

2016

TLX

The 2016 TLX represents more than the latest evolution of Acura. Rather, it's the most compelling realization yet of our driver-focused philosophy. It's power and control brought into perfect balance. It's helping to anticipate where the driver wants to go, changing the way wheels themselves move and guide you. It's uncompromised design in the name of unrestrained feeling, putting exhilaration front and centre once again.

IT'S THAT KIND
OF THRILL

PERFORMANCE

ANATOMY OF A THRILL

SUPER HANDLING

A car should put you in touch with the road. But that's just the beginning. We believe reading the driver is just as important as reading the road. Every TLX—whether the 4-cylinder with Precision All-Wheel Steer™ or the V6 with Super Handling All-Wheel Drive™—is engineered to help anticipate what the driver intends. It is designed to constantly monitor road conditions and driver input to help stay one step ahead. These precise, seamless adjustments bring added confidence and the promise of an immediate thrill around every corner.

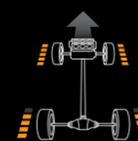

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

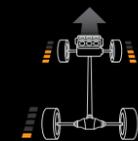

HOW THE CURVE WAS WON

SUPER HANDLING ALL-WHEEL DRIVE™†

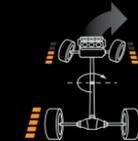

Races are won in the curves. Now curves have met their match. The available torque-vectoring Super Handling All-Wheel Drive (SH-AWD®) system was designed not just for tricky weather, but also for superior handling on practically any road.

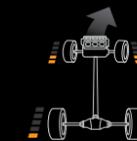

ACCELERATION
As weight shifts to the rear of the TLX during hard acceleration, the SH-AWD® system transfers up to 44% of the power to the rear wheels to take advantage of available traction.

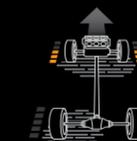

HIGHWAY CRUISE
In an effort to improve fuel efficiency, up to 90% of the power is sent to the front wheels when cruising in a straight line.

CORNERING
When cornering on dry surfaces, up to 70% of the torque is distributed to the rear. Torque vectoring allows up to 100% of the power to be distributed to the outside rear wheel, improving control and helping rotate the TLX through the turn.

LANE CHANGE
For increased stability during lane changes, the SH-AWD® system transfers power to the inside rear wheel.

SLIPPERY ROAD
Under slick conditions, SH-AWD® actively sends power to the wheel with the most traction.

SUPER HANDLING ALL-WHEEL DRIVE™† (SH-AWD®)

By continuously directing engine power to match driver input, weight distribution, available traction, and other conditions, the available SH-AWD® system is designed to provide seamless power transitions and supreme control. And the lightweight SH-AWD® system in the TLX uses torque vectoring to add or subtract rotational momentum with a surgically precise nudge. The result is enhanced performance that simply can't be matched by front, rear, or conventional all-wheel-drive systems, whether out on the track, or simply turning onto your street.

Joining forces with SH-AWD®, Agile Handling Assist† is engineered to actively apply braking to any of the four wheels independently. This helps the TLX pivot through every corner more accurately, aiding vehicle stability, maneuverability and control.

TORQUE DISTRIBUTION

The available SH-AWD® system is designed to continuously determine the optimal level of power distribution between the front and rear wheels, as well as between the rear wheels, based on an analysis of wheel speed, steering angle, lateral G-force, and yaw rate (the rate at which the TLX rotates clockwise or counterclockwise).

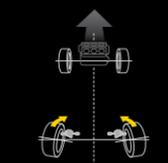

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

FLIP THE SCRIPT ON PHYSICS

PRECISION ALL-WHEEL STEER™†

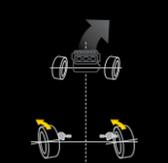

Turning used to be solely the job of the front wheels. The TLX has changed that with the available Precision All-Wheel Steer system. It is designed to adjust the toe angle of each rear wheel independently for increased agility and stability while cornering and also during braking.

TOE-IN TOE-IN

BRAKING

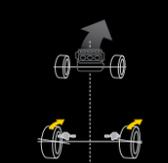

While braking, each rear wheel adjusts inward, increasing stability.

TOE-OUT TOE-IN

CORNERING

While cornering, the rear wheels turn the opposite direction of the front wheels, helping to make handling quick, agile and precise.

TOE-IN TOE-OUT

LANE CHANGE

During high-speed lane changes, the rear wheels turn the same way as the front wheels for enhanced smoothness and stability.

PRECISION ALL-WHEEL STEER™†

From the chassis and suspension to the steering feel, the TLX is tuned for full responsiveness. On front-wheel-drive models, Precision All-Wheel Steer elevates this control to a new level. When compared with traditional two-wheel steering systems, Precision All-Wheel Steer dials in more active agility at low-to-mid speeds and better stability at high speeds.

