

THE NEW OPEL INSIGNIA

Wir leben Autos.

CONNECTED TO WHAT COUNTS.

To drive the new Opel Insignia is to know what defines an exceptional car. A revolutionary interface system transforms the way you and the car interact, Touchpad-controlled, customizable infotainment options create a seamless extension of your digital world, ensuring quality time begins the moment you shut the door. And that's just the start. The new Insignia takes its driver into new territory with a world-best drag coefficient¹, sophisticated assistance systems, sumptuous trims and the refined ride and response of German engineering. But we don't expect you to take our word for that. You'll know for sure when you test-drive one yourself.

Please delete this phrase and the footnote locally if you don't offer the Hatchback.

**WHEN INSPIRATION MEETS SUBSTANCE,
EXCELLENCE RESULTS.**

Alternative page version A (HB, NB and ST)

The new Insignia look gives the range an unmistakable aesthetic. There are four distinct models to choose from: the elegant 4-door Notchback, the streamlined 5-door Hatchback, the extra-spacious Sports Tourer and the state-of-the-art Country Tourer with off-road protection and 4x4 All Wheel Drive ([page 14](#)). Every new Insignia bears our flagship's compelling new signature.

EVERY MOVEMENT HAS ITS ICONS.

Every new Insignia is a classic of its kind. At the pinnacle of the range stands the Country Tourer. A blend of design and refined technologies, it's a beautifully balanced car. Sophisticated protective systems safeguard your investment, including all-round anthracite cladding. Off-road tyres, brash alloys and the 4x4 All Wheel Drive badge hint at the power play yet to come.

EXCELLENCE ISN'T A STATEMENT. IT'S A STATE OF MIND.

As an Insignia driver you insist on attention to detail. Our flagship responds with a tailored interior and a rich variety of hand-picked materials. Add multi-adjustable AGR¹ ergonomic front-seat options and enjoy business-class travel without ever leaving the lounge.

¹The AGR certificate is a seal of quality awarded by an independent testing committee made up of experts from various medical disciplines.

A REVOLUTION IN INSTRUMENTATION.

The new Insignia brings your whole digital life into your car. The most sophisticated infotainment options we've ever built connect you to your world – at the touch of a button or the swipe of the first ever touchpad with haptic feedback, gesture control and handwriting recognition in a car. Voice recognition makes phone calls, music and navigation effortless. It's just as simple to customize 60 favourites on the big colour touch screen. This is no standard tweak of the on-board infotainment. It's an effective transplant of your smartphone right into the dash.

ENGINEERED TO MOVE MILES.

The new Insignia engines excel and excite in equal measure.

Thanks to Opel ecoFLEX technology, the new range boasts excellent fuel efficiency figures. The Hatchback ecoFLEX¹ has the world's lowest drag coefficient for a 5-door hatchback² and the range can also claim the best-in-class mark³ for CO₂ emissions – a mere 99 g³ for the 2.0 litre units with 88 kW (120 hp) and 103 kW (140 hp). Of course, there's no shortage of horsepower either. The most powerful engine puts 184 kW (250 hp) and 400 Nm of torque at your disposal, while optional FlexRide lets you recalibrate the car for a more dynamic driving style. However you drive, the miles just fly by.

¹As of July 2013. ²As of June 2013. ³99 g for Notchback and Hatchback only. 104 g for Sports Tourer.

The calculation of fuel consumption as specified by directive 2007/715/EC, incl. of implementing regulation 2008/692/EC and/or ECE R83 series 05 takes account of the vehicles curb mass, ascertained in accordance with the said regulation. Optional extras may result in slightly higher fuel consumption and CO₂ emission levels than those quoted.

THE END OF THE END OF THE ROAD.

When tarmac turns to turf, one Insignia is ready. First-class All Wheel Drive technologies make the Country Tourer the consummate adventurer, including FlexRide and electronic Limited Slip Differential. In polite company, silver skid plates, elevated ground clearance and chrome headlight accents ensure its rugged good looks never look out of place. With 360° anti-chip cladding, it's always immaculately dressed for dinner.

F GG 9098

CONTROLLERS WELCOME.

The smarter your sensors, the smoother your trip. The Insignia puts the next generation of driver assistance systems at your fingertips. The radar-based options Rear Cross Traffic Alert, Side Blind Zone Alert and Lane Change Alert ensure you can reverse or change lanes with confidence. With our proactive systems running their checks, in any driving situation you can relax.

A blurred city street scene. In the foreground, a woman with long dark hair, wearing a black top, is walking away from the camera. The background shows a modern glass-fronted building and other pedestrians in motion. The sky is blue with light clouds.

**DECISIONS COME EASY
ONCE YOU KNOW
WHERE YOU STAND.**

YOUR CAR SPEAKS HANDS-FREE.

The new Insignia's advanced multimedia options break down all barriers between car, driver and digital content.

Effectively, they transform the way you and your Insignia interact. A customizable information cluster replaces a pre-set default interface, allowing you to access the information that suits you best with just one click. Large colour touch screens and a convenient touchpad replace centre stack buttons, dials and low-res displays. Above all, access to your digital devices is wireless and seamless. For minimum distraction and maximum speed, our Navi 900 IntelliLink sat nav comes with one-shot voice commands for navigation, phone calls and audio choice.

