

The New FORD V-8

***EXPRESS DELIVERY TRUCKS***

**DIFFERENT** — The difference has been removed from the bottom of the outer garment. Draping forces always try to spread out, and when the cloth is draped over a body part, it tends to bunch up. This is why the shoulder area of a dress is often draped in such a way as to keep the shoulder from appearing too wide. Draping forces also tend to pull the fabric toward the center of the garment. This is why the bust area of a dress is often draped in such a way as to keep the bust from appearing too wide. Draping forces also tend to pull the fabric toward the center of the garment. This is why the bust area of a dress is often draped in such a way as to keep the bust from appearing too wide.

**ULL TORQUE** **AND TORQUE** **REDUCERS** **DRIVE** **REDUCERS** **FOR** **INDUSTRIAL** **APPLICATIONS**

With the introduction of the new ULL series of torque limiters, we have added another dimension to our product line. The ULL series is designed to provide a safe and reliable method of protecting machinery from damage due to overloading or over-torquing.

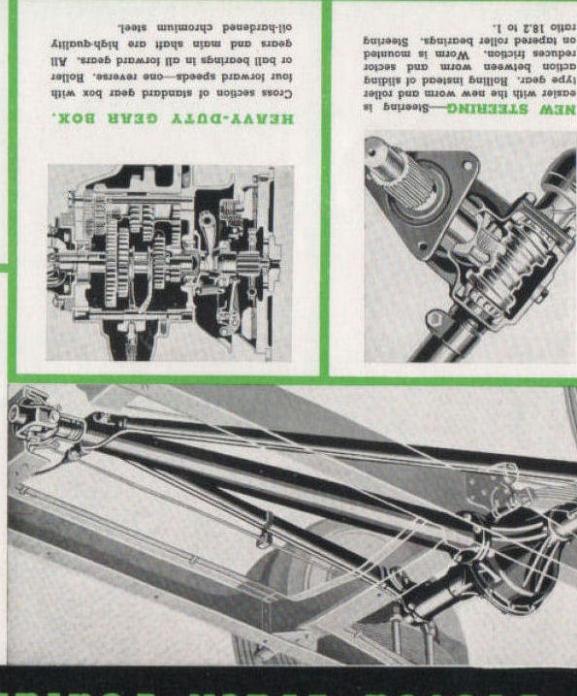

The ULL series consists of two main types: the ULL-1 and the ULL-2. The ULL-1 is a single stage device, while the ULL-2 is a two-stage device. Both models are available in various sizes and ratings, ranging from 1/2 to 100 horsepower.

The ULL series features a unique design that allows for easy installation and maintenance. It is constructed of high-quality materials, including stainless steel and aluminum, which ensures long life and reliability. The device is also designed to withstand harsh environments, making it suitable for use in industrial applications.

