

2014 PREMIUM FLEET EXPERIENCE

VOLVO. The Premium Fleet Experience

With over 13 years as an active supplier of commercial fleet vehicles, Volvo is committed to providing our customers with a premium fleet experience.

Volvo offers:

Extensive Product Range

We have a diverse array of vehicles to meet the needs of all types of customers – from sales reps to management to executives.

Exceptional Value

Over the years several Volvo models have been recognized by Vincentric™ as among the best fleet values thanks to their low total cost of ownership. Most significantly, the Volvo XC60 has won the Vincentric™ award as the "Best Fleet Value in America for 2010, 2011 & 2012."

Legendary Safety

Safety is Volvo's core value. It began with the invention of the V-type 3-point seatbelt in 1959. Most recently, our industry leading safety technology includes introduction of the first City Safety* and Pedestrian Detection systems.

Dealer Network

Wherever your fleet drivers are located, there is a fleet-minded Volvo dealer nearby and ready to deliver our **Premium Fleet Experience**. We offer complete major market coverage across the United States.

Table of Contents

Premium Customer Care

Volvo enhances fleet customer treatment and satisfaction by providing consistent order-to-delivery times with priority order placement at the factory, direct-order relationships with major fleet leasing companies, and premium courtesy delivery at the customer's nearest Volvo Retailer.

To reinforce your corporate image . . . enhance your executive selector . . . and improve recruitment, reward and retention efforts at your organization . . . we encourage you to consider Volvo for your fleet needs.

*Frontal Collision Warning System with Full Auto Brake.

FLEET TEAM

PRODUCT RANGE

DEALER NETWORK

Wherever your fleet drivers are located, there is a fleet-minded Volvo dealer nearby and ready to deliver our Premium Fleet Experience. We offer complete major market coverage across North America. Our exceptionally stable dealer network is here today and here tomorrow to serve your needs.

LEGENDARY SAFETY

Volvo means safety. It begins with our Volvo Safety Center in Gothenburg, the most technologically advanced crash-test facility in the world. Most recently, we have pioneered such landmark safety features as City Safety – Forward Collision Warning System with Full Auto Brake, and Distracted Driver Solutions.

PRODUCT RANGE

Volvo's range of cars is now wider than ever, from our dynamic Volvo S60 sedan, to our flagship Volvo S80 sedan, to our versatile crossovers, the Volvo XC90, XC60 and XC70. The Volvo lineup is sure to fit every level of your organization, from general use to management and executives.

FLEET TEAM

Volvo has been in the fleet business for over thirteen years with an experienced fleet management team leading the way. Our fleet business is rapidly growing as a result of our commitment to deliver an unmatched combination of product quality and personal service to our fleet clients.

INTERNATIONAL REACH

Should you require help coordinating fleet needs worldwide, Volvo is there. Our international network of operating units ensures your buying power is maximized.

LIFECYCLE COSTS

We are committed to helping you manage the acquisition, maintenance and depreciation costs of your fleet vehicles. The high residual values on our vehicles helps control depreciation costs, especially with a Volvo New Car Warranty that provides comprehensive coverage for 4 years or 50,000 miles (whichever comes first). Our team is focused on providing a low cost of ownership during the lifecycle of the vehicles in your fleet.

- Driver & Front Passenger Supplemental Restraint System - Three Step Air Bags
- **Personal Car Communication w/Keyless Drive**
- **Rain Sensor Windshield Wipers**
- **Tunnel Detection**

MAJOR OPTIONAL EQUIPMENT

- Blind Spot Information System (BLIS)
- Metallic Paint
- Power Glass Moonroof, 3.2 (Std. T6)
- Dual-Xenon Headlamps w/Active Bending Lights (ABL)
- Heated Front Seats
- Accessory Prep Cable

OPTIONAL PACKAGES

- Climate Package
 - o Heated Windshield
 - o Heated Steering Wheel
 - o Heated Front & Rear Seats
 - o Heated Windshield Washer Nozzles
 - o Humidity Sensor
 - o Interior Air Quality Sensor (IAQS)
- Inscription Package (T6)
- Technology Package
 - o Adaptive Cruise Control
 - o Collision Warning w/Auto Brake
 - o Distance Alert
 - o Driver Alert Control
 - o Lane Departure Warning
 - o Road Sign Information
 - o Active Highbeams
 - o Pedestrian Detection w/Full Auto Brake

