

## 2007 MARINER HYBRID

**MERCURY** | NEW DOORS OPENED

[mercuryvehicles.com](http://mercuryvehicles.com)

### **INDEPENDENT THINKERS, REJOICE.**

Mercury Mariner Hybrid combines all the utility and convenience of a compact SUV with the eco-responsible efficiency of a full-hybrid powertrain. It's a stylish new way to go green and an intelligent response to contemporary needs and concerns.

### **HIGH SCIENCE MEETS HIGH STYLE.**

**MARINER HYBRID'S AVAILABLE TWO-TONE LEATHER TRIM** takes the SUV passenger cabin to a contemporary place. Chrome, satin-aluminum and wood-grain accents underscore the unique look of the upholstery, creating a striking visual effect.

**WHEN THERE'S WORK TO BE DONE**, the 60/40 split rear seat folds down, opening up 65.5 cu. ft.\* of do-anything cargo space. An available Safety Canopy,<sup>TM\*\*</sup> which includes side-curtain airbags<sup>\*\*\*</sup> and a rollover sensor, helps deliver peace of mind. Intelligently responsible meets can-do capability. An ideal combination for the aware and the active.

\*With rear cushion removed. \*\*Included in Safety Package. \*\*\*Always wear your safety belt and secure children in the rear seat.

## THE WHAT AND THE WHY OF THE WORKS.

**MARINER'S FULL-HYBRID POWERTRAIN** squeezes 32 mpg out of every gallon of gas in city driving\* That's an 86% improvement over the average V-6-equipped SUV. A control module selects the best power source—gas engine, electric motor or a combination of both—in response to driving conditions.

**WHEN LEAVING A STOPLIGHT**, for example, the combined power of electricity and combustion provides 155 net horsepower and acceleration comparable to Mariner's V-6. At low speed or when the vehicle is stationary, the gas engine shuts down for optimum efficiency\* and reduced emissions. At higher cruising speeds, the gas engine provides the power, and an electric generator recharges the battery, so no plug-in is necessary.

### MARINER'S HIGH-TECHNOLOGY APPROACH TO DRIVETRAIN

**ENGINEERING** extends beyond the power source. A continuously variable transmission keeps the engine in its best operating range for optimum torque and smoothness. Intelligent Four-Wheel Drive helps Mariner keep a good grip on the road, even in adverse weather conditions. In short, Mariner Hybrid is a singularly intelligent choice. Perhaps it should be your choice.

\*EPA-estimated mpg 32 city/29 highway. Actual mileage will vary.

## MORE OF THOSE THINGS YOU WANT MOST.

Mariner Hybrid's available **Energy, Audio and Navigation System** provides a power flow map that indicates the proportion of power provided by the gas engine and electric motor. This information can help you determine when you're driving with maximum efficiency.\* At the touch of a button, the screen becomes a control panel for the audio system or Navigation System. Mariner Hybrid's available **Audiophile® Sound System** with six-disc in-dash CD changer delivers great sound through six speakers and an eight-inch subwoofer.

Fold Mariner's split rear bench seat and take on a load. You'll have **65.5 cu. ft. of cargo area\*\*** to work with.

Mariner Hybrid's **leather-wrapped steering wheel** includes buttons that allow you to regulate the electronic speed control system without removing your hands from the wheel.

\*EPA-estimated mpg 32 city/29 highway. Actual mileage will vary. \*\*With rear cushion removed.
