

This is the part where you design your new Micra. With five different grades, three or five doors, four different engines, manual or automatic transmissions, ten different exterior colours and three different trim patterns, you'll create a Micra that's utterly **enticible** : (enticing and irresistible!)

NISSAN COMMITMENT

Ownership

The Nissan philosophy of continuous improvement means we have a different approach to building cars. To make sure that every Nissan meets the real-life needs of its owner, we ask current Nissan drivers what they think of their cars before we start designing. Then there's our tough testing programme. To maintain our excellent reputation for reliability, dependability and safety, we test every single component to destruction. Finally, as the car is assembled, every worker checks his own job as well as that of the person before, ensuring our renowned standards of build quality and attention to detail.

KEEPING THINGS LOCAL

Nissan is committed to keeping its European operations on a local basis. There are design centres in Germany and the UK. Technology Centres in the UK, Spain and Belgium. Manufacturing plants in the UK and Spain. Parts and vehicle distribution in the Netherlands. And our European headquarters in France. Because only through this structure can we continue to produce vehicles to suit the requirements of the people who'll actually drive them. And guarantee that somewhere, within our wide range of models available in Europe, there is one perfect for you.

AFTER-SALES SUPPORT

Our rigorous testing programme gives us the confidence to offer a comprehensive range of after-sales guarantees. All Nissan cars are covered by a 3-year or 60,000 miles warranty (whichever comes first), 3-year paint warranty and 12-year anti-corrosion warranty. For extra peace of mind, we also offer a 12-month RAC roadside assistance package.
