unexpected braking.

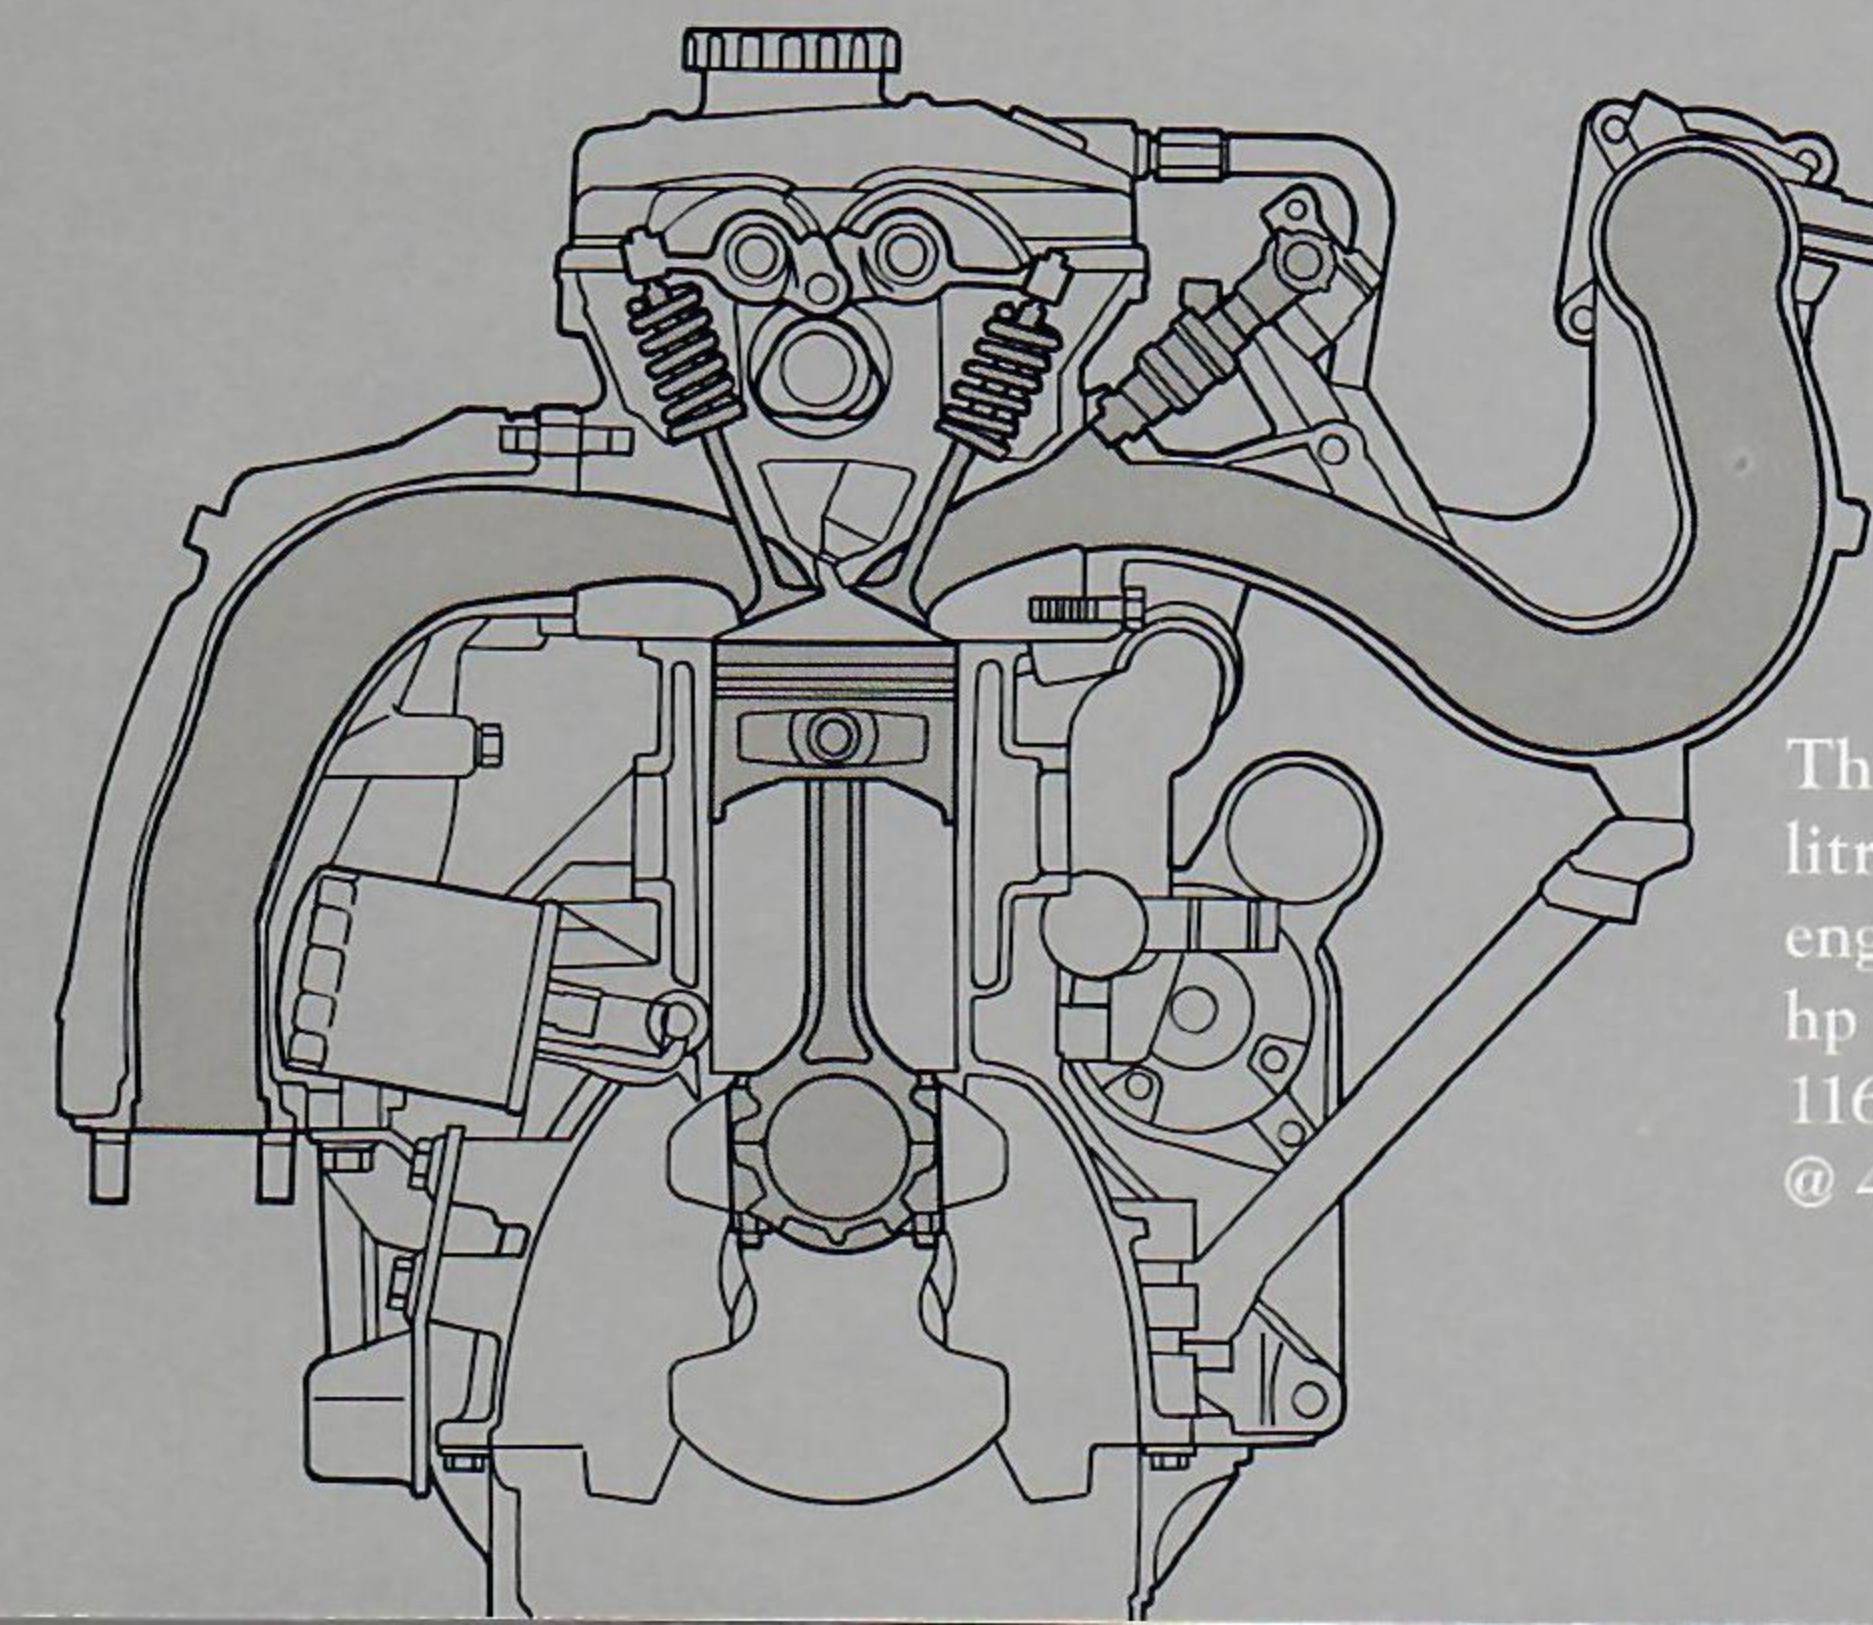

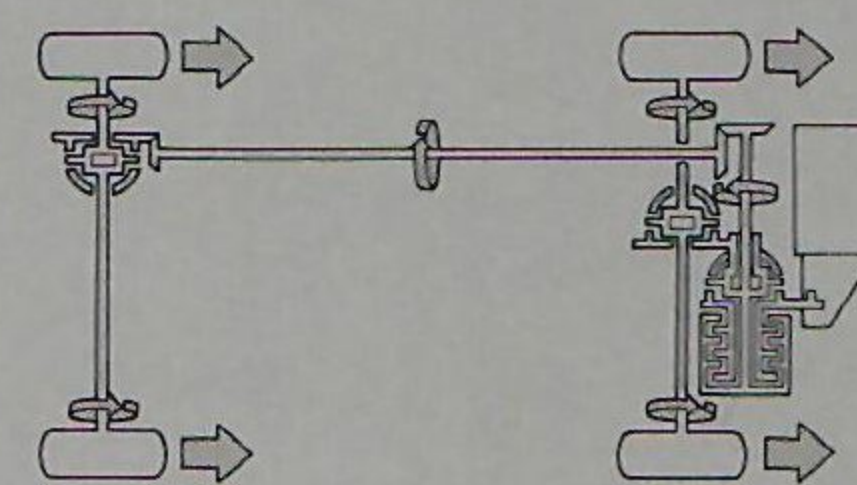

You'll find the powerplant on Summit Wagon to be no less advanced. Standard is a 1.8 litre 16-valve engine for spirited yet efficient performance.

Or if you prefer a bit more thunder, choose the 2.4 litre 16-valve engine and really take the road by storm.

With full-time all-wheel drive, Summit Wagon adjusts to changing driving surfaces automatically, thus providing maximum driver

control and security. Under normal driving conditions, a center differential integrated into the transaxle distributes engine torque equally between the front and rear axles. As road conditions deteriorate and one of the axles begins to slip, a viscous unit in the center differential automatically

sends increased torque to the axle with the most traction, allowing the wheels of the spinning axle to regain traction much sooner.

