

# The 2015 GL-Class.

**Mercedes-Benz**  
The best or nothing.

# The 2015 GL-Class.

Designed for comfort and engineered for capability, the aerodynamic and athletic GL-Class is a powerful yet elegant full-size SUV that impresses with its spaciousness and innovation.

## **Effortless superiority without limits, but with responsibility.**

The GL 350 BlueTEC diesel engine not only impresses with its refined pulling power; its third generation common-rail technology delivers excellent fuel economy with minimal emissions. The top-of-the-range 5.5L engine in the GL 63 AMG features a hand-built Bi-turbo V8. All models include 4MATIC™ permanent all-wheel drive ensuring confident driving in any condition. The 7G-TRONIC PLUS transmission features an enhanced electrohydraulic control unit, together with an optimized engine and transmission software, which facilitates more dynamic gear changes and even greater shift quality. Thanks to the Adaptive Damping System ADS, the AIRMATIC air suspension adjusts precisely to the road surface, driving style and load status for improved ride comfort and driving dynamics both on and off the road.

## **Mercedes-Benz Intelligent Drive – a new era in mobility.**

Every model of GL-Class comes with a host of groundbreaking Mercedes-Benz solutions to get closer to realizing the vision of safe

and accident-free driving. Active Bi-Xenon Headlamps with adaptive highbeam assist offer superior lighting intensity and optimized illumination for every situation. Passive Blind Spot Assist alerts you when there are vehicles located in this zone and generates an acoustic warning when the driver activates the indicator light. Crosswind Assist detects sudden, strong gusts of wind and prevents your vehicle from 'drifting' out of the lane by means of targeted braking on one side of the vehicle. COLLISION PREVENTION ASSIST constantly monitors the distance from the vehicle ahead, and works discreetly to help prevent rear end collisions. And PRE-SAFE® can activate precautionary measures to enhance occupant protection in critical situations.

## **The world at your command.**

The latest generation of COMAND is now equipped with an internet browser and MB Apps that allow you to browse the internet while stationary and use Mercedes-Benz Apps while on the move. You can search via Google, download your route via Google maps and view images from available traffic cameras.

## **PARKTRONIC with Active Parking Assist and 360° Camera.**

At speeds below 35 km/h, this feature will automatically search for a suitable parking space. Once located, Active Parking Assist will take control of the steering wheel, only requiring the driver to engage the accelerator and brake pedals to complete the parking manoeuvre.
