

The Passat Wagon

It might confuse people who've known you all your life.

Drivers wanted.® 

Getting the Passat Wagon to look this elegant means giving the little things a lot of attention.

Chrome Accents. We thought long and hard about where they'd go. To help accentuate the Passat Wagon's graceful arc, some went around the windows. As you can see, we didn't go overboard. And why would we? Subtlety works.

16" Alloys.¹ More rim and less tire provide better cornering and more accurate turns. This seven spoke design evokes strength and momentum even when the car's at a red light. So you're moving when you're standing still. Kind of.

EXTERIOR

Bi-Xenon GDL Headlamps:²

Besides complementing the car's shapely contours, this brand new feature gives off an incredible bluish-white light. So you can better see what's out there. And what's out there can better see you.

Pick a color, any color.

Fresco Green	Blue Spirit	Mojave Beige	Blue Anthracite	Black Uni
Reflex Silver	Silverstone Gray	Candy White	Indigo Blue	Colorado Red

¹16-inch alloy wheels come standard on the GLX and the W8. Alloys shown available only on GLX.

²Bi-Xenon GDL headlamps available only on W8.

GLX exterior shown. Some features may not be available on some trim levels.

DESIGN

We'd never hold back on style,
but we won't smother you with it either.

The Monsoon® Sound System.

200 watts and an eight-channel amplifier will make your earlobes shimmy and shake. To make it as cool-looking as possible, we made it match the blue and red instrumentation panel, too. Now isn't that just like us?

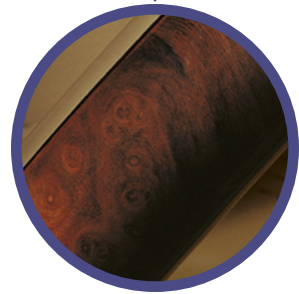

Eight-Way Programmable Seats.

These ergonomically designed buttons let you move higher, lower, further up, down, in, or out. You can program your three favorite seat positions, too. (Suggestion: save one for your mother-in-law.)

INTERIOR

Walnut Trim. We scrupulously inspect the wood we use. If it makes the cut, it's meticulously shaped and treated with round after round of delicate hand-polishing. That's how it gets its elegance and luster. And why you can't take your eyes off it.

Some fabrics to choose from.

Beige Velour

Gray Velour

Black Velour

PERFORMANCE

For us, it's unlikely the thrill of making great engines
will ever wear off.

170 hp

1.8T

Light in weight, compact in design, this engine has 5 valves per cylinder. That means you get better breathing for enhanced performance. Coupled with a Turbo, you get high torque starting at low rpm so you're quicker off the line. And high horsepower at high rpm provides you with exceptional passing power. Your fuel economy¹ is improved, and there are lowered emissions, too.

190 hp

V6

Six-cylinder smoothness is the big story here. With a total of 30 valves, the air-flow paves the way for dynamic performance. Variable valve timing and variable intake manifold give this V6 engine lots of torque over mid-range rpm here for quick acceleration. Not to mention improved fuel economy, and reduced emissions to boot.

270 hp

W8

This eight-cylinder engine was specially designed to accommodate the Passat Wagon's unique shape. And with four valves per cylinder here, well, you do the math. Its weight is significantly reduced, and the variable valve timing creates a flatter torque curve. What does that mean in English? Remarkable smoothness and power, right at your fingertips.

4MOTION™

Here's something special for those rainy days. The sunny ones, too.

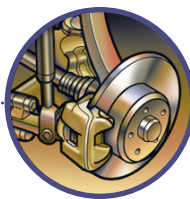

The better you balance gravity and traction, the easier it is to stay on your feet, right? Well, it's the same for a car. Enter 4MOTION™, a special kind of all-wheel drive that steps your driving experience up a notch. **Like a superhero that never rests**, it's there whenever duty calls, distributing power to your wheels and providing traction wherever it's needed most. Say a tire momentarily loses grip and starts to slip. 4MOTION™ will sense something's wrong and let the other tires know a friend's in need. In a flash they'll jump in and employ their own traction to help keep the car steady. How's that for teamwork? Not to mention added safety and control – rain or shine. Take a closer look at some of the engineering that makes it all possible.

