- Unique design combines sporty performance with SUV versatility

Where the Advantage Begins

From the outside, the SX4 continues to exceed expectations. With smooth curves and sleek, sophisticated styling, it gets the looks. Compact and manoeuvrable enough to navigate narrow spaces, it makes parking and getting around the city a breeze, while still being spacious enough to carry all you need for a day out or a weekend getaway. Wherever your travels may take you, the SX4 invites all passengers to experience a ride in thoughtful, refined comfort.

Illuminated information cluster and panel
Blue and red lights integrate your driving space to conveniently reveal not only your speed but also the outside temperature, fuel consumption and fuel range remaining.

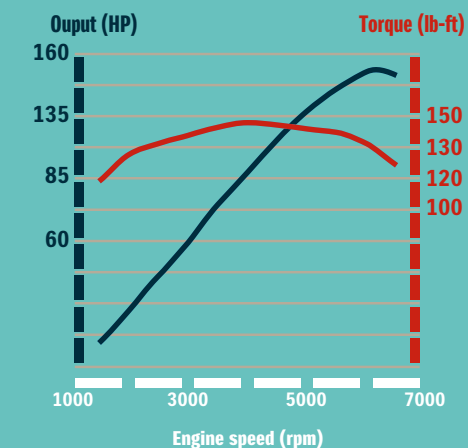

Standard air conditioning with automatic climate control
In the Sport model you'll enjoy the convenience of automatic climate control well positioned for both the driver and front passenger, making it easy to adjust interior conditions exactly to your liking.

Always looking out for you

2.0-litre VVT engine

2.0-litre 16-valve DOHC VVT with 150HP
The SX4 powertrain delivers high-energy excitement from the moment you start the ignition. At low ranges the variable valve timing (VVT) puts out ample torque for immediate responsiveness and quick acceleration that never feels sluggish. As the rev rate increases, the valve timing continuously varies to enable more effective fuel combustion and efficiency, putting all the power at your command.

Passive safety systems are ready when you need them

The SX4 also watches over you with passive safety systems. The rigid frame directs impact energy around the cabin and away from occupants, while crumple zones absorb and dissipate collision energy before it can reach the interior. The front seats are equipped with three-point ELR seat belts with pre-tensioners and force limiters. The rear seats are equipped with right, left and centre three-point ELR seat belts.

Front and rear crush zones crumple to absorb impact energy

4-wheel disc brakes with ABS
4-wheel disc brakes add to the standard anti-lock brakes (ABS) with brake assist and electronic brake-force distribution (EBD) functions.

ESP® control system
Standard on all models, ESP® (Electronic Stability Program) supplements the Suzuki SX4's inherent stability with three major functions: ABS with EBD, traction control and stability control. ESP®'s Electronic Control Unit (ECU) uses various sensors to determine and hold the cornering line, greatly increasing traction and stability control while reducing front and rear wheel-slip for enhanced safety.

← With ESP®
→ Without ESP®

Preventive measures
SX4 is designed to provide the driver with ample visibility to all sides by elevating the driver's seat position and minimizing blind spots. The eight-airbag system combining two front airbags, front and rear side airbags and left and right curtain airbags comes standard to help prevent injury in the event of a collision.

Note: The SRS airbags are shown inflated for illustrative purposes