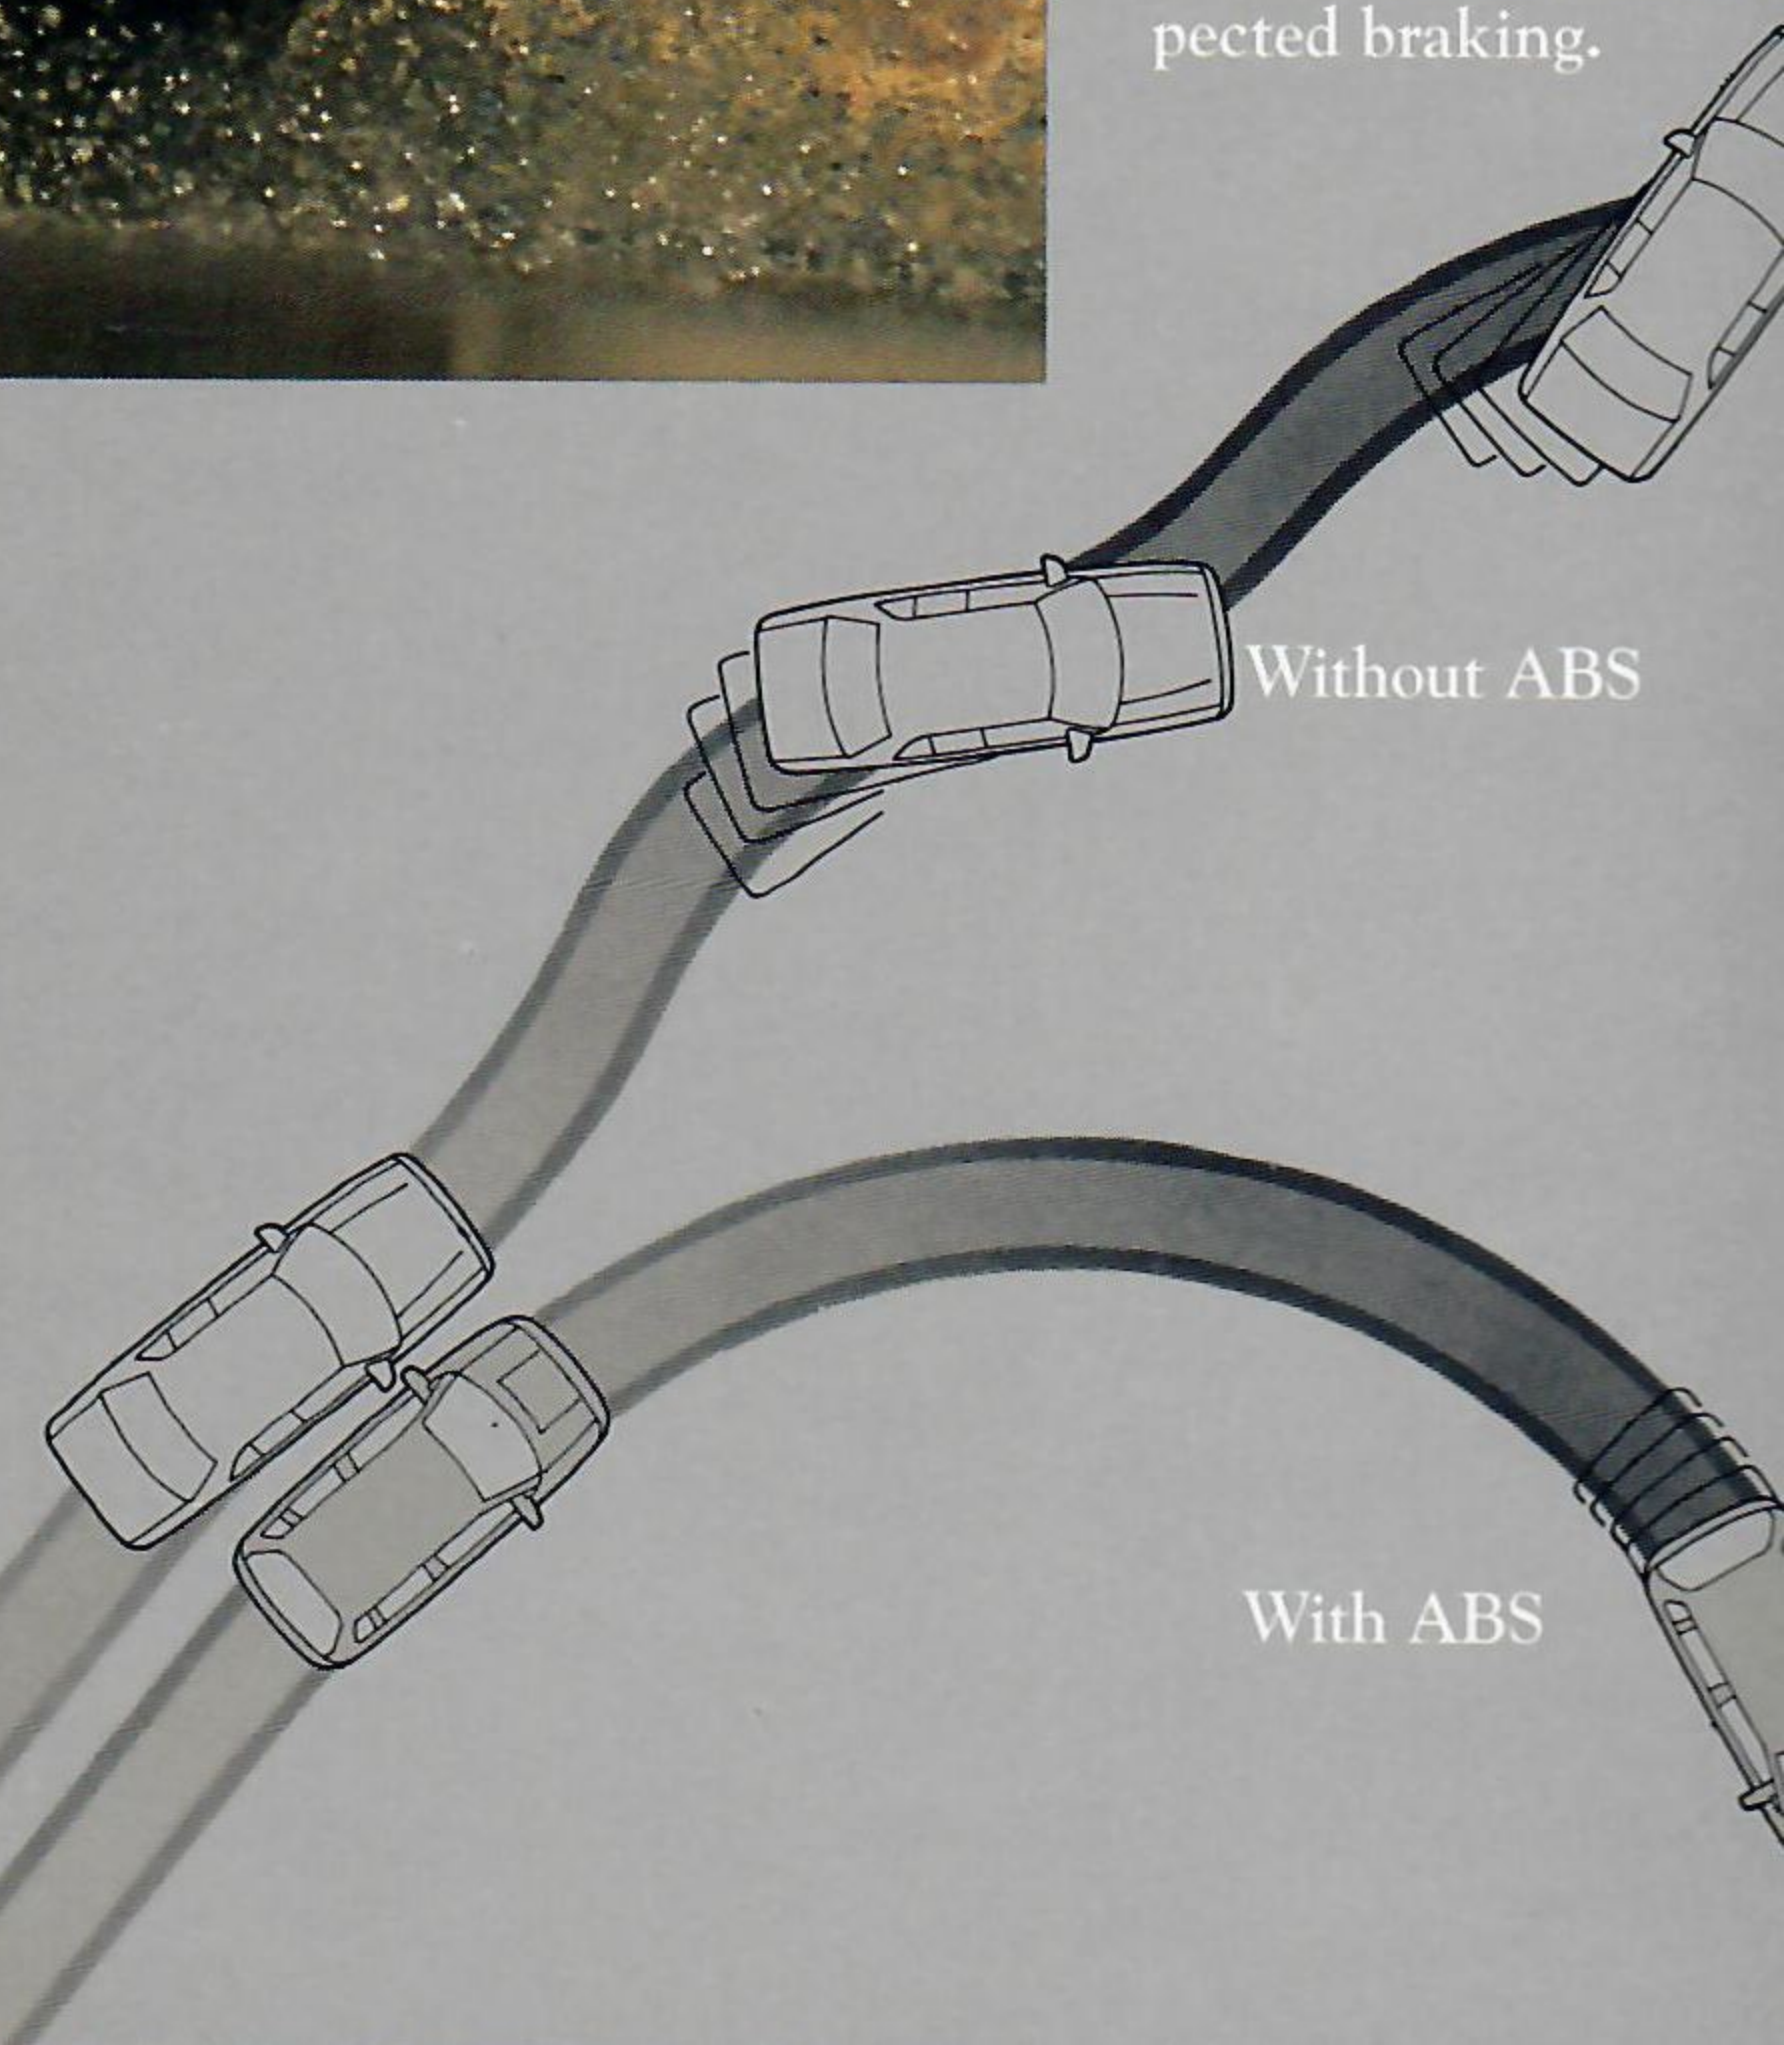

The standard 1.8 litre 16-valve MPI engine delivers 113 hp @ 6000 rpm and 116 lb-ft of torque @ 4500 rpm.