THERE'S MORE @ UW.COM/4MOTION

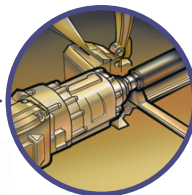

EDL (ELECTRONIC DIFFERENTIAL LOCK)

Operating independently on each axle, EDL controls how power is distributed between either side of the car. When ABS detects unnecessary wheel spin, EDL selectively applies brakes to that wheel only, causing the differential to "lock" and transferring power to the other wheels.

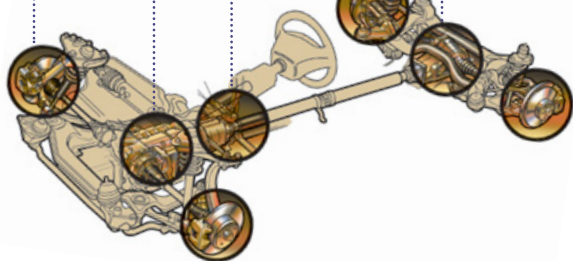

ABS (ANTI-LOCK BRAKING SYSTEM SENSORS)

ABS sensors basically act as lookouts for 4MOTION™. They pick up on unnecessary wheel spin then prod the ABS/EDL Control Unit to go to work. It does so by making sure that each and every wheel's power is individually maximized.

TORSEN® DIFFERENTIAL

This torque-sensing mechanical device is designed to distribute power from front to back. Its gears rotate in opposite directions so it can direct more power to whichever axle has more grip. Think it's massive, right? Actually, it's about the size of a melon.

4MOTION™ is optional on the GLX and standard on the W8.

Drivers wanted.®

ALL-AROUND
SAFETY

Safety.

Our most important standard feature.

Front Crush Zone. Helps to divert impact energy away from occupants in case of a collision.

Anti-Theft Alarm System. Scares away uninvited guests. (Otherwise known as burglars.)

Immobilizer. Prevents the Passat Wagon from being started up if an unauthorized key is used.

Electronic Stability Program.¹ For better handling and control. (Why skid if you don't have to?)

Bi-Xenon GDL Headlamps.¹ Behold as even the darkest of roads succumbs to the light.

Brake Assist System. Working with ABS, it quickly maximizes brake pressure to support you in critical braking situations.

Rear Crush Zone. Helps to divert impact energy away from passengers in case of a collision.

LATCH System. Lower Anchors and Tethers for CHildren. A standardized child seat attachment system for vehicles.

Interior Trunk Escape Handle. You never know – someone might accidentally lock themselves in and want to get out.

Anti-Theft Wheel Locks. We didn't make the wheels pretty so that just anyone could walk away with them.

Reinforced Body Panels. Contributing to the structural integrity of the Passat wagon.

Track-Correcting Torsion Beam Rear Axle. Angled mounts increase vehicle control as turns are completed.

Side Curtain Protection™ Airbags.² These extend down the roofline, helping to minimize head and upper torso injury.

Dual Front and Front Side Impact Airbags.² Deploying within a tenth of a second if needed.

Remote Central Locking System. Don't fumble for keys when you're in a rush to get in.

Anti-Intrusion Side Door Beams. Buying precious time for the side impact airbags to deploy.

Steering Column. Telescoping, height adjustable, and collapsible on impact.

Safety Cell Construction. A rigid cell of reinforced steel is built into every Passat wagon.

WARRANTY

Basic Warranty: Every Passat Wagon comes with a bumper-to-bumper New Vehicle Limited Warranty for 4 years or 50,000 miles, whichever comes first.³

Powertrain Warranty: The Volkswagen Powertrain Limited Warranty provides 5 years or 60,000 miles of protection, whichever comes first.

Anti-Corrosion: A fully galvanized steel body means we can offer you a 12-year unlimited mileage Limited Warranty Against Corrosion Perforation.

Roadside Assistance: The Passat Wagon has a 24-hour-a-day Roadside Assistance package,⁴ for 4 years or 50,000 miles, whichever comes first.

¹ Feature available on certain trim levels.

² Airbags are supplemental restraints only. Always use safety belts. Seat children only in the rear, using restraints that are appropriate for their size and age.

³ Wear and tear items and adjustments are excluded after the first 12 months or 12,000 miles, whichever comes first.

⁴ Roadside Assistance, for 4 years, provided by AAA and its member clubs. See dealer for details.