The instrumentation options in the new Insignia have started a category revolution – offering intuitive, in-car access to your home and work. And because intuitive means different things to different people, the system is fully customizable. You can prioritize icons and cherry-pick information on the centre stack display just as you would on a new computer. You can store up to 60 favourites, from contacts to radio stations, playlists or a great new coffee bar.

ESSENTIA.

For many Insignia drivers, it's the little luxuries in the interior that make their car so special. Like the 7-speaker R300 infotainment system and 4,2" (10,7 cm) centre stack colour display that come standard with the entry-level Essentia Trim Line. You can adjust the height of the driver's seat electrically and all three rear seats are fitted with ISOFIX anchors.

Next to a lively 103 kW (140 hp) 1.8 litre petrol engine and safety must-haves like ESP® and ABS, the Essentia can claim an excellent level of supplied equipment. You can access mobile digital devices like an MP3 player¹ via aux-in or control your music directly on the dashboard via USB. The system can automatically adjust volume and bass with the speed of the car.

Images may show optional features.

¹The number and level of compatible functions between infotainment system and mobile device differs depending on the device. Please see www.COUNTRYSPECIFICurl for a list of devices and compatible functions. ²The 1.4 and 1.8 litre Sports Tourers have 16" wheels. Every 1.6 model has 17" wheels. Wheel size varies with engine and body style. Please consult your Opel retailer for details.

1. Beautiful bi-halogen headlamp. The low and wide front of the new Insignia is dominated by the stylish high-gloss chrome grille. This picks out additional chrome highlights that complement the Essentia's trademark black headlamp housing.

2. 16" or 17" wheels. Every Essentia Hatchback and Notchback comes supplied with 16" steel wheels, with the exception of the 1.6 litre version, which – like most Sports Tourer models – has 17" steel wheels.²

1.

2.

1. Electronic Climate Control (ECC). The ECC lets you set the temperature with the confidence that the Insignia will automatically keep the ambience as you like it.

2. 17" design wheels.¹ The Edition comes supplied with design wheels in Silver. The five-spoke styling complements the new Insignia's elegant silhouette.

EDITION.

The Insignia Edition comes with all the best equipment from the Essentia Trim Line and adds a number of special features including a leather steering wheel fitted with remote buttons for the supplied cruise control. Of course, it also comes with the 4,2" (10,7 cm) colour display that lets you navigate connected digital devices safely from the centre stack.

The Edition takes the trim up a notch with Electronic Climate Control and a driver's seat with 4-way adjustable lumbar support. Upgrade to the Bluetooth®-capable R400 system (shown here) for wireless audio streaming, remote steering wheel-mounted radio controls, remote phone book reference and seamless hands-free calls.

Images may show optional features.

¹Wheel size varies with engine and body style. Please consult your Opel retailer for details.

ACTIVE.

Please check the size of the wheels supplied in your market and change if need be.

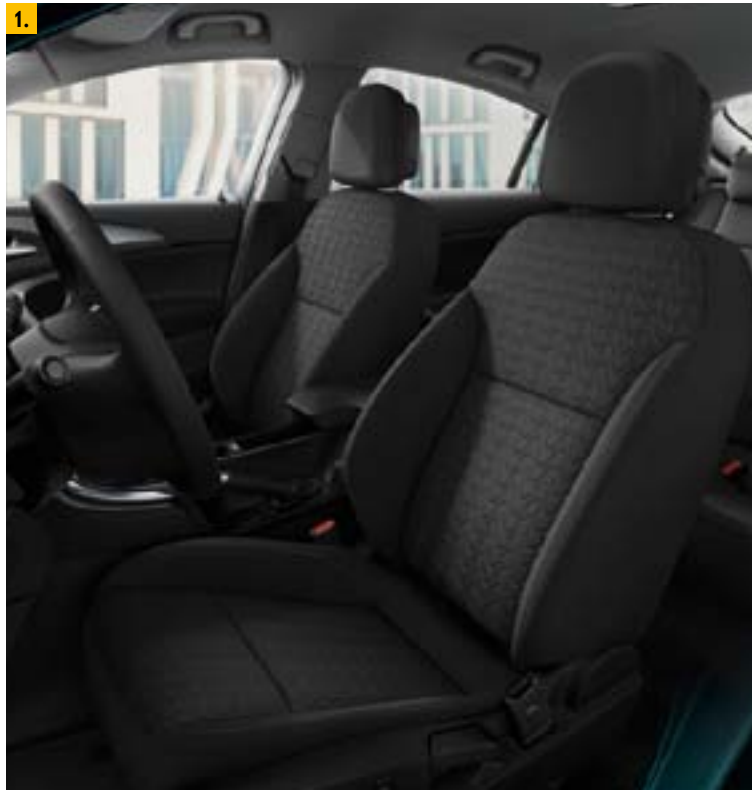

The Active Trim Line has almost the same features as the Edition, but a style all its own. True to its name, the Active is all about action, with large 18" alloy wheels enhancing the new Insignia's broad, athletic shape and adding to its sporting appeal.

Designed specifically for the outdoors-loving Insignia owner, the Sports Tourer Active comes with silver roof rails for stowing out-sized gear and extra luggage using a range of optional roof accessories, such as a roof box or a bike carrier. Like the Edition, another highlight is the comfort and convenience of an easy-to-read 4,2" (10,7 cm) colour screen in the centre stack.

