2004 Honda

ELEMENT

Multi-purpose **adventure tool**

The 2004 Element is all about one thing – getting you and your gear where you want to be, when you want to be there. This **Active Lifestyle Vehicle (ALV)** goes anywhere and can handle just about anything you throw at it or in it. It's perfect for road trips, mountain biking, snowboarding, camping, and lounging. Just load, aim and hit the road.

Element Y Package shown in Satin Silver Metallic.

360° vents

270-watt audio system

7 speakers including subwoofer

dual-stage front airbags

oversized climate-control knobs

non-slip storage shelf

cruise control

gadget-guru's MP3/digital media jack

big storage bins

instrument panel-mounted shifter

room to snooze

rugged utility floor

crud-resistant seat fabric

Element Y Package interior shown in Grey and Blue.  
U.S. model shown.

slick shift

Choose the control of the standard 5-speed or the ease of the available 4-speed automatic. Either way, the shifter is placed high on the instrument panel so it's easy to get a grip.

turn it up

Whatever kind of tunes you play, they'll come through loud and clear. That's because your new Element comes standard with an outstanding audio system that includes an AM/FM stereo with CD player and 4 speakers. You not only hear it, you also feel it in your bones.

play your way

Pump up the volume and hit the trails. The audio system in the Y Package is a heart-pounding 270-watt AM/FM/CD player complete with 6 speakers and an individual volume controlled subwoofer.

driver-focused interior

Inside, the Element is built around the driver. You get in, and everything's right where you need it. Good thing it's comfortable, because you'll want to spend lots of time here.

no sweat

The straightforward climate controls in the Element make it easy for you to stay comfortable. And the knobs and buttons are oversized so they're easy to use even with gloves on.

U.S. model shown.

stow it

The Element has plenty of smart places to keep things close at hand. The console storage, an overhead compartment (Y Package only) and side storage bins give you lots of space for stuff like CDs, lip balm, keys, sunglasses, water bottles, and plenty of maps.

dialed in

The instrument panel features big, glare-free analog gauges. They're easy to read, so you can take a quick glance and keep your eyes focused on more important things, like the road.

270

multi-reflector  
halogen headlights

available anti-lock brakes  
(save sliding for the slopes)

side cargo doors

large windows to see  
if you're there yet

survival gear

heat-rejecting privacy glass

unit-body construction

clamshell tailgate

**4WD is available for that added confidence  
while exploring new territory**

Element Y Package with optional 4WD shown in Fiji Blue Pearl with accessory roof rack and snowboard attachments. U.S. model shown.

# 64

ways to go

**Welcome to the great indoors. Reclining front seats with extra-long fore and aft adjustments and removable, flip-up rear seats, let you reshape the interior of the Element in dozens of totally different ways. In fact, you may run out of things to do and places to go long before trying out all of the seating configurations.**

The Element is big on **function**. Road trips. Mountain biking. Windsurfing. Camping. Extreme napping. Whatever you're into, the Element will get you there and back, and be your base camp in between. Pack it up and hit the road. Element handles it all. The clamshell tailgate and side cargo doors allow **easy loading**. Arrange the seats to make enough room to toss in all your gear. And don't be all gentle about it. Throw in your muddy, snowy,

sandy stuff. The **waterproof and stain-resistant FXC™** (Fabric for Extreme Conditions) seating surfaces and a **wipe-clean** urethane-coated utility floor can take the abuse. There are plenty of tie-down points to keep cargo secure, available **seatback bungees** for extra bits and a removable skylight for even more breathing room.

Element Y Package interior shown in Grey and Blue.

it's go time

big motivation

A 2.4-litre i-VTEC™ engine pumps out 160 horses, enough guts to get you anywhere you need to be. When you literally need to haul, count on a 680 kg towing capacity. The Element is also equipped with a fuel efficient, clean burning engine, and has been designed to meet the requirements of the new stringent 2004 Tier 2 emissions standard. And we're the only automaker to offer two hybrid gas-electric vehicles in Canada. At Honda, caring for our planet is truly a core value.

