THE 2022 CAMRY

Built for the real you.

Beautiful in ways you can't even imagine.

Everything about the 2022 Toyota Camry has been designed to help you get the most out of every road you travel. From its sleek, sophisticated lines, to its powerful and engaging drive, right down to the smart, thoughtful technologies that are seamlessly integrated throughout. The Camry leaves you with one distinct impression: this car is destined to bring you so much more.

[Learn More](#)

EXTERIOR DESIGN

Leave a lasting impression.

From every angle, it's so much more.

The 2022 Camry features sweeping curves and chiselled surfaces that aren't just for looks; they actually help redirect airflow to enhance efficiency and performance. From its bold front fascia to its elegantly sculpted silhouette, the stunning style and craftsmanship are almost too beautiful to resist. If you're looking for a little edge, the XSE, SE, and TRD V6 models feature a sleek, lower roofline, honeycomb grille, side vent inserts, and rear spoiler, while the Nightshade Special Edition includes aggressive 18-inch black wheels, black accents, and exclusive badging.

[Learn More](#)

INTERIOR STYLING

Putting you front and centre.

The driver's seat never felt better.

As stunning as the Camry looks from the outside, you'll be floored by how it feels on the inside. Graceful, fluid interior lines and refined materials create a sporty, driver-oriented cockpit that literally wraps around you. In fact, you could say that it fits both your needs and desires. The dash was designed to provide both driver and passenger with easy access to the centre controls, while offering improved visibility of the road ahead. The seats are distinctively shaped with available leather trim and contrast stitching, and placed lower to create a generous interior space. The rear seats feature the same dynamic and supportive design as the front seats. Such finely-crafted details put a premium on everyone's comfort.

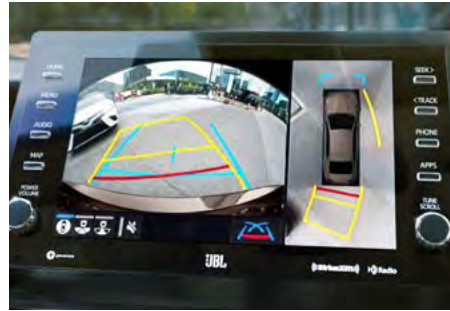

Tech that takes you further.

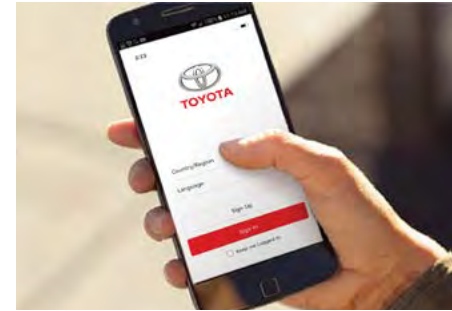

INTUITIVE FEATURES

Camry offers a host of tech-focused features including a 7-inch touch screen display, Apple CarPlay®¹ and Android Auto™¹ compatibility, TFT Multi-Information Display, as well as available Qi Wireless Charging, 10-inch Head-Up Display, and Intelligent Clearance Sonar with Rear Cross-Traffic Brake.

BIRD'S EYE VIEW CAMERA

The available Bird's Eye View Camera gives you a live, 360-degree view of your vehicle's surrounding area. This advanced feature helps you locate nearby objects, so you can park with more confidence than ever before.

CONNECTED SERVICES BY TOYOTA & TOYOTA APP¹

Staying connected has never been easier with a suite of available features including Remote Connect, Safety Connect®, Service Connect¹⁰, and Destination Assist to help enhance your driving experience.

ENERGY MONITOR

Tracking your efficiency is easy with Camry Hybrid's energy monitor. As driving conditions change, the monitor uses both the multimedia display and available Head-Up Display to show you how power is being routed to the drive wheels or how otherwise wasted energy is captured to charge the battery.

[Learn More](#)

PERFORMANCE

Driving excitement, standard.

Discover a ride like no other.

The 2022 Camry injects a level of driving excitement into the category. Its strong, lightweight body offers exceptional handling, while its low, wide stance delivers a responsive feel that puts you in command of the vehicle and the road. The multi-link rear suspension delivers a smooth ride and sharp handling so you can take on any trip, from crosstown to cross-country. And whether you choose the 3.5-litre V6, the 2.5-litre 4-cylinder gasoline engine, or Camry Hybrid's 2.5-litre engine, you get remarkable power, enhanced fuel efficiency, and exceptional driving response to conquer every twist and turn.

[Learn More](#)

PERFORMANCE

Go the distance.

ALL WHEEL DRIVE

For driving on Canadian roads, Camry is equipped with an available Dynamic Torque Control AWD system that distributes engine power from front to rear, giving the driver maximum control on a variety of surfaces.

PADDLE SHIFTERS

When the driver takes a spirited turn, Camry's available steering wheel-mounted paddle shifters give you the power to shift gears manually for a more controlled experience. They make extremely fast shifts possible with a precise, responsive feel.

SPORT/ECO/EV MODE

Camry Hybrid's Sport Mode improves throttle response, while ECO Mode adjusts throttle input to maximize efficiency. EV Mode enables electric driving to help reduce noise and emissions. More choices give you a more customized drive.