VEHICLE LEVELS

- Premier Plus
- Platinum

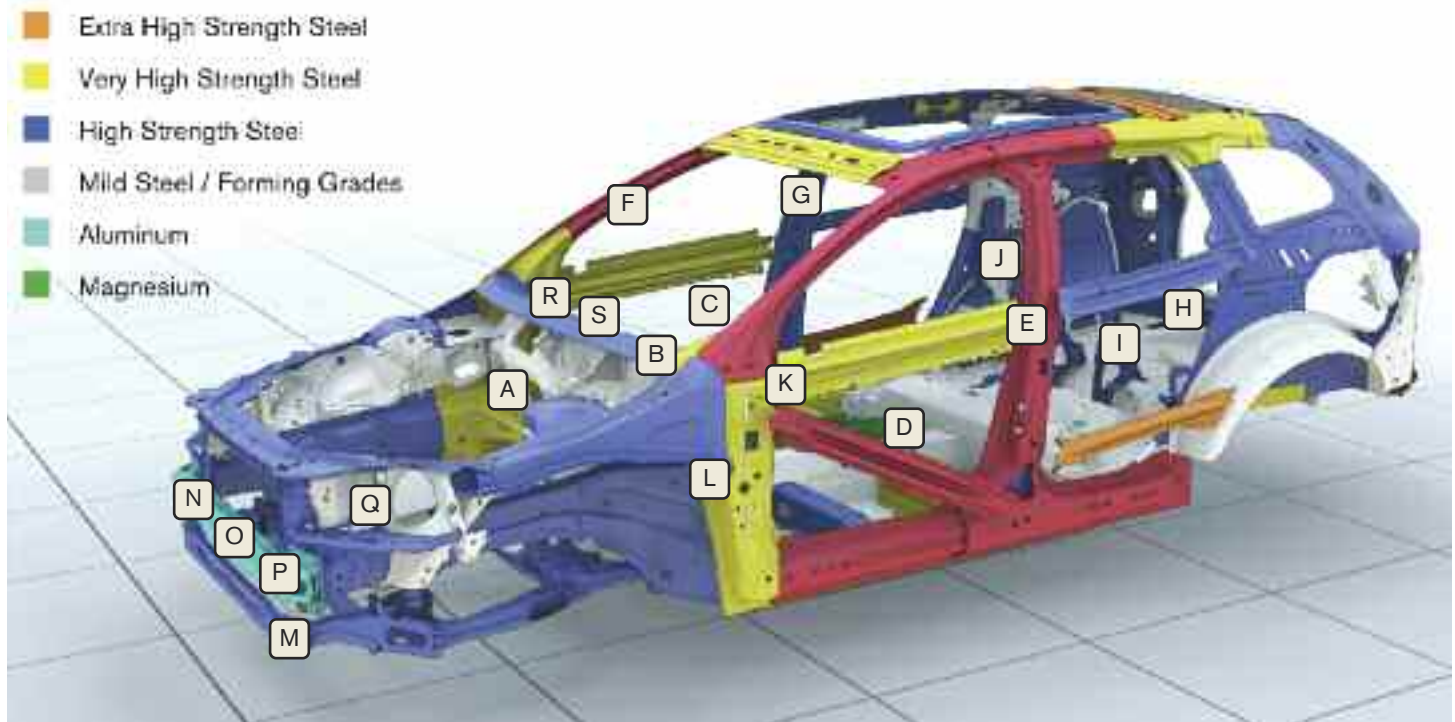

*See your local retailer for details.

† Dimensions shown may vary due to optional features and/or production variability.

‡ Volvo uses clearcoat paint for protection and beauty. All colors may not be available on all series.

For specific Canadian information, please contact the Volvo fleet manager in Toronto.

A. UNIQUE ENGINE INSTALLATION

Our vehicles go through a series of computer simulated frontal crash tests without the engine installed. The engines are then designed to fit within the empty space that remains after the simulation crash test. In a real collision the engine may be shunted rearward before contacting the bulkhead.

B. SAFETY CAGE

The robust safety cage is designed as an interactive web of steel profiles that surround the occupants. The safety cage consists of four different grades of steel to help provide optimum protection and low weight.

