*Trans-Aire's exclusive split wall construction with built in solid oak side rails.*

*\*Available in regular and extended mini vans*

*Trans-Aire's decorative exterior tape scheme.*

*Optional custom exterior paint graphics.*

# Superior Construction

*Engineering that puts Trans-Aire in a Class by Itself!*

*This cut-a-way photograph shows the superior Trans-Aire construction. Trans-Aire is the only company that welds in a steel impact bar on both sides for your protection. Other companies use wood strips. The vertical ribs installed by the factory keep the sheet metal in place but afford very little side protection. Trans-Aire's ceiling is built with 5/8" reinforcing strips, fiberglass insulation, solid 1/4" plywood ceiling panel with 3/8" foam and fabric. 3/8" foam and 1/4" plywood is also used in sidewall construction. Many companies do not cover the front floor seating area. Trans-Aire covers the entire floor with Blandex which will not warp or absorb moisture. Investigate the concealed construction before you buy. Any company can install T.V.'s, C.B.'s, radar detectors, video players, 6-way power seats, extensive wood treatment, etc. But no one else protects your investment and provides safety features like Trans-Aire.*

Trans-Aire...

## The Leader in Design and Engineering Excellence

---

*Trans-Aire International Inc. is one of the nation's largest manufacturers of quality crafted motorized vehicles. Our production facilities sit on 18 acres and our buildings have 152,000 sq. ft.*

*Trans-Aire manufactures and markets through franchised new car and truck dealers only. Mr. Bob Higgins, owner and president of Trans-Aire is well known in the industry for innovative designs in custom sport roofs, lighting systems, seats and many other innovations for which he holds several patents and more pending. Mr. Higgins designed the now famous contoured angle vista bay window which was adopted by the rest of the industry and is widely used today.*

*PHILOSOPHY: Trans-Aire International is recognized as the leader in design and engineering excellence in our industry. This position of leadership was accomplished thru innovative design engineering; careful selection of high quality raw materials; closely controlled quality manufacturing of most of our components; highly skilled quality conscious employees and a network of quality dealers who want to represent and sell the best products available.*

*Our financial strength provides us with the resources to maintain this position of leadership. We are dedicated to the philosophy that every Trans-Aire product will be built with the same attention to quality, value and customer service.*

## Custom Sport Trucks...

## A First Class Statement

---

*Trans-Aire's exclusive line of sporty pickup trucks are styled with the richness of our vans - with quality and craftsmanship that make a first class statement to each one's owner. Trucks are becoming a more and more popular means of transportation, but at Trans-Aire it is a way of expressing that you are not only another driver, you are the proud driver of a machine that will quench the heat of any street. Step into your Trans-Aire dealer today and experience a growing world of new trucks of the present with the class of the future.*
