BUILT FOR WORK, PLAY AND EVERYTHING IN BETWEEN

CAPABILITY.

Bring on your big jobs and huge payloads. Ram 1500 offers eTorque technology, multilink coil spring rear suspension and available class-exclusive Active-Level™ Four Corner Air Suspension.³ It can also haul up to 2,300-lb max payload.⁹

SAFETY/SECURITY/COMFORT.

Comfort doesn't just come from spacious, up-to-six-person seating; it also comes from peace-of-mind, available technology like LaneSense® Lane Departure Warning Plus,⁹ and Blind Spot Monitoring (BSM)¹⁰ with Rear Cross-Path and Trailer Detection.¹¹

CAPABILITY STARTS HERE

CLASS IV HITCH RECEIVER.

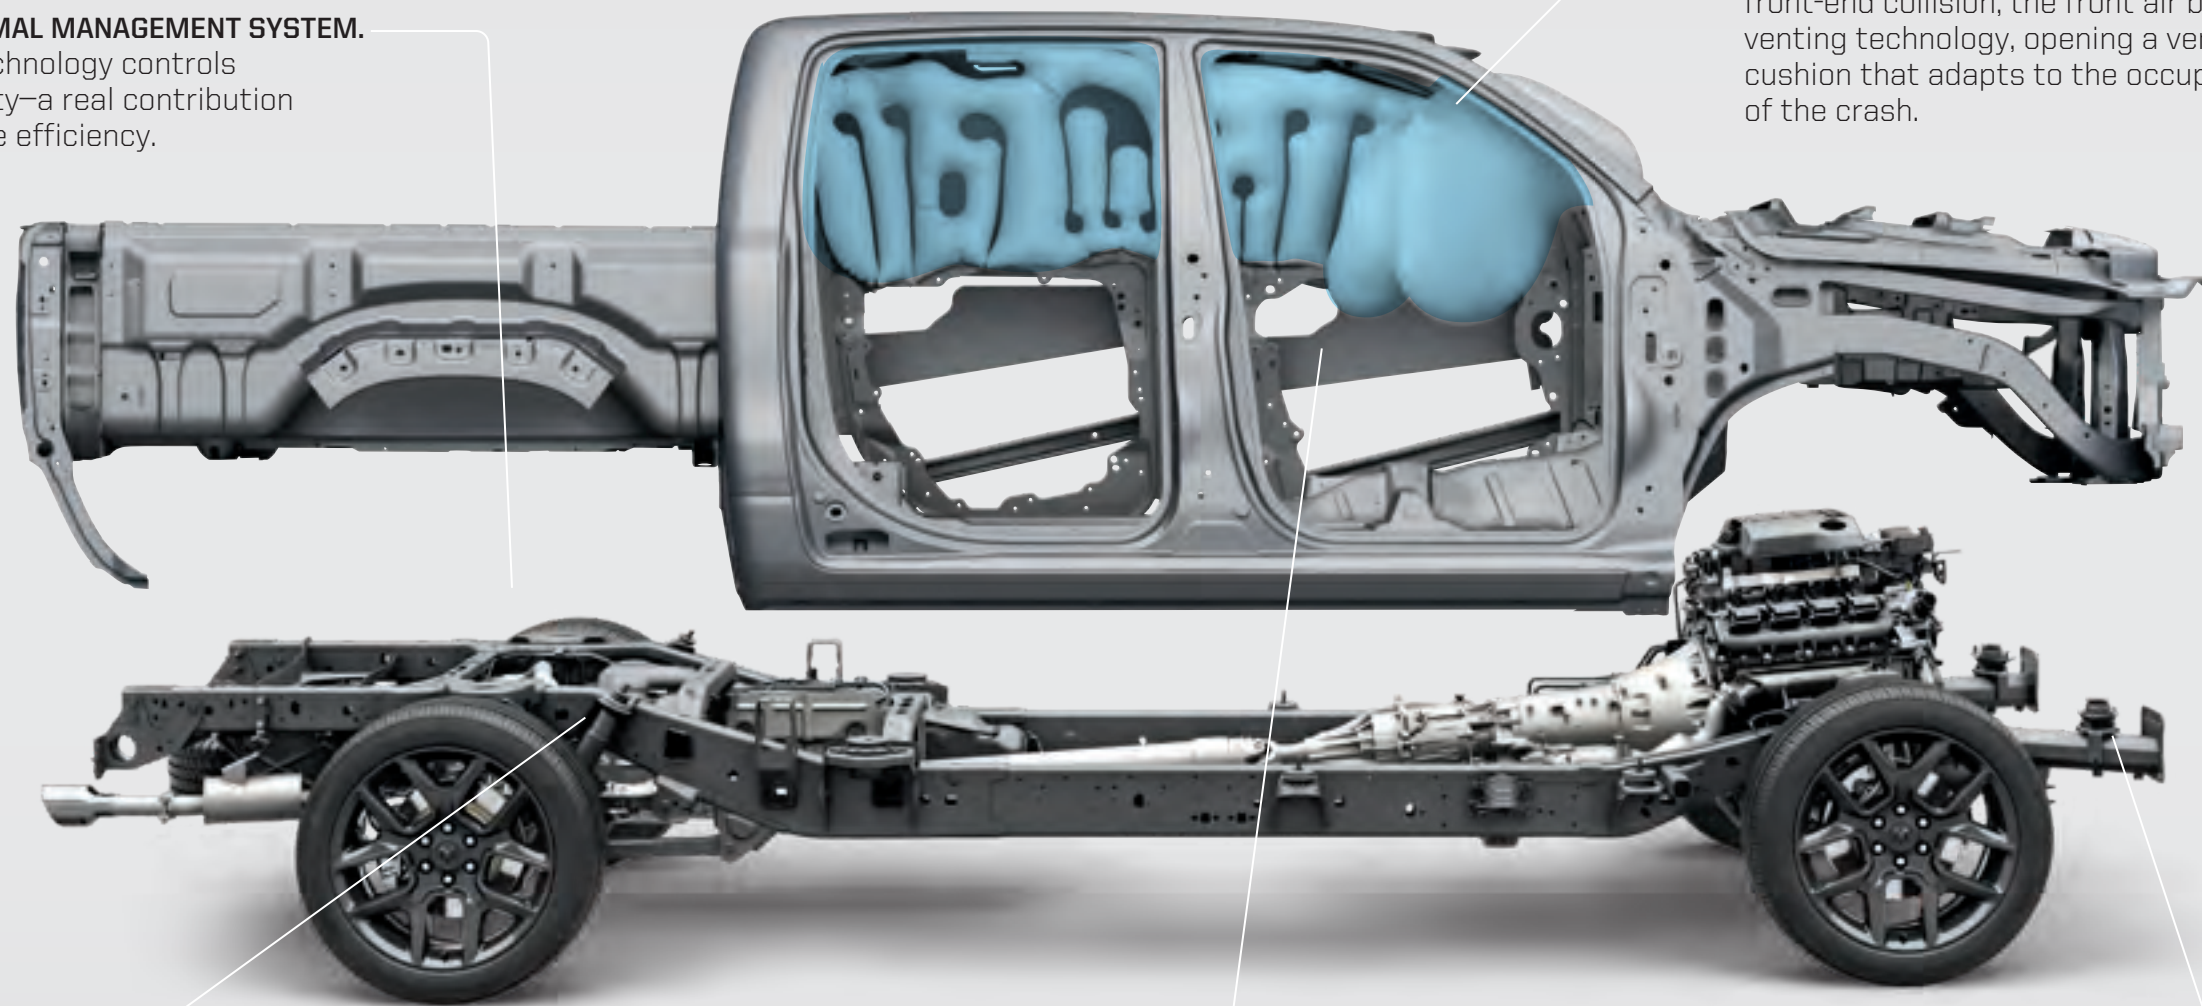

Trailering is part of Ram DNA. The available Class IV hitch receiver helps make it happen.

REAR-AXLE THERMAL MANAGEMENT SYSTEM.

This available technology controls lubricant viscosity—a real contribution to the impressive efficiency.

ADVANCED AIR BAG¹² TECHNOLOGY.

The six standard air bags help provide protection and peace of mind to vehicle occupants. In the event of a front-end collision, the front air bags feature adaptive venting technology, opening a vent within the air bag cushion that adapts to the occupant size and severity of the crash.

