

Rabbit

Rabbit

**In 1975, Volkswagen**

brought the Rabbit across the Atlantic. Built for the tight, speedy streets of Europe it looked a little, well, foreign to most Canadians. It didn't take long, though, for city-dwellers to discover the advantages of driving something small, nimble, fuel efficient and versatile. Well now it's back and, like the original, it's designed with the metropolitan motorways in mind. Who knows, maybe it'll make some automotive history again.

# Urban driving

has a language all its own. We're including some of the unique terms we've discovered so you can talk the talk. Look for them in the corners.

**Hurry Honkers:** People who honk their horn a millisecond after a light changes like they're a drag racer. A move that commonly has the reverse of its intended effect. "Take it easy. Where's the fire, hurry honker?"

**Bumper Broadcasting:** Letting the entire city know what schools you've gone to, what team you root for, what radio station you listen to and who you voted for with bumper stickers. "What's with the bumper broadcasting? Nobody cares what mountain you drove to the top of."

**Spot Sloth:** People who get in their parked car and then sit in it for a long time before leaving. "Sorry I'm late. I found a space but I had to wait like seven minutes for this spot sloth to actually pull out."

# 2.5L

## Power to the pavement

**Engine:** The Rabbit's story begins where all VW stories do: under the hood. Here's where we've tucked about 30% more horsepower than the previous model\*. This extra oomph opens gaps, catches lights and gets you out of traps. It's a huge part of why the new Rabbit not only survives, but thrives on the toughest roads around.

**Transmission:** The Rabbit has either a 5-speed manual or an available 6-speed Tiptronic® automatic transmission. In either case, the ability to choose gears yourself gives you control over any situation. Downshift to change lanes with authority or to pass a wild-eyed bike messenger. Upshift to leave a bus in your dust or catch a light. And with Tiptronic®, you can also opt to let the car select gears for you in "regular" or sport mode. The choice is always yours.

**Noser:** A person who sticks the front of their car in the path of another in an attempt to force their way into a lane. "He tried to pull a total noser back there but I didn't let him in."

\*2006 Golf model.

**Lane Pirate:** Someone who steals space in a lane from another driver. "I know exactly how to position myself for lane piracy. I sweep up close and make my move."

It guzzles  
**road**  
not gas

The Rabbit conforms to Government of Canada emissions standards, using from 10.5 L/100km in the city and 7.1 L/100km on the highway. As impressive as that is, the truly amazing part is how much performance it packs into every one of those kilometres.

\*Est. city/highway 2.5 L engine with automatic transmission.  
Government of Canada Energuide estimate only. Your fuel consumption may vary. Use for comparison purposes only.

# The 5<sup>th</sup>

# door

The Rabbit's simplest and most useful feature is the hatchback. It turns this from a "regular" car into a master of space. Folding the 60/40 split rear seat forward gives you over 1.3 cubic metres of storage space. If carrying linear metres is the issue, the back seat armrest in the 4-door model opens to form a handy pass-through. In the trunk, you'll find a removable storage divider and even a power outlet.

**Pump Up the Volume:** The Rabbit drives, packs and takes on all challenges like a big car but parks and avoids pigeon poop like a small one. The Germans have an expression for this: Raumwunder. It means "small on the outside and big on the inside." Wow, even their words are more efficient.

**Hatch Hiker:** Somebody who needs to have something moved and begs you to use your car because it has a hatchback. "Susan called to see if I would help her move something again. She is becoming a total hatch hiker."

Because the city is  
**expensive  
 enough**

The fact that the Rabbit comes loaded from the wheels to the roof with standard features is downright mind-blowing. Now if only you could find a condo this well appointed.

	Rabbit	Other
ABS, 4-Wheel	Standard	_____
Airbags, Side, Front*	Standard	_____

Outside Temperature Gauge	Standard	_____
Pollen Filter	Standard	_____

\* Airbags are supplemental restraints only and will not deploy under all accident scenarios. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

**Dial Hunter:** To hear another driver's music and attempt to find out what station they are listening to. "The tunes blasting in the car next to me rocked. I dial hunted that mother!"

# Noise Pollution

Driving always benefits from a soundtrack. Driving in the horn-honking, jack-hammering, "Get outta my way!" cacophony of downtown demands one. That's why the Rabbit comes standard with a 10-speaker, CD stereo system. More than just powerful, the stereo is smart. It can adjust volume up and down, depending on how fast you're going, to help compensate for road noise. It's also protected by the Rabbit's anti-theft system. The vehicle alarm system is linked to the doors, the hood and the rear trunk lid. So if a thief gets inside, the Immobilizer system will kill the engine. Just because crime is a reality doesn't mean it has to become your reality.

**Carmakazi:** A person who is reckless, unpredictable and loathed by all on the road. "I gotta get away from this carmakazi before he causes a wreck!"

