THE ALL-NEW 2022 TUNDRA

The new definition of grit.

Completely redesigned to outperform.

The all-new 2022 Tundra is the toughest, most capable, and advanced full-size truck we've ever made. At Toyota, that's what grit is all about – evolving the way we do things, so you can do more with your truck. Grit is more than just dirt roads and muddy tires. And that's why the new Tundra has been redesigned to offer improved performance, with a choice of powerful, efficient engines and impressive towing and payload capacity. It also offers premium refinements, a chiselled design, and all the tech you need to get you where you need to go in comfort and style. A truck that gives you all that? That's Tundra. And that's the new definition of grit.

[Learn More](#)

TRD PRO shown (available spring 2022)

PERFORMANCE

Dynamic performance in every grade.

Power and performance, for maximum excitement.

Tundra's intelligent strength starts under the hood, with two powerful and efficient engines to choose from. The 24-valve Dual Overhead Cam V6 engine is chain driven and features Dual VVT-i. With a water-cooled intercooler, this highly efficient twin-turbo 3.5 litre V6 actually improves on the outgoing V8 engine in every way, producing 389 horsepower and 479 lb.ft. of torque. With the i-FORCE MAX hybrid engine (available spring 2022), performance improves to 437 horsepower and a whopping 583 lb.ft. of torque. Both configurations are mated to a new 10-speed Direct Shift Automatic Transmission. The result? Extraordinary towing, hauling, and driving performance with unheard of fuel economy.

TRD PRO shown (available spring 2022)

PERFORMANCE

The quality and durability you've come to expect from a Toyota truck.

NEW SUSPENSION

Tundra's improved suspension enhances fuel efficiency and ride comfort, not to mention performance and handling. The redesigned double wishbone front suspension offers straight-line stability that maintains better tire contact on the road at all times, while the Adaptive Variable Suspension adjusts damping force based on changing road conditions. The new Multi-Link Rear Suspension ditches leaf springs in favour of coil springs for a smoother on- and off-road experience and much improved handling.

LOCKING REAR DIFFERENTIAL

The available Locking Rear Differential distributes engine power evenly to both rear wheels so they move at the same speed, providing more grip in low-traction conditions such as mud, ice, or snow.

FOX™¹⁷ INTERNAL BYPASS SHOCKS

For maximum off-road performance, TRD PRO grades are fitted with 2.5-inch diameter FOX™ internal bypass shocks that provide position sensitive dampening and improved comfort on uneven terrain.

OPTIONAL OFF-ROAD UPGRADES

Multi-Terrain Select offers adjustable settings to help control wheelspin on a variety of terrain. Crawl Control functions as a low-speed, off-road cruise control that allows the driver to focus on steering while it maintains one of five selectable speeds. Downhill Assist Control is another off-road feature that helps the driver navigate tricky slopes by limiting the speed of the vehicle during descent.

[Learn More](#)

TRD PRO shown (available spring 2022)

TOWING POWER

The ultimate towing machine.

Outstanding towing capacity and driver assist technology.

With a towing capacity of up to 12,000 lb.,¹ Tundra has the muscle to deliver big payloads with ease and confidence. Along with Tundra's strength and power come an array of intelligent towing features designed to make trailering less of a daunting task. An unprecedented number of available exterior cameras provide a 360-degree view,² while the Trailer Backup Guidance with Straight Path Assist³ gives you the confidence to manoeuvre and back up a trailer with ease. The available TOW/HAUL mode gives you added control when hauling heavy loads up and down steep terrain by preventing the transmission from "hunting" for the right gear. And the new available Air Suspension automatically load-levels the rear height to find the right balance between truck and trailer to keep the wheels even and your cargo in check at all times.

[Learn More](#)

INGENIOUS FUNCTIONALITY

Capable, right down to the last detail.

OPTIONS APLENTY

Tundra features your choice of two outstanding four-door options. The Double Cab models are available in a 6.5-foot bed and an 8.1-foot bed, while the CrewMax models are available in a 5.5-foot bed and a 6.5-foot bed.

STRONGER FULLY BOXED STEEL FRAME

The stronger, stiffer frame structure is an example of Tundra's innovative thinking, creating a full-size pickup that you can always depend on. The redesigned high-strength fully boxed steel-ladder frame was widened in the rear to improve stability, towing capability, ride comfort, and handling dynamics.