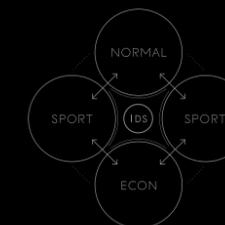

The Precision All-Wheel Steer system is engineered to continuously read vehicle sensors and driver input. It then instantly adjusts the toe angle of each rear wheel independently, like an expert skier precisely controlling both skis. That means the TLX can more gracefully follow the line the driver pursues through every curve.

AGILE HANDLING ASSIST†

Agile Handling Assist in every TLX is engineered to actively apply braking to any of the four wheels individually. This helps the TLX rotate through every corner more accurately. It helps keep you headed right where you want to go, tracing the line through the turn. Working in concert with the Precision All-Wheel Steer system, Agile Handling Assist helps enhance vehicle stability, maneuverability, and control.

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

ACCELERATED THINKING

ENGINES

TLX offers two engine choices. Each direct-injection engine is designed with fuel efficiency in mind, with the across-the-spectrum performance boost of Variable Valve Timing and Lift Electronic Control (i-VTEC®). i-VTEC increases high-rpm horsepower while keeping ample low-end torque on tap for on-demand acceleration.

The 3.5-litre i-VTEC® V6 delivers 290 horsepower* and 267 lb.-ft. of torque.* The 2.4-litre L4 offers 206 horsepower* and linear torque delivery at the low end for direct feedback whenever you need it.

Variable Cylinder Management® (VCM®) lets the V6 TLX switch to just three cylinders in certain driving conditions, a measure designed to improve fuel efficiency. Then, when you need more power, VCM makes the transition back to all six cylinders so seamless, you'll never know it happened.

TRANSMISSION

The TLX transmissions can rev-match downshifts for smoother performance. And both feature steering-wheel-mounted Sequential SportShift® paddle shifters for quick, manual-style gear changes.

TLX models with the 4-cylinder engine feature the world's first 8-speed dual-clutch transmission (DCT) with a torque converter. DCT allows lightning-fast gear changes, as one clutch governs odd gear numbers, and the other, even. The result is direct, responsive action. A torque converter amplifies torque for more immediate response and smoother delivery.

On V6 models, the smooth-shifting, 9-speed, pushbutton automatic transmission marries performance and comfort, accommodating diverse driving scenarios with a wide range of gear ratios.

INTEGRATED DYNAMIC SYSTEM

The Integrated Dynamic System (IDS) gives you four modes: Normal, efficiency-boosting Econ, Sport, and Sport+. Sport dials up throttle response, stiffens the steering feel, and makes the Precision All-Wheel Steer™† and the available SH-AWD®† systems more aggressive, while Active Sound Control (ASC) tunes up the natural engine note. For those times when only the utmost in performance will do, Sport+ goes further, blipping the throttle and rev-matching downshifts to punctuate gear changes and help preserve the balance of the car.

*Horsepower and torque calculations reflect SAE net, Rev. 08/04, SAE J1349 procedures.

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

DESIGN

TRIGGER ROAD ENVY

SCULPTED LINES

Heart-stopping exhilaration is wrought from more than engineering. The TLX leads the way with a sophisticated design language demanding short overhangs, sculpted lines and a wide, athletic stance. With an unmistakable presence, it leaves a bold impression, while standing still or in motion.

JEWEL EYE LED HEADLIGHTS

Acura's Jewel Eye™ LED headlights use ten separate LED lamps to mimic natural sunlight, helping to reduce fatigue at night. The intense, focused beam of light can help you see what conventional non-LED headlights don't, and makes colours appear more vivid.

PITCH-PERFECT SILENCE

Inside the TLX you'll find a haven of calm and quiet. Active Sound Control senses unwanted mechanical noise and emits opposing frequencies to help cancel out even the slightest rumble. Acoustically damped and thoroughly insulated with precisely sealing expanding foam, triple-sealed doors and hydraulic engine mounts, the TLX helps you maintain a positively sheltered existence.

HEARD LOUD AND CLEAR

Surround yourself with studio-quality sound. For lovers of audio performance, we offer the available 10-speaker ELS Surround® Premium Audio System developed by seven-time Grammy Award®-winning recording engineer Elliot Scheiner. As the TLX took shape, Elliot worked closely with Acura engineers to tune the system to precisely match its interior space and preserve the integrity of the sound.

TECHNOLOGY

A CAR THAT ANSWERS YOUR QUESTIONS

SIRI EYES FREE^{††}

Long-press the voice control button on the steering wheel to initiate Siri® Eyes Free. With a compatible iPhone®, you can make and receive calls, select and play music, audibly send and receive text messages and email, check the weather, and look up the traffic report before heading home—it's the perfect co-pilot right at your fingertips.

NAVIGATION SCREEN[†]

Close to your line of vision is a wide, eight-inch colour screen that can combine audio, information, and available navigation functions.* Its intuitive, high-resolution display puts virtually all the information you could need front and centre, where functions are easily controlled by voice or from the interface dial.