160

balanced power

Element gives you an advanced 16-valve DOHC engine design, which provides the best of all worlds. Power whenever you need it. Smooth, quiet running, and legendary Honda fuel efficiency.

i-VTEC™ gives it grunt

It might sound complex, but it has a simple purpose. The latest version of Honda's Variable valve Timing and lift Electronic Control, i-VTEC™ ("i" is for intelligent) helps produce more torque at lower engine speeds, and more peak horsepower at high revs.

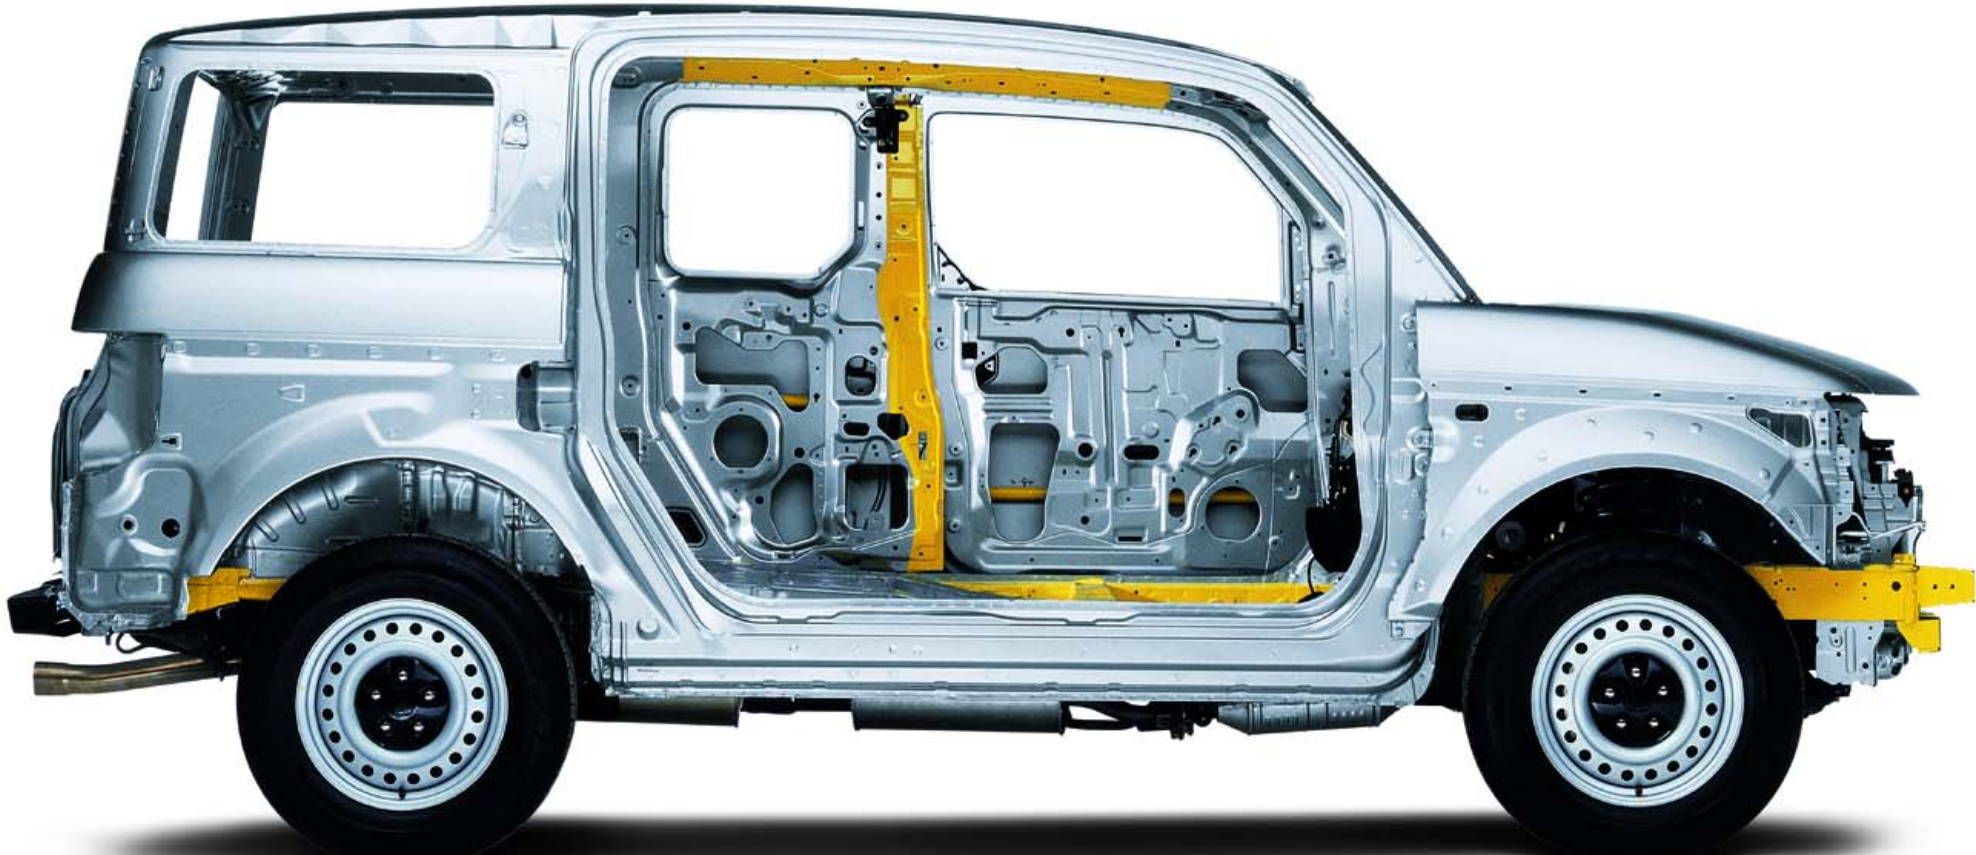

sophisticated suspension

The Element has advanced 4-wheel independent suspension that smoothes out the bumps. Yet handling and steering control still feel direct and precise. In fact, its road manners are probably way better than yours.

Element Y Package shown in Galapagos Green Metallic with accessory roof rack and foglight kit. U.S. model shown.

reinforced for safety

The National Highway Traffic Safety Administration (NHTSA) has awarded the Element a double 5-star crash test rating\*—the highest possible for frontal impacts. But then, safety is always foremost in the minds of Honda engineers. And while the Element may not have conventional side B-pillars, equally strong vertical beams are formed when the stoutly reinforced side cargo doors are closed and connect with the reinforced frame, side sills and roof.

\*U.S. National Highway Traffic Safety Administration (NHTSA) frontal crash test: March 2003.  
Honda reminds you and your passengers to always buckle up.

safe where you leave it