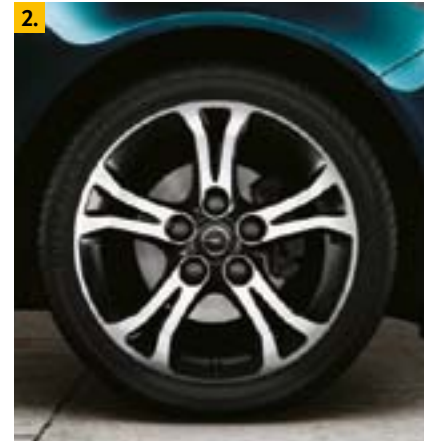

The 4,2" screen may be optional in your country. Please adjust accordingly.

Images may show optional features.

1. Adjustable driver's seat in Salta fabric. Sporty owners will love the driver's seat in the Active Trim Line. Height and lumbar area can be adjusted electronically to take the strain off aching limbs. Jet Black Salta fabric brings out the best in the leather-wrapped steering wheel.

2. 18" alloy wheels. The Active is a colourful character and so are its wheels. These large, bi-colour alloys give this Insignia a decidedly dynamic look.

Please check which wheels are supplied in your local market and adjust if need be.

1. Fog lamps. Fog lamps not only make your car easier to see in bad visibility, they add a motorsport feel to the front fascia too.

2. FlexRide chassis settings. Sporty or soft, you decide! Thanks to Opel FlexRide Adaptive Chassis Technology, you can change the driving dynamics of your Insignia Sport at the touch of a button. Turn to [page 42](#) to find out more about this exciting innovation.

3. 18" sports alloys. The Sport comes with big 5-double-spoke sports alloys with a twisted design that gives the whole car the impression of movement and power.

SPORT.

For aficionados of sporty driving, the Sport Trim Line strikes gold. The chassis is lower, the rear-side and tailgate windows are tinted and the sports seats have 4-way pneumatic lumbar support. Given the FlexRide Adaptive Chassis Technology, this Insignia's intentions are clear.

Images may show optional features.

COSMO.

The Insignia is our flagship, and the Cosmo is the flagship of the Insignia range. You could hardly wish for a more sumptuously equipped Opel. From the dual-zone Electronic Climate Control system to finer design details such as the chrome fittings around the side windows.

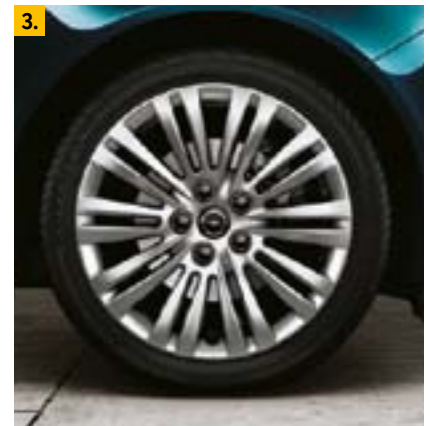

When it comes to making light of your everyday journey, the Cosmo is king. It comes with the Sight Pack as standard, so the windscreen wipers automatically respond when it starts to rain, the rear-view mirror prevents glare and the headlights switch on when you enter a tunnel. The air conditioning and trim are no less regal. For details, turn to [page 58](#).

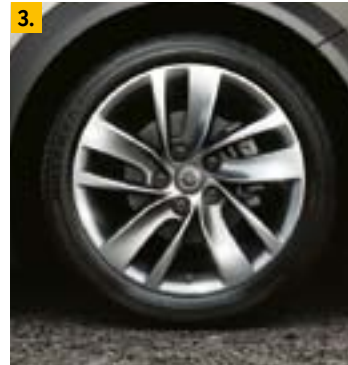

Images may show optional features.

- 1. Dual-zone Electronic Climate Control (ECC).** Set an individual temperature for each side of the car and help reduce your emissions. This ECC has an advanced compressor that cuts fuel consumption by only cooling when it has to.
- 2. Electric parking brake and storage.** A push-button handbrake is elegant, effective and easy to use, on hill starts or simply in the garage at home. It also frees up space for a practical covered storage compartment behind the gear stick.
- 3. 18" alloy wheels.** The Cosmo's chromed contours have the alloys to match – with a 10-twin-spoke design in glinting silver.

1. Chassis protection. Every Country Tourer is fitted with the robust Opel Chassis Protection Kit, including 360° black anti-chip cladding and silver skid plates front and rear, plus sealed bearings that help protect your purchase off-road.

2. Powerful presence. Elevated ground clearance of 20 mm complements the lean, sculpted aesthetic of the new Insignia.

3. 18" sports alloys. The Country Tourer boasts big, sporty 5-double-spoke alloys with a sinuous, twisted design.

COUNTRY TOURER.

The new Country Tourer is the quintessential contemporary estate, with the outstanding 4x4 grip of All Wheel Drive and an electronic Limited Slip Differential. It combines rugged off-roader looks with the sophistication of the Cosmo Trim Line and the powerful personality of the Insignia Sport. Its turf-churning credentials include the most powerful standard engine of all six Insignia Trim Lines – a 2.0 litre petrol unit that generates 184 kW (250 hp) and 400 Nm of torque.

Images may show optional features.

FREQUENT TRAVEL HAS ITS PRIVILEGES.

In your Insignia, business-class driving means much more than the luxury of exclusive, tailor-made materials. From luggage handling to home comforts like lighting, personalized seat adjustment and remote office access, you can expect service as smooth as a 5-star hotel.

