Wheels on a car are analogous to the shoes on our feet.

They not only serve an important practical function, but also reflect our personal style. The technical challenge in wheel design is to minimize unsprung masses and provide strength, while maintaining the drive characteristics that the suspension engineers intended.

Only Genuine Mercedes-Benz wheels do this with certainty. Producing an assortment of sporty and elegant styles to match your vehicle's individual style at the same time is where artistry and technology converge.

Mercedes-Benz COMAND Navigation Map Update²

The world is changing every day.

▶ The Mercedes-Benz COMAND Navigation System is a factory-installed in-dash console that combines Global Positioning System (GPS) technology with detailed electronic maps to allow you to plan trips, navigate detours, and help prevent you from getting lost. (Vehicle location is determined by the GPS system.)

The system covers more than 4.6 million miles of navigable roads in the 48 contiguous United States, plus Hawaii and Canada.

The Navigation System also offers 1.6 million Points Of Interest in 40 categories including ATMs, hospitals, hotels, airports, museums and more.

Navigation Map Update²

Your Mercedes-Benz COMAND Navigation System relies upon a detailed electronic map to guide you to your destinations and help you find the services and attractions that you need and want in your daily life.

But things are constantly changing out there. Roads are added or diverted, restaurants open and close, hotels and hospitals are built, ATMs move. In fact, as much as 20 percent of the navigation data is updated every year. That is why Mercedes-Benz makes new, updated navigation data available to ensure that you always have the most current available navigation information.

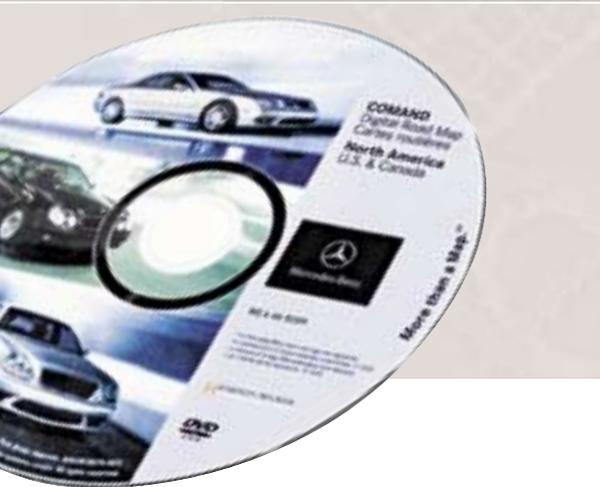

² COMAND Navigation system data represents the 48 contiguous United States, plus Hawaii (Oahu only) and Canada. Personal Navigation Devices system data represents the 48 contiguous United States and Canada excluding Alaska and Hawaii. Directional assistance provided only when GPS coverage is available. Maps do not cover all areas nor all routes within an area. While the navigation system provides directional assistance, the driver must remain focused on safe driving behavior, including paying attention to traffic and street signs. The driver should utilize the system's audio cues while driving and should only consult the map or verbal displays once the vehicle has been stopped in a safe place.

Portable Navigation Devices²

Keeping you on track.

Take your C-Class exploring Here, There – and just about Anywhere.

Maybe your C-Class lifestyle is more “on-the-go.” Mercedes-Benz Portable Navigation Solutions can help point you in the right direction. Get help finding the nearest Chinese restaurant, an unexplored antique shop, or an address in an unfamiliar city, all from a vast selection of locations in numerous categories. Mercedes-Benz Portable Navigation Solutions include full-featured portable units that can be transferred between vehicles, or taken “on-the-go.” Custom-mount installation solutions for select Mercedes-Benz vehicles even offer audio and electronic integration. Ask your dealer how Mercedes-Benz Portable Navigation Solutions can help you explore a new street, a new town – or a new world.
