

LADA

NEW HORIZONS

LADA Largus

**A partner for business
for travelling
for life**

LADA Largus is a comfortable and spacious car for urban driving, active travelling and business challenges.

You can trust this multi-functional vehicle capable of doing a variety of tasks well.

LADA Largus means European quality, excellent acoustic protection and surprisingly spacious interior. Largus is the only vehicle of such class that provides truly comfortable seats for seven adult passengers. LADA Largus is adapted to Russian environment: zinc-plated external body panels, high road clearance and energy-absorbing chassis for confident travelling on any roads.

Quality in comfort and reliability

Largus

**Stylish
and
practical**

Functionality beyond the ordinary scope

"Largus" means "generous" in Latin, this is true when we talk about a wide range of car's functions. LADA Largus offers a variety of interior configuration options. The second row seats are 60/40 foldable.

The third row seats are also foldable or removable – with no tools. With the rear seats completely folded, Largus transforms into a mini-truck with a trunk capacity of 2,350 l.

Rigid roof rails can bear a load up to 80 kg. Raised roof ensures comfortable accommodation for 7 adult passengers and makes it possible to place a shelf above the second row seats. This shelf is an ideal place to put books, a blanket and other stuff for travelling.

Smart business solution – rear flip-flap doors. They can be opened and retained at different angles: 45, 90 and 180 degrees for easier loading and unloading in confined urban places. Each Largus car has fasteners for the shelf screen to conveniently separate the trunk compartment from the passenger cabin.

Inherent safety

The thoroughly engineered load-bearing body frame and up-to-date safety systems ensure that LADA Largus is fully compliant with the applicable European driver, passengers, and pedestrians safety regulations.

1

Anti-lock braking system (ABS).

Keeps the car steerable in emergency braking.

3

Front safety belts.

The front safety belts with load limiters to reduce the peak load during actuation.

5

Strong load-bearing body frame.

2

Front sub-frame.

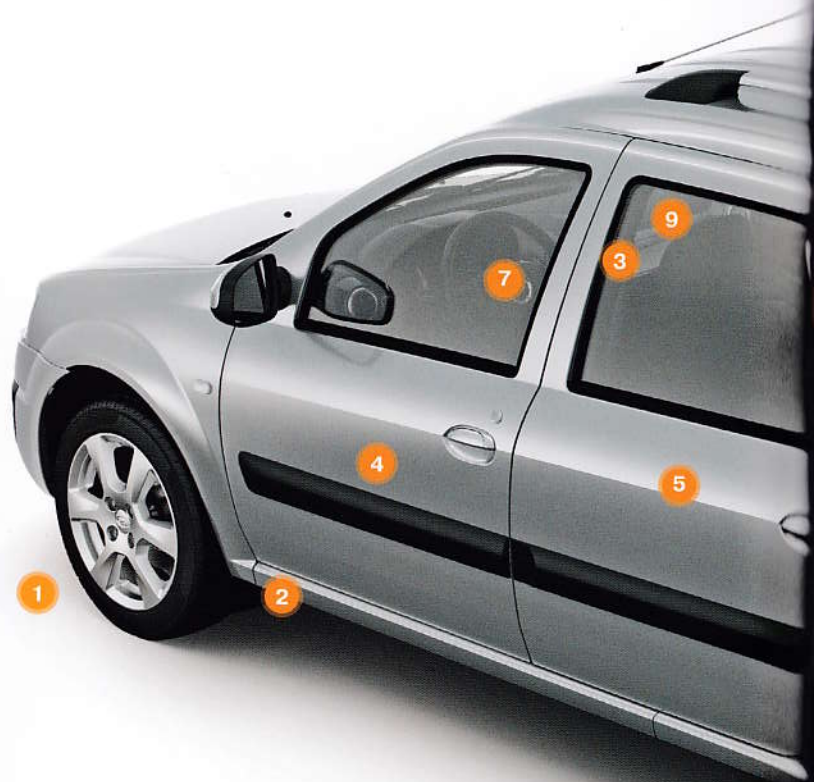

The front sub-frame acts as an additional stiffener to absorb and re-distribute the crash-impact energy.

4

Honeycomb filler in the front door panels.

6

All of the seven passenger seats have headrests and 3-point safety belts.

7

Driver's airbag.

A basic and necessary driver protection system.

9

Passenger's airbag

take care of the people you love.