¹Not available on the Essentia. ²The AGR certificate is a seal of quality awarded by an independent testing committee made up of experts from various medical disciplines. ³All optional infotainment systems come with multimedia remote controls. Adaptive Cruise Control with Speed Limiter is optional on Insignia Edition, Sport, Cosmo and Country Tourer. Cruise control is standard on all models except Essentia, where it is optional.

3. High-capacity boot. Whichever body shape you select, the boot of your new Insignia is an impeccable calling card. The **Notchback and Hatchback** swallow an impressive 500 or 530 litres respectively – or at least 4 standard suitcases – without folding any seats down, while Tourer models offer up to about 1.530 litres.

1. Panoramic sunroof.¹ An elegant option for Sports Tourer drivers that makes light of long holiday trips. The large, tinted sunroof adds daylight in cloudy weather or a welcome breeze when it's warm.

2. Ergonomic AGR² front sports seats. Excellent seating options are an Insignia speciality. You can fine-tune the lumbar cushion in four directions, and even extend the seat cushion forward for extra thigh support.

4. Steering-wheel remote controls.³ Equip your Insignia with an optional infotainment system and the steering wheel comes with expertly laid-out controls for everything from music and phone calls to cruise control.

5. Push-button ignition. Keyless access and ignition is elegant, quick and effective.

HEADLIGHTS WITH FORESIGHT.

As an Insignia owner, you have access to a comprehensive range of sophisticated driver aids, such as the optional intelligent Bi-Xenon Adaptive Forward Lighting Plus (AFL+) headlight system. AFL+ makes driving at night less stressful. Using a front-mounted camera, rain sensor and steering angle input, it improves visibility and safety by automatically adjusting the strength of your headlights to different speeds, manoeuvres, weather conditions and traffic situations.

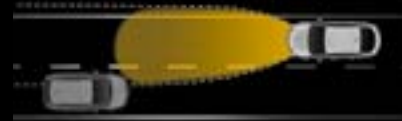

As a headlamp-based technology, AFL+ includes LED Daytime Running Lights and the Sight Pack, which further enhances safety and comfort in the dark. It consists of an anti-glare mirror and tunnel detection, which automatically switches on your headlights in a tunnel. The pack also comes with a rain sensor for the windscreen wipers and headlamp washers to ensure your headlights are fully effective in bad weather.

1. Static Cornering Light. Throws light 90° to the left or right so you can see better what's around the corner.

2. Dynamic Curve Light. The headlights turn into the curve by up to 15°. Activated by steering angle and speed.

3. High Beam with Assist (HBA). HBA automatically dips your headlights when it detects other vehicles ahead and switches back to high beam when the road is clear.

4. Adverse Weather Light. Activated by wipers or a rain sensor, this setting improves vision in wet weather.

5. Highway Light. Raises, brightens and extends the beam to 140 metres – without blinding other drivers.

6. Country Road Light. Wider and brighter than normal, for a 70-metre dazzle-free beam.

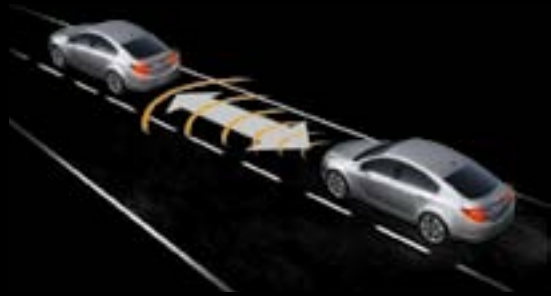

7. Town Light. Spreads the light wider and lower. Activated by vehicle speed and street lighting.

8. Pedestrian Area Light. Highlights potential hazards with a wider spread of light (an extra 8° left and right).

MOTIONAL INTELLIGENCE.

Forward thinking is all about not looking back. The Insignia's optional assistive technologies put you in control and your mind at ease. Adaptive Cruise Control with Speed Limiter (ACC) helps maintain a set distance to the car ahead – and can even stop, prompt and pull away for you in bumper-to-tail traffic¹. In addition to the widely praised Opel Eye and AFL+, the Insignia breaks new ground with three advanced radar-based systems: Lane Change Alert, Side Blind Zone Alert and Rear Cross Traffic Alert.

Adaptive Cruise Control (ACC) with Forward Collision Alert (FCA). ACC is an advanced, proactive version of conventional cruise control for preventing bumper-to-tail collisions at speeds between 25 and 180 km/h. It uses a powerful radar sensor to automatically maintain a safe gap (chosen by you) to the vehicle in front. ACC also incorporates Forward Collision Alert. If you approach slower-moving vehicles too fast at speeds above walking speed, FCA automatically triggers visual and audible warnings. FCA includes Collision Imminent Braking technology that automatically applies the brakes gently – and makes them more sensitive in case you have to brake hard yourself.

Lane Change Alert (LCA). LCA uses a powerful radar to monitor parallel lanes to a distance of approx. 70 metres behind your car. If you indicate to change lanes, a symbol blinks in the side mirror to warn of any fast-approaching vehicles you may not have seen.

Rear Cross Traffic Alert (RCTA). As you reverse, RCTA uses radars to detect objects approaching from the back and side of your car, up to 20 metres away at a 90° angle. The speakers emit a tone on the relevant side and an icon appears on the same side of the Rear View Camera display.

¹With optional Full Speed Range Adaptive Cruise Control (FSRA), available with automatic transmissions only.