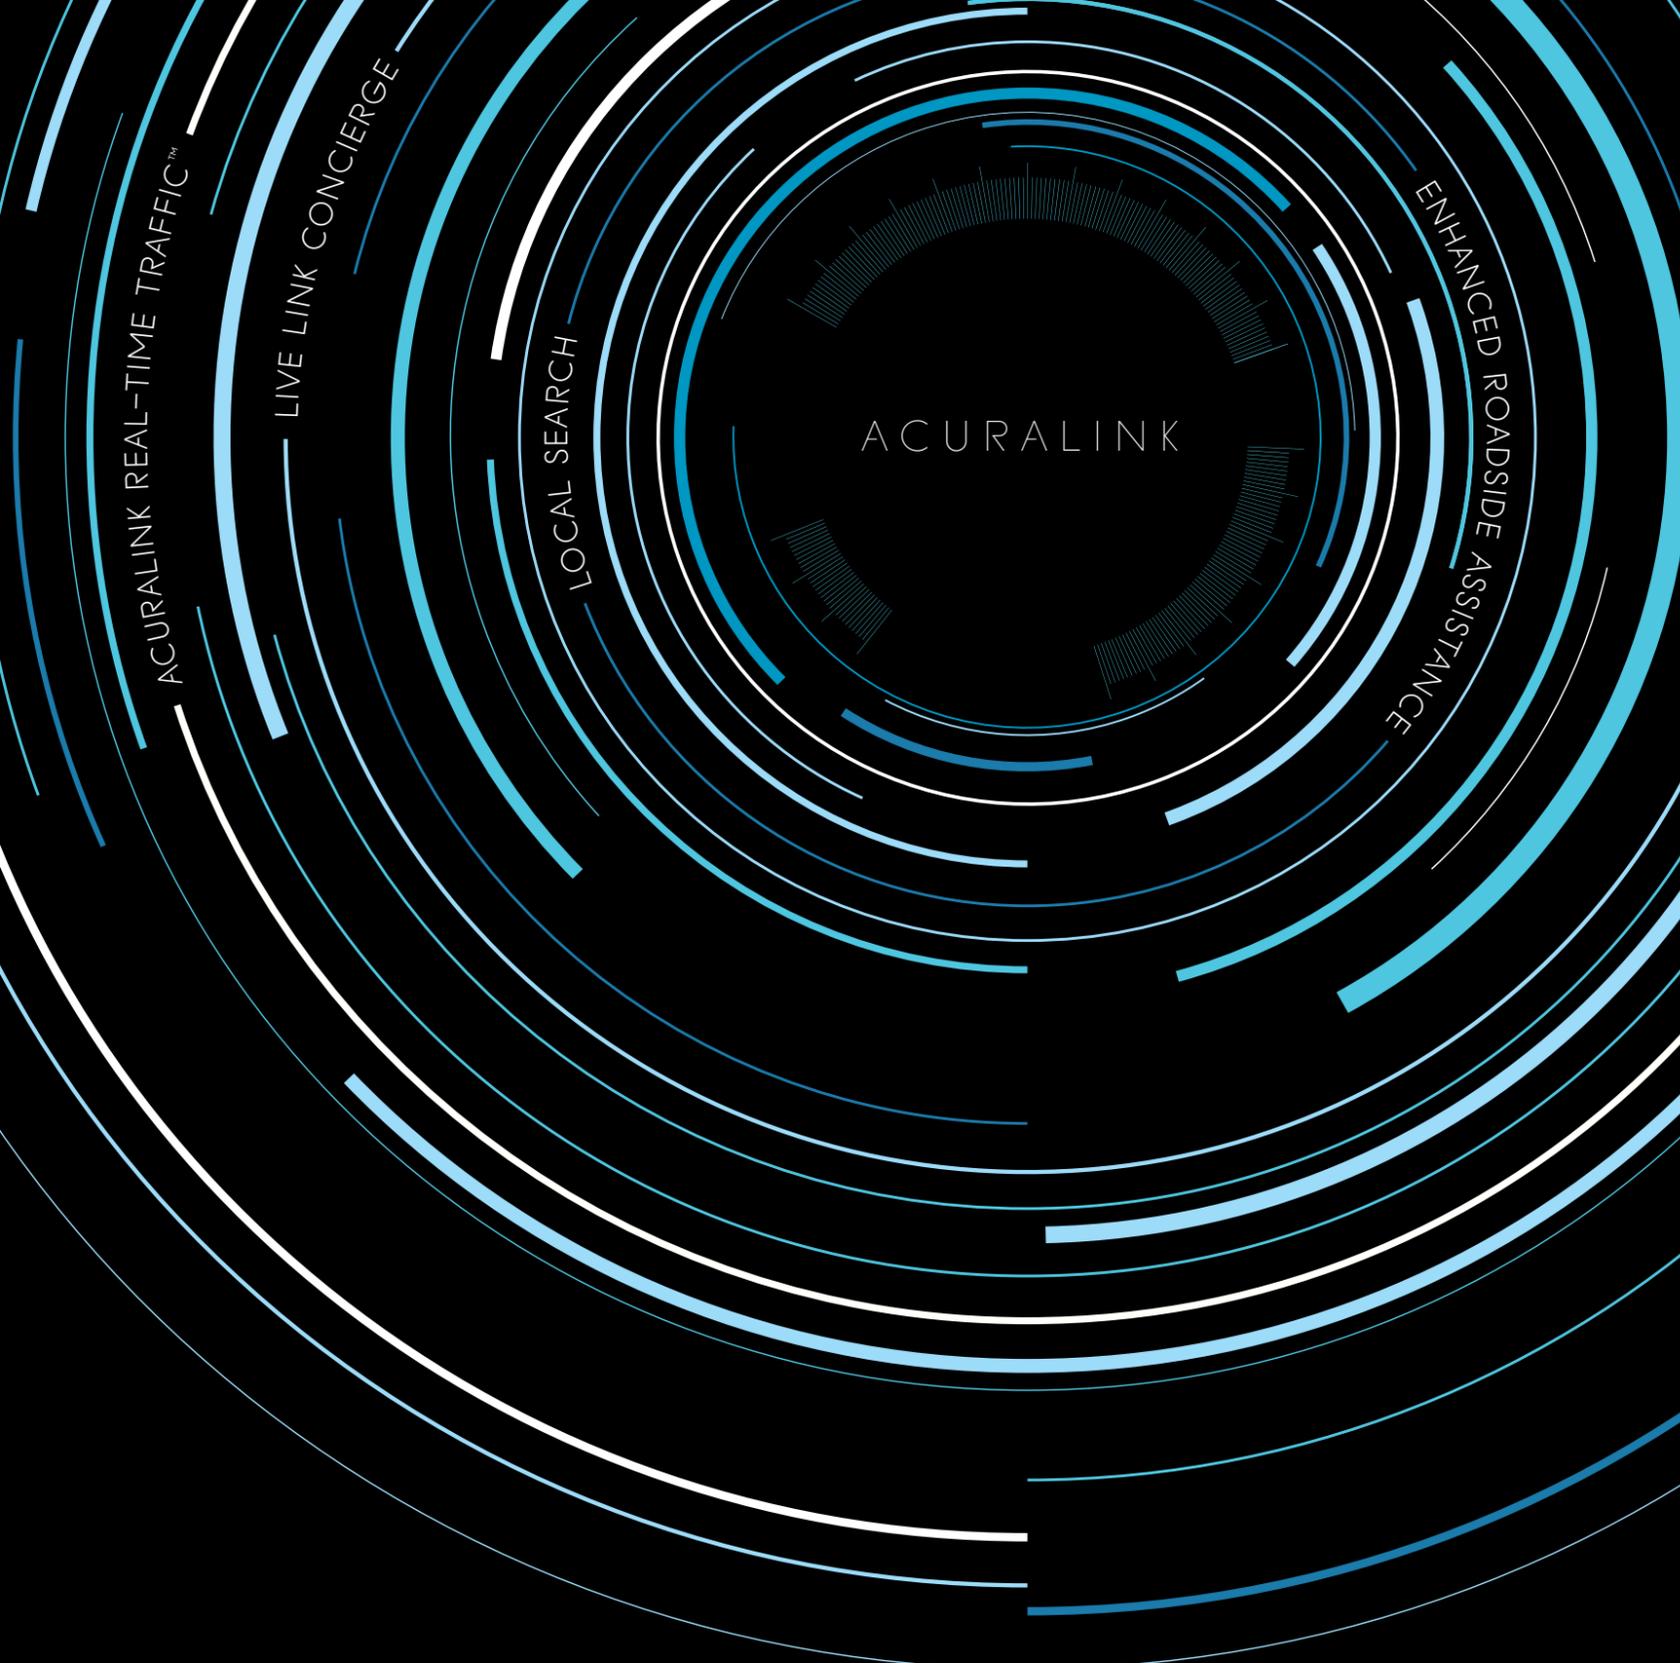

ON-DEMAND MULTI-USE DISPLAY™^{††}

An intuitive touch screen combines the controls you need most. The striking, seven-inch, colour On-Demand Multi-Use Display™ touch screen puts the audio system, climate and your choice of programmed shortcuts at your fingertips, all with feedback you can feel. You can even use voice and steering-wheel-mounted controls without taking your hands off the wheel.

[†]None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

^{††}Only compatible with certain devices and operating systems. Cellular data and/or voice charges may apply including roaming charges and/or other amounts charged by your wireless carrier.