SMART SHOCKS.

Frequency Response Damping (FRD) shock absorbers adapt to varying surfaces and driver demand.

PROGRESSIVE-RATE REAR SPRINGS.

They automatically adapt to payload while helping maintain a level profile and superb ride quality.

SIDE-IMPACT DOOR BEAMS.

The robust beams built into every Ram 1500 help reinforce protection against side impacts.

HIGH-STRENGTH STEEL.

The frame takes the concept of durability to extremes. 98 percent of the steel used in the frame is high-strength steel.

FRONT FRAME RAIL SECTION.

In the event of a frontal offset collision, dynamic front crumple zones with front splayed frame rails and tire blockers help protect against cab intrusion.

LARGEST BRAKES IN ITS CLASS³

At nearly 15 inches in diameter, the front and rear rotors are built for superb stopping.

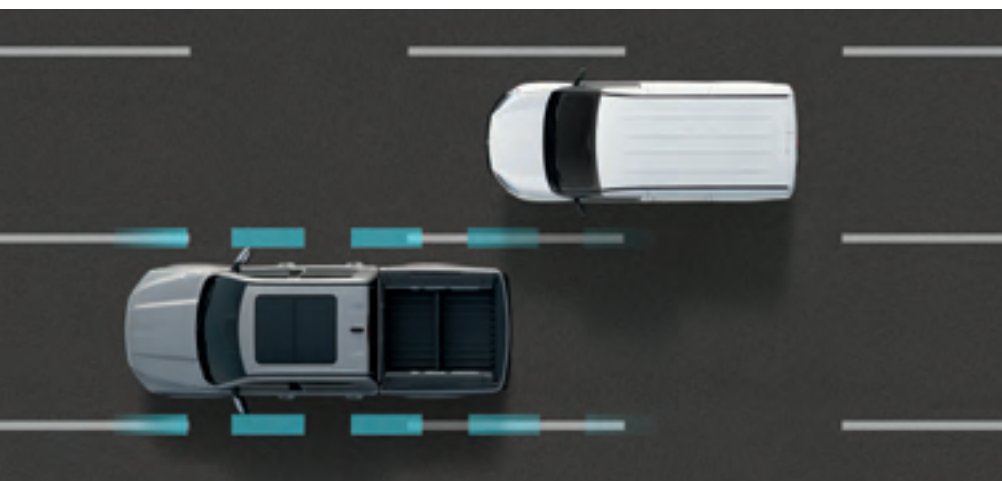

OUR TECHNOLOGY

HELPS YOU MOVE WITH CONFIDENCE

BLIND SPOT MONITORING (BSM)¹⁰ WITH REAR CROSS-PATH AND TRAILER DETECTION¹¹ This available system scans the blind-spot zones beside and behind the vehicle to help ensure trailer safety during maneuvering while automatically sensing and accounting for the length of the trailer.

PEDESTRIAN AUTOMATIC EMERGENCY BRAKING (PAEB)¹³ Radar technology is used to help determine if a collision between the vehicle and a pedestrian appears imminent. If so, the Forward Collision Warning with Advanced Brake Assist¹³ activates the vehicle's brakes. Available.

LANESENSE[®] LANE DEPARTURE WARNING PLUS⁹

If you begin to drift from your lane, the available LaneSense Lane Departure Warning Plus⁹ helps keep you in your lane by warning you visually and adjusting your steering.

SMART CRUISING.

Available Adaptive Cruise Control with Stop & Go¹⁴ detects vehicles ahead. If increased braking is needed in slower traffic, the available Forward Collision Warning with Advanced Brake Assist¹³ automatically helps adjust to a safe distance.

GUIDED PARKING.

