

The 2006 Honda Pilot

HONDA

**Adventurous, powerful and
tough by nature. Ready for
anything out there.**

Adventurous.

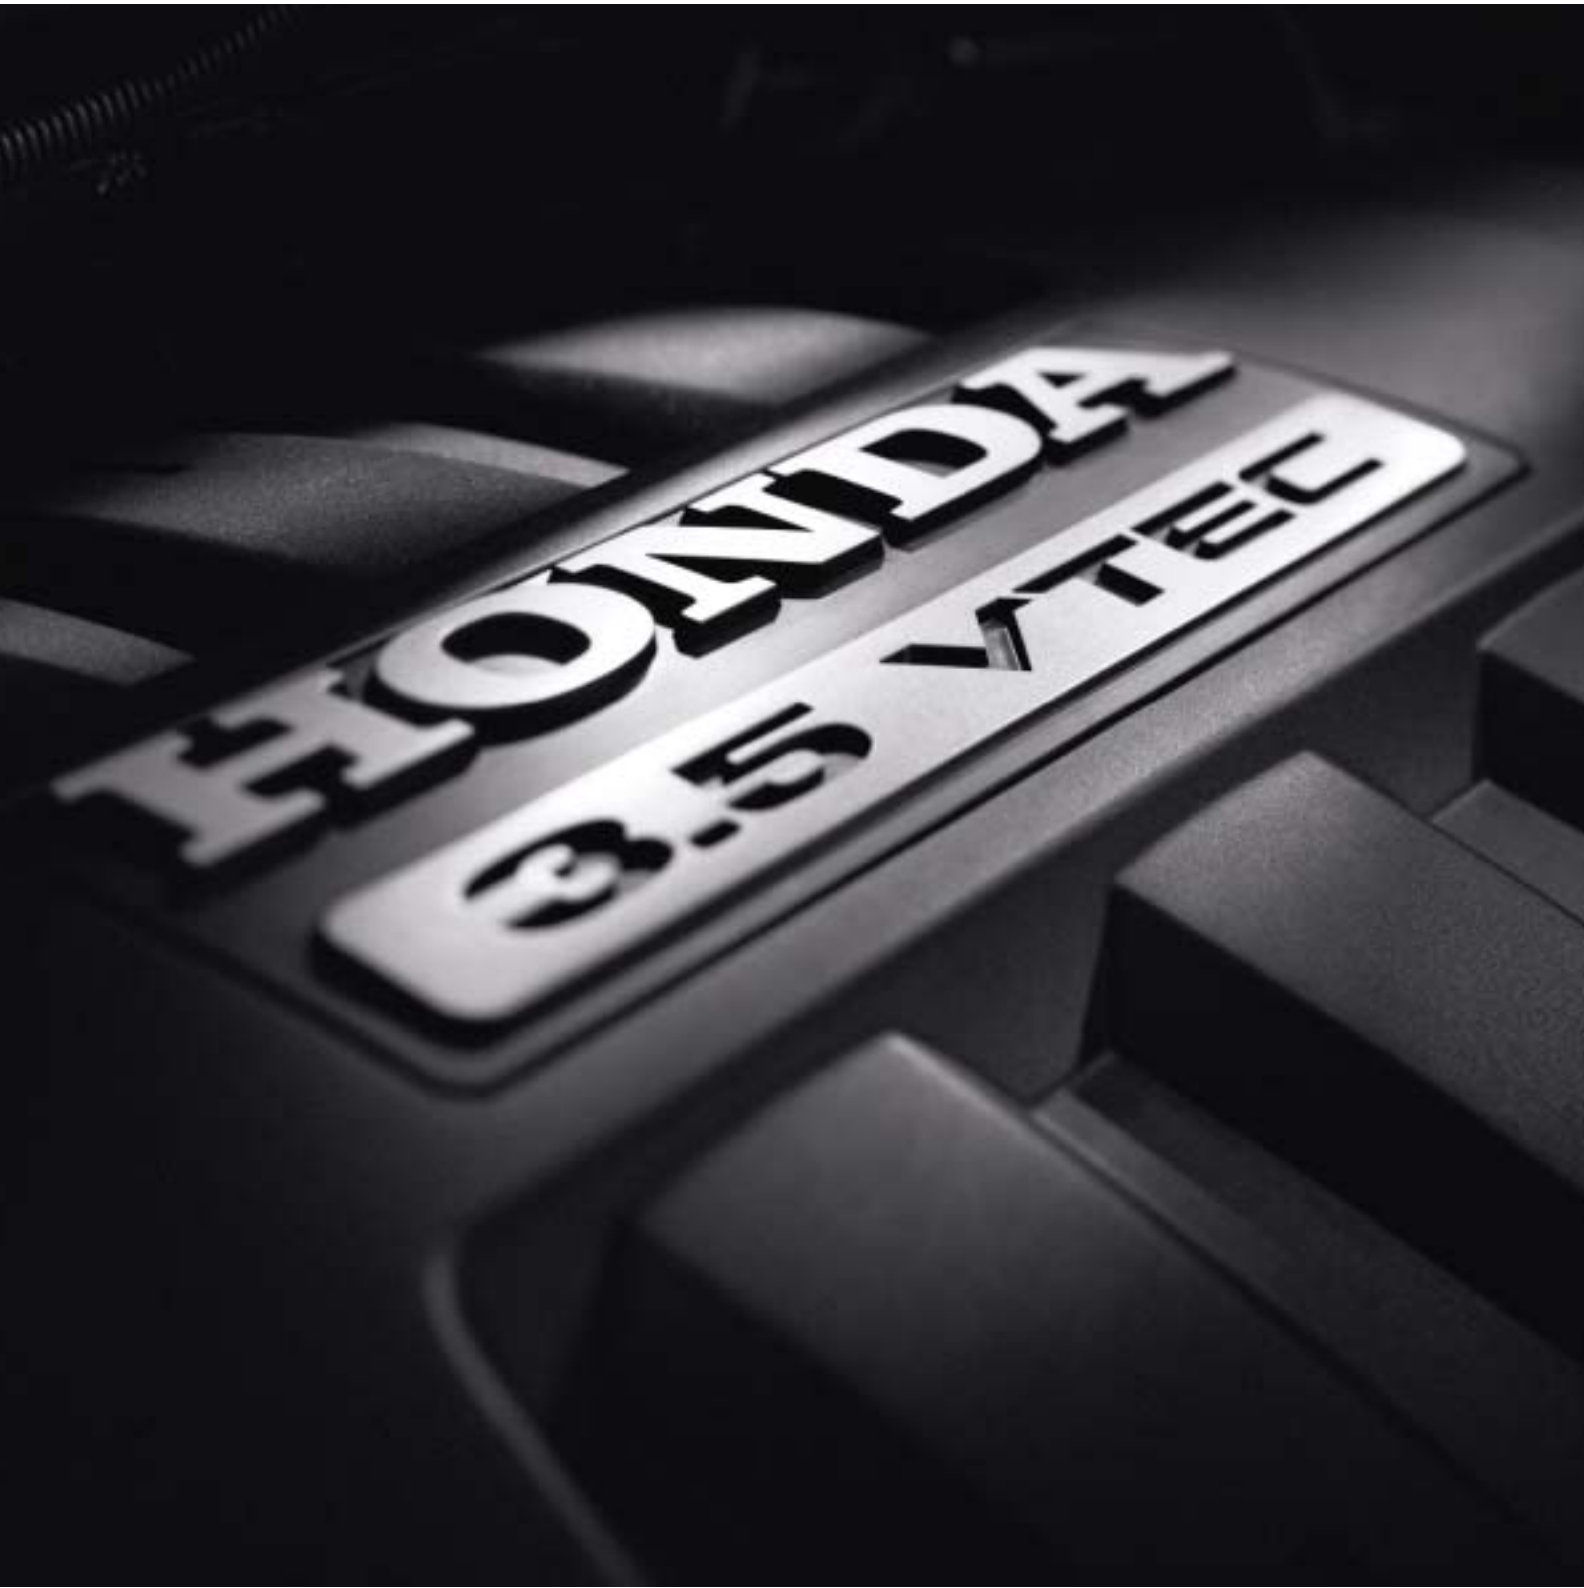

Climbing a mountain near you. The 2006 Honda Pilot has all the great features and rugged pedigree of its formidable predecessor – and a lot more. New styling gives it stronger, more chiselled lines. The solid unibody design offers maximum comfort and stability. A 244-hp engine gives you power to spare – not to mention amazing fuel efficiency. Combine all of that with more safety features and Honda's legendary reliability, and you've got an SUV ready for any adventure.

Powerful.

It's been working out. For fast response and plenty of reserve power, the 3.5-litre V6 engine delivers an impressive 244 hp, provides 240 lbs-ft of torque, and can tow up to 2045 kg, all on regular fuel. Programmed fuel injection and the direct ignition system provide both efficiency and power. Even with all that muscle, the Pilot is an ultra-low-emission vehicle with a Tier2 Bin5 rating.

