

2016 FIAT®

FIAT® 500X
WHERE ITALIAN STYLE MEETS
ALL-WHEEL DRIVE

When it comes to capability, one crossover wears it best. The all-new 500X expands on FIAT® functionality and performance, delivering it all in a larger yet distinctively Cinquecento package reminiscent of the original 1950s' FIAT 500 classic. Designed at Centro Stile in Turin, Italy, this familiar mix of accessibility and simplicity has all the earmarks of a new modern classic.

Now all-wheel drive (AWD) comes to the FIAT 500 family, featuring advanced drive systems that include two engine options and an available class-exclusive⁽¹⁾ 9-speed automatic transmission. With a special, class-exclusive⁽²⁾ disconnecting rear axle design, the innovative AWD system also works to improve fuel efficiency, boasting up to as good as 6.9 L/100 km (41 mpg) highway. It all comes back to a very Italian approach to doing things: do them well, and always with style.

THE X FACTOR IS YOU.

Driving FIAT® 500X is already a statement in itself — but with five different models and 12 exterior colour choices, you can be sure the car you drive will truly say something about you. Find your true 500X self in Pop, Sport, Lounge, Trekking or Trekking Plus models: each offers a mix of standard and optional features that will reflect, enhance and inspire any lifestyle — from urban cool to outdoor rugged.

POP

This 500X is all about versatility. With its innovative spirit, the 500X Pop not only reflects popular culture, it helps inspire it. Pop features a 1.4L MultiAir® Turbo I-4 engine with 6-speed manual transmission, air conditioning, cruise control, Radio 3.0 with USB and auxiliary media hub, steering wheel-mounted audio controls, 60/40 rear folding seats and more.

SPORT

With 500X Sport, everything looks easy and effortless thanks to its many capabilities. An available 9-speed automatic transmission, the FIAT® Dynamic Selector and 17-inch aluminum wheels keep it nimble. The Uconnect® 5.0 hands-free⁽²⁾ radio with voice command, premium wrapped steering wheel and shift knob, automatic headlamps and front cornering fog lamps all add to its winning streak.

LOUNGE

As the name suggests, 500X Lounge will become your go-to place to unwind from a long day. Why not, when, in addition to the standard 2.4L Tigershark™ MultiAir I-4 engine, it offers leather-faced seats, heated front seats, 12-way power driver's seat including 4-way power lumbar adjust, heated steering wheel, eight speakers, ParkView® Rear Back-Up Camera⁽³⁾ and interior ambient lighting.

TREKKING

The brawny good looks of 500X Trekking gives you the nudge you need to make good on those dreams of adventure. Featuring rugged-looking cloth seating, unique front and rear "rugged appearance" fascia, automatic headlamps and unique 17-inch wheels. With Keyless Enter 'n Go™ with proximity entry, you've got no excuses — so get out there!

TREKKING PLUS

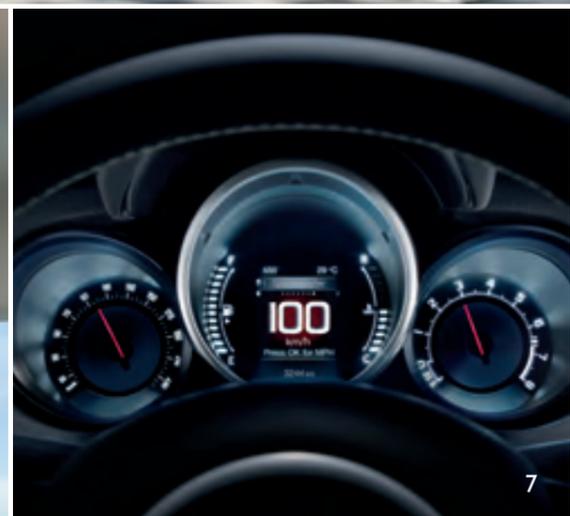

For adventuresome spirits who in no way subscribe to the "roughing it" lifestyle, Trekking Plus has you covered. It steps things up with leather-faced seats, dual-zone automatic temperature-controlled climate system, ParkView Rear Back-Up Camera⁽³⁾, Park-Sense® Rear Park Assist⁽³⁾, 12-way power driver's seat including 4-way power lumbar adjust and a heated steering wheel.

THINKING BEYOND FOUR WHEELS.

With design cues that capture the charm and charisma of that very first “Nuova” Cinquecento, the 2016 FIAT® 500X boldly enters the crossover segment with the FIAT spirit of innovation and functionality. Building on those signature looks, designers and engineers thought about the big picture by adding more space, utility and ground clearance. The available 3.5-inch full-colour customizable Electronic Vehicle Information Centre (EVIC) in-cluster display brings a world of information front and centre, while double headlamps and a dual-pane sunroof help you see more of your surroundings. The 500X interior comfortably seats five, while retaining classic elements like a smooth silhouette, 360-degree character lines, circular three-button cluster and available body-colour instrument panels.

