

SIMPLY CLEVER

The new Škoda Fabia RS

Power can simply mean knowing it's there when you need it. Like the 180 horses waiting at the command of your right foot. Welcome to a world of power and performance where a healthy dose of adrenaline is served with an equal measure of comfort and control.

Some have the power within. Others are merely dressed for it. But when true performance comes with the looks to match, it's a pleasure to watch and a thrill to experience. Like the potent 1.4 TSI/132kW engine wrapped in the sporty contours of the new Škoda Fabia RS.

Power is something which needs to be enjoyed. Pure performance can only be appreciated in pure comfort. It's when a thrilling ride can be stretched into a relaxing journey. After all, even adrenaline needs to calm down in the comfortable sports seats of the new Škoda Fabia Combi RS.

It's good to know you have the performance. But it's even better to know you have it in control. Witness raw force being tamed by pinpoint precision, thanks to the 7-speed DSG. You can enjoy this perfect balance of power, and a lot more in the new Škoda Fabia RS.

While the **front grille** with the RS badge gives the car a friendly appearance, the robust **front bumper** invokes the feeling of power and dynamics. The honeycomb pattern used on the **cover of the integrated inlet for the air intake** adds a distinctive design element. The same as applied to the grid in which the **LED daytime running lights** (see photo) or the circular fog lamps are embedded.

The RS inscribed **decorative door sill strips** enhance your feeling of comfort and protect sills against possible damage.

The 7.0J x 17" **Gigaro** alloy wheels with 205/40 R17 tyres were especially developed for the RS model. You may choose from 4 different colour versions: silver, anthracite, white and black.

The **double exhaust tailpipe** and the **diffuser** accentuate the car's sporty rear.

The vehicle may also be equipped with **tilting halogen projector headlamps** for the enhancement of corner driving safety.

If you decide for the **LED daytime running lights** (installed instead of the circular fog lamps), you have practical equipment which at the same time stresses the car's sporty design.

The **circular fog lamps** are part of the standard equipment. We also offer a Corner function version, which automatically switches on either the right or the left fog lamp, depending on the angle of the steering wheel and the activation of the turn indicators, at the maximum speed of 40 km/h.

With the **5th door spoiler**, favourably influencing the car's aerodynamics, the elegant rear of the Fabia RS receives the desired degree of ferocity.

The Fabia Combi RS is also equipped with the **5th door spoiler**. Furthermore, you may order **roof railing**.

The **3-spoke sports leather steering wheel** enhances the dynamic riding experience. The car may also come equipped with the **multifunctional leather steering wheel** (see photo), which enables you to control the radio, phone and shifting of the DSG automatic transmission.

The **1.4 TSI/132kW engine**, delivered along with the **7-speed DSG automatic transmission**, offers remarkable performance and power in a wide range of revs, as well as economic operation. This engine enables Fabia RS to accelerate from 0 to 100 km/h in just 7.3 seconds.

The **High-line instrument panel** incorporates the Maxi DOT multifunctional display which, among other details, displays the current DSG automatic transmission speed gear.

The standard equipment of the Fabia RS and Fabia Combi RS includes the attractive **Tempo** interior in black, including the columns and the ceiling, always accompanied with the Onyx/Onyx dashboard.

Both the driver and the front passenger **sports seats**, delivered exclusively for the RS cars, are specially moulded in a racing style. The upholstery covers are embroidered with an RS emblem. You may choose between grey or red seat upholstery.

Technical specifications

Model	Fabia RS	Fabia Combi RS
Engine	1.4 TSI/132 kW, turbocharged petrol engine with compressor	1.4 TSI/132 kW, turbocharged petrol engine with compressor

One of the most important goals of Škoda Auto is the development and production of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our Škoda cars are manufactured using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cataphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines of Škoda Auto meet the current emission regulations. We also offer diesel engines with Diesel Particulate Filters (DPF). All products made by Škoda Auto adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, Škoda cars meet technical, safety, quality and environmental requirements. Škoda Auto contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses Škoda Auto's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature.

Some models in this catalogue are shown fitted with extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes (including changes of technical parameters or individual model equipment). Please consult your authorised Škoda partner for further details on standard and extra equipment, current prices and delivery terms and conditions. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