C. ADAPTIVE AIRBAGS

The driver and front passenger airbags assist in protecting the head, face and chest in a frontal collision. They monitor the force of the impact and adapt inflation to the severity of the collision, with full or reduced pressure, depending on the impact force. The driver's airbag also interacts with the steering column, which collapses in a controlled way so that the airbag can help provide optimum protection. If the collision force is not sufficient to trigger the airbag, only the seat belt pre-tensioner is activated. The passenger airbag is automatically connected or disconnected by sensors that monitor the weight of the person in the front passenger's seat.

D. SIPS (SIDE-IMPACT PROTECTION SYSTEM)

SIPS distributes crash forces in a side impact across a larger part of the car's body in order to help minimize the strain on the occupants. Extra reinforcement in the doors, door pillars and dashboard, among other areas, enhances side impact protection still further. The IC (Inflatable Curtain) for all the car's outbound occupants and the front side airbags help reduce the risk of injury to the head, chest and hips. The rear doors feature energy-absorbing blocks that help distribute incoming collision forces in a side impact.

E. PROTECTION IN COLLISIONS INVOLVING LARGER VEHICLES

Sturdy upper front side members improve protection in a frontal collision with a larger vehicle. The door pillars and door sides feature extra reinforcement to help withstand impacts if the car collides with a tall vehicle such as an SUV.

F. IC (INFLATABLE CURTAIN)

IC (Inflatable Curtain) offers occupant protection irrespective of whether you are in the front or rear seat. It inflates in certain side impacts to help protect the heads of all outbound occupants. For added safety during multiple collision sequences or collisions of longer duration, it stays inflated for up to three seconds.

G. SEAT BELTS WITH PRE-TENSIONERS AND SEAT BELT REMINDERS

All seats have head restraints and 3-point seat belts. In a crash, the front and rear outboard seat belts are tensioned across according to the size of the occupant, then slacken slightly so that the occupants are restrained by the airbags in a more controlled manner.

H. LOAD SAFETY

Loads should be secured using the eyelets in the floor of the trunk

I. CHILD SAFETY

Volvo has designed this vehicle with the safety of children in mind. Smaller children up to the age of three, however, travel most safely in a rearward-facing child seat. The integrated booster cushions help ensure that the seat belt is at the right height for somewhat older children. The rear outboard seats are equipped with ISOFIX/LATCH anchors.

J. WHIPS (WHIPLASH PROTECTION SYSTEM)

WHIPS helps reduce injury by cradling the spine and neck in a controlled way if the car is hit from behind at low speeds. It is built into the front seats and activated by a sufficiently severe impact.

K. ENERGY-ABSORBING INTERIOR

All of the panels and door sides are padded with energy-absorbing materials to help reduce the risk of injury to the occupants. The ignition lock is located on the dashboard, which helps reduce the risk of knee injuries to the driver.

L. PROTECTED ZONES

Volvo's patented frontal structures with various zones are designed to distribute incoming collision forces. An extra-rigid cross member under the dashboard helps reduce intrusion into the cabin and helps protect feet and legs. The pedals are also designed to reduce the risk of foot injuries.

M. ENERGY ABSORBING STRUCTURE

The front and rear structures dissipate and distribute incoming collision forces to reduce the effects on the car's occupants. The bumpers are reinforced with a beam made of boron steel to help withstand low-speed knocks without deforming the body structure.

N. PEDESTRIAN PROTECTION

The smooth front and energy-absorbing structure with its soft plastic beam ahead of the bumper can help reduce the risk of injury to unprotected road users. The hood and front fenders help absorb crash energy for anyone colliding with the car.

Pedestrian Detection

City Safety

O. CITY SAFETY

City Safety is a Volvo Car Corporation developed low-speed auto brake technology that helps avoid or reduce the consequences of an accident.

P. PEDESTRIAN DETECTION

Using a digital camera and radar, Collision Warning with Full Autobrake constantly scans the road ahead. Shapes identified as people at risk will trigger a warning. More importantly, the system will employ full brake force to stop your vehicle – if you don't.

Q. ACTIVE HIGH BEAM

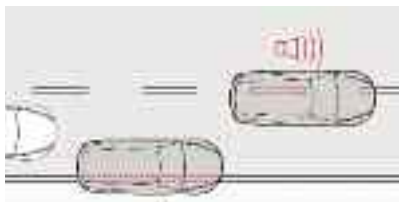

High beam headlights automatically switch to low beam when opposite traffic is detected entering the high beam zone. Available only in combination with Technology Package.