Side Blind Zone Alert (SBZA). SBZA similarly uses radar in the rear bumper. It monitors both blind spots and activates a light in the side mirror if it detects a vehicle closer than approximately 5 metres behind, or about 3,5 metres to the side of, the side mirrors. If you indicate on that side, the light flashes as an additional warning.

1. Traffic Sign Assistant II (TSA, via Opel Eye). TSA monitors road signs to make sure you're aware of the speed limit and other restrictions all the time, even when temporary signs are put up. This new and enhanced version of TSA can read more signs in more countries than ever before, including electronic signs over motorways.

2. Rear View Camera (RVC). The optional RVC makes reversing easy. A high-res display shows the area behind the car while a scaled grid helps you judge distances and angles.

Advanced Park Assist. This assistant will not only detect suitably sized spaces for your new Insignia, with the help of graphics and acoustic signals it will tell you how far backwards and forwards to drive and even show you how far to turn the wheel. All you do is work the accelerator, choose first or reverse gear, and steer.

SAFETY? CHECK.

A 5-star NCAP rating speaks volumes about the Insignia's ability to shield you and your family in the event of an emergency. With optional aids like Advanced Park Assist and steering-wheel mounted controls for heads-up operation of car systems, the Insignia proactively helps prevent accidents to make driving as comfortable, convenient and safe as possible.

5 stars for safety. The Insignia was awarded the maximum possible 5-star safety rating by NCAP, the European New Car Assessment Programme. The award takes into account four crucial aspects of overall safety: adult and child protection features such as full airbag coverage or ISOFIX, pedestrian safety and safety assistive technologies.

Four-way active headrests. This proactive technology significantly reduces the risk of whiplash injuries to front-seat passengers in the event of a rear-impact collision. Your seat back detects the impact and quickly moves the headrest forwards to minimize head movement and cushion your neck.

Adaptive All Wheel Drive. Fit your Insignia with 'active on demand' 4x4 Adaptive All Wheel Drive (AWD) and you'll enjoy increased driving stability in challenging conditions. AWD uses sensors to monitor the relative speed of the wheels, then a sophisticated Torque Transfer Device automatically distributes torque between the front and rear axle.

The heightened stability and traction of AWD are further enhanced by the electronic Limited Slip Differential that enables individual torque vectoring for the rear wheels. Together, these technologies deliver faster acceleration and the motorsport kick of genuine rear-wheel driving.

FLUID TORQUE TRANSFER. GRIP LIKE GLUE.

The new Insignia is a driver's car with the engineering to fire real driving passion. Powerful engines get the grip they deserve, especially in tandem with 4x4 Adaptive All Wheel Drive (AWD) and the accompanying lowered chassis. Sport and Cosmo drivers¹ can even go one better – with the optional SuperSport chassis package. It gives you the handling edge of the same sports chassis featured on the Insignia OPC as well as its adrenaline-rich high-performance (HiPer) front struts and top-flight Brembo motorsport brakes.

1. FlexRide Adaptive Damping Control. Every Insignia with AWD also comes with Opel FlexRide technology. One touch of the Sport button changes the whole driving dynamics of your Insignia – from 'Normal' or 'Tour' to 'Sport' and back again. Using Continuous Damping Control (CDC) technology, FlexRide automatically adjusts the damper settings in real time to give you excellent road holding. In 'Tour' mode, it chooses the best settings for gentler, straight-line driving. Switch to 'Sport' mode and it instantly stiffens the dampers and sharpens the response of the steering, accelerator and automatic transmission (if fitted).

¹ Available for Sport and Cosmo with AWD and selected engines.

SYNCHRONIZE ALL SYSTEMS.

The new Insignia offers our most advanced infotainment options ever. With the help of IntelliLink technology, systems like the Navi 900 IntelliLink sat nav (right) give you fast, effortless access to digital entertainment on a big, 8" (20 cm) colour touch screen that plays back video¹ and audio streamed from Bluetooth®-capable portable devices. A category first is the configurable 8" display in the driver information cluster. Use one of four options to control the system easily and eyes-free, including voice recognition and an industry-first touchpad with haptic feedback behind the gear stick.

Four options for natural navigation. What do a swipeable touchpad, speech recognition, steering-wheel switches and touch-screen controls have in common? Answer: the Navi 900 IntelliLink has them all.

¹Video Bluetooth® streaming is only available while the car is stationary and with Android operating systems. ²A compatible portable device with an Internet connection is required to download apps, which are available from XX 2013.

1. No eyes required. The touchpad on the Navi 900 IntelliLink responds to the familiar one-, two- and three-finger swipe gestures used on contemporary laptops. Enter or browse destinations by letter using the handwriting recognition button, or press the back button on the left to access the previous screen.

2. Voice recognition. For the added convenience and safety of head-up driving, the Navi 900 IntelliLink understands one-shot voice commands for destination input, choosing music, making calls from your address book and much more. Downloadable apps² give you access to many of the familiar features on your portable device. For example, TuneIn lets you browse and play music whilst The Weather Channel keeps you up to date on how your day is going.

3. Touchpad commands. You can control the new Insignia's configurable home screen using a touchpad mounted in easy reach behind the gear stick.