9 - SPEED
AUTOMATIC TRANSMISSION

SKILLS: LOADED TO THE NINES.

Pairing the 2.4L Tigershark MultiAir I-4 engine with a class-exclusive⁽¹⁾ 9-speed automatic transmission sets this crossover apart. These two technological marvels act as a dynamic duo that optimize engine output, so you can look forward to fast, assertive launches and smooth, power-when-you-need-it delivery on the highway. This extremely sophisticated technology is a breakthrough for its segment.

THE FIAT DYNAMIC SELECTOR.

AUTO MODE is designed for everyday driving — it will smooth things out to help optimize fuel efficiency, emissions and comfort.

SPORT MODE optimizes the transmission shift points for improved performance and acceleration feel in both FWD and AWD. With Sport Mode, the Electronic Stability Control (ESC)⁽⁴⁾ and steering calibrations are tuned for a sportier feel and faster driving response.

TRACTION+ MODE maximizes low-speed traction — the kind you need when things get a little slick or bumpy along the way. It all works by providing additional wheel-slip through specially tuned chassis controls and a more direct engine response.

- + A FULLY ELECTRONIC AUTOMATIC TRANSMISSION OFFERS CUSTOMIZED DRIVING MODES VIA THE FIAT DYNAMIC SELECTOR

- + THE FIAT 500X 9-SPEED TRANSMISSION TRULY SETS THIS CROSSOVER APART

- + MORE THAN 20 INDIVIDUAL SHIFT MAPS FOR SPECIFIC CONDITIONS OPTIMIZE SHIFT QUALITY

- + FOUR OVERDRIVE RATIOS REDUCE FUEL CONSUMPTION, NOISE, VIBRATION AND HARSHNESS (NVH)

- + TEMPERATURE, SPEED AND ESC⁽⁴⁾ ACTIVATION ARE MONITORED FOR A MORE REFINED DRIVE

- + ESC⁽⁴⁾ HELPS THE DRIVER MAINTAIN VEHICLE DIRECTIONAL STABILITY AND LIMITS OVERSTEER OR UNDERSTEER WHEN ROAD CONDITIONS ARE NOT THE BEST

DRIVING FORCES.

THE 1.4-LITRE MULTI-AIR® TURBO ENGINE.

The FIAT® 500X offers two extraordinary engine and transmission options with innovative MultiAir technology. The 1.4L MultiAir Turbo four-cylinder engine comes standard on Pop, Sport and Trekking models. MultiAir technology utilizes electrohydraulic valves for more direct control of air and combustion, improving power up to 10 percent, torque up to 15 percent and fuel efficiency up to 7.5 percent over naturally aspirated engines. Emissions are cut an impressive 10 percent. Paired with a 6-speed manual transmission, this powerplant generates 160 horsepower and 184 lb-ft of torque — giving Pop a snappy performance true to its name.

THE 2.4-LITRE TIGERSHARK™ MULTI-AIR I-4 ENGINE.

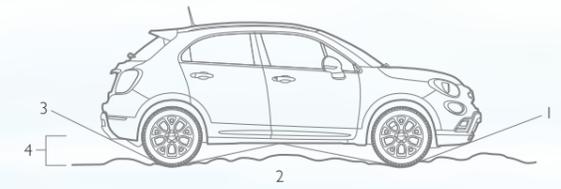

Available on all models and standard on Lounge, Trekking Plus and AWD models, the 2.4L Tigershark MultiAir I-4 engine is acclaimed for its unique and efficient valve-lift system. It incorporates a column of oil flow with a precise control of intake valve events. This I-4 burns clean, improves fuel efficiency and reduces emissions with a quiet and refined ride while producing 180 horsepower and 175 lb-ft of torque.

THE FIRST
ALL-WHEEL-DRIVE
SYSTEM IN
FIAT® 500 HISTORY.

GAINING TRACTION.

A first for the FIAT 500 portfolio of offerings: an advanced all-wheel-drive (AWD) system. Available on most 500X models, AWD adds peace of mind on any drive. This new-generation drive system brings new functionality and improvements over conventional AWD systems. It features a class-exclusive⁽¹⁾ disconnecting rear axle that helps to improve fuel efficiency by automatically selecting front-wheel drive (FWD) or AWD when necessary. It completely removes power to the rear axle during regular conditions when FWD performance is adequate. With this system, driver input is not required — all actions (including AWD activation) are intelligently, seamlessly engaged based on conditions and drive style. Additionally, while the system boasts leading traction management advances, it also works to improve dynamic handling.

