# Golf GTI

Das Auto.

**Unforgettable rush.**

**When we engineered the 2016 Golf GTI, we pulled out all the stops.** With its sporty performance and tight handling, you'll be hard pressed to find a hatchback that's this much fun. Excitement called. And we answered.

#### **Technology**

When it comes to having the technology you need in the Golf GTI, it's not hit or miss, it's hit or hit. We've added what's important to make your unforgettable drive an unforgettable experience.

#### **Performance**

Unbridled fun. It's where this hot hatch shines. With a suite of performance features that make every drive a thrill, it's a road-savvy car for a road-savvy driver.

#### **Design & interior**

Why choose substance over style, when you can have substance *and* style. The Golf GTI has a smartly refined design that's suited to you, for you.

## Technology is our driving force.

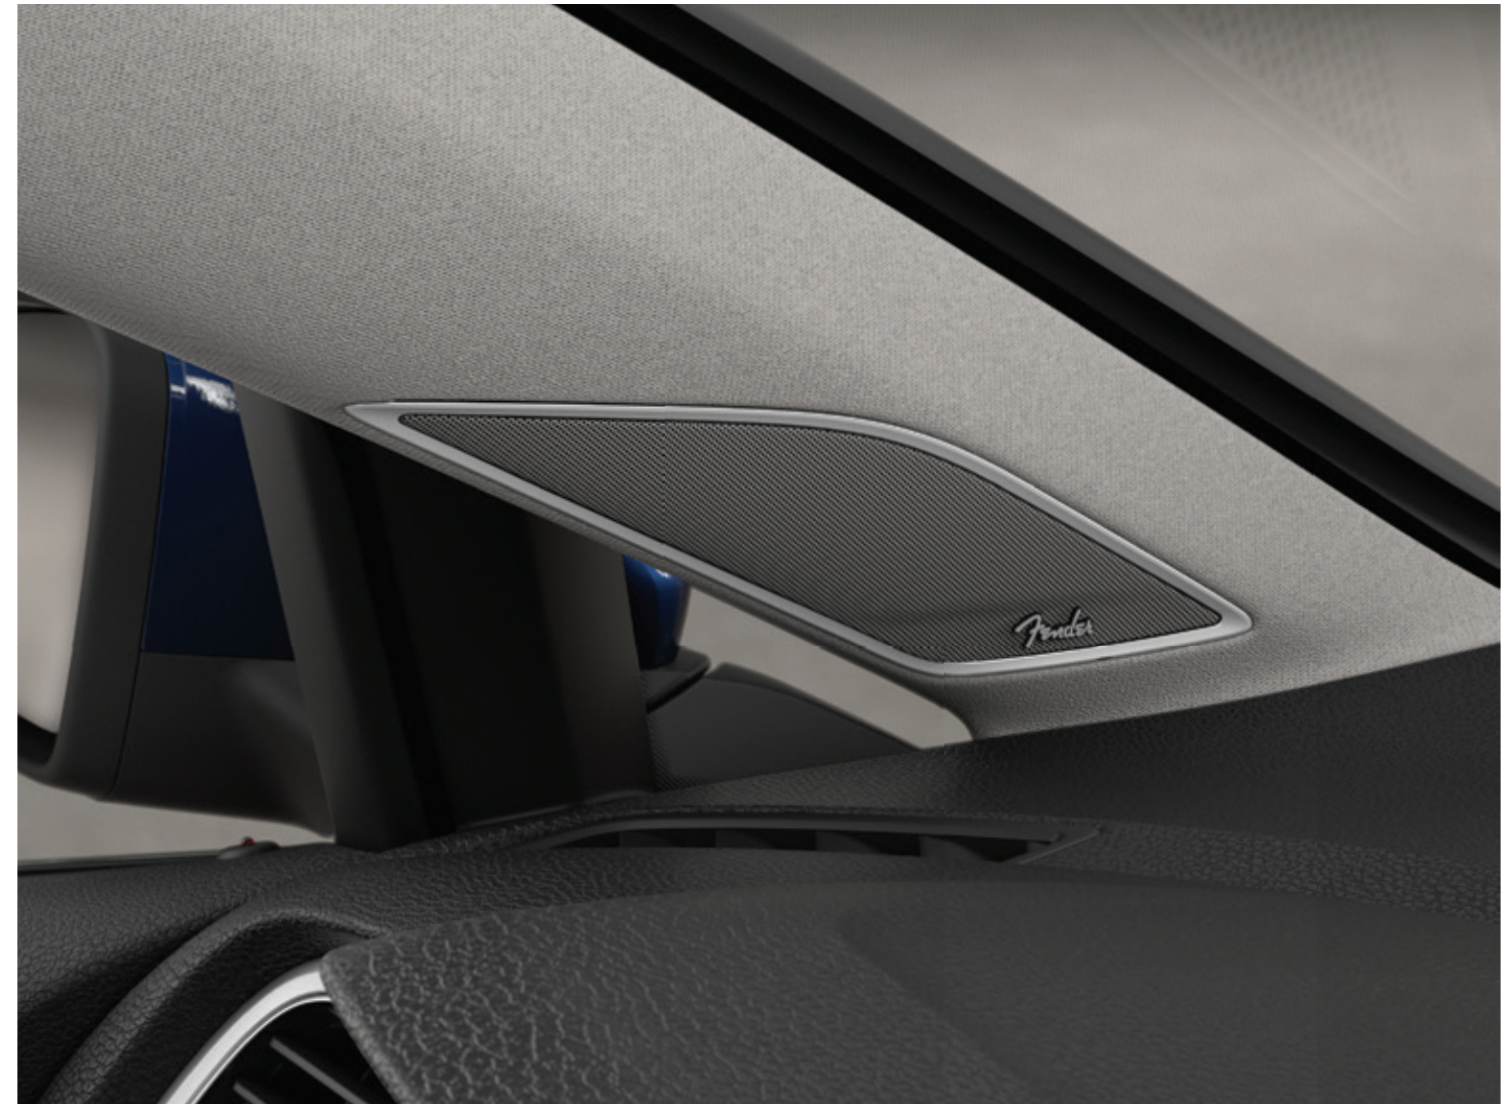

As a passionate driver, you already connect with the road, so in a 2016 Golf GTI, you'll just connect. Period. It's our most technologically advanced hot hatch to date, which means you won't need to log in to log on.