Bespoke instrumentation. Depending which infotainment system you select, you can personalize the game-changing driver's information cluster. It's designed specifically to work seamlessly with next-generation in-car hardware like the optional Navi 900 IntelliLink and Touch R700 IntelliLink, so personalization is as easy as picking a new desktop wallpaper. Of course, the whole system is compatible with external SD cards and CDs, plus all the widely used portable digital devices via USB, aux-in or Bluetooth®. iOS, Windows Mobile or Android, smartphone or tablet. If it connects in your home, you can be confident it'll connect in your car.¹

YOUR CENTREPIECE. OUR MASTERPIECE.

In the new Insignia, dreams of fast, effortless access to entertainment come true. Even more impressive are the features you might never even have dreamt of. Like the fact that you can customize the information cluster directly behind the steering wheel to prioritize key information, like radio stations, that would normally be displayed on the centre stack screen. Control is instinctive. One glance at the cluster, one touch of the wheel-mounted button. Done.

¹Number and level of compatible functions between infotainment system and mobile device differs depending on the device. Please see WWW.COUNTRYSPECIFICurl.com for a list of devices and compatible functions. ²Standard with the R300 infotainment system. ³Standard with all infotainment systems except R300. ⁴8" cluster is optional with Navi 900 IntelliLink and Touch R700 IntelliLink systems.

1. 3,5" (9 cm) monochrome driver cluster. The standard driver information cluster provides information such as fuel and distance covered. It's navigable using optional switches mounted on a steering wheel stalk.²

2. Digital 4,2" (10,7 cm) colour driver cluster. This larger screen lets you access and control audio, contacts and preferred information directly on the driver cluster.³

3. 8" (20 cm) driver cluster in analogue sport mode. You can opt to display systems info via traditional dials on the big 8" (20 cm) screen. If your Insignia is fitted with optional FlexRide, you can set the display to change to analogue sport mode whenever you select the 'Sport' chassis setting.⁴

4. 8" (20 cm) driver cluster in digital tour mode. With optional FlexRide in 'Tour' mode, the driver information cluster switches to a digital display that shows Vehicle Information, Media, Phone, Settings and Performance.⁴

5. BOSE® sound system. Take your seats in a portable concert hall. This 8- or 9-speaker system delivers unprecedented performance, immersing you and your passengers in world-class surround sound. The aural experience is astonishing, front and rear.

EXTRAS AND ACCESSORIES.

As befitting the flagship of the Opel range, the new Insignia was created to satisfy the most demanding of drivers. In terms of comfort, quality and technical specifications, the level of equipment is exceptional. Of course, should you need to adapt your Insignia for any reason, Opel offers an exhaustive range of dedicated extras and accessories to help you do just that.

Comprehensive and online. For the full range of accessories designed for the new Insignia, please visit our website at WWW.COUNTRYSPECIFICurl

1. Thule bicycle carrier. A sturdy hitch-mounted carrier is easy to attach and takes up to three bikes, with trailer electrics and an extension and for a fourth bike available if need be. Tilt the carrier backwards to access the boot.

2. Thule roof base carrier. Skis, boogie boards, bikes, tents and windbreaks – when there's simply too much luggage to fit in the boot, there's still room on the roof. Thule offers a whole range of products to fit the base carrier, including this aerodynamic roof box. It's sleek, spacious, weather-proof and robust.

3. Hard cargo tray. This tough tray helps keep the boot clean and tidy. The edge has a lip to stop liquids spilling onto the carpet. Add nets or dividers to organize your gear.

4. Privacy shades. Keep the Insignia interior cooler on long trips in hot weather and protect passengers and possessions from prying eyes. You can put shades up or take them down in a matter of seconds.

5. Slide-out Flex Floor extension. This clever accessory extends the boot space of the Sports or Country Tourer out over the bumper so you can load heavy objects without leaning forward and potentially straining your back. Simply place up to 120 kg of luggage on the extension then push it back into the boot.

1. OPC Line Interior Pack. Take your seat with black under your legs, black over your head, an OPC Line gear stick in your hand and gleaming OPC Line alloy racing pedals under your feet. Driving an automatic is more thrilling when you can change gear using Formula One-style paddles¹ with both hands gripping an OPC Line leather steering wheel. The OPC Line packs can be factory fitted or added post-delivery as accessories. Enjoy.

2. OPC Line Exterior Pack. Add to the adrenaline with an OPC Line rear spoiler², OPC Line side sills and OPC Line lower skirts front and rear. The ultimate flourish? The visible dual chrome exhaust³.

PACKS WITH A PUNCH.

Whichever way you look at it, the Insignia's athletic contours and muscular stance hold the promise of agile handling and an exciting drive. But if you like your car to wear its high-octane heart on its sleeve, there's no substitute for the motorsport styling of an Opel Performance Center (OPC) Line Pack.

¹Paddle gear change available with automatic transmissions only.

²Not available with the Sports Tourer or Country Tourer. ³Visible with selected engines only.

ENGINES AND TRANSMISSIONS.

Power and reliability are nothing without efficiency, and the new Insignia range has all three in abundance. It sets a category-best¹ 99 g² mark for low CO₂ emissions and the 125 kW (170 hp) 1.6 litre engine is the benchmark for low noise and vibration. Transmission options include front-wheel drive and advanced 4x4 All Wheel Drive technologies.