Eagle Summit AWD Wagon

The optional ABS system pumps brakes automatically, helping to prevent wheel lockup. This allows the driver to maintain more steering control during unexpected braking.

With ABS

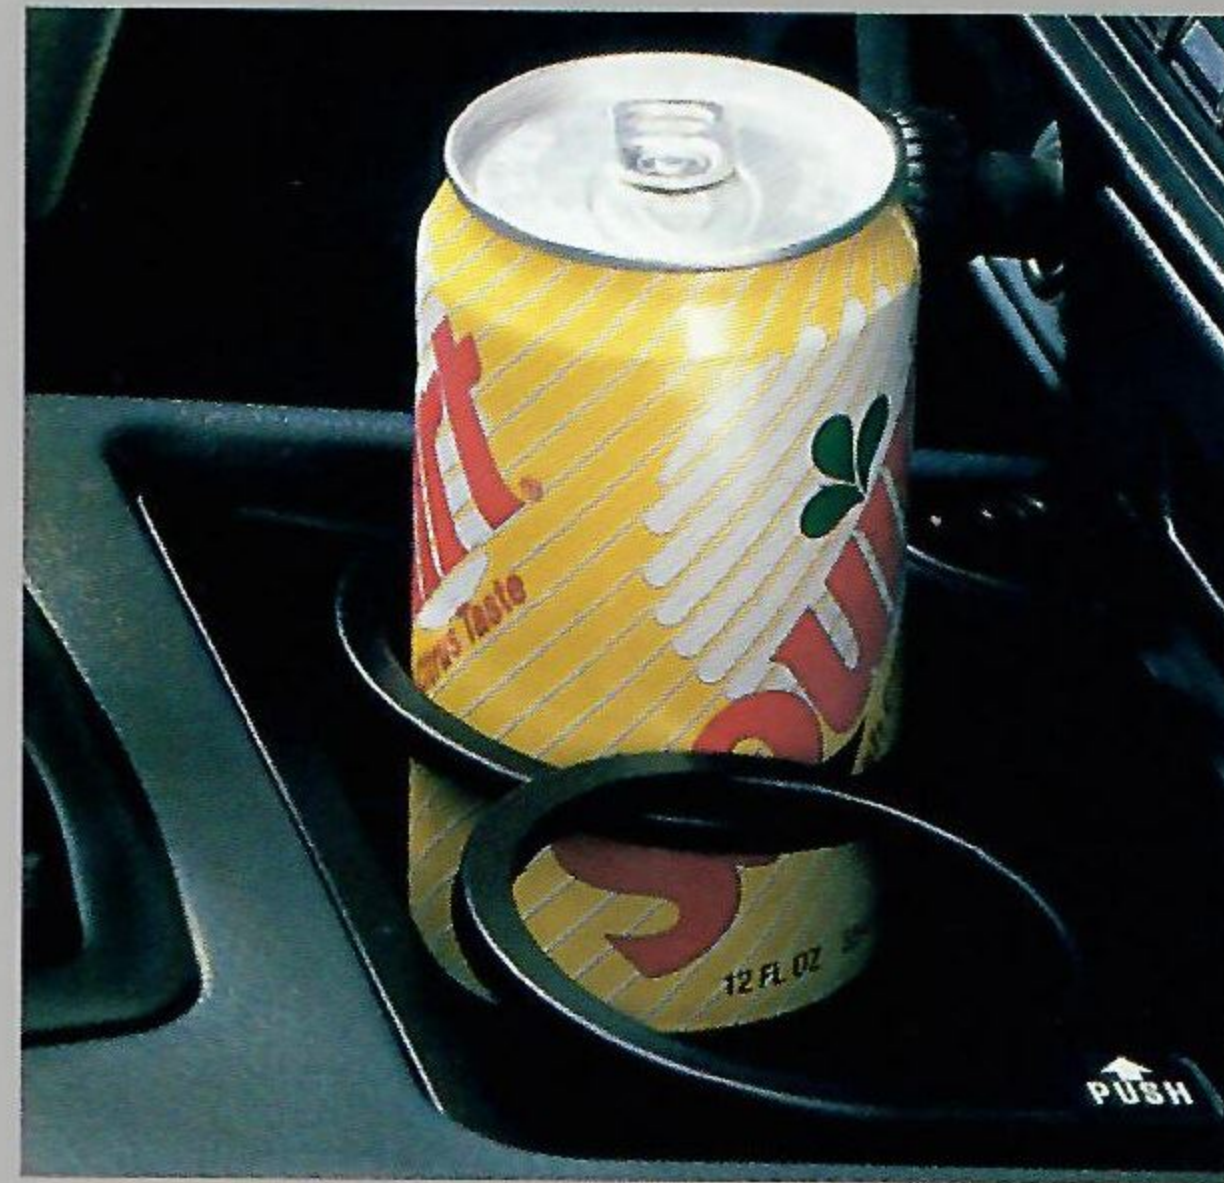

Without ABS

Here's That Spare Room You've Always Wanted.

Summit Wagon has what every family needs—room. And plenty of it. It offers comfortable surroundings for five people—with a child-protection lock on the sliding side door to ensure that those surroundings are safe.

Behind the rear seat, you'll discover plenty of spare room: 34.6 cubic feet to be exact. Perfect for luggage, groceries, sports equipment, or whatever your needs happen to be that day. Fold the rear seat, and Summit Wagon can

handle even more cargo. Loading is made simple, thanks to a convenient sliding door, tall cabin, rear liftgate, and flat floor. Tumble the seat forward, and you'll have 67.8 cubic feet at your disposal. Remove it entirely, and you'll find more total room than any small wagon*—an impressive 79.0 cubic feet.

