

 **TOYOTA RAV4 2006**

This year's RAV4 was designed to be bigger, but not just for bigger's sake. It was meant to do big things. Yes, it is bigger overall, but the available 269 horsepower V6¹ engine makes it one of the most powerful SUV's in its class. The frugal 4-cylinder and V6¹ engines deliver improved fuel economy and higher performance. Inside the RAV4 is roomier by 21%, including 40% more cargo space. And with the available third row seats, RAV4 offers more people space too. In short, the all new RAV4 can do more things. So, no, it's not just bigger, it can handle anything.

* Airbag Notice: The 2006 RAV4 features a driver & front passenger airbag Supplemental Restraint System (SRS) which activates only in a full-frontal collision of sufficient magnitude to inflate the bags. In moderate frontal collisions, the airbags may not inflate; in a rear or side collision the airbags are designed not to inflate, so the primary protection is provided by the lap and shoulder belt system. The 2006 RAV4 Limited 4WD V6 with Premium Package also features a front seat-mounted side airbag Supplemental Restraint System (SRS) and a front & rear head/side curtain airbag Supplemental Restraint System (SRS) which activates only in a side-impact collision of sufficient magnitude to inflate the bags. Seatbelts must be worn at all times by all occupants.