MT-6 = 6-speed manual transmission, AT-6 = 6-speed automatic transmission

All information was accurate and up to date at the time of going to print. The company reserves the right to alter engine specifications at any time, which may influence the content of the shown data. Please consult your Opel dealer for the latest information. All figures quoted relate to the EU base model with standard equipment. Fuel consumption data and CO₂ emission data are determined according to regulation R (EC) No. 715/2007 (in the version respectively applicable), taking into consideration the vehicle weight in running order, as specified by the regulation. Additional equipment may lead to slightly higher results than the stated consumption and CO₂ figures. The figures for fuel consumption and CO₂ emissions do not relate to a specific vehicle and are not part of an offer. They are provided only for the purpose of comparison between different vehicle variants. Additional equipment may increase the weight of the vehicle when empty and in some cases the permissible axle weights as well as the permissible total weight of the vehicle and reduce the permissible towing weights. This may lead to a reduction in top speed and increased acceleration time. Driving performance figures assume a 75 kg driver plus a 125 kg load.

¹As of June 2013. ²99 g for Notchback and Hatchback only, 104 g for Sports Tourer. The calculation of fuel consumption as specified by directive 2007/715/EC, incl. of implementing regulation 2008/692/EC and/or ECE R83 series 05 takes account of the vehicles curb mass, ascertained in accordance with the said regulation. Optional extras may result in slightly higher fuel consumption and CO₂ emission levels than those quoted. Tyre groups: depending on the width of the tyres. ³In acc. with regulation R (EC) No. 715/2007 (in the version respectively applicable). ⁴As of July 2013.

Opel continues to pioneer innovations that reduce fuel consumption, including ecoFLEX technologies like low-friction wheel bearings and intelligent generator management that help cut the running costs of new Insignia engines – whether petrol, diesel or gas. **The result? At 0,25 c_d, the Insignia Hatchback ecoFLEX boasts the world's lowest drag coefficient for a 5-door hatchback⁴. Even the regular Insignia Hatchback holds the best-in-category mark⁴ – a remarkably aerodynamic 0,26 c_d.**

OPEL FOR LIFE.

Every Opel is designed and built to perform day in and day out. But like any piece of precision engineering, it performs best when it's cared for by people who really know what they're doing.

Throughout Europe, more than 6.000 Opel repair shops are ready to deliver professional and punctual service. As you'd expect, they'll repair your vehicle to the highest standards. As you might not expect, they'll tell you exactly what's been done and why, and they'll give you a clear and concise overview of any costs. To find your nearest authorized repairer, go to www.opel.com or call the Opel service hotline: **XXX-XXX-XXX-XXX, Monday to XXday, X a.m. to XX p.m.**

Opel Roadside Assistance. This mobility service is free of charge for all new Opel vehicles for one year after they were first registered or delivered to the customer by the distributor, depending on which date comes first. No matter where you are, Opel Roadside Assistance is there to help. In more than 40 European countries, round the clock. Offering services such as breakdown assistance, towing, a hire car, hotel accommodation or the organization of onward transportation, e.g. via rail or air (please see programme conditions). Your distributor or authorized repairer will be happy to offer an extension at your annual service.

CAN YOUR CAR KEEP UP?

Opel specializes in features that make today's cars safer, more versatile, more user-friendly – and more fun to drive. Our innovations have also had a significant impact as car manufacturers everywhere seek to reduce fuel consumption. Here are just some of the great ideas that make your Opel such a pleasure to own.

Configurable 8" (20 cm) driver cluster. The optional infotainment system includes two category firsts: the configurable 8" (20 cm) optional driver cluster and up to four control options: steering-wheel switches for the driver cluster, plus a swipeable touchpad, speech recognition or the touch screen for the centre-stack display.¹ [Page XX](#).

4x4 All Wheel Drive (AWD) System. Optional AWD increases driving stability by redistributing torque in challenging conditions. FlexRide recalibrates AWD and chassis settings for different driving styles while electronic Limited Slip Differential redirects torque to one or both rear wheels.² [Page XX](#).

SuperSport chassis with Brembo brakes. The optional SuperSport chassis is specifically calibrated for sporty driving, in combination with high-performance front struts and the advanced AWD System³. Brembo four-piston callipers with 355 mm front disc brakes provide immediate response.

Rear View Camera. The optional RVC makes reversing easy. A high-res display shows the area behind the car while a scaled grid helps you judge distances and angles. For maximum safety and comfort, combine this feature with radar-based driver aids. [Page XX](#)

Low-emission ecoFLEX engines. ecoFLEX technology delivers not just the world's most aerodynamic 5-door hatchback⁴, but also CO₂ emissions of just 99 g⁵ for 2.0 litre engines with 88 kW (120 hp) or 103 kW (140 hp). That makes these Insignia units the cleanest engines in the category.⁶ [Page XX](#).

Radar-based driver aids. Optional Side Blind Zone Alert, Rear Cross Traffic Alert and Lane Change Alert make driving safer and easier in a variety of driving and parking situations, by monitoring hard-to-see areas to the side and rear of your car. [Page XX](#).

Adaptive Cruise Control (ACC). An optional, advanced, radar-based version of conventional cruise control for preventing bumper-to-tail collisions up to 180 km/h. ACC automatically maintains a safe gap to the vehicle in front. With automatic transmissions, its Stop/Go feature makes light of very slow-moving traffic. [Page XX](#).

Keyless Open and Start. The ideal feature when you're in a hurry. User Identification Interface technology recognizes when your key is very near the car and automatically opens the door when you work the handle. Push-button ignition is also easy and key-free.

