Škoda Roomster 1

	CO ₂ (g/km)	Maximum VED Band**	Insurance Group	Recommended Basic	VAT	RRP	Recommended 2006 OTR*
1.2 12V 70bhp†	TBC	C	2E	£8,005.96	£1,401.04	£9,407.00	£9,920.00
1.4 16V 85bhp	168	E	3E	£8,461.28	£1,480.72	£9,942.00	£10,505.00
1.4 TDI PD 70bhp	142	C	3E	£8,933.62	£1,563.38	£10,497.00	£11,020.00

RRP (Recommended Retail Price)

* Recommended 'On the Road' prices include delivery, 12 months Road Fund Licence, DVLA First registration Fee (at £38), petrol/diesel, and apply to the United Kingdom only.

** All vehicles will be subject to vehicle excise duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). The weight of a vehicle will influence the level of CO₂ emitted. As a result, vehicles with higher levels of specification may emit higher levels of CO₂. Once a car has been built it will be given its own specific CO₂ emission on which the Vehicle Excise Duty will be charged. The VED bands are shown in the table opposite.

† Not available until January 2007.

Standard Equipment

12V socket in boot	Manually adjustable door mirrors
15" 'Hermes' Steel wheels	Middle console with 12V outlet, cup holder and storage box
ABS	3.5mm jack input for MP3 player
Central door locking	Body coloured bumpers
Curtain airbags	2 DIN radio 'Dance' with single CD + MP3
Driver and passenger front airbags	4 Speakers
Electric front windows	Rear fog lights
Headlight height adjustment	Side airbags
Height and reach adjustable 4-spoke steering wheel	Ticket holder
Height-adjustable drivers seat	Tinted glass
Immobilizer	Varioflex seating
Load securing loops in luggage space	
Adjustable rear parcel shelf	

1 15" 'Hermes' Steel wheel

2 Roomster 1 Interior (not UK specification)

3 Stone Red Cloth Upholstery
4 Stone Blue Cloth Upholstery

Škoda Roomster features and benefits

Living Room

The 'Living Room' offers the passengers a large, comfortable, airy, light and flexible space. The cinemascope rear seats are slightly raised and in tandem with the deeper rear windows offer greater views to keep those small children occupied. The Varioflex seating offers a myriad of seating combinations to suit all of your needs.

Driving Room

The 'Driving Room' of the Roomster is different from the conventional MPV. The position of the seats and the dash are such that it is just like driving a car, rather than your average people carrier. The controls are logical and in easy to reach places, allowing you to concentrate on the road.

Electrically heated and adjustable door mirrors

The door mirrors can be adjusted from the small control situated on the driver's door. This allows a comfortable start to your journey without you having to stretch across the car to adjust the passenger door mirror. The heated mirror function allows the mirrors to be defrosted quickly on those cold winter mornings. Standard on Roomster 2 and 3.

Storage

There are numerous storage spaces and cubby holes in the Roomster. From the drawers under the passenger seat (Roomster 2 and 3) to the double glovebox and 1.5 litre bottle holders in the sides of the doors. The Roomster will have a cubby hole to suit you.

Single CD + MP3 Player

Standard across the range is the 2 DIN radio 'Dance'. The single CD player allows you to play CDs with recorded MP3 tracks on, whilst the 3.5mm jack allows you to plug your MP3 player in and listen to it through the Roomster stereo.

Manual air conditioning

Air conditioning offers great advantages over standard ventilation and the first is keeping your car cool through the summer months. Perhaps more surprisingly becomes an effective tool in the winter, demisting the windows faster than standard ventilation. Other added benefits include increased residual values and desirability. Standard on Roomster 2 and 3, optional on Roomster 1.

Airbags

All Roomsters are equipped with driver and front passenger, side and curtain airbags. These are designed to inflate upon impact thus protecting the driver and passengers from serious head and chest injuries.

Cruise control

Provides you with comfort on long journeys by assisting you to maintain safe driving speeds by setting your speed as the circumstances dictate.

3 year / 60,000 Mile Warranty

ŠkodaAuto are pleased to provide a two year unlimited mileage warranty. In addition, ŠkodaAuto UK provides a further warranty on new vehicles supplied by them through their appointed retailer network which is valid until the vehicle has completed 60,000 miles or the end of the third year, whichever is the sooner (see page 21 for more details).

Inclusive AA cover for 3 years

Accessed through a dedicated Freephone number, this free back-up service covers your Roomster for Roadside Assistance, Relay and Relay Plus, Home Start and includes European cover.

Škoda Roomster features and benefits

The 'Varioflex' seating provides a flexible and functional array of seat positions. The outer seats are able to slide backwards and forwards and recline, whilst the middle seat folds down to

create an additional armrest and convenient table and drinks holders (table and drinks holders standard on Roomster 2 and 3)

The 'Varioflex' seating has over 20 different seat combinations. All seats can individually be folded down, lifted up and secured behind the front seats or removed completely. The centre seat can be removed and the two outer seats pushed inwards to create a more spacious two seat 'Living Room'.

