

OPEL MOVANO

People carriers

Wir leben Autos.

Opel Movano Combi & Bus. For your most precious cargoes.

People. Big and small, young and old, sports teams, hotel guests, students, project teams – whoever they are, the Opel Movano people carriers provide comfortable and practical transport for everyone on board.

A delight to drive.

How you sit is just as important as where you sit. Whether you drive yourself, or others drive for you, it's vital that a day at the steering wheel does not result in a week of back problems. The cabin of Opel Movano, from the choice of seats to the ergonomically located gear shifter and tiltable steering wheel, has been designed to keep the driver, as well as the vehicle, on the road day after day.

Instrument panel. Clear, easy-to-read instruments, ideally and ergonomically placed, reduce driver fatigue and increase operating safety.

Dash-top compartment. Just one of the many convenient storage solutions located within easy reach of the driver (optional).

Safety assured.

When carrying people, their safety is always a priority. That's why, besides the standard ESP[®], ABS, driver's airbag and standard three-point seat belts for all occupants, a front passenger airbag is also available. Additional safety and protection is also available through the option of automatic headlight and windshield wiper systems, which react instantly to changing light and weather conditions. And every Opel Movano offers excellent crosswind stability and a vision-optimized view of the road.

Static Cornering Light. Simply activated by the indicator switch at low speeds, throws light exactly where it's needed. (Optional.)

Electronic Stability Program (ESP[®]). ESP[®] massively increases stability and safety. It is standard on every Movano and includes Hill Start Assist, Trailer Stability Program and Enhanced Traction Mode.

An all-round performer. The Combi.

Sometimes your priority is carrying passengers, sometimes it's load space. But most of the time you need both. With its easily variable passenger/load capacity the Opel Movano Combi is the ideal solution. Available as 6- or 9-seater, in either L1H1 or L2H2 body styles, it provides comfortable transport for passengers and all they want to take with them.

All aboard! The Bus.

The Opel Movano Bus provides generous accommodation for 16 or 17 people. The purpose-built passenger saloon has offset double seats on one side of the aisle and single seats on the other, for optimal access and comfort. The fully trimmed interior, with high-mounted luggage racks, saloon lighting, and optional adjustable air vents, has been designed to make even long journeys a pleasure, whilst the wide-opening side door with standard electrically operated step makes for easy passenger access. Power operation is standard for the retractable access step, optional for the large sliding door.

Combi: versions and dimensions

Key	Combi

Equipment & options.

Infotainment. Staying in touch, knowing exactly where to go, how to get there, and how the traffic is moving gives you a real advantage in business. Also, people work best in relaxed conditions. For these reasons the infotainment packages in the Opel Movano are tailor-made for outstanding performance. There are three packages available, all have been exactly developed especially for the Opel Movano.

High-mounted colour display screen. As part of the optional navigation system, the screen is centrally positioned, immediately above the rear-view mirror, to ensure maximum visibility with minimum distraction from the road. In addition to all the route guidance information, the screen also displays infotainment status, external temperature, and Bluetooth® mobile phone signal strength.

Satellite navigation with colour display and European coverage. Clear, attractive graphics show the full range of routing information in either day or night modes, including distance, current speed limit, RDS-EON route delay information, and estimated arrival time. There is also a choice between bird's eye view and direct overhead view (shown here). Maps cover 26 European countries. The system is easy to operate and can be updated over the Internet. The navigation system also features TomTom's LIVE service package, with support for HD traffic, Google Local Search, and weather forecasts. A 3-month trial subscription is included (features vary by market).

High-mounted radio display (not shown). The high-definition monochrome display screen for the CD 35 BT USB audio system is located above the rear-view mirror position.

Bird's eye view graphics. As an alternative to the direct overhead 2-D map portrayal, selecting “bird's eye view” adds useful 3-D perspective to the route display.

Bluetooth® connectivity. Easy to operate and virtually universal, Bluetooth® makes mobile phone communication hands-free and safe.

Steering column radio controls. All major radio functions such as volume, input selection, and radio station changes can be made without the driver needing to move hands from the steering wheel.

R 15 BT USB. Tuner with integrated display, which also displays the time. With RDS EON, Bluetooth®, USB and aux-in. 2 x 15 W (Bus) or 4 x 15 W (Combi).

CD 16 BT USB. CD/MP3 player, tuner with RDS EON, Bluetooth®, USB, aux-in and integrated display, steering column controls. 2 x 15 W (Bus) or 4 x 15 W (Combi).