*Map database covers major metropolitan areas in Canada and the 48 contiguous U.S. states.

TECHNOLOGY

EASE OF EVERYTHING

ACURALINK™,†

Today it is not enough just to be connected. You need an intelligent way to keep it all straight. Beyond conventional navigation, the available AcuraLink system connects you to the data and media you want. It can reroute you based on current traffic conditions, stream your favourite web content through Aha™,‡ and provide you with 24-hour concierge service that helps with anything from reading reviews to ordering last-minute concert tickets. Its expansive technology keeps you more in touch with everything in the cloud and the world beneath it.

CONNECT

You can be in sync with your car even when you're apart. The Acura Connect app acts as a remote and gives you vital vehicle stats. Flash your lights, lock and unlock your car, or check tire pressure, fuel level, and more remotely. It also gives you information and 24/7 live concierge services, and can even send destinations right to your car.

SAFETY ASSIST

PROTECT

Enhanced Roadside Assistance and Stolen Vehicle Locator are available 24/7. Drive with added peace of mind knowing features such as AcuraLink Assist™ and Automatic Collision Notification can help in a serious situation, even pinpointing your exact location and dispatching emergency personnel if needed.†

AUTOMATIC COLLISION NOTIFICATION

STOLEN VEHICLE LOCATOR

ACURALINK ASSIST

ENHANCED ROADSIDE ASSISTANCE

REMOTE SMART ENTRY

A car that really knows you. In addition to the available keyless remote engine start, your personal key fob remembers your settings for seat and mirror adjustments, cabin temperature, and allows you to preheat and pre-cool your TLX from a distance.

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

*Only compatible with certain devices and operating systems. Cellular data and/or voice charges may apply including roaming charges and/or other amounts charged by your wireless carrier. AcuraLink requires a subscription. One year complimentary subscription to AcuraLink Standard, AcuraLink Connect, and AcuraLink Premium included, after which fees, taxes and other charges will apply to continue AcuraLink subscription. Ask your dealer for full terms and conditions.

‡Vehicle or the compatible smartphone tethered via the vehicle's Bluetooth® connection needs to have cellular reception.

**Real-Time Traffic™ is only available in 13 of Canada's largest metropolitan areas and is dependent upon data location reporting of connected vehicles.

((ACURAWATCH))

IT HAS YOUR BACK, YOUR FRONT, AND YOUR SIDES

ACURAWATCH™

AcuraWatch™ forms a network of sensing technologies hard at work in the TLX. These advanced driver assistance features constantly gather information and offer warnings, and some features can even take action when necessary. All to help prevent, avoid, or minimize threats.

FORWARD COLLISION WARNING (FCW)† SYSTEM

This available system is designed to trigger an audible alert if it determines you are in danger of a collision with a vehicle detected ahead.

ADAPTIVE CRUISE CONTROL (ACC) WITH LOW-SPEED FOLLOW†

This available radar-based system is engineered to keep a set speed and a set interval from a vehicle detected directly in front of you, and is designed to even bring the TLX to a complete, full stop in traffic.

COLLISION MITIGATION BRAKING SYSTEM™ (CMBS®)†

To help reduce the likelihood or severity of a frontal impact, the available CMBS is engineered to lightly brake and tug at your seat belt if you don't slow down when it senses you're at risk of a collision. If it still senses an imminent collision, CMBS is designed to tighten the belts further and brake more firmly.

LANE DEPARTURE WARNING (LDW)† SYSTEM

A small camera mounted at the top of the windshield is designed to track lane markings on the road and then determine when the driver is making an unintended departure from a detected lane. This available system provides visual alerts on the driver's instrument panel along with an audible warning.

LANE KEEPING ASSIST SYSTEM (LKAS)†

The available LKAS is engineered to gently correct your steering when you begin to leave a detected lane without signaling, applying torque progressively to the steering to help guide you back to the centre of the lane.

ROAD DEPARTURE MITIGATION†

With camera technology, available Road Departure Mitigation can sense more than just lane markings—it has been engineered to detect parked cars, pedestrians, mailboxes, and other objects. It is designed to help steer and even apply break pressure when necessary to keep the car from leaving the road.

BLIND SPOT INFORMATION (BSI)† SYSTEM

Using ultrasonic sensors in the rear bumper, the available BSI system is designed to illuminate an indicator light to let you know a vehicle has been detected in your blind spot, and alerts you with an audible signal if you try to change lanes.