## Safety first

City streets are full of thousands, sometimes hundreds of thousands of drivers at once. The reality is, some of these people are gonna make mistakes. That's why the Rabbit is loaded with things to help protect you. You need airbags? How about six of them: dual front, side curtain and front side thorax? On top of that, the doors are built with anti-intrusion beams. The whole car is a safety system because, well, the world isn't. Don't just take our word for it. The NHTSA awarded the Rabbit a 4 Star frontal and a 5 Star side impact crash test rating.\*\*

**Strong Like Bull Market on Bay St.:** The Rabbit's steel frame is laser-welded. This process means the Rabbit's "skeleton" is engineered to deal with the kind of punishment dished out by city streets. A stiffer frame also improves the Rabbit's handling, gives it a super-solid road feel and even helps reduce interior noise.\*\*\* Yeah, lasers are even cooler than we thought.

\* Airbags are supplemental restraints only and will not deploy under all accident scenarios. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

\*\* Frontal NCAP: 4 Star Driver / 4 Star Passenger (based upon 4 door model)  
Side NCAP: 5 Star Front Seat / 5 Star Rear Seat (based upon 4 door model)

\*\*\* vs. non laser-welded frames.

# Rabbit Colours

**Shadow Blue** has lots of layers. Calm, confident and friendly, it can also be mysterious and seductive. Blue has a little bit of something for everyone. If the world had to pick a favourite colour, the winner would probably be blue.

**United Gray** is anonymous, until you take a second look. It's the subtle cousin of silver who prefers to let your right foot do the talking.

**Reflex Silver** Shiny, slippery, and swift, silver is part shield, part tip of an arrow. Silver is restless. Silver is sturdy. Silver looks like it's moving, even when it isn't.

**Tornado Red** Red wears its emotions on its sleeve. It stands out, demands attention and seduces people with its passion. There's a reason bulls charge at red.

**Candy White** Gleaming, glossy, and stark, white lets its reputation for innocence lull people to sleep and then, whoosh, flashes by like lightning.

**Black Uni** Stealthy, classic, eternally cool, black has the confidence of a colour that's been around forever for a reason. Everybody loves black, except those who are afraid of it.

**Sage Green** Green is the colour of spring and rebirth but it can also be the colour of envy. Somehow, it's warm and cool at the same time. It can say a lot but, most importantly, green means go.

\*delayed introduction for Candy White, Tornado Red and United Gray. See dealer for availability.

**Hatch Hiker:** Somebody who needs to have something moved and begs you to use your car because it has a hatchback. "Susan called to see if I would help her move something again. She is becoming a total hatch hiker."

### automatic locking feature

locks automatically engage at 13 km/hr and unlock automatically when the airbags deploy.

### front seat safety belt pre-tensioners with load limiters

in a severe front impact, the turbines in the pre-tensioners explode reeling in excess safety belt slack.

### dual front and side airbags

deploy within a tenth of a second.

### rear impact optimized head restraints

helps minimize whiplash injuries from rear-end collisions.

### steering wheel

deformable/collapsible on impact.

### pinch-protection on power windows

a closing window reverses if there's any obstruction.

### side curtain protection

airbags deploy down the roofline from the a-pillar to the c-pillar to help minimize head and upper torso injury in the event of side impact.

safety cell construction and anti-intrusion side door beams driver and passengers travel inside a rigid cage of reinforced steel.

### tether

lower anchors and tether for children. a standardized child-safety seat system.

### asr, edl, eba

improve handling and help prevent compression-induced skidding in slippery conditions.

## alphabet brakes

abs + ebd + hba = enhanced control

### esp\*

complex traction-control system helps prevent over or understeer.

## crash-tested front and rear ends

designed to help divert impact energy away from cab occupants.

### roadside assistance

4-year, unlimited mileage, 24-hour roadside assistance protection by Professional Dispatch Group,® peace-of-mind when you're out on the lonely road.

airbags are supplemental restraints only and will not deploy under all accident scenarios, always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.

\* optional feature

**Blinker Slinger:** When two cars coming in opposite directions, both signal for the same parking spot. "I beat him on the blinker sling back there. It was totally my parking spot. I'm a quick draw blinker slinger."

## It's the little things:

**Lane change feature:** Tap the blinker and it flashes three times. This lets you keep your hands on the wheel, where they belong.

**Power windows:** All have pinch protection, one touch open or close on driver controls and open or close them all at once with your key.

**Two power outlets:** One in center console and one in the trunk means you can plug in anything from your cell phone to, well, whatever you want.

**2-speed windshield wipers, with variable intermittent wipe feature:** After you stop the wipers they delay a

few seconds, while the usual drips come down, and then wipe one more time to get any last bits of water/cleaning fluid/puddle sludge. Bad news for the squeegee guys.

