COROLLA FAMILY

Fun. Intelligent. Drive.

The perfect model designed just for you.

With the sleek design, spirited driving dynamics, remarkable fuel efficiency, and state-of-the-art technology, the 2021 Corolla Family is your ever-ready partner that you can count on for all of life's endeavours. With three models to choose from, including the reliable Corolla, fuel efficient Corolla Hybrid, and versatile Corolla Hatchback, there's a model perfectly suited for your lifestyle.

COROLLA

Fun at first sight.

We never stop finding ways to make you stare.

Corolla has been a favourite of Canadian drivers for decades, and the 2021 Corolla is no exception. Its dramatic design blends high tech with high style that is sure to turn heads - whether you're admiring it from the curb or from the comfort of the driver's seat. With a host of sporty driving dynamics, Corolla ensures that every ride is as memorable as the last.

COROLLA

Style balanced with substance.

A premium experience you can see and feel.

Toyota's design team aimed to craft a car that is stunning from every angle. Corolla's electrifying style includes a honeycomb grille and a distinct rear end with narrow combination lamps that wrap into the powerful fender flares. The refined driver-focused interior features piano black accents, contrast stitching, and soft-touch instrument panels. And you'll feel the difference too with the available leather-wrapped heated steering wheel, heated front and rear seats, and moonroof.

COROLLA HYBRID

Get the most out of using less.

Welcome to the best of both worlds.

Like its gas-powered siblings, the Corolla Hybrid delivers a highly satisfying driving experience, along with the latest advances in comfort and multimedia technology. The powerfully stylish Corolla Hybrid gives up nothing with its optimized fuel economy, advanced tech, and striking look that will leave you breathless.

COROLLA HYBRID

Expect a few surprises.

Love every part of the drive.

The design isn't the only thing exciting about the Corolla Hybrid. This high-efficiency model features Toyota's proven Hybrid Synergy Drive® system to help you get to what matters most, on less fuel. And the smart Energy Monitor makes tracking your efficiency and driving habits incredible easy. As driving conditions change, the monitor uses the multimedia display to show you how power is being routed to the drive wheels or how otherwise wasted energy is captured to charge the battery.

COROLLA HATCHBACK

Designed for real life.

Style that fits who you are.

The Corolla Hatchback keeps the fun going. Low to the ground and lightweight, this energetic hatch will reintroduce you to the thrill of driving. Its sporty exterior highlights its practical five-door design, while the interior surrounds you in comfort with room to take friends along for the ride. So, whether you're running to the store or driving to the lake, Corolla Hatchback finds fun around every corner.

COROLLA HATCHBACK

Energy that's contagious.

Sleek, sporty styling.

The Corolla Hatchback was meticulously designed to stand out. Its exterior features an athletic stance with bold wheel flares and arches, and stylish Bi-Beam LED headlights. The ergonomically designed sport seats offer a relaxed and focused drive, while pedals and shifters are perfectly positioned to give you optimal control around every bend and corner.

TECHNOLOGY

Next-gen street smarts.

Advanced tech for a smarter drive.

The Corolla Family is loaded with easy-to-use tech that is designed to make your drive fun and your life easier, such as the 4.2" TFT Multi-Information Display, Backup Camera, and available Smart Key with Push Button Start and 8" multimedia display with embedded navigation.

TECHNOLOGY

Stay connected to what matters most.

CONNECTED SERVICES BY TOYOTA¹

Staying connected has never been easier with a suite of available connectivity features including Remote Connect, Safety Connect[®], Service Connect, and Destination Assist to help enhance your driving experience.

Qi WIRELESS CHARGING²

Simply place your Qi compatible device on the available Qi wireless charger for a quick and easy charge.

ANDROID AUTO^{™1} COMPATIBILITY

Bring your favourite smartphone apps into one place for easy access to navigation, media, and communication apps. With Google Assistant[™], you can perform actions with your voice, keeping your eyes on the road and your hands on the wheel.

APPLE CARPLAY^{™1} COMPATIBILITY

Connect a compatible iPhone[®] to get directions, make calls, send and receive messages, and listen to your playlists with your voice through Siri[®] or the steering wheel controls – all while maintaining focus on your drive.

PERFORMANCE

The joy of the ride.

Make the most out of life. One KM at a time.

If you're looking for excitement behind the wheel, the Corolla Family's agile and responsive yet refined driving dynamics create an engaging drive. Its streamlined exterior includes aero-stabilizing fins and a finely tuned underbody that help to enhance handling and improve fuel efficiency. Its spirited feel is thanks to a multilink rear suspension, improved shock absorbers, and Active Cornering Assist that help to create exceptional handling, stability, and ride comfort.

PERFORMANCE

Rev up your heartbeats per minute.

SPORT MODE

On models equipped with Sport Mode, the engine control unit and simulated shift points are adjusted to create a more athletic feel with every drive.

PADDLE SHIFTERS

Available steering wheel-mounted paddle shifters give you the power to shift gears manually for a more controlled experience. They make quick shifts possible with a precise, responsive feel.

6-SPEED INTELLIGENT MANUAL TRANSMISSION (iMT)

The available 6-speed intelligent Manual Transmission (iMT) features close-ratio gears down low for spirited acceleration and taller gears up top for optimized fuel economy while cruising. It also incorporates an intelligent rev-matching feature, helping reduce transmission shock when downshifting.

SPORT PERFORMANCE

Upgrade your drive with Corolla SE, XSE, and Hatchback models. They offer a more exhilarating punch in performance and sharp handling thanks to a sport-tuned suspension and a 2.0 litre Dynamic Force engine.

SAFETY

Toyota Safety Sense™

No matter what roads you travel, Toyota Safety Sense™³ 2.0 is always there to help keep you as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2021 Corolla Family, and it is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION⁴

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

DYNAMIC RADAR CRUISE CONTROL⁵

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

STANDARD TOYOTA SAFETY SENSE™ 2.0

LANE DEPARTURE ALERT WITH STEERING ASSIST⁶ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

AUTOMATIC HIGH BEAMS⁷

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

LANE TRACING ASSIST⁸

Provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation. (Available on Corolla models with Automatic transmission).

— D I S C L A I M E R S —

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns. (3) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (4) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (5) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (6) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (7) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (8) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (9) Not all exterior and interior colour options are available for every model. (10) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.