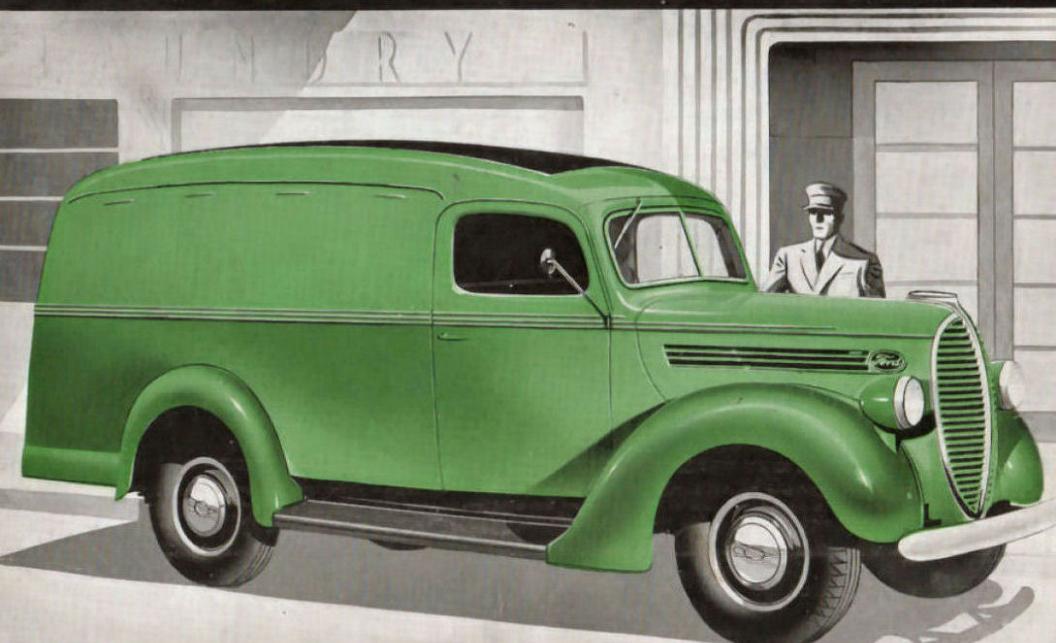

One of the key features of the ULL series is its ability to provide a safe and reliable method of protecting machinery from damage due to overloading or over-torquing. This is achieved through the use of a built-in torque limiter that automatically disconnects the motor from the load when the torque limit is exceeded. This prevents the motor from being damaged by overloading or over-torquing, which can occur in industrial applications.

The ULL series is also designed to be easy to maintain. The device is built with a simple design that makes it easy to access and service. The bearings are sealed and pre-lubricated, which reduces the need for regular maintenance. The device is also designed to be compact, which makes it easy to install in tight spaces.

In conclusion, the ULL series of torque limiters is a valuable addition to our product line. It provides a safe and reliable method of protecting machinery from damage due to overloading or over-torquing, and is designed to be easy to maintain. We believe that the ULL series will be a valuable addition to your industrial applications.

## S P E C I F I C A T I O N S

**ENGINE:** V8 engine with aluminum cylinder heads.  
**CYLINDER BLOCK:** Cast iron containing a high percentage of steel for long life.  
**CRANKSHAFT:** Cast alloy steel.  
**CONNECTING RODS:** Manganese steel.  
**PISTONS:** Light weight alloy.  
**CAMSHAFT:** Cast alloy iron.  
**VALVES:** Heat resisting chrome nickel alloy steel. Inlet and exhaust valve inserts—tungsten steel.  
**ENGINE COOLING:** Direct pressure to all crankshaft, camshaft and connecting rod bearings.  
**COOLING:** Two centrifugal water pumps self-lubricated.  
**FUEL SYSTEM:** Dual downdraft carburettor with oil bath air cleaner, mechanical fuel pump.  
**IGNITION:** Direct driven with distributor and coil in waterproof housing governed.  
**BATTERY:** 17 plate situated on cowls.  
**CLUTCH:** Fly plate pressure increased so that centrifugal force as engine speed is increased 11 inch diameter friction areas, 133.7 sq. inches.  
**TRANSMISSION:** Truck type. Four forward speeds and reverse.  
**UNIVERSAL JOINTS:** Evil eye enclosed.

FORD OWNERS ALONE ENJOY THIS MOST MODERN METHOD OF MONEY-SAVING, TIME-SAVING MAINTENANCE — THE ENGINE EXCHANGE PLAN

When, after scores of thousands of miles of dependable service, the time finally comes for engine overhaul, you can drive into any Ford Dealer's and exchange your old engine for a factory-reconditioned, precision-built engine. The exchange engine carries the same warranty as a new engine. The changeover (requiring only a few hours) costs far less than an equally complete engine overhaul, takes a fraction of the time of an engine overhaul.

*Ford Motor Company of Australia Pty. Ltd., whose policy is one of continual improvement, reserves the right to change specifications and prices at any time without notice or incurring liability to purchasers.*

THE FORD MOTOR COMPANY OF AUSTRALIA PTY. LTD. ALSO HAS AVAILABLE THE FOLLOWING COMMERCIAL MODELS:-

## THE NEW FORD V-8 EXPRESS DELIVERY TRUCKS

DESIGNED ESPECIALLY FOR ECONOMICAL PETROL CONSUMPTION.

Specifically Built for 1-ton, 30-cwt. Payloads.

Complete Range of Body Styles.

Every model in the new Ford 122" W.B. Express Delivery range is built along truck lines. Engine, clutch, gear box, frame, rear axle assembly—are rugged for long service and a high margin of load capacity for payloads up to 30 cwt.

The truck type features of these units bring to the 1-Ton 30-cwt. field a new conception of economical "express" delivery service.