SAFETY

Toyota Safety Sense™

Toyota
Safety
Sense

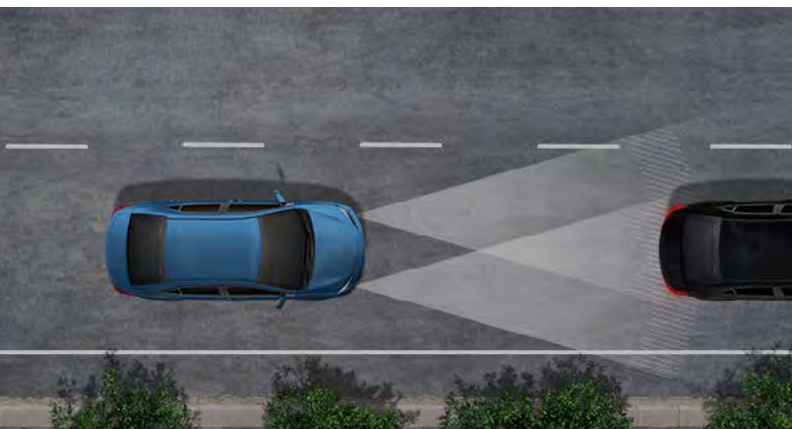

No matter what roads you travel, Toyota Safety Sense™² (TSS) 2.5+ is always there to help keep you – and those around you – as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2022 Camry, and is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

[Learn More](#)

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION³

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system introduces Left Turn Intersection Support, which may detect oncoming vehicles when performing a left turn at an intersection and provide automatic braking in certain conditions. The system may also detect oncoming pedestrians when turning left or right and provide automatic braking in certain conditions as well. The PCS system in TSS 2.5+ is also enhanced with the new Emergency Steering Assist feature that is designed to stabilize the driver's emergency steering maneuver and correct the vehicle's trajectory when avoiding a pedestrian, bicyclist, or another vehicle.

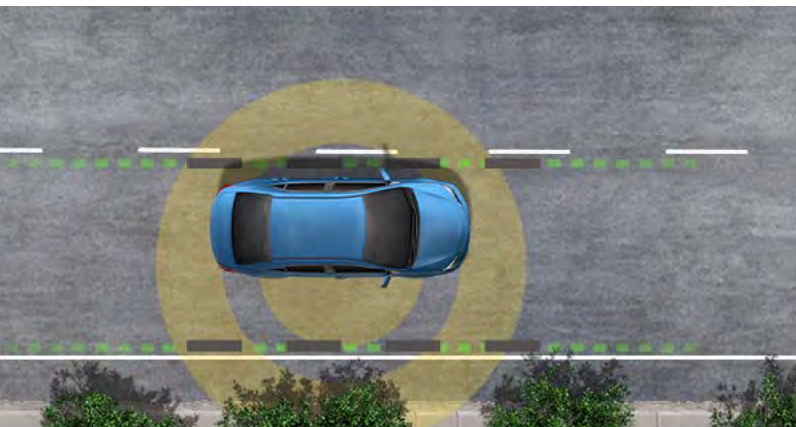

AUTOMATIC HIGH BEAMS⁴

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

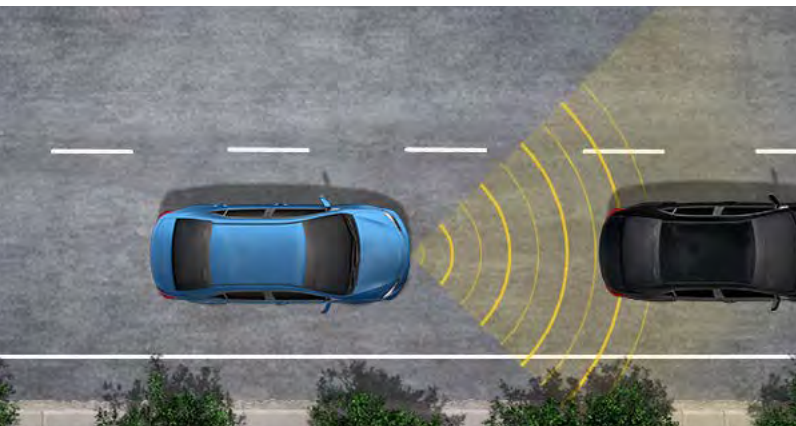

[Learn More](#)

LANE DEPARTURE ALERT WITH STEERING ASSIST⁵ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL⁶

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance. DRCC receives the Curve Speed Management function in TSS 2.5+. This system will automatically decelerate when driving through a curve, if required, and return the vehicle to the preset speed after passing the curve.

LANE TRACING ASSIST⁷

Provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation. Lane Tracing Assist performance has been enhanced in TSS 2.5+.

[Financial Services](#)

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (3) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian and Bicycle Detection system is designed to detect a pedestrian and bicyclist ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians and bicyclists, driver input and weather, light and road conditions. Do not overly rely on the Intuitive Intersection Support system. Always visually confirm that it is safe to proceed. System may not operate depending on the traffic conditions and intersection configuration. Intersection Support will NOT detect pedestrians crossing the road in the same direction as the vehicle. Emergency Steering Assist may not operate if an oncoming vehicle or an obstacle that would prevent a safe evasive manoeuvre are detected. (4) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (5) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (6) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (7) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (8) Not all exterior and interior colour options are available for every model. (9) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (10) Services are dependent upon connection to a compatible 4G wireless network, provided by a third-party wireless service provider. Toyota is not responsible for 4G cellular network discontinuance and will not provide compensation for reduced service availability. Based on current information, 4G network availability may end as early as 2029. (11) Active DCM required. DCM is active during connected services trial periods or with a paid subscription for connected services. Waiving your connected services will deactivate the DCM.

Details on the above features can be found in the Owner's Manual or through your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure.