**Side mirrors:** More than just reflective, the Rabbit's side-view mirrors are power-controlled, heatable and even have blinkers integrated into them.

**Full-sized spare:** What it lacks in "cool" factor, it more than makes up for in "I'm so glad I don't have to drive around with a disposable wheel on my car" usefulness.

**Dual tone horn:** Let's be realistic, you're gonna need this baby in the city. Don't abuse it though, or you'll just be another #\$\$%@!.

## Suspension meets braking

**Suspension:** The Rabbit's suspension is precise, balanced and über-responsive. Up front are independent McPherson struts with a stabilizer bar. In back, a 4-link, fully independent system with a stabilizer bar. This package works together to tackle any turn, soak up almost any pothole and bob and weave through traffic like a prizefighter.

**Brake System:** That's right, we said "system." The Rabbit doesn't just have brakes, it has a team of technologies for stopping. After all, in the land of instant gridlock and car doors that fly open into your path, being able to stop quickly is a matter of survival.

**Eye Contract:** To make eye contact with the driver in the lane you are attempting to merge with. "You have to let the person in if you make eye contract!"

# Accessorize

vwdrivergear.com

Here are a few ways to make your Rabbit even more "yours." 01 Body Kit. 02 17" Goal Wheels. 03 18" Vision Wheels. 04 18" Karthoum Wheels. 05 Barracuda® Bike Rack. 06 Snowboard/Ski Rack. 07 "Bounce" Graphics. 08 "Quick" Graphics.

\*Shown with Aerodynamic Base Carrier Bars. Vehicles are pictured with options and accessories that may be available at an extra cost. Some accessories may not be available in Canada.

**Captain You:** These streets are not exactly the most “comfortable” concrete you can drive on. That’s why we made sure the driver’s seat is. It’s 6-way manually adjustable and has side bolsters. The steering wheel tilts and telescopes and the safety belt is height adjustable. The blue instrument panel lighting means it’s bright and easy to see. Easy readability is pretty huge, since taking your eyes off these roads had better be done lightning fast. Just as important, though, it’s hypnotically cool. That said, it’s cool for more than just colours. On top of the usual information, you’ll find the outside temperature and even a brake pad wear indicator.

**Periscoping:** To have a conversation with the person in the back seat through the rearview mirror. “How do cabbies make periscoping look so easy?”

Roadside assistance 4-year/unlimited mileage, 24-hour, provided by Professional Dispatch Group®	s	s
---	---	---

**Urban Hand Signals:** There's a complex system of non-verbal ways city drivers "talk" to one another. Here are a few basic examples (and what they mean). Keep in mind, though, just because some people are crazy enough to take their hands off the wheel while they're driving doesn't mean you should too.

**"The Manual Merge:"**  
This is one driver's way of telling another that "Like it or not, I'm cutting in front of you."

**"The Field Goal:"**  
This is how a driver expresses utter disgust with the driving of the person/people in front of him. It commonly follows a loong honk.

**"The Piston:"**  
A circular, repeating motion that is one driver's way of asking another to roll down their window to ask for directions.

**"The Shrug of Shame:"**  
This almost involuntary signal is the way a driver says "My bad" to any he has wronged. It's a universal sign of apology.

**"Fury Fist:"**  
The waving of one's closed fist, usually out the driver's side window, as if to say "Why I oughta!" Usually considered more civilized than the more common "bird."

**Power Points:** When drivers are stopped they will sometimes hold the top of their steering wheel and use just the index finger to "ask" another driver a question.

Figure 1: "You going for that space?"

Figure 2: "Will you let me in?"

Figure 3: "Do you see that 'violators will be towed' sign?"

**Thank You Waves:** There's no surviving on the urban asphalt without some help. Here are a few popular waves of appreciation. Use them as often as you can.

**"The Rusty Elbow:"**  
A motionless "wave" that is held for 3-5 seconds to make sure the intended recipient sees it.

**"El Presidente:"**  
A high, angled wave done in two crisp motions. Almost a salute.

**"The Spread Eagle:"**  
An open-handed wave where no two fingers touch, commonly done out of the window.

**"Big Props:"**  
A Spring and Summer wave of thanks done through the sunroof.

Now remember  
mind those city rules

©2006 Volkswagen Canada Inc. Printed in U.S.A. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices. Volkswagen Canada Inc. believes the information and specifications in this brochure to be correct at the time of printing. Specifications, standard features, options, fabrics, and colours are subject to change without notice. Some features may be unavailable when your vehicle is built. Some vehicles are pictured with options that may be available at extra cost or may not be available on some models. Ask your dealer about the availability of options and verify that the vehicle you ordered includes the equipment you ordered. Tires are supplied and warranted by their manufacturer.