MULTI-ANGLE REAR VIEW CAMERA† WITH DYNAMIC GUIDELINES

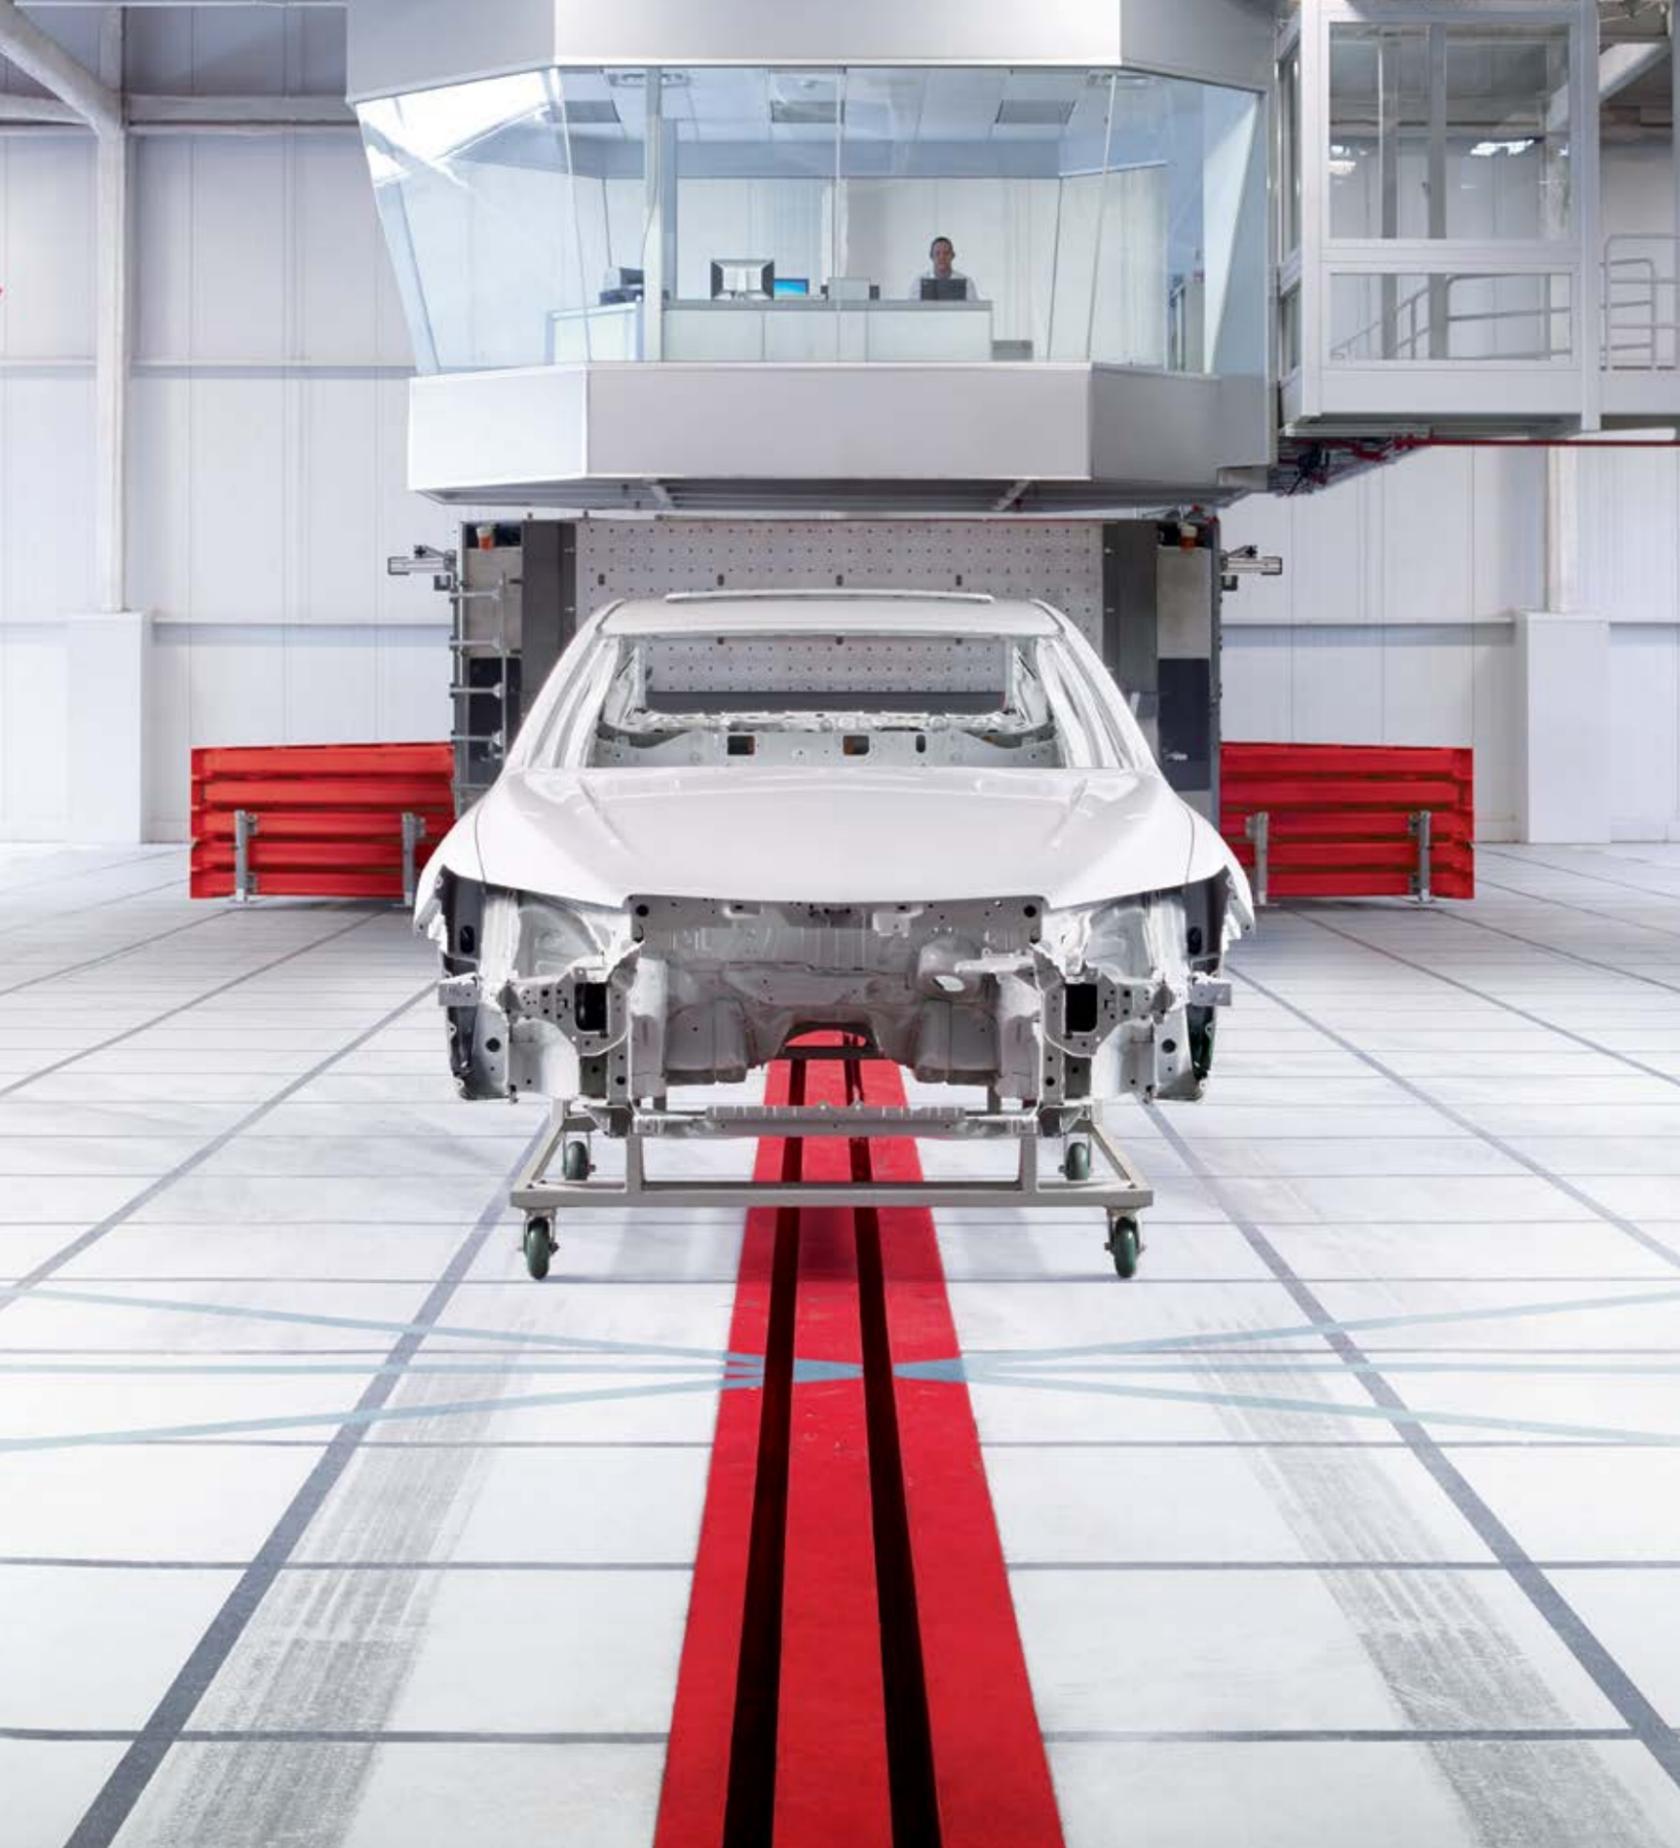

As the TLX is put in reverse, the multi-angle rearview camera provides a choice of three views, including top down and wide angles, to help you see where you're going.