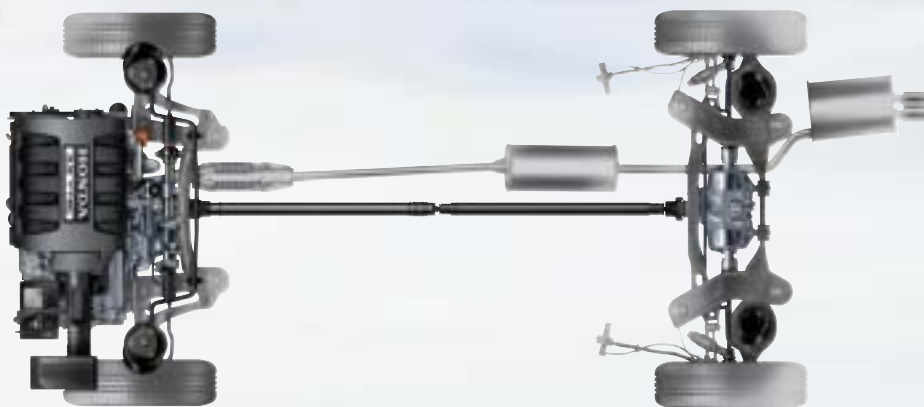

VTEC equipped. The Variable valve Timing and lift Electronic Control (VTEC®) system gives you low-end torque and high-end power. An electronically-controlled 5-speed automatic transmission delivers power when you need it. Grade Logic Control holds the ideal gear according to conditions. All a fancy way of saying there's a lot of intelligent Honda engineering under the hood.

Tough.

VTM-4. Strong and smart. All Pilot models benefit from the ingenuity of the Variable Torque Management™ (VTM-4®) 4-wheel drive system. When starting off in mud or snow, the VTM-4 Lock feature lets you manually lock the rear differential with the push of a button, which is located conveniently on the Pilot's instrument panel. Once on the road, the VTM-4 system's electronic control unit (ECU) can automatically engage the rear wheels if it senses any slippage. When added traction isn't necessary, the system simply reverts to front-wheel drive. While you're driving, you'll also feel the benefit of the Pilot's unibody construction – a solid body design that resists torsion and bending. Plus, the fully independent suspension provides precise handling and a surpassingly smooth ride.

FRONT DIFFERENTIAL FOR MOST CONDITIONS

When extra traction isn't needed, all the power is directed to the front differential, enhancing fuel efficiency in daily use.

CENTRE PROPELLER SHAFT

The propeller shaft constantly sends power to the rear differential. But the rear wheels are not engaged until directed by the VTM-4 ECU.

REAR DIFFERENTIAL ALWAYS ON CALL

When added traction is needed, the VTM-4 ECU signals the rear differential to engage, seamlessly transferring power to the rear wheels.

*EX-L NAVI model shown.

**Nature rewards the rugged, and you get
bonus points for being civilized about it.**

*EX-L NAVI model shown.

When it's time to load up, the Pilot switches from comfortable cabin to spacious cargo carrier thanks to 60/40 split seats that fold up in seconds. With the second and third row seats

folded down, the Pilot offers an impressive 2557 litres of cargo area to handle large or bulky items. In fact, the flat floor area is more than 4 feet wide.

↑ Rear-seat passengers can control their own cabin temperature. In DVD RES-equipped models, a 110-volt power outlet can provide current for various electronic devices like laptops and game consoles.

↑ All EX models offer a 155-watt AM/FM audio system with 7 speakers, and a 6-CD changer.

↑ Small items like cameras or valuable electronics are safely out of view and secure in the rear underfloor storage area. And a 12-volt power outlet nearby offers convenient power for many uses.

↑ The available power moonroof also features a daytime sunshade.

↑ With the available Honda DVD Rear Entertainment System, rear passengers can choose their own audio or video source and listen in privacy with surround-sound headphones.

↑ The front armrest flips up to provide access to a large storage area. It can hold as many as 13 CDs and also features a 12-volt power outlet and a cradle to keep your cell phone secure and handy.

Inside, you're not exactly roughing it. The Pilot's interior offers the perfect combination of comfort and control. Take command of your adventure from the well-designed cockpit – all EX models have an 8-way power driver's seat, and leather models add heated front seats. Enjoy the available 7-speaker audio system with 6-CD changer, or the available Honda DVD Rear Entertainment System. Travel smart with the available Honda Navigation System with Bilingual Voice Recognition that can respond to 140 voice commands.

