

CITIGO

GENUINE ACCESSORIES

ŠKODA

SUPERSIZING SMALL

For a car renowned for its compactness, the Citigo is undeniably big on agility, practicality and functionality. These key qualities are further increased with the addition of ŠKODA Genuine Accessories, which also enable you to express your personal tastes to the highest standards.

More than that however, they transform the car from an inner city marvel to one perfectly equipped for taking away on a fun-filled family adventure or adrenalin-fuelled sporting trip.

From enhancements that improve child safety and make transporting your luggage easier, to those that add greater design flair and versatility, it goes without saying every accessory has been rigorously tested and is fully compatible with the Citigo.

Although the ŠKODA Citigo is at home on city streets, its capacity is far greater than that. Moreover, with ŠKODA Genuine Accessories, you can impress an individual character on your car and highlight those qualities that matter in your lifestyle. We bring you attractive design features, alloy wheels, items to increase the car's level of convenience and comfort, modern automotive equipment for quality listening and navigation, and safety-related accessories, including child seats.

All the products we offer have been approved by ŠKODA AUTO and their primary characteristics include reliability and long service life.

When it comes to checking the quality of our alloy wheels, we're unapologetically testing. First they have to prove their resistance to corrosion, climatic influences and driving strain. Then the layer of heat-resistant paint is tested over and over for strength and durability.

**CITY CRASH
TESTED
TECHNOLOGY**

The City Crash is a method of testing genuine accessories products that can be fitted to the vehicle's body.

Any Genuine Accessories that can be fitted to the outside of the Citigo must undergo the City Crash test. This includes subjecting the car to simulated crash conditions at 30km/h, where a rack loaded with transportable items must remain on the car body under a force of approximately 9-12G. After all, the last thing we'd ever want are your bikes or skis hitting anything other than the slopes.

City Crash test by ŠKODA was verified for lockable ski and snowboard box, and for basic roof rack.