CD 35 BT USB. CD/MP3 player, tuner, Bluetooth®, USB, aux-in, high-mounted monochrome display, steering column controls. 4 x 20 W. The CD 35 BT USB is also available with satellite navigation and high-mounted colour display screen.

Auxiliary input (aux-in) and USB connection. All Opel Movano infotainment systems feature auxiliary input jacks and USB connection.

Digital radio. All European digital radio formats can be received with DAB/DAB+/DMB audio. Available as option in combination with CD 16 BT USB.

Cockpit

Board computer. This provides information including fuel consumption, range, driving time, and distance covered.

Digital tachograph. Easily operated by the driver. Reliably records driving and rest time for assembling and analysing fleet management data. (Standard on Bus, optional on Combi.)

Fixed speed limiter. The Bus comes fitted with a speed limiter as standard, fixed at 100 km/h as mandated by law and cannot be deactivated. The optional speed limiter on the Combi is available with a choice of four predetermined speeds.

Start/Stop System. The Start/Stop System provides considerable fuel savings, especially in city operation. It automatically stops the engine when the car comes to a standstill. The engine promptly restarts as soon as the clutch is engaged. (Optional on Combi.)

Please fill in your local specifications.

Comfort

Comfort driver's seat. Optionally available deep contoured seat, adjustable lumbar support and armrest, height-adjustable. Also available for co-driver.

Comfort seats. A seat angle of 19.5 degrees, hip-to-knee room of 660 mm, and offset double seats for improved shoulderroom all go together to deliver passenger comfort. Every seat has 3-point safety belt and head restraint. (Standard on Bus.)

Saloon lighting. Individual lighting for each seat improves travel comfort and convenience for passengers, whilst footwell lighting allows passengers to easily find their seats in the dark. (Standard on Bus.)

Air conditioning. Staying cool is part of travelling well. Available as part of the Climate Pack, it features also a pollen filter.

Rear step. An optional rear step, incorporated within the rear bumper, aids access into the cargo area of the Combi.

Rear air conditioning on Combi. The separate rear air conditioning with overhead outlets ensures climate comfort for the passengers in the second and third row. (Optional.)

Retracting side step. The electrically retractable side step, together with a handrail inside, allows easy access and exit for passengers. When the side door is opened the step deploys automatically and retracts when the door is closed. (Standard on Bus.)

Rear air conditioning on Bus. As in air travel, rear passengers have their own ventilation nozzles in the overhead luggage shelf to adjust the air direction and quantity to their preferences. (Optional.)

Opening side windows. Optional sliding panels in the side windows provide extra fresh air ventilation.

Rear heating. The rear heating system has two powerful 4-kW heaters operating through the underseat ventilation system. It can be programmed to pre-heat the interior. (Optional on Bus.)

Tinted glass. Standard tinted rear glass increases passenger comfort and privacy while protecting against strong sunlight.

Versatility

Coat racks. The overhead-mounted coat racks allow for storage of jackets and smaller items. (Standard on Bus.)

Electric sliding door. Remote-controlled by the driver, with emergency opening from outside the electric sliding door is perfect for easy loading and passenger access. (Optional on Bus.)

Removable rear seats. To provide extra space for luggage etc., the two rear benches can be removed from the Combi without using tools. For the Bus the two rear rows of seats can be removed. (Option.)

Full-size spare wheel. The Combi and the 16-seater Bus are equipped with a full-size spare wheel, located under the vehicle floor. The 17-seater Bus comes with a space-saving tyre repair kit.

Load restraint eyes (Combi). Convenient and practical lashing eyes in the luggage area keep loads firmly in place.

Safety and security

Park Pilot. This gives an audible warning to avoid accidental damage when reversing. (Optional.)

Vehicle security system. Remote-controlled anti-theft alarm that uses volumetric movement sensors to protect the whole vehicle (engine compartment, cabin, and passenger compartment) against intrusion. (Optional.)

Lighting Pack.

All important light features for improved view and safer ride are combined in the Lighting Pack: automatic wipers and lights, front foglights, and the Static Cornering Light.

Blind angle mirrors. Dual lens exterior rear-view mirrors minimize blind spot dangers while driving. A large convex mirror mounted on the front passenger sunblind offers extra blind spot coverage while reversing in tight spaces.

Exterior

Front foglights. These are recessed against accidental damage and optimally positioned.

Splash guards. Tough thermoplastic, specifically designed to protect the bodywork from damage resulting from stone chips, splashes, grit, etc.

Performance, service & warranties.

