

2020

HIGHLANDER

AT TOYOTA, WE'RE MORE THAN JUST A CAR COMPANY

WE'RE A PARTNER IN THE JOURNEY TO LIVE YOUR MOST FULFILLING LIFE.

We give you the tools you need to achieve your full potential by designing our vehicles with purpose. To be as dynamic as the life you've always envisioned yourself living.

And we don't stop at meticulously designed, quality vehicles. We're pioneering alternative fuels, improving human movement, and creating meaningful community partnerships, like the one we have with our Olympic and Paralympic athletes. These initiatives demonstrate our determination to give everyone the ability to move freely through a world with constantly evolving mobility challenges, enriching that world in the process.

Alone, just a car. Together, so much more.

COMFORT. CONFIDENCE. COMPLETELY REDESIGNED.

THE ALL-NEW 2020 HIGHLANDER. DESIGNED FOR ALL THAT YOU ARE.

There's more to you than meets the eye. The same can be said of the all-new, completely redesigned 2020 Toyota Highlander and Highlander Hybrid. From its striking, fluid exterior styling, to its comfort and handling, to the host of intuitive tech that you'll find at your fingertips, the Highlander goes a bit deeper than your standard SUV. Couple that with gas and hybrid options that offer extraordinary fuel efficiency, power, capability, and safety features – and we're sure you'll agree that there is nothing on the road quite like the all-new Highlander and Highlander Hybrid.

HEIGHTENED PREMIUM FEELING DESIGN.

DESIGN THAT YOU CAN ACTUALLY FEEL.

From the moment you see it, you'll realize the new Highlander is something special. It's simply that striking, with a sophisticated shape that's been sculpted to give the Highlander a more powerful stance and a bold silhouette. And those modern lines are perfectly complemented with expanded fender flares, available 20" alloy wheels, and a dynamic grille. Available Platinum trim and premium LED headlamps complete the picture. And all of these design features aren't just for show; the Highlander's highly functional design promises improved aerodynamic efficiency, reducing wind noise while enhancing vehicle stability.

IT'S WHAT'S INSIDE THAT COUNTS.

INTERIOR FEATURES AND COMFORT THAT YOU MAY NOT HAVE EXPECTED.

As stunning as the outside of the Highlander is, it's what's inside that will truly impress you. In fact, it's all about you. You'll feel the premium, refined style that will elevate every ride – for both you and your passengers. Highlander offers modern luxury touches such as soft, padded surfaces with impressive stitching, available ambient LED lighting, and inset steering wheel controls. And you'll appreciate improved functionality throughout, from a centre console that offers available Qi wireless charging, to the available 12.3-inch touchscreen display, and available JBL® Premium Sound System. The spacious cabin comfortably seats up to 7 or 8 passengers, with available heated and ventilated leather captain's seats for a more premium feeling. And sound-dampening and soundproofing materials are optimized throughout the vehicle to minimize noise. Taken together, it adds up to a driving experience that is sure to surprise you.

PUTTING YOU AT THE CENTRE OF EVERYTHING.

CONNECTED SERVICE BY TOYOTA¹

Staying connected has never been easier with a suite of available connectivity features including Remote Connect, Safety Connect[®], Service Connect, and Destination Assist to help enhance your driving experience.

APPLE CARPLAY^{™1}

Highlander offers Apple CarPlay[™] support as a standard feature. Connect your compatible iPhone[®] and get directions, make calls, send and receive messages, and listen to your own playlist with your voice through Siri[®] or the steering wheel controls – all while maintaining focus on your drive.

ANDROID AUTO^{™1}

Android Auto[™] brings your favourite smartphone apps into one place, making it easy to access navigation, media, and communication apps. With the Google Assistant[™], you can perform actions with your voice, keeping your eyes on the road and your hands on the wheel.

Qi WIRELESS CHARGING

No wires. No worry. Simply place your Qi compatible device on the available Qi wireless charger for a quick and easy charge. For more convenience, four USB 2.0 ports let anyone find a connection from any seat.

PERFORMANCE TO TAKE YOU WHEREVER YOU WANT TO GO.