Two chassis models are available: 1-Ton and 30-cwt. capacities respectively in a range of body styles including: Dropside, Platform, Steel Straightside, Welltype and a new Panel Van.

Note the following features which are standard equipment: Truck type Ford V-8 engine. Oil bath air cleaner. Centriforce truck clutch. 4-speed gear box. Full torque tube drive and radius rods with universal joints and drive shaft fully enclosed. Full floating rear axle with straddle

mounted pinion. New powerful hydraulic brakes. Refinements incorporated in the 1939 model express delivery trucks include: Improved down-draught carburetor. Newly designed intake manifold for greater petrol economy. Larger main bearings, heavier crankshaft and new coated piston rings for long life. Tungsten steel inserts in both inlet and exhaust valve seats. Perfected hydraulic brakes with total braking area of 201.21 square inches.

Standard tyre equipment at list price.

Express Delivery 1-Ton—4 17 x 7.00.

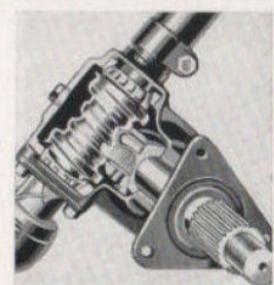

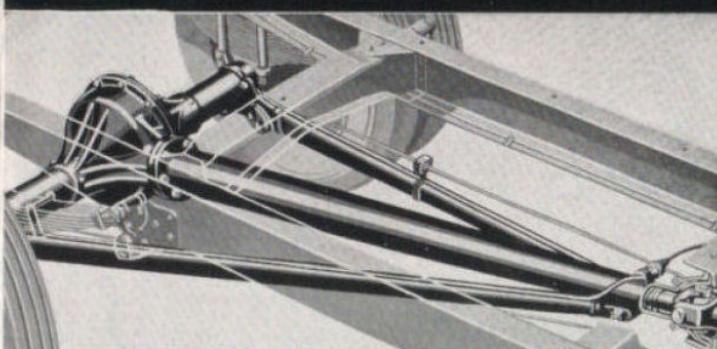

Express Delivery 30-cwt.—Front, 2 17 x 7.00. Rear, 2 17 x 7.50 8-ply.

Gross vehicle capacity:

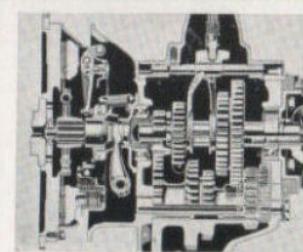

1-Ton, 6,500 lbs.

30-cwt., 7,250 lbs.

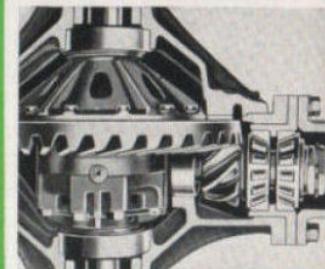

## Proved Truck Features for Long Life

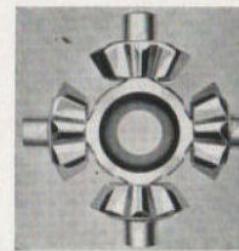

**NEW STEERING**—Steering is easier with the new worm and roller type gear. Rolling instead of sliding action between worm and sector reduces friction. Worm is mounted on tapered roller bearings. Steering ratio 18.2 to 1.

**HEAVY-DUTY GEAR BOX.** Cross section of standard gear box with four forward speeds—one reverse. Roller or ball bearings in all forward gears. All gears and main shaft are high-quality oil-hardened chromium steel.

**FULL-FLOATING AXLE.**—Ford heavy-duty rear axle is of full-floating type with straddle-mounted pinion. Rugged axle-housing takes all weight, leaving axle-assembly free to transmit power with maximum efficiency. Note the two large tapered roller bearings in front of pinion and additional roller bearing at back for extra strength.

**FOUR-PINION DIFFERENTIAL.**—The differential has four pinion gears instead of the customary two. Driving force always is applied to axle shaft through differential pinions. Using four, in place of two, reduces tooth pressures on pinions and axle shaft gears. Improvements that lower friction when differential is working include use of bronze thrust washers between pinions and case, and between axle shaft gears and case.