DURABLE AND LIGHT RESIN BED

The truck bed is made from a new Sheet-Moulded Compound construction that is both lightweight and extremely strong to protect against dents, impact dings, and rust, as compared with traditional steel decks.

TAILGATE RELEASE

The tailgate uses lightweight construction techniques to reduce weight by 20 percent compared with the outgoing model. And the innovation carries on with a convenient release button on the tail light to lower the tailgate, which can be activated with even a push of your elbow for when your hands are full.

TRD PRO shown (available spring 2022)

EXTERIOR STYLING

Capability never looked so good.

A bold look with a satisfying feel.

Tundra's new chiselled exterior design features a muscular front end with high mount head lamps, blacked out grille, 18- or 20-inch wheels, and a Tundra-embossed tailgate. For all-terrain enthusiasts, Tundra offers unique TRD Sport and Off-Road packages that are designed to give you a thrilling performance edge on the blacktop, or on adventurous terrain. With a choice of multiple bed lengths, six distinctive grades, and exciting package upgrades, there is a perfect Tundra just for you.

[Learn More](#)

TRD PRO shown (available spring 2022)

INTERIOR DESIGN

Tough on the outside. Premium on the inside.

A premium interior designed to offer the utmost in comfort and sophistication.

Tundra's exceptional interior stands apart with its premium materials and quality feel that both driver and passengers will enjoy. Unlike most trucks, Tundra's horizontal layout helps integrate the instrument panel to make it easier to access and use. Durable materials are used on high-contact surfaces like the armrest, dash, and door to avoid scuffs and scratches. The spacious cabin places comfort and convenience above all else, with available Heated and Ventilated Leather Front and Rear Seats, Heated Steering Wheel, Authentic Wood Trim on select models, Panoramic Moonroof, and Smart Key System with Push Button Start.

TECHNOLOGY

The brains to match the brawn.

TRD PRO shown (available spring 2022)

EMPOWERING TECH

Tundra's all-new Toyota Multimedia system features an 8-inch or 14-inch HD touch-screen display with wireless Apple CarPlay™⁴ and Android Auto™⁴. The Drive Connect package (Cloud Navigation, Intelligent Assistant⁵ and Destination Assist) elevates your driving experience, while available features like Qi Wireless Charging⁶ and Head-Up Display give you the convenience you need while on the go.

TRAILER BACKUP GUIDANCE WITH STRAIGHT PATH ASSIST³

Trailer Backup Guidance provides multiple camera views to aid in maneuvering trailers with confidence and ease. When Straight Path Assist is activated, the system takes over steering inputs and automatically keeps the trailer in a straight line while backing up.

360-DEGREE CAMERAS² KEEP YOU COVERED

With cameras situated in the front, side, rear, hitch, and bed, Tundra provides a 360-degree view to keep an eye on your surroundings and tough-to-see areas around the truck and trailer.

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT⁷

The available Blind Spot Monitor with Rear Cross-Traffic Alert uses radar technology to help identify vehicles that may not be visible when changing lanes or backing out of a parking space. When a vehicle is detected, a warning indicator illuminates on the appropriate side view mirror.

[Learn More](#)