Coupled with the available FIAT® 500X innovative transmissions, Dynamic Selector options, independent front and rear suspensions, and KONI® FSD shock absorbers, AWD makes for a remarkably responsive, smooth and fuel-efficient drive.

FWD/AWD Traction+ mode is activated on the FIAT Dynamic Selector. This system uses Electronic Stability Control (ESC);⁽²⁾ braking system management and engine response optimization to enhance driving when conditions are such that a driving wheel isn't tracking — such as on rain-soaked or snowy roads. Basically, Traction+ gives the wheel with better grip more to go on: when there's little or no grip on one wheel, the control unit brakes the spinning wheel, enabling the transfer of torque to the gripping wheels, allowing the vehicle to gain traction.

HEATED FRONT SEATS

AN INTERIOR UNLIKE ANY OTHER.

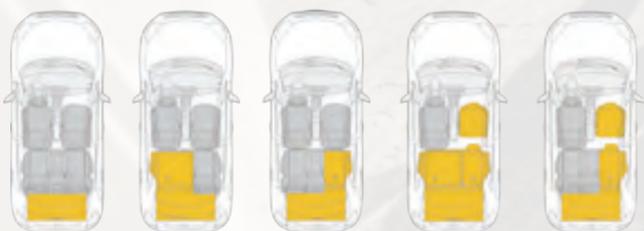

Delivering interiors with refined Italian style and world-class craftsmanship, our designers did what many carmakers leave only to the engineers: they created a car that really moves people. At the same time, they encourage personal style with an offering of five different interior environments that feature distinctive colour choices with an available body-colour instrument panel. There's ample room for five, with an array of comfortable seating choices and materials, such as premium leather trim, standard on Lounge and Trekking Plus. Engineers plussed the 500X comfort level even more with a number of modifications based on Noise, Vibration and Harshness (NVH) data, creating a quiet, serene cabin. Also available are heated front seats with 12-way power driver's seat including 4-way lumbar adjust and a heated steering wheel.

PLAY ROOM.

UNMATCHED VERSATILITY AND UTILITY.

FIAT® 500X humbly harbours many hidden talents that will reveal themselves with each trip you take. In particular, the spacious utility of its interior makes the seemingly impossible not only possible — but much more comfortable than you imagined. A large rear cargo area, available height-adjustable rear cargo floor, **60/40 second-row split seats** and a fold-forward front passenger seat accommodate those unexpected treasures you find along the way. No need to leave that antique rocking chair behind. Plus, you can keep all your other belongings stashed and organized, thanks to genius storage solutions like a dual glove box with a locking lower portion and a push-button Electronic Park Brake (EPB) that saves space.

ROOM WITH A VIEW.

Leveraging eye-catching, classic FIAT exterior cues in the larger and more capable 500X, designers wanted to make the most of the surrounding views, as well. They thoughtfully added an available **dual-pane sunroof with panoramic views**. Its glass panels create a wide, spacious feeling. Light intensity is easily managed with a manual sunshade.

Properly secure all cargo.

BE CONNECTED.

NAVIGATE TO EVERY ADVENTURE

SAFETY & SECURITY FEATURES

FIAT® 500X approaches safety and security from every angle. Here are just some of the advanced features that will offer extra peace of mind:

Blind-Spot Monitoring with Rear Cross-Path Detection⁽³⁾

will constantly monitor the space between you and other vehicles. When a side or rear blind spot is encroached, this feature notifies you via illuminated icons on sideview mirrors and an audible chime.

Forward Collision Warning⁽³⁾ with Active Braking uses radar sensors to detect when you may be approaching another vehicle too rapidly. This active safety feature sends an audible and visual alert to the driver and provides limited braking if the driver does not react in time.

Lane Departure Warning⁽³⁾ with Lane Keep Assist tracks the vehicle's lane position via mounted cameras. Should the driver drift outside of lane boundaries, the system can provide a visual warning, as well as a slight steering wheel jerk, encouraging the driver to keep within lane boundaries.

The ParkView® Rear Back-Up Camera⁽³⁾ provides a wide-angle view of the area immediately behind the vehicle, giving the driver greater peace of mind before moving backwards at low speeds. It displays dynamic grid lines on a colour touchscreen to aid the driver when the vehicle is in Reverse.

The Park-Sense® Rear Park Assist System⁽³⁾ can help you park and back out with grace. When in Reverse, these available sensors detect objects in the rear back-up pathway and also provide an audible and visual warning so you have time to react.

Seven Standard Air Bags⁽⁸⁾ FIAT 500X surrounds you with a comprehensive air bag system that features full-length front and rear side-curtain, driver's inflatable knee blocker, seat-mounted side for front occupants, and advanced multistage driver and front-passenger air bags, all working together to help provide encompassing protection.

