

THE NEW
2008 ESCAPE & ESCAPE HYBRID

Built for life in Canada

Escape with all-new style.

The new Ford Escape and Escape Hybrid are sporting nimble moves and a robust new stance for 2008. You also get an available 200 horsepower on Escape XLT and Limited and a peppy 155 net horsepower on Escape Hybrid. Plus, more standard safety features than ever, and an all-new interior design with room for lots of gear and up to 5 adults on all Escape models. Ready yourself for life's adventures in the 2008 Escape and Escape Hybrid.

Escape Hybrid in Tungsten Grey Metallic and Escape Limited in Redfire Metallic with available equipment.

Turn every ride into a powerfully fun time.

The new Escape is bursting with enthusiasm for the open road — especially those twisty, curvy sections. Its retuned, fully independent suspension delivers a smoother, more refined ride than before, while the available Duratec 30–3.0L V6 engine supplies a sporty 200 horsepower to keep you on the move. If maximizing fuel economy is your kind of fun, go for Escape's available Duratec 23–2.3L I-4 or the ultra-efficient hybrid powertrain.

Escape Limited in Black Pearl Slate Metallic with available equipment.

TOW YOUR TOYS

Escape XLT and Limited can tow up to 1588 kg (3500 lbs.).*

*When properly equipped with Class II Trailer Tow Prep Package and Duratec 30–3.0L V6 engine. Maximum trailer towing capability will vary based on passenger and cargo loads, and optional equipment installed on the vehicle. See your Ford of Canada Dealer for more information.

GET OVER IT

The new Escape is naturally nimble thanks to its outstanding approach, breakover and departure angle capabilities. So you can drive Escape up and over some formidable obstacles that others will have to drive around.

Wander the great outdoors.

It's Saturday. It's sunny. You've got to get out. Time to call your friends and hit the road. Or maybe there's no road where you're going. No matter. Escape's available Intelligent 4WD System is always on and always working. In fact, it automatically monitors traction and adjusts torque distribution as needed to give you maximum grip. So change course whenever you'd like. Escape is willing and able to take you anywhere your heart desires.

Escape XLT in Silver Metallic with available equipment.

MAXIMIZE YOUR STABILITY

LEGEND

Vehicle inertia

Brakes activating to maintain control

1

3

AdvanceTrac® with class-exclusive* RSC®

An electronic stability enhancement system that actually measures what other manufacturers' systems ignore or can only estimate, AdvanceTrac with RSC (Roll Stability Control) features a unique vehicle-roll motion sensor that works in conjunction with the Anti-lock Brake System (ABS), traction control and yaw control. The sensor directly measures the vehicle's roll-rate 100 times every second, which is used to determine when and how the system will apply individual brakes and modify engine power to help keep all 4 wheels firmly planted. This system is standard on Escape XLS, XLT and Limited.

*Small SUV class.

Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions.

Traverse the rough stuff with poise.

With more standard safety features than ever, the new Escape is well equipped to get you through all sorts of situations. For instance, our new Electric Power Steering system adapts with changing road conditions and vehicle speed, resulting in more confident steering and handling. It also improves steering feel at low speeds and provides precise steering on the highway. It's just one of the many new standards we put into the new Escape and Escape Hybrid.

All 6 airbags now standard

The dual front airbags in our Personal Safety System® are now joined by front-seat side airbags and the side-curtain airbags of our Safety Canopy™ System as standard equipment on every Escape.

Take control with all-new style.

Designed to help keep your eyes on the road, Escape's new instrument panel features a "top of dash" display that you can reference for everything from your radio station, to the available dual-zone temperature control settings, compass and outside temperature. Optional on Escape XLT and Limited, the DVD-based Navigation System is paired with our 320-watt Audiophile® Sound System which features a 6-disc in-dash CD changer with MP3 capability.

TUNE IN TO YOUR OWN STYLE

MP3 jack and SIRIUS Satellite Radio

Thanks to Escape's standard new auxiliary audio input jack, you can plug your personal MP3 player into the vehicle's sound system and tune in to your own road trip sound track. SIRIUS Satellite Radio* is also available to expand your listening options. Standard on Escape Limited and available on Escape Hybrid and XLT, SIRIUS comes with a 6-month subscription to get you started surfing your choice of sports, news, entertainment and 100% commercial-free music channels, coast to coast.

*See your Ford of Canada Dealer or contact SIRIUS at 1-888-539-7474 for more information.

Skyward vision

Escape's available moonroof opens and closes at the push of a button so you can let the sun in or shut the rain out at a moment's notice. Paired with a mini-overhead console that includes a storage bin and map lights, this refreshing feature is standard on Escape Limited and available on Escape Hybrid and XLT.

Escape Limited with Camel interior and available equipment. U.S. model shown.

Spacious possibilities

Escape can carry up to 827 litres* (29.2 cu. ft.) of cargo behind its standard 60/40 split-folding rear seats. When you need more space, fold both rear seats down and load up to 1877 litres* (66.3 cu. ft.) of fun.

*Escape XLT capacities stated. Actual capacities vary by model.

INCREASE THE LUXURY QUOTIENT

These must-have features are all standard on Escape Limited: new Dual-zone Electronic Automatic Temperature Control for the driver and front passenger, heated sideview mirrors, heated front seats, new steering wheel-mounted audio controls, and the Reverse Sensing System.

Escape Limited with Camel interior and available equipment.

The perfect fit for you and your friends.