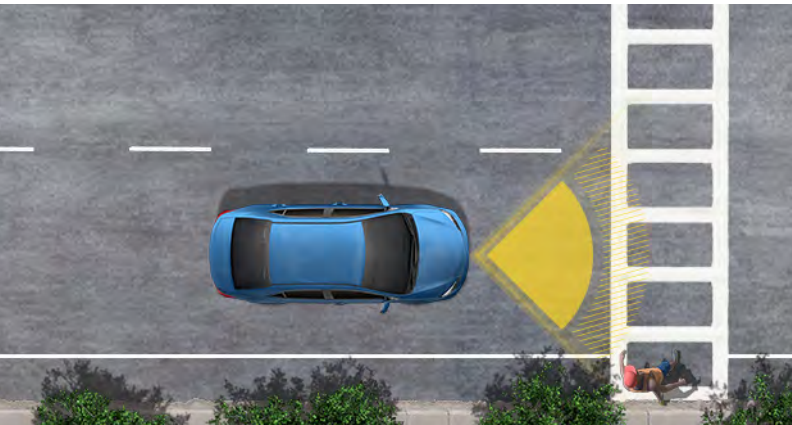

SAFETY

Toyota Safety Sense™

Toyota
Safety
Sense

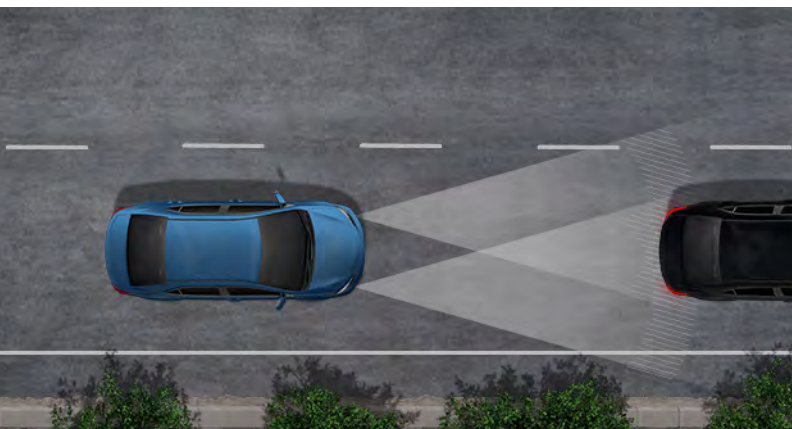

No matter what roads you travel, Toyota Safety Sense™⁸ (TSS) 2.5 is always there to help keep you – and those around you – as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2022 Tundra, and it is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

[Learn More](#)

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION⁹

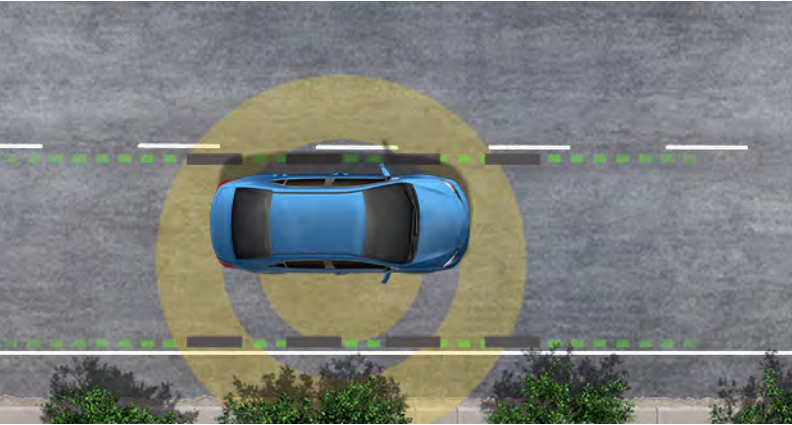

It provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system introduces Left Turn Intersection Support, which may detect oncoming vehicles when performing a left turn at an intersection and provide automatic braking in certain conditions. The system may also detect oncoming pedestrians when turning left or right and provide automatic braking in certain conditions as well. The PCS system in TSS 2.5 is also enhanced with the new Emergency Steering Assist feature that is designed to stabilize the driver's emergency steering manoeuvre and correct the vehicle's trajectory when avoiding a pedestrian, bicyclist, or another vehicle.

AUTOMATIC HIGH BEAMS¹⁰

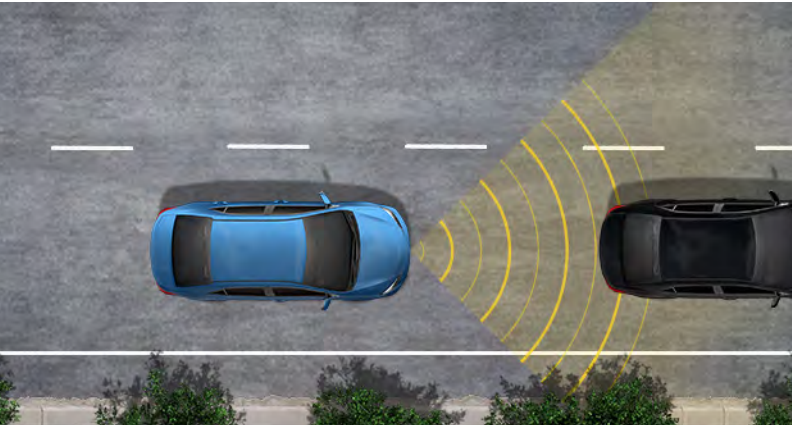

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

[Learn More](#)