All 3 seats can be removed quickly and easily to create an enormous flat loadspace with a volume of 1,780 litres*

* 1,780 litres represents a space large enough to hold a small flock of sheep, goats or one concrete block from the Hoover dam! (Source - AQA)

The Roomster has been designed with both the driver and passengers in mind. The interior is split between the 'Driving Room' and the 'Living Room'.

Škoda Roomster and the environment

ŠkodaAuto views the development and manufacture of environmentally friendly products as one of its foremost priorities, and this in all phases of the products' life cycles. In order to fulfil this criterion we have taken the following steps in the manufacture of our vehicles:

We have placed the main emphasis on the use of recycled materials. The parts used in the Roomster are marked according to appropriate standards. This allows their fast identification during disassembly and any subsequent separation of various groups of parts. Construction design of these parts is optimised with regard to their easy and fast disassembly when the vehicle is being dismantled at the end of its life cycle.

We manufacture Škoda vehicles using progressive technologies in the most modern production facilities which correspond to the highest and strictest criteria. For anti-corrosion protection of the painted part of the vehicle we always and without exception use leadless cathaphoresis (KTL) and waterbased colours.

Cutting the consumption of fuel and emissions is done within the framework of the concern strategy with both petrol and diesel engines. In the area of combustion we achieve lower consumption of fuel by minimising the frictional loss in wheel traction, optimising vehicle aerodynamics, reducing energetic consumption and decreasing the weight of parts and at the same time continuing to meet all of the required parameters. All engines we offer meet the current emission guidelines.

In construction of the vehicle we pay special attention to limiting the possibility of the escape of service fluids, in the framework of manufacturing of the vehicle, its operation and service. All products of ŠkodaAuto meet the requirements of laws and guidelines for the protection of the environment, both earth and water.

In consequence of using the most modern analytical methods and the follow-up measures, we are also able to decrease noise levels and improve sound quality.

The result of all of these activities is that the Škoda Roomster car fulfils not only the requirements in the technical area, in safety and quality, but also in the area of protection of the environment. ŠkodaAuto thereby contributes to the preservation of a clean, healthy environment while at the same time guaranteeing the mobility and satisfaction of their customers.

Technical glossary

ABS: the Anti-lock braking system prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable. When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the system reduces brake pressure to that wheel.

MSR: the engine torque control system recognises when the wheels are subject to too much slippage and regulates the power supply by intervening in the engine management system. This prevents wheelspin when, for example, changing down on a smooth or wet road surface. MSR is a constituent part of the ASR system.

EDL: the Electronic differential lock continually compares the rpm of the drive wheels, and if it identifies a difference between them which could lead to an individual wheel spinning, for example if the two wheels are on different types of surface or accelerating on wet leaves, the system brakes the wheel affected until uniform rpm of all drive wheels is restored.

MBA: the Mechanical brake assist system increases brake effort under emergency braking conditions through a dual rate servo.

ASR: Anti-Slip Regulation traction control ensures the Roomster's stability when pulling away or accelerating. If the engine power or torque being transmitted to the drive wheels is too great, for example on a slippery road surface, engine torque is automatically reduced until optimum road-holding returns, thus preventing wheelspin. A light indicates whether the ASR system is on. It can be manually switched off.

ESP: Electronic Stability Programme is designed to stabilise the dynamic handling response of the vehicle by

counteracting any tendency towards oversteer or understeer. The ESP constantly compares the actual movement of the vehicle with predetermined values and according to the situation ESP reacts by braking each wheel individually (according to direction of slip) and automatically adjusting the engine's output.

CAN Bus: the CAN Bus is an electronic data bus which links the various different electronic control systems in the car. It ensures ideal co-ordination between systems and reduces the amount of wiring needed in the car.

The CAN Bus system (described above) requires a new generation of towing electrical adapters and the Roomster utilises a 13-pin European System. This can then be easily converted to a single 7 pin socket for users with a trailer. For users with Caravans a number of options are available depending on the need for a fixed/detachable Towbar, ability to use reversing sensors and age of Caravan. A number of different 13 Pin to Twin 7 pin adapters are available - please ask your Retailer for more information.

Fuel cut-out: should one or more of the airbags inflate after an accident, this system automatically cuts out the fuel supply, thus preventing subsequent leakage of the diesel or petrol.

Trip Computer: the Trip computer not only features an impressive range of data displays, operating it is simplicity itself. A multi-function touch key enables you to call up all relevant data on the easy-to-read display. Features include external temperature, time, current fuel consumption, average fuel consumption, miles driven and average speed.