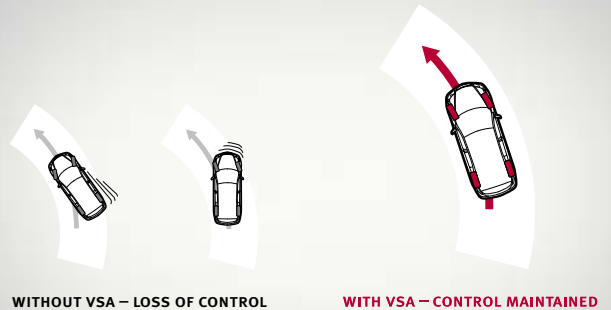

Standard Safety Features:

- 4-Wheel Anti-Lock Braking System (ABS) 4-Channel with Electronic Brake Distribution™ (EBD™)
- Driver and Front Passenger Dual-Stage, Dual-Threshold Airbags (SRS)
- Driver and Front Passenger Side Airbags (SRS) with Passenger Seat Occupant Position Detection System™ (OPDS™)
- Side Curtain Airbags
- Vehicle Stability Assist (VSA)

Solidly Built

Safety For Everyone. Honda has a long commitment to safety. The idea that safety is for everyone is a company philosophy, not a slogan. Honda seeks to provide the highest level of occupant safety in all of their cars and trucks – regardless of size or price – as well as improving safety for pedestrians. This approach is making a difference as 9 of Honda's 2005 models have earned the U.S. National Highway Traffic Safety Administration's (NHTSA) 5-star frontal impact crash-test rating – the most of any brand.

↑ Laboratory crash testing goes a very long way toward determining what is needed to create rigid structures that promote occupant protection. This results in industry-leading crashworthiness and safety.

↑ Every 2006 Pilot features Honda's sophisticated Vehicle Stability Assist™ (VSA®) system. Working with the Anti-Lock Braking System and electronic throttle control, VSA enhances stability by detecting oversteer or understeer, and braking individual wheels and/or reducing throttle to help restore the driver's intended travel path.

Solid Frame Structure. Front and rear crumple zones deform in a controlled manner to help absorb impact energy before it has a chance to intrude into the passenger cabin. Further protection for the occupants is enhanced with a rigid safety cell that is reinforced with high-tensile steel and numerous cross braces to help stop cabin deformation.

Honda reminds you and your passengers to always buckle up. Children 12 and under are safest when properly secured in the rear seat.

Unibody. Solid by design. The Pilot, like all Honda trucks, benefits from a unique unibody design. Unlike many other trucks and SUVs, the Pilot is built with a single frame for better stability, rigidity and a smoother overall ride.

Honda's advanced crash-test facility in Tochigi, Japan demonstrates how the unibody design also helps promote driver and passenger protection. And as our testing philosophy demands, we always verify any lab findings out on the road.

↑ Pilot models with the available Honda Navigation System with Bilingual Voice Recognition are also equipped with a rear view camera that helps you look out for obstacles when you select reverse gear.

↑ All models feature standard dual-stage, dual-threshold front airbags combined with front side and three row side curtain airbags.

Pilot's combination of energetic performance, excellent handling and rugged reliability makes it ideal for all your adventures. The experts agree. It has won as the Large SUV in Car and Driver's "5Best" Trucks in 2005 – and every other year since its release.

The Power of Dreams.

On a September day in 1946, Soichiro Honda visited the home of a friend where he came across a small generator engine designed for a wireless radio. In a moment of inspiration, he turned to his friend and said, “Let’s use this to power a bicycle.”

Say “hello” to ASIMO, the world’s most advanced humanoid robot.

Honda’s advanced crash test facility in Tochigi, Japan.

The ultimate in clean performance.

Racing helps us prove our innovations.

The jet, reinvented.

From this engine-powered bicycle, Honda has grown into a company that moves people in every conceivable way: motorcycles, automobiles, trucks, marine engines, hybrid vehicles, a jet, a fuel cell car and even a robot that will walk and run to assist those who can’t. And each innovation begins with the same dream Mr. Honda had when he found that engine: the dream of bringing the joy of mobility to people.

Honda never stops dreaming. We dreamed of “Safety for Everyone” because everyone has the right to safety, no matter how much they pay for their vehicle. The result: 9 of

Honda’s 2005 models are awarded the U.S. National Highway Traffic Safety Administration’s (NHTSA) 5-star frontal impact crash-test rating, the most of any brand.

