

RAPID SPACEBACK

ŠKODA

RAPID SPACEBACK – EXPERIENCE MORE

The Rapid Spaceback is a car of extremes. Impressively compact, yet remarkably spacious with generous leg and headroom for up to five occupants. It has an understated interior, yet is packed with intuitive technology including the latest smart assistance systems and connected features. Then there's the increased performance that uses less energy thanks to intelligent engine recuperation. The result is a car of compelling opposites that enables you to experience more at every turn.

Models shown are not UK specification. Some of the equipment shown is optional.

LOOK SHARP

The Rapid Spaceback's exterior features a new longer rear window design, giving it a sportier and edgier look. This is further enhanced by the sharp and high tornado line. It's not all change however, as the car's dynamic silhouette remains ever present.

DYNAMIC FRONT DESIGN

The front view of the Rapid Spaceback is characterised by the wide air intake grid with integrated fog lamps. While the striking radiator grille and eye-catching chrome strip also command attention.

PANORAMIC GLASS ROOF

Made entirely of tinted glass, the panoramic roof gives every passenger the sensation of extra light and space. Standard on SE Sport.

REAR LIGHTS

The distinctive C-shape rear lights wrap around to the sides, further enhancing the Rapid Spaceback's rear view. A darkened black finish is standard on the SE Sport.

DASHBOARD

Designed to perfectly complement the curve of the steering wheel, the stylish dashboard has been designed with functionality front of mind. Top trims include a multifunction steering wheel wrapped in leather, which puts radio and phone controls at your fingertips.

SPACE TO IMPRESS

ŠKODA and class-leading space have always gone hand in hand. The Rapid Spaceback's refined interior builds on this tradition, providing generous room for up to five occupants. It's also a perfect example of style meeting substance, with practical touches filling every inch.

REAR PARKING SENSORS

When reversing towards objects the sensors produce an acoustic sound to inform the driver of the distance between the car and the object.

AMBIENT LIGHTING

Going for a trip in the Rapid Spaceback is never dull thanks to the soft ambient lighting on the centre console, front feet area and door handles. Available with light and rain assist.

HEATED SEATS

When it's chilly out, your inside passengers will appreciate the heated rear seats that form part of the Winter Pack. These are regulated by a separate control on the rear side of the front armrest.

CONNECTIVITY TO GO WHEREVER YOU GO

By enabling you to be fully online on the move, the Rapid Spaceback helps you stay connected wherever your journey takes you. Thanks to its smart assistance systems, you'll also know the best places to park, shortcuts to take and routes to avoid.

SMARTLINK+

From taking calls to switching between your favourite playlists, SmartLink+ enables you to safely use your smartphone through the infotainment system. It also includes SmartGate, which enables you to record and analyse your drive to help you cut fuel costs and extend the life of your car. Available as an optional extra.

NAVIGATION SYSTEM

The Amundsen satellite navigation with 6.5" touchscreen display will get you from A to B, but why stop there? With Bluetooth®, SmartLink+ (optional) and two SD card slots, it offers complete connectivity on-the-go.

EMERGENCY CALL

Activated by pressing a red button placed on the roof, Emergency Call provides immediate contact with the emergency services. In the event of a crash, the call is made automatically to ensure you get the help you need.

REAR USB PORTS

Passengers can keep their devices charged up using the two rear USB ports. Available as an option on all trim levels.

STAY CONNECTED

The new ŠKODA Connect system turns the Rapid Spaceback into a fully interconnected car. Infotainment Online provides satellite navigation, traffic reports and calendar updates.

While Care Connect focuses on help and safety, enabling remote access and control of the vehicle. It also offers an assistance service for any situation that needs it.

SPACE TO SPARE

As the name suggests, the Rapid Spaceback really boasts impressive luggage capacity. The sizeable boot has 415 litres of space available, which can be increased to 1,381 litres when the rear seats are folded down. Combined with the wide opening, the Rapid Spaceback is ready to pack everything you'll need for that special family outing.

FIT AROUND YOU

We understand that everyone uses space differently. Some require very little, others demand more. That's why we've designed the boot of the Rapid Spaceback to adjust to your precise needs, whether that's additional room or extra functionality.

CARGO ELEMENTS

Stop your luggage from sliding across the boot with these two optional plastic cargo elements with Velcro® fastener. When not in use, they can be stored in the compartments behind the rear wheel arches.

