

The instruments in the new BMW 5 Series are located directly in the driver's field of vision. Their glare-free design ensures clear visibility at all times.

The iDrive Controller is an integral part of the overall control concept, providing easy and intuitive access to most of the comfort functions within the new BMW 5 Series.

Everything is in its place. Waiting for your touch.

Equipment Equipment

■ Xenon headlights illuminate the road ahead and to the side with brilliant clarity. These headlights also feature auto-levelling to adjust for varying passenger and cargo loads. In conjunction with the new Adaptive Headlights (optional), this also means much improved visibility in bends, as the adjustable headlights are directed into the bend as soon as the vehicle begins cornering.

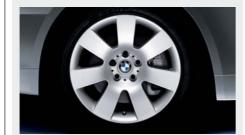

■ Rain sensor with automatic headlights uses an infrared light to measure the amount of rain and exterior light. When the wipers are in the "intermittent" mode, the rain sensor automatically adjusts the windshield wiping interval as needed. When selected, the xenon headlights are activated as required.

■ Heated seats, front and rear, are a welcome feature in cooler weather. With the touch of a button, you can individually select from three heat settings.

■ Star spoke alloy wheels, style 138, 7.5J x 17, 225/50 R-17 all-season tires. (Available only on the 530i.)

□ Star spoke alloy wheels, style 123, 8.0J x 18, 245/40 R-18 performance run-flat tires. (Available only on the 530i.)

■ Foglights are clearly integrated in the front bumper providing extra safety in bad weather and situation of poor visibility. Ellipsoid free-form technology ensures ever spread of light on the the road.

☐ Comfort seats at the front, electrically adjustable with multi-function control of seat angle, headrest position, backrest angle, seat height and active headrests for the driver and front passenger. Also include lumbar support, seat depth adjustment, backrest width adjustment.

■ Heated steering wheel is a welcome pleasure whenever there is a chill in the air. The switch is conveniently located right on the steering column.

■ Glass sunroof allows natural light to enter the cabin. For convenience, it offers fingertip control of sliding and vent functions, trap release and comfort opening and closing.

■ Multi-function leather steering wheel allows for convenient operation of numerous functions without being distracted from road traffic – which means you keep your hands on the wheel all the time. Buttons are included for audio, cruise control and telephone. One button's function may be defined by the user.

□ Navigation System presents information in the dazzle-free Control Display. Driving information is provided by the voice computer, with further data added by the direction arrow (on the Info display) or the map.

element for both the driver and the front passenger. This turn/press button enables intuitive control of a variety of functions shown on the Control Display. The menu system is based on the compass directions and provides a choice of four individually coloured menus: Climate, Navigation, Communication and Entertainment.

☐ **Ventilated seats** for the driver and front passenger. Ventilator fans are built into the outside seats and blow air upwards through an internal web and the micro-perforated Nasca leather to provide active ventilation.

■ Automatic Climate Control including Automatic Air Recirculation (AAR) provides your desired climate as quickly as possible, keeping the temperature at a steady level separately on the driver's and front passenger's side.

□ Six-speed automatic transmission with electronic gearshift and STEPTRONIC. You operate the transmission via the switch on the steering column or the STEPTRONIC buttons on the steering wheel. Electric shift-by-wire transmission allows a very quick and absolutely faultless shift of gears in the interest of supreme driving dynamics.