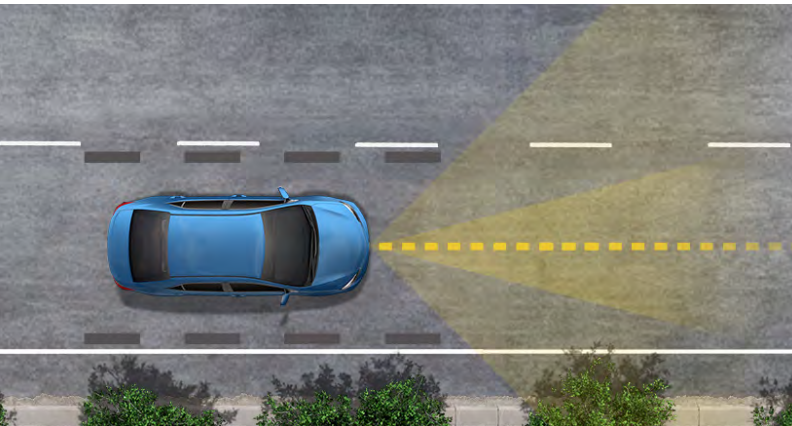

LANE DEPARTURE ALERT WITH STEERING ASSIST¹¹ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL¹²

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance. DRCC receives the Curve Speed Management function in TSS 2.5. This system will automatically decelerate when driving through a curve, if required, and return the vehicle to the preset speed after passing the curve.

LANE TRACING ASSIST¹³

It provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation. Lane Tracing Assist performance has been enhanced in TSS 2.5.

Get financing

Toyota Financial Services can help you get behind the wheel of a new Toyota faster with quick & easy online pre-approvals.

[Financial Services](#)

(1) Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total Weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weight your vehicle without passengers or cargo. Installation of a tow hitch receiver and/or accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations. (2) Exterior cameras do not provide a comprehensive view of the areas around the vehicle and you should also look around the vehicle, using mirrors to confirm clearance. Environmental conditions may limit effectiveness and view may become obscured. See Owner's Manual for additional limitations and details. (3) Trailer Backup Guide with Straight Path Assist. The backup camera does not provide a comprehensive view of the rear area of the vehicle/trailer and you should look around the vehicle and use mirrors to confirm clearance. Additionally, when using straight path assist, the driver is still responsible for safe operation as there are environmental conditions and design limitations to system performance. See Owner's Manual for additional limitations and details. (4) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (5) Drive Connect availability and accuracy depend on factors outside of Toyota's control, including an operative telematics device, a cellular connection, GPS signal, and the availability of a compatible wireless network, without which system functionality and availability may be limited or precluded. Services not available in every city or roadway. Services subject to change at any time without notice. Requires app download/registration and subscription required after trial (if applicable). Terms of Use apply. See Owner's Manual and for additional limitations and details. To learn about Toyota's connected services data collection, use, sharing and retention practices, please visit <http://www.toyota.ca/connected-services-privacy>. (6) Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns. (7) Do not rely exclusively on the Blind Spot Monitor System and Rear Cross-Traffic Alert System. They are not collision-avoidance systems or substitutes for safe and attentive driving. (8) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (9) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian and Bicycle Detection system is designed to detect a pedestrian and bicyclist ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians and bicyclists, driver input and weather, light and road conditions. Do not overly rely on the Intuitive Intersection Support system. Always visually confirm that it is safe to proceed. System may not operate depending on the traffic conditions and intersection configuration. Intersection Support will NOT detect pedestrians crossing the road in the same direction as the vehicle. Emergency Steering Assist may not operate if an oncoming vehicle or an obstacle that would prevent a safe evasive manoeuvre are detected. (10) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (11) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (12) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (13) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (14) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (15) Not all exterior and interior colour options are available for every model. (16) Services are dependent upon connection to a compatible 4G wireless network, provided by a third-party wireless service provider. Toyota is not responsible for 4G cellular network discontinuance and will not provide compensation for reduced service availability. Based on current information, 4G network availability may end as early as 2029. (17) FOX is a registered trademark of FOX Factory, Inc.

Details on the above features can be found in the Owner's Manual or through your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure.
