Notes regarding the chart above: Payload and Max Trailer Weights are ESTIMATED values. All values are shown in lb unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. GAWRs, GVWRs and GCWRs should never be exceeded. Recommended tongue weight determined by class of hitch receiver and hardware limits of upfit. Upfit or aftermarket equipment weight not included with Base Weight. Frontal Area: Maximum allowable Frontal Area, in ft.² that the vehicle can project. For details on calculations, please refer to Ram Body Builders Guide. If VECI Label and Max Upfit Weight not available, Vehicle is not restricted to MCWV, Frontal Area or Maximum Upfit Weight limits; however, GVWR/GAWR/GCWR cannot be exceeded.

Notes regarding the charts above: Payload and Max Trailer Weights are ESTIMATED values. All values are shown in lb unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. GAWRs, GVWRs and GCWRs should never be exceeded. Recommended tongue weight determined by class of hitch receiver and hardware limits of upfit. Upfit or aftermarket equipment weight not included with Base Weight. Frontal Area: Maximum allowable Frontal Area, in ft² that the vehicle can project. For details on calculations, please refer to Ram Body Builders Guide. If VECI Label and Max Upfit Weight not available, Vehicle is not restricted to MCWV, Frontal Area or Maximum Upfit Weight Limits; however, GVWR/GAWR/GCWR cannot be exceeded.

Notes regarding the charts above: DRW = Dual Rear Wheel. Weights given in lb. Numbers in **Black boxes** reflect the maximum of that class. Payload and Max Trailer Weights are ESTIMATED values and rounded to the nearest 10 lb. Payload = GVWR - Base Weight. Payload and Trailer Weight Rating are mutually exclusive. GAWRs, GVWRs and GCWRs should never be exceeded. Trailer Weight Rating and Tow Vehicle Trailing Weight are calculated as specified in SAE J2807. Passenger Weight = 300 lb. Options Weight = 100 lb. Trailing Equipment Weight: 75 lb for conventional hitch, 70 lb for gooseneck and 250 lb for fifth wheel. Tongue weight: 10 percent of the gross trailer weight for conventional hitch, 15 percent of the gross trailer weight for a fifth-wheel or gooseneck hitch. Payload and GAWR should never be exceeded and must account for all of the above weights, including the appropriate trailing equipment and tongue weight. Box-Off Body Completion Weight = 80 lb per foot from end of cab to end of frame. The maximum tongue weight for Class V (hitch receiver) is limited to 1,800 lb. A fifth-wheel or gooseneck hitch is required for trailers over 18,000 lb. The 13,800-lb GVWR stated for Regular Cab, 4x2, 6.4L V8 with 4.10 axle ratio applies to Tradesman[®] and ST Packages only. For all other configurations (Regular Cab, 4x2, 6.4L V8 with 4.10 axle ratio), the GVWR is 13,700 lb.

- ▶ Optimum efficiency achieved in part by eTorque belt starter-generator system, which enables seamless start-stop capability
- ▶ 850RE (GEN 2) TorqueFlite 8-speed automatic

850RE/8HP75 TORQUEFLITE 8-SPEED AUTOMATIC TRANSMISSIONS

- ▶ Two transmissions, with each application based on the specific engine
- ▶ Identical gear ratios used in both the 850RE and 8HP75 transmissions
- ▶ Unique electronic controls, plus a new hydraulic impulse oil storage element, to better support the start-stop system
- ▶ Automatic shifting attuned to performance requirements to meet virtually every driving demand
- ▶ Maximized efficiency by operating at lower engine rpm—applicable to both city and highway driving

Notes regarding the payload and towing charts above: numbers in **Black boxes** reflect max ratings. Payload and Max Trailer Weights are ESTIMATED values. All weights are shown in lb unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. Trailer Weight Rating (TWR) and Tow Vehicle Trailing Weight are calculated as specified in SAE J2807. Passenger Weight = 300 lb. Options Weight is option content above 33 percent of sales volume. Trailer Equipment Weight = Class IV Hitch Receiver is 111 lb (if not already included in Options Weight). Trailer Hitch is 10 lb if TWR is less than or equal to 5,000 lb, and 65 lb if TWR is greater than 5,000 lb. Payload and Trailer Weight Rating are mutually exclusive. GAWRs, GVWRs and GCWRs should never be exceeded. The recommended tongue weight for a conventional hitch is 10 percent of the gross trailer weight. The maximum tongue weight for Class IV hitch receiver is limited to 1,100 lb. Weight-Distributing Hitch is recommended for trailers over 5,000 lb.

Notes regarding the charts above: numbers in **Black boxes** reflect max ratings. Payload and Max Trailer Weights are estimated values. All weights are shown in lb unless otherwise stated. Payload and Max Trailer Weight values are rounded to the nearest 10 lb. Payload = GVWR - Base Weight. Trailer Weight Rating and Tow Vehicle Trailing Weight are calculated as specified in SAE J2807. Payload and Trailer Weight Rating are mutually exclusive. GAWRs, GVWRs and GCWRs should never be exceeded. The recommended tongue weight for a conventional hitch is 10 percent of the gross trailer weight. The maximum tongue weight for Class IV hitch receiver is limited to 1,100 lb. Weight-distributing hitch is recommended for trailers over 5,000 lb.

BUSINESS SUPPORT

THE DEALER NETWORK FOR YOUR BUSINESS.

Your **BusinessLink** dealer is committed to providing you, the small business owner, with the vehicle support you need for your business, from servicing all makes and models of your existing lineup to selling you the right vehicles needed to perform the work that you do. Your **BusinessLink** dealer provides priority service because we know downtime is costing you money. Your **BusinessLink** dealer has sales professionals trained to properly “job-rate” the right vehicle for your work application along with providing commercial finance options. New vehicle sales to qualified small business owners also receive a free alternate transportation contract, in the event your vehicle is in for service.

Membership in the **BusinessLink** program is free. Membership helps us to identify you as a small business owner so we can provide you with both the service you deserve and update you with offers that can help reduce the cost of doing business. Ask your **BusinessLink** dealer to register today.

BusinessLink has you covered.

CHRYSLER CAPITAL

A commercial line of credit from Chrysler Capital is ideal for qualified business customers looking for a flexible, easy way to manage growing vehicle needs. Chrysler Capital streamlines the process, and—with pre-qualification—you're ready to buy a vehicle when you need it. Ask your **BusinessLink** dealer for details.

THE RIGHT UPFIT FOR YOUR RAM TRUCK

Because it's the most important and expensive tool in your business toolbox, you can increase your truck's efficiency and customize its capability with an upfit—an aftermarket body modification. Ram Commercial is ready to help.

Select upfitters who meet our criteria for excellence, and who agree to our guidelines, help ensure that your truck performs to spec. Streamline the process by identifying the type of work, operating conditions (worksites, on-/off-road, etc.), type and amount of weight or payload, and type and weight of trailer and contents (if applicable).

You'll find the most recent list of these upfitters and the comprehensive Body Builder's Guides—critical details, technical specs and measurements—at ram.com/commercial. Log on to rambodybuilder.com or use our toll-free hotline for Body Builder questions or assistance: the number is 866-205-4102.
