THE 2022 SIENNA

An absolute game changer.

Redefining what a minivan should be.

Stylish on the outside. Functional on the inside. The 2022 Sienna effortlessly works with your lifestyle. Its versatility and spaciousness will inspire you to take on any day – and look good while doing it. On unfamiliar roads, the available All-Wheel Drive system helps keep you in control, while the Hybrid Synergy Drive® powertrain delivers proven power, outstanding fuel efficiency, and tremendous strength. And with a full array of advanced technology and safety features, the Sienna is ready for whatever comes your way.

[Learn More](#)

EXTERIOR STYLING

Designed to be noticed.

It's all about the details.

From the outside, the Sienna is assertive at every angle. Its sculpted design flows from the lower front grille all the way to the tailgate, while thin LED lights create a signature impression at the front and rear. And if you're looking for more exhilaration, the ultra-sporty XSE model amps up the driving experience with a dark sport grille, bold front and rear bumpers, and available dark 20" alloy wheels.

[Learn More](#)

First-class comfort.

Refined in all the right ways.

The moment you sit behind the wheel of the Sienna, you're the one in control. With no detail overlooked, Sienna's thoughtfully designed interior is the ideal balance of function and style. The spacious cabin features mood lighting at entry, available SofTex®/Perforated Leather Seats, and an innovative console that puts everything within reach. The available heated and ventilated front seats and heated rear captain's seats bring enhanced comfort no matter the season, while the available four-zone climate control system allows you to set the temperature for each zone so that everyone can keep their cool.

[Learn More](#)

VERSATILITY

A real people pleaser.

Room for the entire family and then some.

Get comfortable because the Sienna LE and AWD LE come in 8-seat configurations with 2nd row bench seats and a stowable middle seat. The XLE, XSE, AWD XSE, and AWD Limited models feature 7 seats with long slide 2nd-row captain seats that provide passengers with unprecedented legroom. And with smart solutions like available hands-free power kick sensors for the back and sliding doors, available reclining 3rd-row seats, 7 USB ports, and up to 16 cupholders, every seat offers an incredibly versatile experience.

More options. Less compromise.

Making getting there easier than ever.

Sienna's shape and spacious size make it well suited for individuals living with a disability. With four mobility models to choose from, and standard convenience features such as power dual sliding doors and power rear door with jam protection, there is a perfect Sienna to get everyone where they need to go. For greater accessibility, the Toyota Mobility Program works with several mobility specialists to provide a conversion allowance and additional accessibility conversion options.

[Learn More](#)

A smarter driving experience.

INTUITIVE TECH

Sienna's fully loaded with tech, such as a 9-inch touch-screen display, and Apple CarPlay^{®1} and Android Auto^{™1} compatibility. Available features include Qi Wireless Charging,³ JBL[®] Audio with Clari-Fi[™], and an 11.6-inch HD rear entertainment display with two wireless headphones.

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT⁴

The standard Blind Spot Monitor with Rear Cross-Traffic Alert uses radar technology to help identify vehicles that may not be visible when changing lanes or backing out of a parking space. When a vehicle is detected, a warning indicator illuminates on the appropriate side view mirror.

CONNECTED SERVICES BY TOYOTA¹

Staying connected has never been easier with a suite of available features including Remote Connect, Safety Connect[®], Service Connect¹³, and Destination Assist to help enhance your driving experience.

FRONT AND REAR PARKING ASSIST WITH AUTOMATED BRAKING

When you're pulling in or backing out of a tight space, Sienna's available Front and Rear Parking Assist with Automated Braking sends you audio and visual notifications, helping you park under pressure without breaking a sweat.

[Learn More](#)

PERFORMANCE

Unexpected power.

That's right, we're talking about a minivan.

The 2022 Sienna is powerful. The Toyota Hybrid System II high-efficiency 2.5-litre DOHC engine delivers 245 total horsepower, excelling in power and fuel economy. It's the only vehicle in its class that combines a hybrid powertrain with available electronic on-demand AWD. The Sienna also offers some performance-control surprises with selectable EV, Normal, ECO, and Sport driving modes to improve your driving experience. And with an available towing capacity of up to 1,585 kg (3,500 lbs)², you can easily pull a compact travel trailer for a weekend getaway.

[Learn More](#)

SAFETY

Toyota Safety Sense™

Toyota
Safety
Sense

No matter what roads you travel, Toyota Safety Sense™⁵ (TSS) 2.0 is always there to help keep you – and those around you – as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2022 Sienna, and is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

[Learn More](#)

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION⁶

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

AUTOMATIC HIGH BEAMS⁷

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

[Learn More](#)

LANE DEPARTURE ALERT WITH STEERING ASSIST⁸ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

HIGH-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL⁹

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

LANE TRACING ASSIST¹⁰

Provides steering support to help the driver keep the vehicle centred in its lane when Dynamic Radar Cruise Control is in operation.

Get financing

Toyota Financial Services can help you get behind the wheel of a new Toyota faster with quick & easy online pre-approvals.

[Financial Services](#)

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weigh your vehicle without passengers or cargo. Installation of a tow hitch receiver or other accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations. (3) Qi wireless charging may not be compatible with all mobile phones, MP3/WMA players and like models. When using the wireless charging system avoid placing metal objects between the wireless charger and the mobile device when charging is active. Doing so may cause metal objects to become hot and could cause burns. (4) Do not rely exclusively on the Blind Spot Monitor System and Rear Cross-Traffic Alert System. They are not collision-avoidance systems or substitutes for safe and attentive driving. (5) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (6) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (7) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (8) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (9) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (10) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (11) Not all exterior and interior colour options are available for every model. (12) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors. (13) Services are dependent upon connection to a compatible 4G wireless network, provided by a third-party wireless service provider. Toyota is not responsible for 4G cellular network discontinuance and will not provide compensation for reduced service availability. Based on current information, 4G network availability may end as early as 2029. (14) Active DCM required. DCM is active during connected services trial periods or with a paid subscription for connected services. Waiving your connected services will deactivate the DCM.

Details on the above features can be found in the Owner's Manual or through your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca – or your Toyota Dealer is your best source for up-to-date information.