For convenience and safety, Summit Wagon provides two retractable cup holders in the center console.

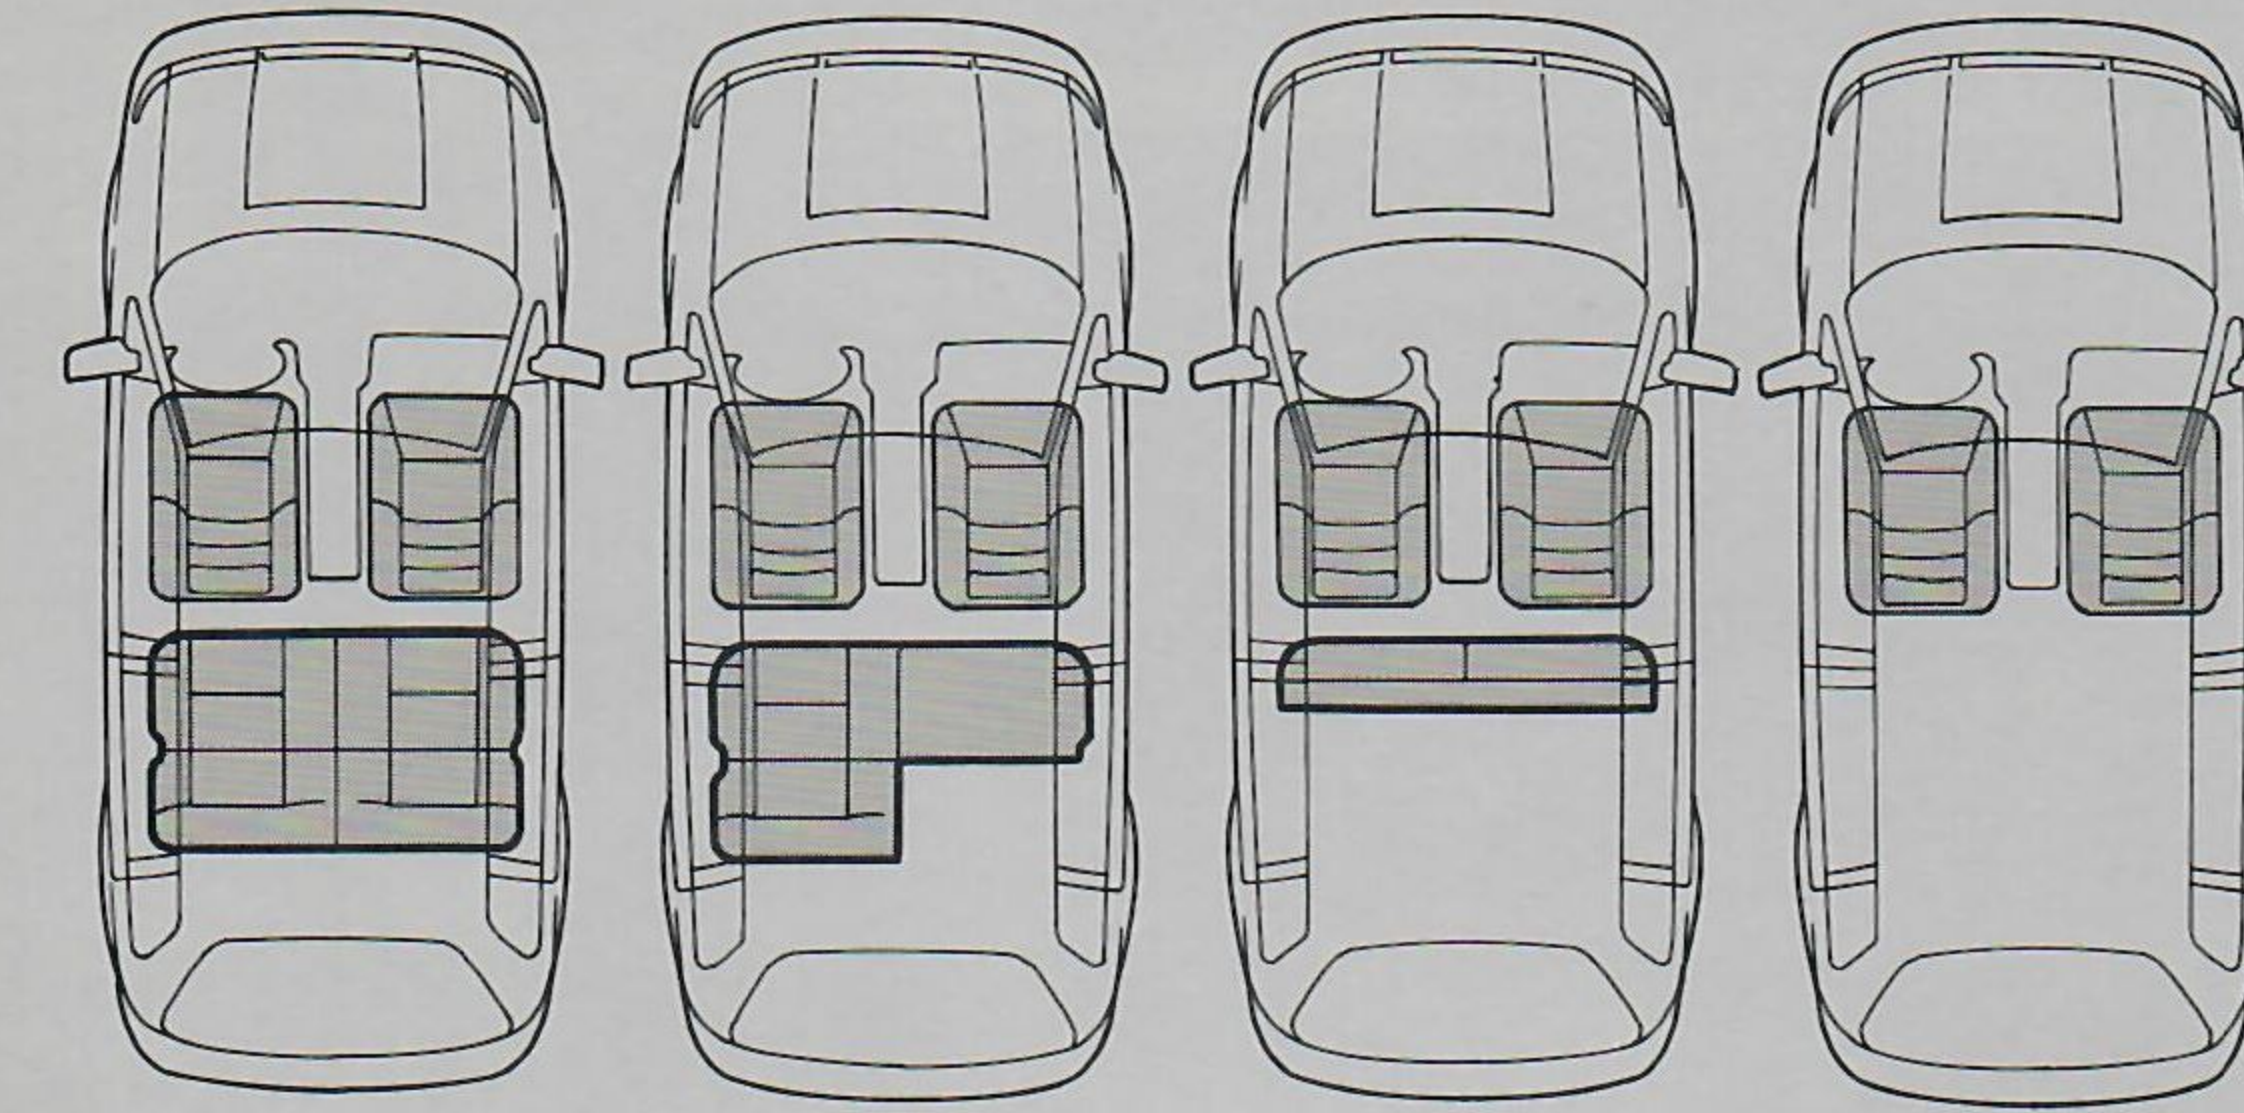

In addition to the sliding side door, the Wagon offers easy loading, thanks to a flat floor, tall cabin, and fold-and-tumble removable rear seat.

And with an optional cargo security cover, you'll keep all your belongings safely out of view.

A choice of superb sound systems guarantees to entertain even the most restless of passengers. Expansive windows provide all occupants with excellent visibility.

Summit Wagon. The perfect addition to any family.

*Based on 1992 model year EPA Interior Volume Index and Ward's Small Car Class.

With all seats up, Summit Wagon carries five passengers and 34.6 cubic feet of cargo. Fold the split-back rear seat (standard on LX; optional on AWD with Custom Package), and you can carry people and their gear. Tumble or remove the rear seat for 67.8 or 79.0 cu. ft. of cargo space, respectively.

Eagle Summit AWD Wagon interior shown with optional Custom Package (standard on LX)

COMMITMENT

Where You Can Be Something Nobody Else Is: Yourself