All engines have been engineered for maximum efficiency and high torque, delivering all the power you need. And to keep you ecologically and economically ahead, the standard Start/Stop System of the Movano ecoFLEX versions cuts emissions and fuel consumption to zero whenever you have to stop at a red light or in a jam – resulting in considerable savings in towns and heavy traffic conditions.

All Opel Movano variants are built on the premise that your commercial vehicles should be out there working for your business and clients, not standing around in workshops. To this end, they have been engineered to provide years of reliable service, with the minimum of necessary servicing, and are covered by a 6-year anti-perforation warranty.

Service intervals are scheduled every 40,000 km¹ for the Combi and 30,000 km¹ for the Bus. Should unscheduled maintenance be required, a Europe-wide network of 3,200 specialist service points is there to get your Opel Movano back on the road with minimum downtime, or provide a temporary replacement vehicle.

For full details of leasing, maintenance, or fleet customer services, please contact your specialist Opel commercial vehicle dealer.

All information was accurate and up to date at the time of going to press. The company reserves the right to alter engine specifications at any time, which may influence the content of the shown data. Please consult your Opel dealer for the latest information. Fuel consumption data and CO₂ emission data are determined according to regulation R (EC) No. 715/2007 (in the version respectively applicable). The figures for fuel consumption and CO₂ emissions do not relate to a specific vehicle and are not part of an offer. They are provided only for the purpose of comparison between different vehicle variants. Additional equipment may increase the kerb weight of the vehicle and impact the payload. This may lead to a reduction in top speed and increased acceleration time. Driving performance figures assume a 75 kg driver plus a 125 kg load.

Opel Service.

Europe-wide Customer Service.

More than 3,200 Opel repair workshops including over 2,000 commercial vehicle specialized service centres throughout Europe are prepared to provide individual, professional, and punctual service. Good service also includes explaining to you in detail what has been repaired and why, and where this is shown on the invoice.

OPEL RoadPlus.

Maximum uptime.

Your vehicle will be immediately diagnosed without appointment should you need to visit one of our Opel commercial vehicle repair workshops. Smaller repairs are done while you wait and standard wear-and-tear parts will be replaced within a day. Should the repair take more than 3 hours, an alternative transport solution shall be made available to you free of charge within the first 3 years of ownership of your new vehicle.

Customer Information Centre.

Your Opel partner is at your service for all questions and special requests. For any additional information on your van, you may also contact our Opel Customer Information Centre, tel. (add: local number).

Opel Roadside Assistance.

This mobility service is valid and free of charge for all new Opel vehicles during the first year after the date on which they were first registered or delivered to the customer by the distributor, depending on which date comes first. No matter where you are, the Opel Roadside Assistance is there to help. In more than 40 European countries – round the clock. Offering services such as breakdown assistance, towing services, rental car, hotel accommodation, or the organization of onward transportation, e.g. via rail or air (please see programme conditions). Your distributor or authorized repairer will be happy to offer an extension at your annual service.

Financing Offers.

Opel Finance offers you interesting tailor-made financing models. You alone decide how you would like to pay for your vehicle, in accordance with your particular needs.

Leasing Offers.

You can also lease your Opel, e.g. through Opel Leasing. Leasing terms can be adapted to fit your business requirements and capabilities.

Insurance Service.

Our Opel Insurance Services round off the Opel Service Package. We offer Opel customers all types of automotive insurance.

Opel Rent Service.

Opel Rent will keep you on the road if your vehicle is out of service.

New Vehicle Warranty.

This warranty applies to all new Opel commercial vehicles for a period of 24 months without any mileage restrictions, as from the day on which it was either registered for the first time or delivered to the customer by the Opel partner, depending on which date comes first.

Extended Vehicle Warranty.

This repair cost insurance enables you to extend the warranty on your new vehicle to a maximum of xx years.

Up to 6 year Anti-Perforation Warranty.

Opel provides you with a reliable long-term warranty against perforation according to the warranty conditions as described in the service booklet.

Parts and Accessories.

All items necessary to maintain your vehicle in perfect condition and to individualize it for your private and business needs are available at your Opel partner.

Recycling.

Information about Design for Recycling, Take-Back points for End of Life Vehicles (ELVs), and the recycling of ELVs can be found on the Internet at www.opel.com

In case of any questions, please ask your Opel partner. More information can be found under www.opel.com

Implementation of Opel Financial Services i/o GMAC does not yet apply to all EU markets —> local adaption to be re-checked with local clients!