R. ROAD SIGN INFORMATION (RSI)

When traffic speed signs appear on the road, the system displays them to the driver. RSI utilizes the Forward Looking Camera (FLC) and navigation. Requires Technology Package.

S. TUNNEL DETECTION

Automatically turns on the headlights when the vehicle enters a tunnel and returns lights to the previous setting when the vehicle exits a tunnel. This sensor is part of the Rain Sensor, so there is no sign of it on the exterior. Note that the light switch now has a new position marked "A."

Lane Departure Warning

VOLVO SAFETY

VOLVO CITY SAFETY SYSTEM - STANDARD EQUIPMENT

FACTS

Approximately 50% of collisions occur at low speeds.

(Source: www.moneyinstructor.com)

Drivers spend more than 50% of their time behind the wheel engaged in distracted behavior.

(Source: AAA Foundation for Traffic Safety)

Distracted driving contributes to up to 8,000 crashes every day.

(Source: AAA Foundation for Traffic Safety)

Sending or receiving a text takes a driver's eyes off the road for an average of 4.6 seconds. At 55 mph, this is the equivalent of driving the length of a football field.

(Source: US Department of Transportation)

Using a cell phone while driving—whether it's hand-held or hands-free—delays a driver's reaction as much as having a blood alcohol level of .08%.

(Source: University of Utah)

Driving while using a cell phone reduces the amount of brain activity associated with driving by 37%.

(Source: Carnegie Mellon University)

HOW IT WORKS

- A laser sensor mounted in the upper section of the windshield monitors traffic in front of the vehicle.
- The sensor determines the closing velocity.
- When the sensor determines an impending collision, City Safety™ will trigger brief, forceful braking if a low-speed collision is imminent.
- From 2 to 9 mph, City Safety™ may bring the car to a complete stop.
- Between 9 and approximately 30 mph, City Safety™ can help prevent or reduce the effects of a collision.
- City Safety is active up to approximately 30 mph, and is inactive below 2 mph.
- If City Safety is activated, it will apply the brakes and a message will appear in the information display to indicate that the system is/has been active.

The technology behind City Safety is a "World First," developed exclusively by Volvo. City Safety is standard on the 2014 Volvo S60, S80, XC60 and XC70—no one else offers this technology standard.

CUSTOMER BENEFITS

- 1 Helps prevent driver and passenger whiplash and other collision-related injuries.
- 2 Can reduce impact speeds when a collision is unavoidable.
- 3 Works to reduce repair costs by avoiding collisions and possibly reducing their impact, leading to lower insurance premiums.
- 4 XC60s with City Safety file 27% less insurance claims than similar vehicles without. *(Source: Insurance Institute for Highway Safety and Highway Loss Data Institute)*
- 5 The Insurance Institute for Highway Safety (IIHS) states the City Safety technology helps reduce, and even prevent, low speed collisions.

ACCESSORIES Port-Installed

Volvo is pleased to offer this program to our Commercial Fleet customers. The Port-Installed Accessories Program* lets you add a select group of Volvo's most popular accessories to vehicles that have already landed at our ports. These accessories are professionally installed by Volvo technicians and are covered by Volvo's 4-year, 50,000 mile new car limited warranty. Better yet, the cost of the accessory is included on the invoiced price of the car. This allows you to add the cost into the lease payments. It's as if these accessories were ordered and installed right at the factory.

ENVIRONMENT

Caring For The Environment

TO CARE

Concern for the environment is part of your driving experience, no matter which Volvo you choose. You get a fuel efficient car which meets very strict emission standards. It is quite simply more enjoyable to drive a car that takes the environment into consideration.

CLEAN INSIDE

A cabin air filter ensures that dust, exhaust particles and pollen do not enter the cabin through the ventilation system. Moreover, interior components such as the ignition key, center console and parking brake handle button are tested with regard to contact allergies.