REAR CROSS TRAFFIC MONITOR†

Using the blind spot information sensors designed to detect cars as the TLX is put in reverse, the available Rear Cross Traffic Monitor is engineered to sound a warning and display a visual warning on the rearview camera display if a vehicle is detected. Like having eyes on the back of your head, the system often detects vehicles before you can even see them as you reverse.

†None of the features we describe are intended to replace the driver's responsibility to exercise due care while driving. Drivers should not use handheld devices or operate certain vehicle features unless it is safe and legal to do so. Some features have technological limitations. For additional feature information, limitations and restrictions, please visit www.acura.ca/disclaimers and refer to the vehicle's owner's manual.

SAFETY

PROTECTION AT THE FOREFRONT

ADVANCED COMPATIBILITY ENGINEERING

Using a network of connected structural elements, the Advanced Compatibility Engineering™ (ACE™) body structure is designed to distribute frontal crash energy more evenly throughout the vehicle. This not only helps reduce the forces transferred to the passenger compartment, it also helps disperse the forces transferred to the other vehicle in an impact. In addition to ACE, the front door areas are composed as a single piece of hot-stamped, ultra-high-strength steel. It's just one of many ways the TLX body is designed to help absorb and redirect energy to help protect its occupants.

ENGINE	
Engine	2.4-litre, 16-valve, Direct Injection DOHC, i-VTEC® 4-cylinder
Horsepower	206 hp @ 6800 rpm

At Acura, when innovation and performance meet purpose, remarkable things can be achieved. Through our commitment and continued involvement with events and organizations across Canada, we seek to create engaging and inspiring experiences for our customers and our community. Because at Acura we believe exhilaration goes beyond the driver's seat.

Acura is honoured to be the Canadian broadcast sponsor of golf's most historic and time-honoured tournament. The Masters is golf's first major open of the season and is famous for its ceremonial "Green Jacket" winner's presentation.

Mobile Clinics
Presented by Acura

Acura is proud to be the official vehicle sponsor of the CN Future Links Mobile Golf Clinics. Close to 70,000 junior golfers are expected to participate in the clinics facilitated by the ten provincial golf associations, each of which are provided a current model year MDX from Acura.

Driving a luxury vehicle should go beyond engineering and amenities. That's why Acura is committed to ensuring your ownership experience is equally luxurious. New Acura owners benefit from four-year 24-hour Roadside Assistance, which includes Dispatch Emergency Roadside Service, Emergency Lockout Service and Traffic Accident Services. See your Acura Retailer for details.

WARRANTY

Your new Acura vehicle comes with the following warranties:

- Major Component – 5-year/100,000-km limited warranty
- Vehicle – 4-year/80,000-km Distributor's limited warranty
- Rust Perforation – 5-year unlimited-distance warranty
- Surface Corrosion – 4-year/ 80,000-km
- Accessories – 4-year/80,000-km limited warranty

(when installed by an authorized Acura Retailer at time of new vehicle delivery). Regular maintenance items and parts are subject to normal wear and replacement, and are not covered by warranty. Certain other items are excluded and certain conditions apply. See your Acura Retailer for details.

ACURA PLUS

Extend your worry-free ownership experience by purchasing additional coverage. Choose from Acura's flexible selection of Mechanical Coverage that extends up to 8 years or 200,000 km, whichever comes first. See your Acura Retailer for details.

LEASING AND FINANCING

Owning your Acura is easy. See your Acura Retailer for complete details on Conventional Financing.*

*A genuine service of Acura Financial Services. Conditions, restrictions and prepayment requirements might apply O.A.C.

Always use seat belts and appropriate child seats. Children 12 and under are safest when properly restrained in a rear seat. Acura reminds you to properly secure all items stored in the cargo area.

Acura reserves the right to terminate or change any of the services and/or features at any time, for any reason. Certain features require registration and may transmit to Acura and/or its providers a vehicle's location, operating conditions or other information that may be tied to the vehicle identification number (VIN) and can be combined to create a track of a vehicle. For Acura's data use and privacy policy, see www.acura.ca/owners/acuralink.

2016 TLX model shown. Some of the technologies described in this brochure come with limitations. See owner's manual for complete details. Specifications, features, illustrations and equipment shown in this catalogue are based upon the latest available information at the time of publication. Remember your seat belts. It's a simple fact of life. Although descriptions are believed to be correct, accuracy cannot be guaranteed. Honda Canada Inc. reserves the right to make changes at any time, without notice or obligation, in colours, specifications, accessories, materials and models. Some vehicles are shown with optional equipment. Some vehicles shown are U.S. models. Canadian specifications may vary. Map Database of the Acura Navigation System covers major metropolitan areas in southern Canada and the 48 contiguous U.S. states.