An Immobilizer Theft-Deterrent System is standard equipment, to help keep your Element safe in the “better keep your hands off my wheels” sense of the term.

stop it

The Element Y Package comes with a 4-wheel Anti-lock Braking System (ABS) that helps prevent wheel lockup and helps maintain steering control during hard braking. It's also equipped with an Electronic Brake Distribution (EBD) system that adjusts front-to-rear brake effort to enhance vehicle control and stability.

U.S. model shown.

dual-stage front airbags

In addition to 3-point seat belts to keep you and your friends secure, front airbags provide additional protection in a moderate to severe impact. The Element features dual-stage, dual-threshold technology enabling the front airbags (SRS)\* to deploy at one of two rates and thresholds, depending on the force of the impact and seatbelt use.

\*Honda reminds you and your passengers to always buckle up.

Element Y Package shown in Satin Silver Metallic with U.S. accessory roof rack and bike attachment. U.S. model shown.

it's a no-brainer

Two wheels or four wheels? It doesn't take a whole lot of deliberation when snowy paths or rocky roads are part of your journey. With the optional RealTime™ 4-wheel drive system, the Element Y Package takes to the road when the going gets rough and gives you more traction when you need it most. A sophisticated system senses wheel slippage, then automatically sends power to the rear wheels, getting you right through that tough, tricky terrain. No buttons. No stopping.

Honda reminds you to “Tread Lightly!”®