DOUBLE-SIDED BOOT FLOOR

This thoughtful optional feature lets you quickly switch between a carpet or rubber boot floor. Taking suitcases to the airport? Go for carpet. Need to take off those muddy boots? Flip it to rubber.

NET PROGRAMME

This optional set of nets comes in a variety of sizes increasing the flexibility of the luggage space and preventing objects from sliding around.

SPACIOUS STORAGE

Several storage compartments have been included in the interior to help you keep it looking its best. The glove compartment can also be air-conditioned, making it perfect for storing chilled refreshments.

IT'S THE LITTLE THINGS THAT COUNT

In a car packed with cutting-edge smart technology, we haven't forgotten about the simple ideas. After all, they're often the ones you rely on most. Especially on cold mornings and rainy days.

REAR-VIEW CAMERA

Located on the boot handle, the rear-view camera makes light work of reverse parking, with an integrated washer to keep obstacles visible.

UMBRELLA STORAGE

A spot of rain will never dampen your spirits again thanks to the umbrella under the front passenger seat.

ICE SCRAPER

Mounted out of sight on the fuel cap this handy ice scraper is ideal for frosty mornings. It also doubles up as a magnifier.

REAR SEAT ARMREST

The option of the foldable rear seat armrest creates a load-through area that enables you to pack long items while retaining seating in the back. The armrest also includes an integrated drinks holder, giving rear passengers the opportunity to stay refreshed on the move.

SAFETY WITHOUT COMPROMISE

A close-up photograph of the rear passenger area of a car. The focus is on the middle seat, which features a third headrest. The seats are upholstered in black leather with white stitching. The background shows the rear window and a red interior panel.

THIRD HEADREST

If full carloads are the rule rather than the exception, the option of a third headrest in the middle seat will be welcomed by all rear passengers.

The Rapid Spaceback offers exceptional safety to all passengers. It's why you'll find smart safety features such as ABS braking, Electronic Stability Control and three-point safety belts aren't available as an option. They come as standard, as do the six airbags located around the car.

AIRBAGS

Safety is always a priority, with six airbags included as standard including head, front and front side airbags. In the event you're transporting a little one in the front, the passenger airbag can be deactivated as required.

DRIVER FATIGUE SENSOR

Using data from the power steering sensors, this clever assistant system detects when it's time to stop for a coffee break and displays a warning on the display.

FRONT ASSIST

Using a radar in the front bumper this system provides an audio and visual signal to warn of an impending collision. If the driver fails to respond, the system initiates braking to minimise any possible impact. Available as an option on SE Tech and SE Sport.

TIME WELL SPENT

Whether nipping through the city or cruising up the motorway, every second behind the wheel should be one enjoyed in total relaxation. It's why we've packed the Rapid Spaceback with clever little comforts that makes even the daily commute something to look forward to.

MULTIFUNCTION STEERING WHEEL

The attractive multifunction leather steering wheel isn't simply soft and tactile, it enables you to control the radio and your connected smartphone.

KEYLESS ENTRY AND START/STOP

Get on the road faster by equipping the car with keyless entry and start/stop. A start/stop button is also located on the steering column to enable you to effortlessly turn the engine on and off.

CRUISE CONTROL

Maintain a constant speed without using the pedals, allowing you to fully concentrate on the road ahead.

HEADLAMP WASHERS

The integrated telescopic washers keep the headlamps clean, ensuring obstacles and other drivers are always in clear sight.

BEST OF BOTH WORLDS

Performance when you need it, enhanced fuel efficiency when you don't. That's the power of the Rapid Spaceback's turbocharged engines. While each offers a distinctively unique drive, all feature sophisticated technical solutions such as start/stop and brake energy recuperation.

FUEL-EFFICIENT ENGINES

Whether you favour petrol or diesel, you'll find a clever engine to suit. Four are available to choose from, each delivering a comfortable and compelling driving.

DIRECT SHIFT GEARBOX (DSG)

DSG automatically adapts to your driving style, whilst taking road conditions into account. It reduces the strain on the engine and stress to the driver, by deciding when to change gear, leaving you free to concentrate on the journey.

START/STOP

With this fuel saving feature, the engine automatically switches off when stationary, restarting as soon as the driver presses the clutch or steps off the brake.

RAPID SPACEBACK S

Heated wing mirrors, smart assist systems, USB connectivity. Just some of the thoughtful touches and features included in this entry-level trim.

DAYTIME RUNNING LIGHTS

BODY COLOURED DOOR MIRRORS AND HANDLES

DRIVER AND PASSENGER AIRBAGS

STANDARD EQUIPMENT