Escape features its quietest ride ever thanks to a new acoustic-laminate windshield and other refinements that help make it 15% quieter inside at highway speeds. To make the experience even more plush, leather-trimmed seating is standard on Limited and available on Escape Hybrid and XLT. New earth-friendly seat fabric, standard on Escape Hybrid and XLT, is made from 100% post-industrial materials that would have ended up in landfills otherwise.

KEEP YOURSELF IN THE KNOW

Escape Hybrid's optional Hybrid Energy/Navigation/Audiophile® System allows you to track the powertrain's 3 main modes of operation (Hybrid Drive, Electric Drive and Idle Charging); find your way to destinations near and far; and jam out in 320-watt audio bliss. The Navigation and Audiophile Systems are also available on Escape XLT and Limited.

Have your Hybrid and your SUV too.

As earth's first full-hybrid SUV, Escape Hybrid continues to offer the best of both worlds: outstanding hybrid fuel efficiency and SUV capability. And it produces near-zero tailpipe emissions* which helps keep our air cleaner too. Available Intelligent 4WD and up to 1869 litres (66.0 cu. ft.) of cargo space make it the ideal SUV for all sorts of outings. Start down the path toward a brighter tomorrow in the new Escape Hybrid.

*When operating in Electric Drive mode.

Escape Hybrid in Kiwi Green Metallic with available equipment.

Use your (passing) power for good.

Escape Hybrid is all about conserving fuel. So on those rare occasions when you step on the accelerator looking for some additional get-up-and-go, Hybrid Drive mode will engage its electric traction motor to give the gas engine an extra boost. The result? Lively V6-like acceleration performance with lower average fuel consumption. Another fun fact: Thanks to its electronically controlled Continuously Variable Transmission, Escape Hybrid can also be flat towed behind your motor home.

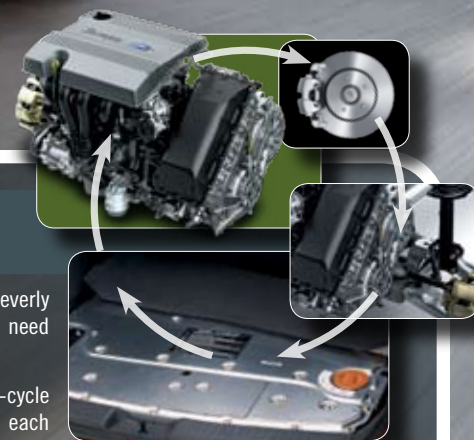

Escape Hybrid in Light Ice Blue Metallic with available equipment.

START A NEW RECYCLING PLAN

The Escape Hybrid powertrain cleverly recharges itself, so there's never any need to plug it in.

The 2.3L I-4 engine uses Atkinson-cycle combustion to make the most of each drop of gas, producing 124 lb.-ft. of torque and a peppy 155 net hp. When you apply the brakes, the electric traction motor captures the kinetic energy that's created through a process called Regenerative Braking and uses it to recharge the battery pack. The 330-volt battery pack completes the circle by supplying energy to start the engine, to drive at low speeds, and to boost acceleration.

If you're already into recycling, Escape Hybrid is a natural fit. And if you're not, there's no better way to start.

ESCAPE & ESCAPE HYBRID STANDARD FEATURES

Each series includes the standard equipment of the previous series, except where additions/exceptions are noted.

ESCAPE XLS Duratec 23—2.3L I-4 engine • 4-speed automatic transmission • Front-wheel drive • AdvanceTrac® with RSC® (Roll Stability Control) • Safety Canopy™ System • Front-seat side airbags • 16" styled-steel wheels • Chrome grille • Power windows, door locks and sideview mirrors • Remote keyless-entry system with 2 integrated key fobs • AM/FM stereo/single-CD player and clock with MP3 capability • Cloth seats • Front and rear floor mats

ESCAPE XLT 16" cast-aluminum wheels • Automatic headlamps • Front fog lamps • Privacy glass • Roof rack with crossbars • Premium cloth seats with 6-way power driver seat

ESCAPE LIMITED Duratec 30—3.0L V6 engine • Intelligent 4-wheel drive • 16" bright machined-aluminum wheels • Monochromatic exterior appearance • Heated sideview mirrors • Premium leather-trimmed seats • Heated front seats • Auto-dimming rearview mirror • Audiophile® Sound System • AM/FM stereo/6-disc in-dash CD changer with MP3 capability and SIRIUS Satellite Radio • Compass and outside temperature display • Illuminated visor vanity mirrors • Keyless-entry keypad • Reverse Sensing System • Moonroof with mini-overhead console

ESCAPE HYBRID (contains equipment exclusive to Escape Hybrid) 2.3L Atkinson-cycle engine • 330-volt nickel-metal-hydride (NiMH) battery • Regenerative Braking System • Safety Canopy System • Front-seat side airbags • Front-wheel drive • 16" cast-aluminum wheels • Chrome grille • Premium cloth seats with 6-way power driver seat • 60/40 split rear seat with tip-fold-flat latch • AM/FM stereo with 6-disc in-dash CD changer with MP3 capability

Create your own unique Escape.

Are you drawn to the environmentally conscious, amazingly efficient Escape Hybrid? Does the fundamentally capable nature of Escape XLS meet your needs? Perhaps you'd enjoy Escape XLT's standard 6-way power driver seat and other conveniences. Or could the monochromatic exterior, 200-hp V6, and leather-trimmed seating of Escape Limited be your must-haves? Compare them here, and explore the following pages to consider all your options.

Escape Hybrid in Kiwi Green Metallic, Escape XLS in Redfire Metallic, Escape XLT in Silver Metallic and Escape Limited in Black Pearl Slate Metallic.

ESCAPE & ESCAPE HYBRID SPECS
