# The ŠKODA Range Highlights

Effective: 1st July 2011

## Welcome to the ŠKODA family.

The ŠKODA range is built upon the core values of practicality, reliability and great value for money with a history dating back over 100 years.

Small, nimble, and a pleasure to drive, the Fabia delivers everything you need, without having to break the bank.

The Roomster provides two distinct areas; the 'Driving Room' and the 'Living Room'. Each area has been designed to make sure you are comfortable and enjoy the drive.

Whatever your needs, there's bound to be an Octavia to suit you. From the entry level S, to the sporty vRS, to the top of the range Laurin & Klement. In need of a four wheel drive? Then there's the 4x4, or the even more adventurous Scout.

Yeti strikes the perfect balance between on road performance, family oriented practicality and rugged 4x4 styling. Yeti is perfect for life in towns and cities. It combines all the benefits of a 4x4 with the practicality of a hatchback, making it a great family car.

Superb is the flagship of the range, a mainstream vehicle offering the customer more space, refinement and luxury than its competitors at a price which is traditionally ŠKODA.

## Sporty and economical.

### More Performance...

The Fabia vRS has become an icon of the ŠKODA range, offering pure driving pleasure that outclasses more expensive rivals. This celebrated model now makes an eagerly-anticipated return to the ŠKODA line-up, with more power, a seven-speed DSG transmission and for the first time ever, an estate variant. The new vRS is the fastest production Fabia ever built, and builds on its predecessor's reputation for high performance, low running costs and remarkable value for money. Above all, it is a thrilling driving experience that makes the most of cutting-edge automotive technology.

### Less consumption...

GreenLine II is ŠKODA's product strategy to reduce its impact on the environment. In this age of environmental awareness, and the financial advantages of operating frugal and low CO<sub>2</sub> emitting vehicles, the demand for this type of vehicle is increasing.

These models take existing diesel engines in the range, and with the help of mechanical and technological changes seek to improve efficiency. New features such as lowered ride height, improved aerodynamics and low-friction tyres improve efficiency. Whilst technological advancements like the introduction of a Stop/start system, gear change recommendation and energy recovery improve fuel economy and reduce exhaust emissions.

These advancements mean that the Fabia GreenLine II emits just 89 g/km CO<sub>2</sub> so it's exempt from road tax. Along with a combined fuel economy figure of 83.1 mpg, it's also the most economical ŠKODA ever!