From the moment you enter a Jeep and Eagle dealership, you won't be treated just like anyone else. Because, frankly, we know the reason you choose to drive a Jeep or an Eagle is precisely *because* you're not like everyone else.

Knowing that, we've created Customer One, a comprehensive dealership program dedicated to your total satisfaction. So whether you need vehicle specifications, pricing information, or an appointment for service, you will benefit from the attention given by every member of our dealership family.

With your choice of Jeep and Eagle models comes a warranty choice no other manufacturer offers. It's the Owner's Choice Protection Plan. Choose between our exclusive 7-year/70,000-mile powertrain warranty or 3-year/36,000-mile bumper-to-bumper coverage. Either way, you'll never pay a deductible. Just see limited warranties, restrictions,

and details at your dealer. Excludes normal maintenance, adjustments, and wear items.

Additional peace-of-mind protection for Jeep and Eagle vehicle owners is available through optional Chrysler Service Contracts.

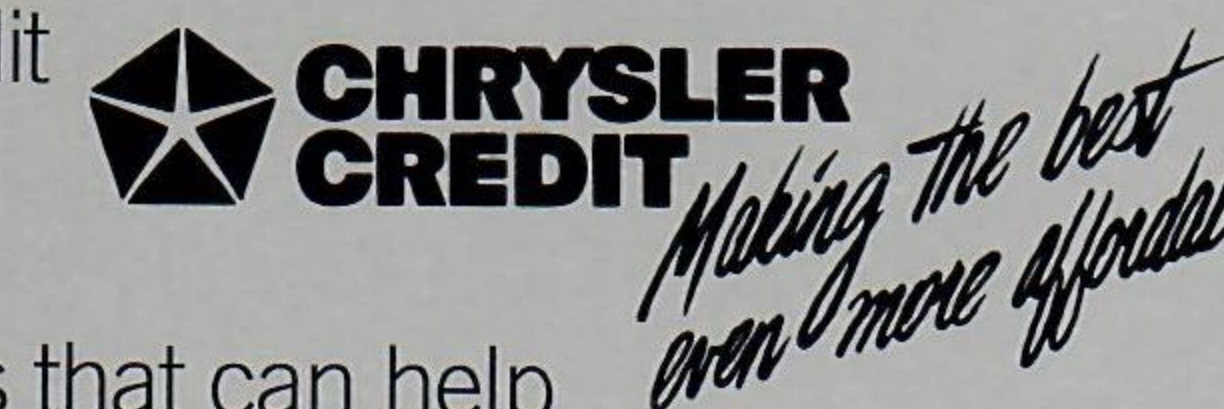

(Top) Jeep Grand Cherokee Limited and (Bottom) new Eagle Vision TSi.