**1-TON & 30-CWT. MODELS • 5 STANDARD BODY TYPES • COMPLETE EQUIPMENT AT LIST PRICES**

# FORD presents this range of 20&30 cwt. Trucks for swift . . . efficient . . . lower cost service

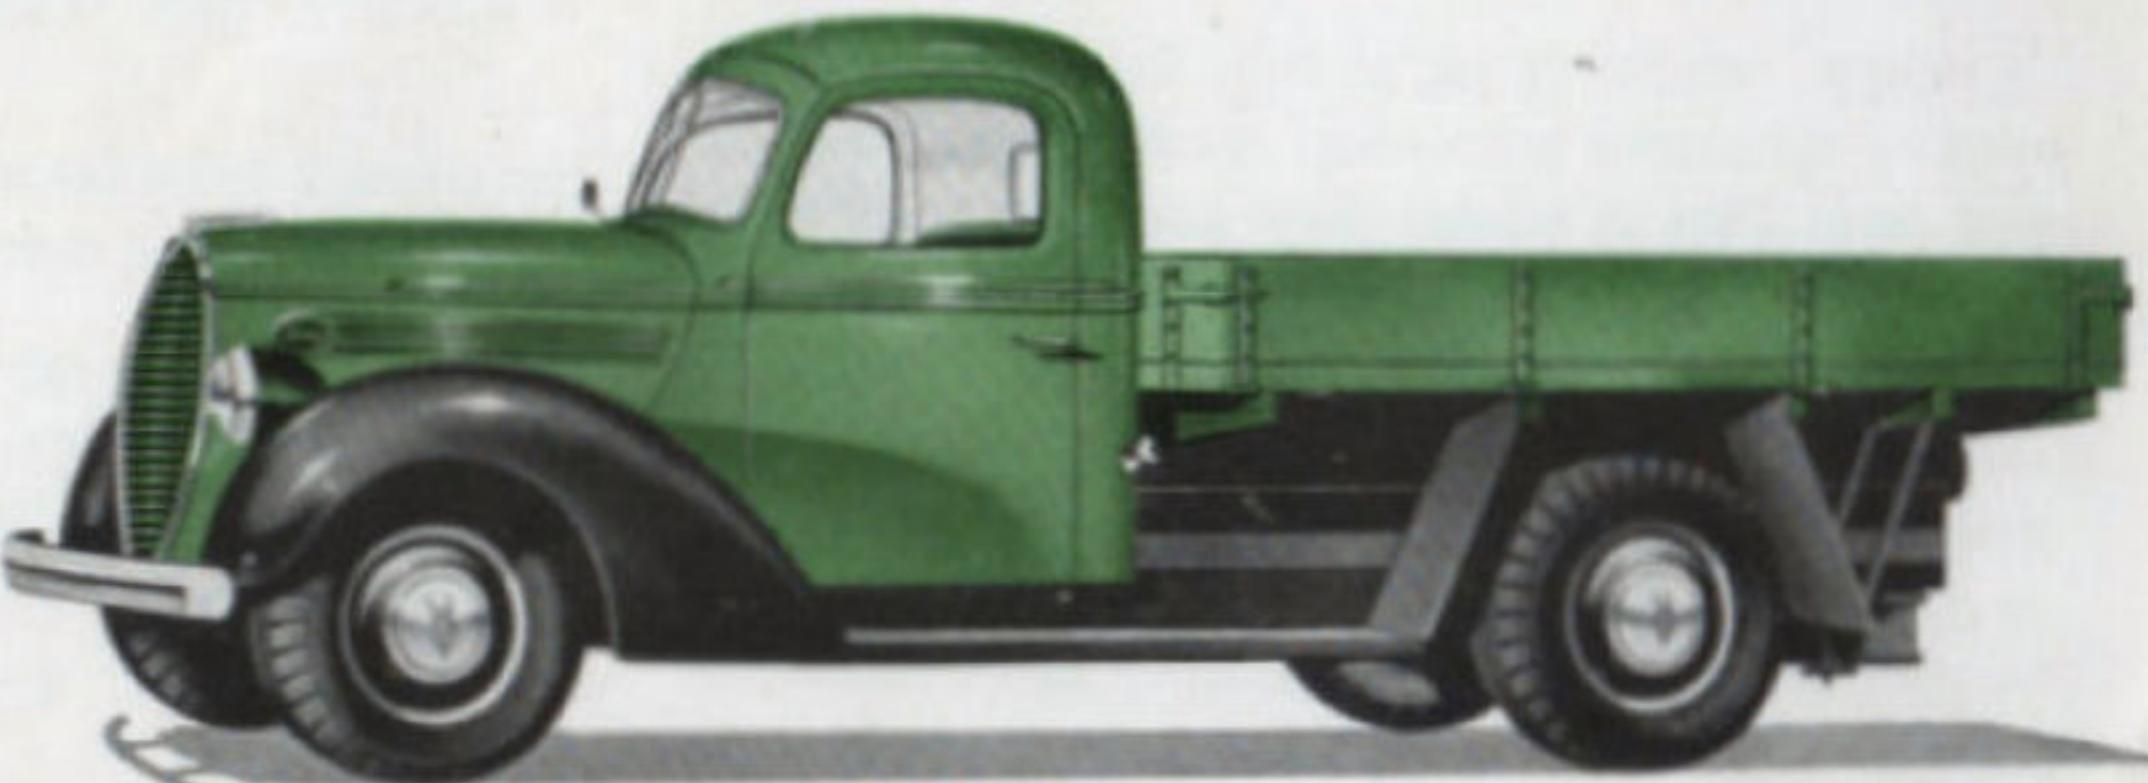

## 122 IN. W.B. EXPRESS DELIVERY TRUCK WITH DROPSIDE BODY

A model of all-round usefulness with gross capacity of 7,250 lbs. Also available with Platform body. Standard equipment at list price: Front bumper. Front shock absorbers. Oil bath air cleaner. Coupe-type steel cab with safety glass all round. Ventilating windscreen and screen wiper. Enclosed despatch box. Speedometer, petrol and oil gauges. Foot controlled headlight beam with pilot light on dash.

Tires: 1 Ton. 4 17 x 7.00 6-ply. 30-cwt. front 2 17 x 7.00; rear. 2 17 x 7.50 8-ply.

Gross vehicle capacity: 1 Ton. 6,500 lbs. 30-cwt. 7,250 lbs.