An Electronic Park Brake puts a parking brake switch in the centre console and offers five modes of operation: static apply and release, dynamic apply, drive away release, auto apply and safe hold.

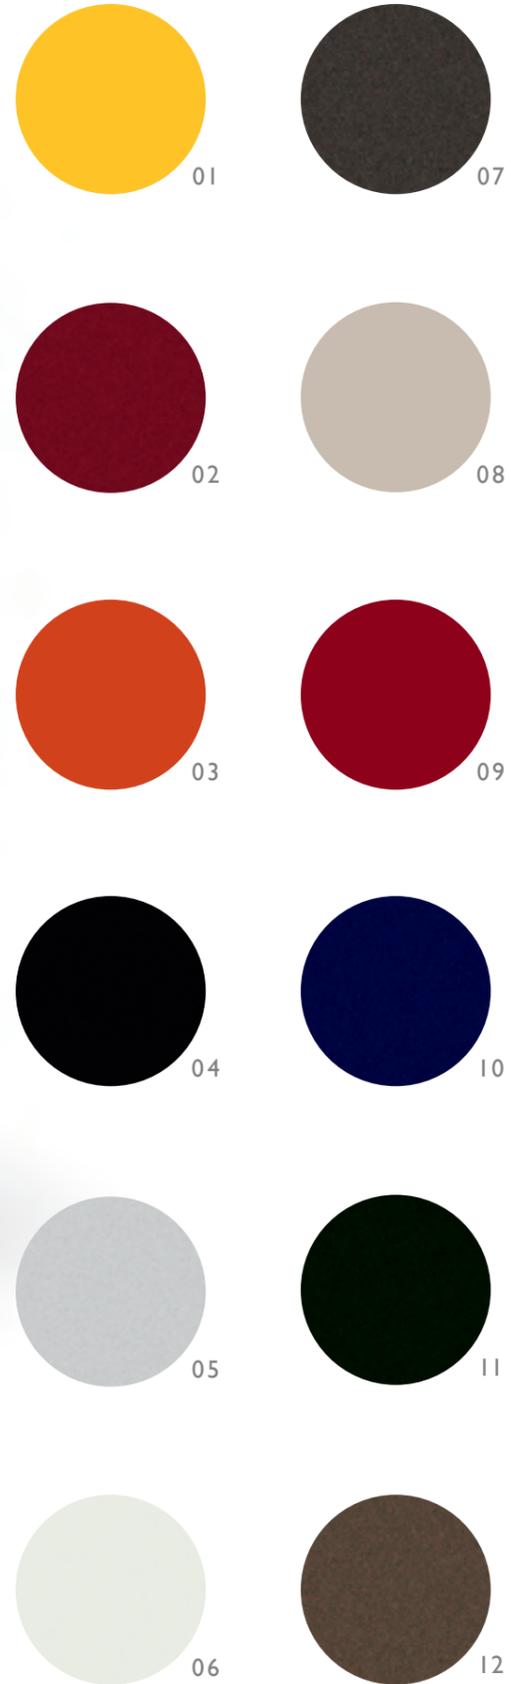

Cornering Fog Lamps are initiated on the appropriate side of the car with a turn signal or steering wheel turn to shed a little light on the subject.

The ParkView Rear Back-Up Camera⁽³⁾ creates a better view and greater peace of mind.

WARRANTIES: 2016 FIAT vehicles are backed by a 5-year or 100,000-kilometre* fully transferable Powertrain Limited Warranty with \$0 deductible plus 24-hour roadside assistance.† Basic Warranty coverage is for 3 years or 60,000 kilometres.* Rust-through coverage on all body sheet metal is for 3 years.

*Whichever comes first. Some conditions may apply. †The 5-Year/100,000-Kilometre Powertrain Limited Warranty does not apply to vehicles sold for certain commercial uses. Visit your FIAT Studio for full details.

DISCLAIMERS: (1) Based on *WardsAuto* Small Cross/Utility sub-segmentation of Crossover vehicles including Buick Encore, Chevy Trax, Kia Sportage, Mini Countryman, Mini Paceman. Excludes other vehicles designed and manufactured by FCA US LLC. (2) Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. Voice commands of phone require a Bluetooth compatible phone. (3) This is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of their surroundings and be prepared to take corrective action to avoid collisions. (4) No system can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. (5) Never program while driving. GPS mapping and available 3D navigation may not be detailed or available in all areas or reflect current road regulations. (6) Preset voice-to-text messaging and incoming text message reading requires a MAP-enabled phone. (7) Requires SiriusXM radio subscriptions governed by SIRIUS terms and conditions available at siriusxm.ca (8) The advanced front air bags in this vehicle are certified to the federal regulations for advanced air bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly.