PHYSICALLY-CHALLENGED ASSISTANCE PROGRAM
Cash reimbursement of up to \$500 for purchase and installation of adaptive driving aids or passenger equipment on new 1993 Chrysler Corporation cars, trucks or vans. For further information, contact your dealer or the Physically-Challenged Resource Center at 1-800-255-9877.

OWNER'S CHOICE PROTECTION PLAN
7/70
POWERTRAIN OR
3/36
BUMPER-TO-BUMPER

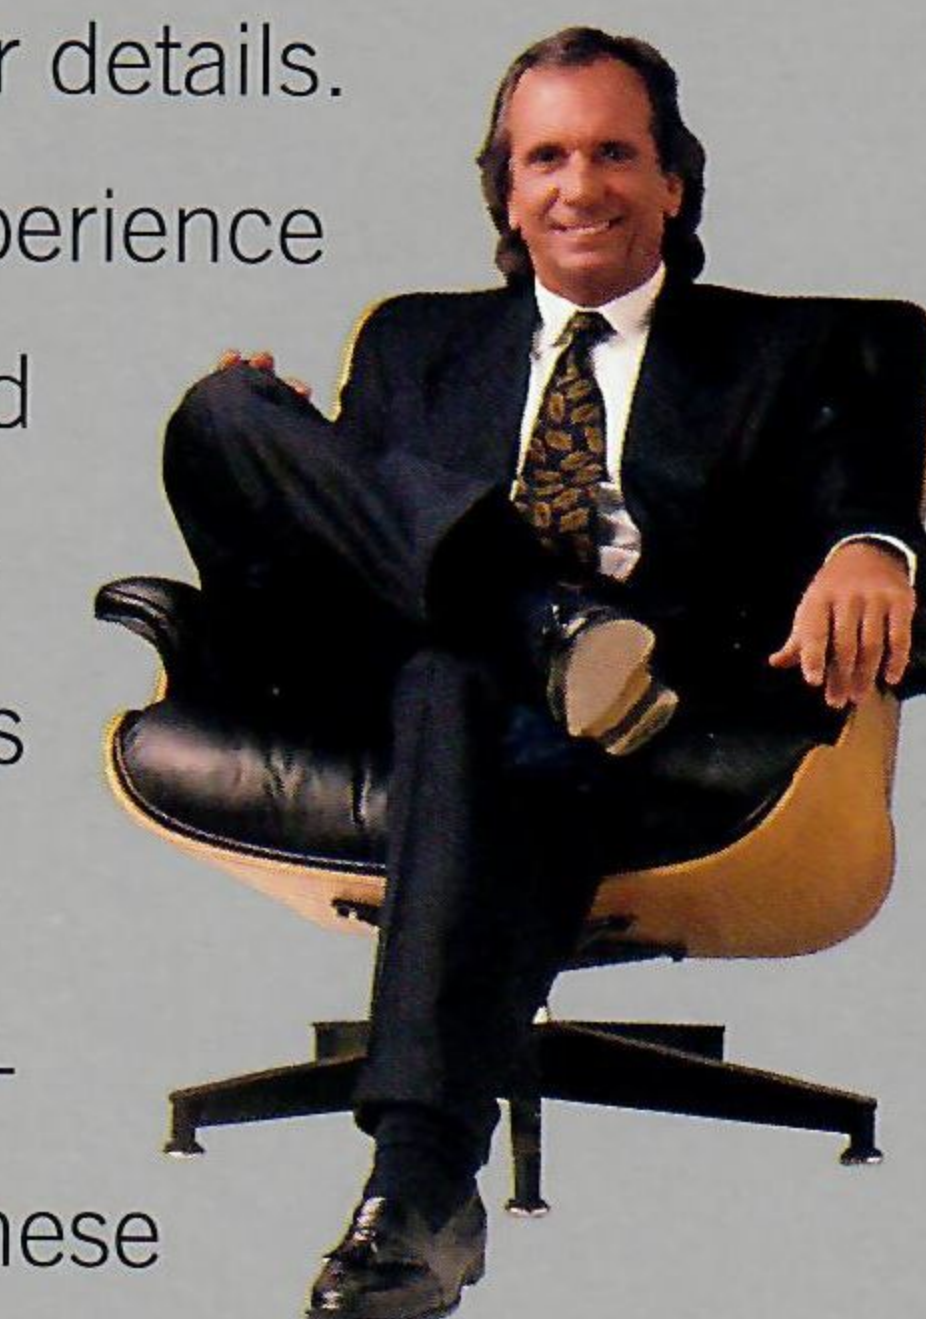

These services are available in a variety of time and mileage combinations to meet your needs.

Chrysler Credit offers a variety of finance programs that can help

make your new Jeep or Eagle vehicle even more affordable. These flexible finance and lease programs can be tailored to suit your budget and lifestyle. They include Advantage: Gold Key Lease, College Graduate Plans, Retail Financing, and other special payment plans. Ask your salesperson for details.

Your ownership experience can be further enhanced by selecting from a variety of Mopar accessories designed to help equip your vehicle to your individual needs. Many of these accessories can be installed prior to delivery of your new vehicle. Ask your dealer for information on genuine Mopar accessories.

Two-time Formula 1 Champion and Indianapolis 500 winner Emerson Fittipaldi contributed considerable talents as consultant to the development of Jeep and Eagle vehicles.

All product illustrations and specifications are based upon current information at the time of publication approval. Although descriptions are believed correct, accuracy cannot be guaranteed. Chrysler Corporation reserves the right to make changes from time to time, without notice or obligation, in prices, specifications, colors, and materials and to change or discontinue models. Some of the equipment shown or described throughout this catalog is available at extra cost.