8

ISOFIX fastening accessories for child safety seats on the second row seats and rear doors lock:

for comfortable and safe transportation of young passengers.

10

Three parking sensors
for safe reversing.

**Interior:
comfort
in everything**

Comfortable wide seats in LADA Largus offer enjoyable experience to the passengers. Height-adjustable driver's seat with lumbar support will make any driver feel comfortable.

A great advantage of LADA Largus is that even tall passengers can feel really comfortable in the third row seats – there is enough space.

This feature is emphasized by the interior style with some silvery elements and three main color patterns for the interior trim: Dark Carbon, Grey Tropic and Brown Mokka.

The way of being excellent

Largus has a comfortable and energy-absorbing suspension. But not only this makes LADA Largus a dynamic multi-function vehicle you can rely on. If you want more speed – Largus offers good acceleration time even when fully loaded. This is possible due to thoroughly engineered transmission with optimal final drive ratio. If you want keen steerability – Largus is ready to follow every turn of the steering wheel: the front suspension and steering rack are mounted on the rigid sub-frame. Being reliable and multifunctional is the philosophy of LADA Largus.

Two types of engine are offered for LADA Largus to meet your style and purposes. The powerful and dynamic 106 hp 1.6l 16-valve engine is for speedy driving, and the torquy 87 hp 1.6l 8-valve engine is the best solution for cost-effective cargo transportation.

- The engine and transmission on all the LADA Largus cars are protected with a rigid 2 mm thick steel guard.
- The front sub-frame ensures stability and steerability at any speed.
- Increased road clearance for confident driving over road irregularities.
- The LADA Largus Engine Control

System has been designed for Russian climatic environment and fuel quality. LADA Largus can "digest" regular unleaded gasoline.

- The torsional rigidity of the body frame is 14,000 Nm/degree – for better steerability and vibroacoustic protection.

- Originally designed for the market of Eastern Europe, LADA Largus was modified for Russia: reinforced suspension and brakes, better antigravel protection, anti-chipping guards of the wheel arcs.

Largus Cross

LADA

LARGUS
CROSS

Largus Cross – extra tourist

LADA Largus Cross features outstanding interior capacity and high manufacturing quality, increased road clearance and a special body protection kit.

- LADA Largus Cross is a special version with improved off-road performance and contrasting exterior design.
- The road clearance is at least 195 mm (with the driver only) and at least 170 mm with the full rated load (under the crankcase guard).
- The interior of LADA Largus Cross features colorful (orange or light-grey) elements made of plastic and eco-leather.
- Off-road body kit includes practical unpainted bumpers, moldings, floor sill and wheel arch trim panels.
- 16" alloy wheel rims add more to the impressive appearance and off-road performance.
- LADA Largus Cross, like all cars in this family, is well prepared for Russian environment: zinc-plated external body panels, high road clearance and energy-absorbing chassis for confident travelling on any roads.
- Really spacious interior, practical seats transformation pattern – LADA Largus Cross is ready for any task: from exciting travelling to heavy cargoes transportation.
- The height-adjustable driver's seat with lumbar support is wide and comfortable.
- Each of the three rows of seats has individual hot air ducts to keep the passengers' feet warm.
- Air conditioning, audio system (FM, CD, MP3, AUX, USB, Bluetooth, Handsfree), front seats heating, electric adjustment and heating of the sideview mirrors – LADA Largus Cross is packed with all the necessary comfort options.
- Strong body frame and thorough selection of materials ensure high acoustic protection.

Largus van: the business partner

LADA Largus van features excellent off-road performance, good interior capacity, decent load-carrying capacity, a widespread network of service stations and proven reliability. Practical bumpers and moldings, high-capacity interior – LADA Largus van is a real workhorse.

- LADA Largus van is the most spacious in LADA family. The trunk volume is 2,540 l.
- LADA Largus van is the LADA with the highest load capacity (it is able to transport 800 kg).
- Four cargo attachment points and a rubber mat for reliable and safe transportation.
- A euro-pallet easily fits in the cabin.
- The cargo compartment length is 1.94 m.
- In Largus, the cargo is accessible from the rear and from the side doors.
- With a towbar, Largus can be fitted with a 650-kg trailer.
- LADA Largus van offers plenty of comfort options: a dish-shaped wall behind the driver's seat for highly adjustable workspace.