CLEAN OUTSIDE

High efficiency engines reduce fuel consumption, thereby also reducing emissions of carbon dioxide, a greenhouse gas. Advanced engine emission control technology eliminates 95-98 percent of carbon monoxide, hydrocarbons and nitrogen oxides from the exhaust gases. The catalytic converter is positioned right beside the engine so it gives full exhaust conversion more quickly after a cold start. The engines already meet very stringent ULEV II emissions standards. PremAir coating on the radiators installed on our 3.2L PZEV engines can convert up to 75% of the

ground-level ozone in the radiator cooling air into oxygen, another step towards a cleaner environment.

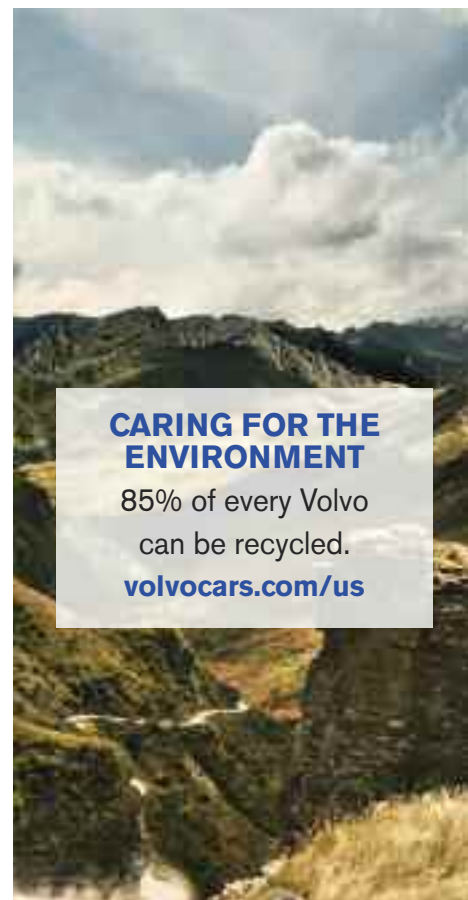

CLEAN ALL ITS LIFE

In every Volvo, environmental care is built in from the initial design and engineering stages. The car is built in one of the automotive world's cleanest factories, and 85 percent of every Volvo can be recycled. But we wanted to give you additional information about the environmental impact of your Volvo during its entire life cycle. That's why all Volvo models come with EPI (Environmental Product Information). It gives the car buyer an overview of the car's environmental impact throughout its lifetime, and thus makes it easier to compare the eco performance of Volvo's various models and engine alternatives. More information can be viewed at www.volvocars.com/experience/environment.htm

CONTRIBUTING TO SUSTAINABLE DEVELOPMENT

Volvo Cars aims to be a leader in corporate

citizenship ensuring a balance between the needs of the company, its customers, society, and future generations. Environmental responsibility is an important part of this effort, and so too is a far reaching undertaking to safeguard society's interests, in Volvo's role as an employer and as a builder of that society, independently and together with other companies, authorities and organizations. Our annual "Corporate Citizenship" report is available at www.volvocars.com/citizenship.

FSM

Factory Scheduled Maintenance

Volvo is committed to a premium fleet experience for its customers along with driving down your lifecycle costs. To further enhance your fleet experience, all 2014 model year Volvo vehicles sold new to a fleet customer and registered in the US by an authorized Volvo Retailer will include Complimentary Factory Scheduled Maintenance. This program provides scheduled maintenance coverage for the first three services or 30,000 miles, is designed to complement your Volvo warranty, and will help to ensure trouble-free operation of your Volvo vehicle. Coverage includes factory recommended maintenance including oil and filter changes, checks and adjustments as listed in the Warranty and Maintenance Records Information booklet, for the first three maintenance services at intervals of 10,000, 20,000 and 30,000 miles. See your Volvo Retailer for details.

FSM not available in Canada.

A-PLAN BY VOLVO

Special Vehicle Pricing For All Employees of Our Fleet Customers

The A-PLAN BY VOLVO Corporate Partner Program is an exclusive arrangement that allows all your employees to purchase or lease new Volvo vehicles at discounted, non-negotiated prices that are the same prices as employees of Volvo Cars of North America pay for their vehicles.

These prices represent a 6% (4% in Canada) discount off the vehicle's Manufacturer Suggested Retail Price.

This program is a wonderful incentive to your employees, who can feel that they are getting the benefits of your relationship with Volvo Cars of North America.

There is no cost to your company or any administrative management burden. Simply register your company at www.aplanbyvolvo.com/companyregistration and your employees have immediate access to these special discounted prices.