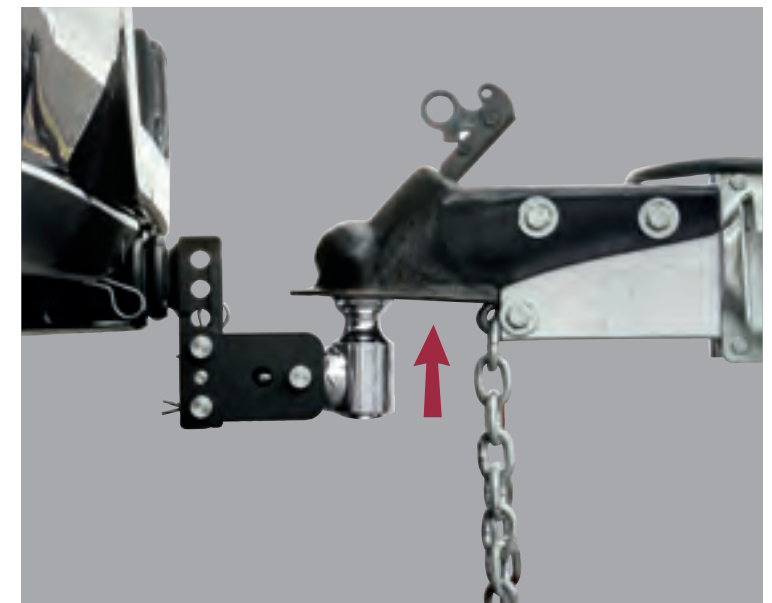

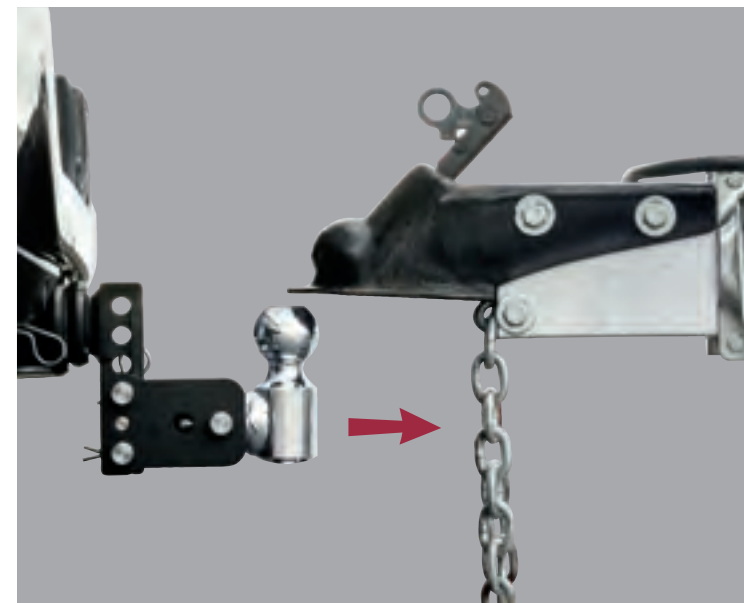

Available Parallel and Perpendicular Park Assist¹⁵ provides active guidance when parking. The guidance system directs you to engage the gear position, brake and accelerator while it automatically controls steering.

*12,750¹⁶ REASONS
TO TOW WITH RAM 1500*

HITCH UP, HEAD OUT. The available 360° Surround-View Camera System¹¹ and Trailer Camera Prep allow for up to two cameras to be positioned on or within the trailer. You'll get a full view of the truck's surroundings which takes the guesswork out of trailer hookup. The tailgate light provides illumination for easy trailer hookup in the dark. Opt for the new available 360° Trailer Surround-View Camera System¹¹ feature that provides a 360° bird's-eye view of the trailer, eases vehicle/trailer maneuvering by providing enhanced visibility of trailer surroundings and aids when backing up a trailer in tight spaces. The available Active-Level™ Four Corner Air Suspension automatically lowers the vehicle at highway speeds to help with drag and offer maximum efficiency. The lowering capability can also help with accessing the bed and cab, entering parking garages and hitching a trailer.

CONVENIENCE OF TECHNOLOGY. Self-calibrating, available Trailer Reverse Steering Control (TRSC) automatically assists with backing up a trailer by turning the truck wheels in the proper direction. Just twist the knob in the direction you want the trailer to go. The available digital rearview mirror uses an LCD monitor to display real-time video that helps with the driver's view behind the vehicle. If a trailer tire becomes low, the available Trailer Tire Pressure Monitoring System will alert the driver. The unique pressures for up to six trailers/RVs can be programmed into the system.