¹All four control options are available with the Navi 900 IntelliLink system. Voice recognition for destination input, phone calls and music selection only. ²Electronic Limited Slip Differential and FlexRide come standard with AWD. ³Optional SuperSport chassis available with 2.0 AWD Bi-Turbo CDTI ECOTEC[®] with 143 kW (195 hp) and 2.0 AWD SIDI Turbo ECOTEC[®] petrol engine with 184 kW (250 hp). ⁴The Insignia Hatchback ecoFLEX with 0,25 c_o, as of July 2013. ⁵99 g for Notchback and Hatchback only. 104 g for Sports Tourer. ⁶As of June 2013.

To be integrated before page 08/09.

EVERY MOVEMENT HAS ITS ICONS.

Every new Insignia is a classic of its kind. The new design makes a bold first impression, starting with the beautifully balanced silhouette. Sitting low, broad and strong on the road, the Insignia blends refinement with solidity and a sure-footed ride. Rear LED lamps enhance the sharp, clean aesthetic.

Alternative page version B (ST)

ENGINEERED TO MOVE MILES.

The new Insignia engines excel and excite in equal measure. Thanks to Opel ecoFLEX technology, the new range boasts excellent fuel efficiency figures. The Hatchback ecoFLEX¹ has the world's lowest drag coefficient for a 5-door hatchback² and the range can also claim the best-in-class mark³ for CO₂ emissions – a mere 99 g³ for the 2.0 litre units with 88 kW (120 hp) and 103 kW (140 hp). Of course, there's no shortage of horsepower either. The most powerful engine puts 184 kW (250 hp) and 400 Nm of torque at your disposal, while optional FlexRide lets you recalibrate the car for a more dynamic driving style. However you drive, the miles just fly by.

Delete if the Hatchback is not available in your country.

Please change if Notchback is not available in your country.

¹As of July 2013. ²As of June 2013. ³99 g for Notchback and Hatchback only. 104 g for Sports Tourer.

The calculation of fuel consumption as specified by directive 2007/715/EC, incl. of implementing regulation 2008/692/EC and/or ECE R83 series 05 takes account of the vehicles curb mass, ascertained in accordance with the said regulation. Optional extras may result in slightly higher fuel consumption and CO₂ emission levels than those quoted.

OPEL FOR LIFE.

Every Opel is designed and built to perform day in and day out. But like any piece of precision engineering, it performs best when it's cared for by people who really know what they're doing.

Throughout Europe, more than 6.000 Opel repair shops are ready to deliver professional and punctual service. As you'd expect, they'll repair your vehicle to the highest standards. As you might not expect, they'll tell you exactly what's been done and why, and they'll give you a clear and concise overview of any costs. OPEL FOR LIFE.

Every Opel is designed and built to perform day in and day out. But like any piece of precision engineering, it performs best when it's cared for by people who really know what they're doing.

Europe-wide Customer Service. Throughout Europe, more than 6.000 Opel repair workshops are ready to provide professional and punctual service. As you'd expect, they'll repair your vehicle to the highest standards. More unusually, perhaps, they'll tell you exactly what's been done and why, and they will show any costs involved clearly and concisely.

Opel Roadside Assistance. This mobility service is valid and free of charge for all new Opel vehicles during the first year after the date on which they were first registered or delivered to the customer by the distributor, depending on which date comes first. No matter where you are, the Opel Roadside Assistance is there to help. In more than 40 European countries – round the clock. Offering services such as breakdown assistance, towing services, rental car, hotel accommodation or the organization of onward transportation, e.g. via rail or air (please see programme conditions). Your distributor or authorized repairer will be happy to offer an extension at your annual service.

Financing Offers. The GMAC Bank offers you interesting tailor-made financing models. You alone decide how you would like to pay for your vehicle, in accordance with your particular needs.

Leasing Offers. You can also lease your Opel, for example through GMAC Leasing. Leasing terms can be adapted to fit your business requirements and capabilities. Also, Master Lease offers you a complete fleet management service from one source.

Insurance Service. Our GMAC insurance service rounds off the Opel Service Package. We offer Opel customers all types of automotive insurance.

Opel Rent Service. Opel Rent will keep you on the road if your vehicle is out of service.

New Vehicle Warranty. 2-year new vehicle warranty. This warranty applies to any new Opel car for a period of 24 months without any mileage restrictions, as from the day on which it was either registered for the first time or delivered to the customer by the dealer, depending on which date comes first.

Extended Vehicle Warranty. This repair cost insurance enables you to extend the warranty on your new vehicle to a maximum of 10 years.

12-year Anti-Perforation Warranty. Opel provides you with a reliable long-term warranty against perforation, provided you have your vehicle serviced and all necessary inspections performed according to the service booklet.

3-year Warranty for Opel Batteries. With a 3-year warranty for service-installed Opel original batteries your starting problems are over – even in the coldest winter.

Parts and Accessories Service. Opel parts and accessories are available at your local Opel Shop, where you'll find everything to make your vehicle more comfortable or to meet your individual needs, as well as expert advice.

Opel on the Internet. Need instant information? At www.opel.com you can access a wealth of information on all Opel cars, services and accessories. Get online for Opel news and product updates.

Recycling. Information about Design for Recycling, Take-Back points for End of Life Vehicles (ELVs) and the recycling of ELVs can be found on the Internet page www.opel.com

In case of any questions, please ask your Opel partner. More information can be found under www.opel.com