We dreamed of making products that are friendlier to the environment, so this year we introduced FCX, a fuel cell car that will soon be available.

As long as people have places to go, Honda will invent new ways to get them there. And while today Honda makes some of the most powerful engines in the world, we will always think of Mr. Honda’s first motorized bicycle, and remember the greatest power is the power of a dream.

Trim Levels & Models

Pilot LX

- 244-hp, 3.5-litre VTEC® V6 Engine
- 16-Inch Aluminum-Alloy Wheels
- 4-Wheel Disc Brakes with Anti-Lock Braking System (ABS) (4-Channel) and Electronic Brake Distribution™ (EBD™)
- 4-Wheel Independent Suspension
- 5-Speed Automatic Transmission
- 8-Passenger Seating
- 60/40 Split Flat-Folding Second and Third Row Bench Seats (Second Row has Easy-Entry Slide Feature)
- AM/FM/CD Audio System with 4 Speakers
- 12-Volt Accessory Outlets
- Body-Coloured Side Protectors and Bumpers
- Cruise Control with Steering Wheel-Mounted Controls
- Dual-Stage, Dual-Threshold Front Airbags
- Dual-Zone Air Conditioning (CFC-Free) with Defrost Synchronization and Micron Air Filtration System
- Front Side Airbags and Side Curtain Airbags
- Heated Folding Power Door Mirrors
- Keyless Remote Entry
- Maintenance Minder
- Passenger Seatbelt Reminder
- Power Windows and Door Locks
- Roof Side Rails
- Tire Pressure Monitoring System
- Variable Torque Management™ (VTM-4®) 4-Wheel Drive System
- Vehicle Stability Assist™ (VSA®)

Pilot EX

Adds to or replaces LX features:

- Second-Row Fold-Down Activity Tray
- AM/FM/In-Dash 6-Disc CD Changer Audio System and 7 Speakers, including Subwoofer
- Body-Coloured Door Mirrors and Door Handles
- Driver's Seat with 8-Way Power Adjustment and Manually Adjustable Lumbar Support
- Front and Rear Automatic Climate Control System
- Front Fog Lights
- HomeLink® Garage Door Opener
- Rear Privacy Glass

Pilot EX-L

Adds to or replaces EX features:

- Compass in Rear View Mirror
- Conversation Mirror
- Heated Front Seats
- Leather-Trimmed Interior
- Leather-Wrapped Steering Wheel
- Power Moonroof

Pilot EX-L RES

Adds to or replaces EX-L features:

- 110-Volt Power Inverter
- Honda DVD Rear Entertainment System with 9-Inch Flip-Down Screen

Pilot EX-L NAVI

Adds to or replaces EX-L features:

- Honda Navigation System with Bilingual Voice Recognition
- Rear View Camera

A = Accessory

At Honda, assistance and support are always available. The team of trained technicians at your Honda dealership will keep your vehicle in terrific shape. Honda accessories installed at the time your vehicle is purchased are covered under the 3-year/60,000-km limited warranty. If you need more information or assistance, call us at 1-888-9-HONDA-9. For all of the latest Honda information, including product specifications, pricing, photos and more, visit [Honda.ca](http://www.honda.ca). It has everything you need to “design” your Honda and personalize it with items from a list of quality accessories.

We're Here

Quality Honda Accessories give you the opportunity to fine-tune your new Pilot just how you like it. Whether you want to turn up the style, the versatility or the exclusivity, every accessory is designed and built to adhere to the strictest Honda standards. See your dealer for full details.

Genuine Honda Replacement Parts are made to the same exacting standards as original Honda components and are guaranteed by the Genuine Honda Parts Warranty.

Make the grade with Honda. If you're a recent university or college graduate, you may be eligible for an allowance of up to \$750 on certain Honda models. To learn more about the Graduate Program, see your participating Honda dealer.

Honda Canada Finance Inc. Whether you buy or lease a Honda, Honda Canada Finance Inc. can assist you with the process. Ask your dealer which lease or purchase plan best suits your needs.

We're ready to help. When you purchase a 2006 Honda, you automatically receive Honda Plus Roadside Assistance. This service is available to you or anyone else driving your vehicle 24 hours a day, 7 days a week, anywhere in Canada or the U.S. Coverage is for 3 years, unlimited distance and includes towing, battery boost, lock-out assistance plus many other helpful services. Ask your dealer for more information.