No matter where you're travelling, nothing will take you there like the all-new Highlander. It offers two powertrain options that deliver horsepower, torque, outstanding fuel efficiency and exceptional driving responsiveness and handling. And the available Multi-Terrain Select allows you to maximize traction when driving through inclement weather or road conditions. With performance also comes power. Highlander features impressive towing capabilities that can haul 2,268 kg/5,000 lb. (or 1,587 kg/3,500 lb. for Highlander Hybrid), which is enough power to pull a camping trailer with ease. With features like these and many more, the Highlander lets you make the most out of every drive.

DYNAMIC TORQUE-VECTORING AWD WITH REAR DRIVELINE DISCONNECT

Enjoy an upgrade in performance that is paired with impressive fuel efficiency. Gas models offer available Dynamic Torque-Vectoring All Wheel Drive that improves handling by sending up to 50% of the power to the rear and then distributes more power to the wheel that needs it. To boost fuel efficiency, Rear Driveline Disconnect will stop sending power to the rear when it isn't necessary.

GET MOVING.

HYBRID CAPABILITIES

The Toyota Hybrid System battery can hold a charge longer for greater distances to give you outstanding fuel efficiency. And the available AWD employs a separate rear-mounted electric motor to power the rear wheels, distributing more power there when needed. This means enhanced cornering agility by helping to reduce understeer, and increased rear-wheel torque over rough or slippery surfaces.

DRIVING MODES

Highlander Hybrid offers selectable driving modes that let you choose the vehicle's performance personality. SPORT mode unlocks boost from the hybrid system for improved acceleration response. ECO mode gets maximum efficiency from the fuel and battery. NORMAL mode is ideal for everyday driving, while EV mode allows electric-only driving at low speeds for short distances.

Toyota
Safety
Sense

SAFETY NEVER LOOKED SO GOOD.

STANDARD TOYOTA SAFETY SENSE™ 2.0.²

No matter what roads you travel, Toyota Safety Sense™ 2.0 is always there to keep you as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2020 Highlander, and it's designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

LANE DEPARTURE ALERT WITH STEERING ASSIST⁶ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL⁵

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

LANE TRACING ASSIST⁷

Provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation.

AUTOMATIC HIGH BEAMS⁴

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION³

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

HIGHLANDER SELECT FEATURES

L FWD

DRIVETRAIN

- 3.5 Litre, V6 Engine with 295 hp @ 6600 rpm & 263 lb.ft. of Torque @ 4700 rpm
- Front Wheel Drive
- Variable Valve Timing with intelligence, Direct-Injection D-4S Fuel Injection System
- Electric Parking Brake
- 8-Speed Direct Shift, Automatic, Transmission Cooler

ENTERTAINMENT & CONNECTIVITY

- Connected Services by Toyota¹ – Audio: 8" Touch Screen, 6-Speakers, Works with Apple CarPlay™ & Android Auto™
- USB Input Ports, Auxiliary Input Jack, Bluetooth®

WARRANTY

No deductibles. No transfer fees.

COMPREHENSIVE COVERAGE 3 YEARS OR 60,000 KM

This warranty includes 24 hour Roadside Assistance and other benefits, as well as coverage of repairs on any part of the vehicle that is defective in material or workmanship under normal use and maintenance. Different warranties apply to original tires.

POWERTRAIN COMPONENTS 5 YEARS OR 100,000 KM

This warranty covers repairs to powertrain components that are defective in material or workmanship under normal use and maintenance.

MAJOR EMISSION CONTROL COMPONENTS 8 YEARS OR 130,000 KM

This warranty covers repairs to specified major emission components that are defective in material or workmanship under normal use and maintenance.

CORROSION PERFORATION 5 YEARS/UNLIMITED DISTANCE

This warranty covers any sheet metal found, under normal use, to have developed a perforation from corrosion due to defects in material or workmanship.

HYBRID BATTERY 10 YEARS OR 240,000 KM

This warranty covers repairs to the hybrid battery that is defective in material or workmanship under normal use and maintenance.

HYBRID-RELATED COMPONENTS⁸ 8 YEARS OR 160,000 KM

This warranty covers repairs to hybrid-related components outside of the hybrid battery that are defective in material or workmanship under normal use and maintenance.

DISCLAIMERS

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. (2) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (3) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (4) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (5) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (6) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (7) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (8) Includes: Battery Control Module, Hybrid Control Module, and Inverter with Converter.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of printing. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca – or your Toyota Dealer is your best source for up-to-date information.