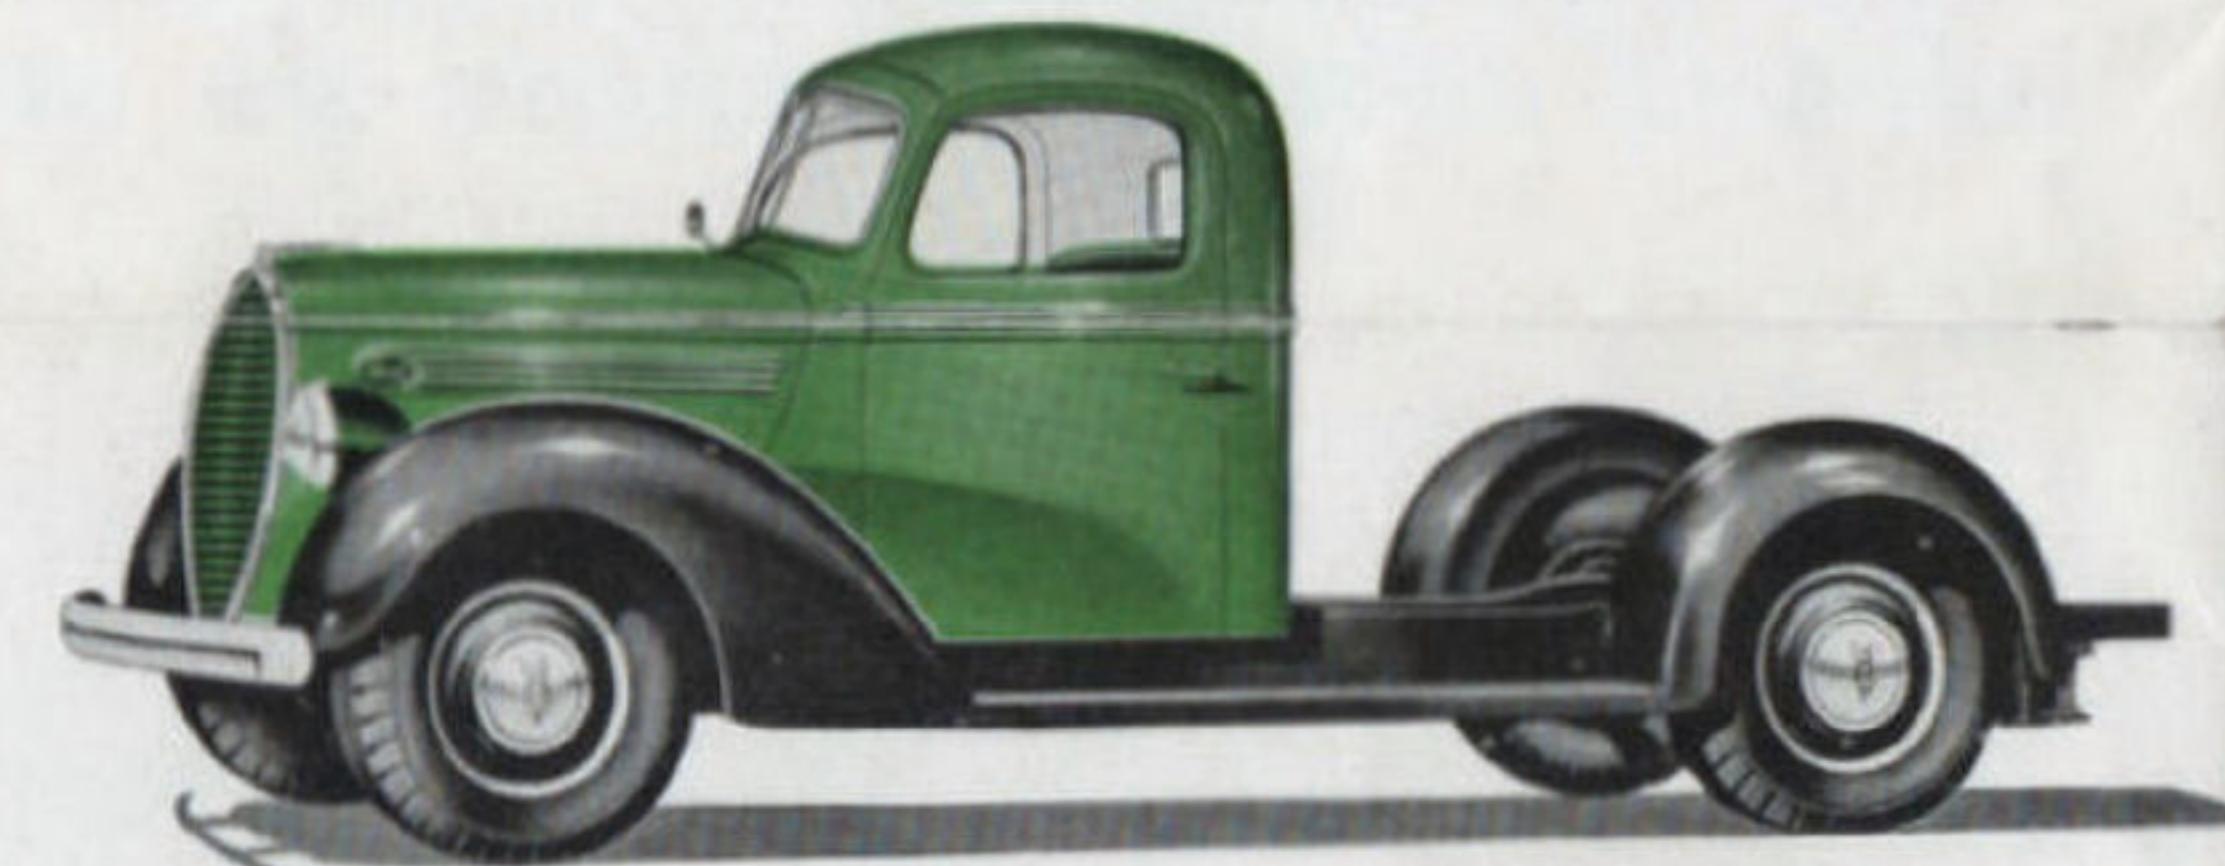

Tray size, length 96", width 78", height sides 11".

122" W.B. DROPSIDE TRUCK

## 122 IN. W.B. EXPRESS DELIVERY TRUCK, CHASSIS WITH CAB

All-steel cab, factory-built, with every comfort and convenience for the driver. Seat is adjustable. Standard equipment: Front bumper. Front shock absorbers.