### App-Connect (Android Auto™, Apple CarPlay™, MirrorLink™)\*

Connect to the things that matter most. The intuitive interface and voice command actions let you easily search online for songs, directions or even your favourite restaurant. So you'll keep your eyes on the road, and not on your screen.

### Available Discover Pro\*

Your technological hub. This 8" infotainment touchscreen with proximity sensors puts satellite navigation and music playback all at your fingertips.

### Fender® Premium Audio System

The 8-speaker system will have you feeling like you've got the best seat in the house. Or in this case, the best seat on the road.

## The standard engine is anything but standard.

We've engineered the 2.0 TSI® engine to inject fuel precisely for maximum efficiency. The result is maximum performance.

### Sport suspension

Improved stability, control, and performance. Three more reasons to get behind the wheel of a GTI.

Fuel Consumption*	Engine	City L/100 km	Highway L/100 km
Manual	2.0 TSI®	9.4	6.9
Automatic DSG®	2.0 TSI®	9.5	7.2

\*Fuel consumption figures are estimates based on Natural Resources Canada's approved criteria and testing methods. Your fuel consumption will vary.

# Get noticed at a moment's notice.

It doesn't take much effort to look good in the Golf GTI. With an aesthetic that says "sporty" without saying "flashy," it's all the form and substance you want without the showiness you don't.

## Available panoramic sunroof

It's a big world out there. See a whole lot more of it with a panoramic sunroof that spans nearly the entire length of the cabin.

## Available Bi-Xenon headlights

They're brighter. They last longer. They consume less energy. And they're smarter. In fact, the Bi-Xenon lights have an Adaptive Front-light System that turns up to 13 degrees around corners before you do. Smart indeed.

## Red painted brake calipers

Our red painted brake calipers make you look fast even when you're standing still. The irony isn't lost on us.

# Live life in the faster lane.

Good things may come to those who wait, but sporty performance only comes to those who drive. And drive you will. With sporty suspension, sporty shifting, sporty handling, and, well, you get the idea – it's a ride with an exciting kick.

## Available Dynamic Chassis Control with Driving Mode Selection

You don't have to settle for a middle-of-the-road ride when you can opt for a dynamic one. Whether it's sport, normal, or comfort, the suspension of your GTI allows you to enjoy better steering responsiveness to handle any driving situation.

## Available DSG® paddle shifters

Enjoy the convenience of an automatic with the thrill of a manual. Our DSG® paddle shifters allow faster shifting and unbroken acceleration for – you guessed it – unbridled fun.

## Cross Differential System (XDS)

Turn the corner on cornering with our standard wheel lock/stabilizer system. If a wheel spins after turning a corner, XDS will apply that wheel's brake while directing a better grip to it. Sporty never felt so safe.

## Refinement from the inside out.

The feeling of an unforgettable urban thrill ride starts the moment you sit down. Once you've wrapped your head around its upscale interior and refined design, you'll just have to wrap your hands around the steering wheel to let the excitement wash over you.

### Leather-wrapped multifunction sport steering wheel

Never take your hands off the wheel again. And not just because it's wrapped in leather. The music, navigation and settings are all close at hand.

### Interior ambient lighting

There's nothing worse than bad lighting. So we made sure to have good lighting.

## Safety at the edge of your seat.

Dramatization.\*

It doesn't matter if it's tight city streets or wide-open freeways. The Golf GTI wasn't just designed to help get you there quickly – it was designed to help get you there safely too.

### Available Park Distance Control\*

Go ahead, try and fit in that spot. Sensors in the front and rear of the car will indicate if you're getting too close to surrounding vehicles.

### Available Front Assist with Autonomous Braking\*

Stop accidents before they happen. A built-in traffic monitor detects situations where the distance to the vehicle in front of you is too close and helps reduce the vehicle's stopping distance when required. At low speeds (up to 30 km/h) the system can automatically brake.

### Automatic post-collision braking system

Protection for you and your car. The automatic post-collision braking system is designed to help minimize damage in the event of an accident. Upon sensing an impact, the brakes are applied to help prevent another collision, preventing further damage from occurring.

### Available Park Assist\*

Welcome to your very own personal parking attendant. Automatic Park Assist steers the car in and out of parallel parking spots.

### Available Lane Assist\*

Sensors send a vibration to your steering wheel when you drift outside of your lane, making sure that when you hit the road, you always stay the course.

### Available Adaptive Cruise Control\*

Adaptive Cruise Control is genius (if we may say so). It uses sensors to detect the vehicle ahead, and then automatically adjusts your speed to help keep you at a safe distance without ever needing to adjust the gas or brakes – even in stop-and-go traffic.

### Electronic Stability Control (ESC)

Our technology helps keep your vehicle stable, so you can come to grips with low-grip conditions.

\*Not all airbags will deploy, and if multiple airbags do deploy, they will be in various stages of inflating/deflating.

\*Driver assistance feature. Drivers must continue to perform manual checks before proceeding and pay full attention to the road.
