

## The New Honda FR-V

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from him on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised.

?Have you got life's balance right

You probably have, so isn't it time to have a car that approaches life like you do? The new Honda FR-V delivers advanced versatility with quality and style. It can carry up to six people and everything they need. It has performance, but matches it with economy and safety. A car that not only brings people to places, but also because of its unique layout and flexibility brings them together.

**?Are big ideas better than  
small ones**

The new FR-V is full of big ideas.  
But we believe that it's the smaller  
details that can make life so  
much easier.

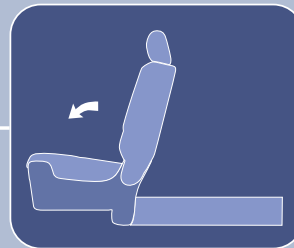

Not only does the front centre  
seat slide back and forth to create  
more shoulder space and legroom, but  
with a simple flip of an easy to reach  
handle it folds down to create a table  
and armrests. The front half of the seat  
also lifts open to create extra storage.

There's even a handy tray that  
slides out from within the base,  
for all those little details you  
need to carry with you.

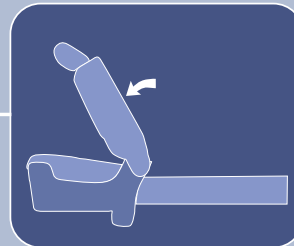

**?Why can't folding a seat be as easy as turning a page**

With the new FR-V it can.

The back centre seat effortlessly slides back and forth to allow more leg and shoulder room. And with a simple flip, any combination of the rear seats collapse flat to the floor. So, it doesn't matter if you're heading to the beach for the last bit of sun, or to the DIY store for the all essential garden furniture. With the new FR-V it's always easy.

?People act on impulse, so why shouldn't your car

At Honda we don't like the word 'compromise'. That's why the new FR-V is designed to be as spontaneous as you are.

Whether it's carrying anywhere between one to six people the FR-V can take you, your passengers and the luggage comfortably. For once you won't have to argue about what to leave behind.

And if you do spy that chest of drawers that's just right for the house, the rear seats disappear flat into the floor. So you can carry whatever you want, whenever you want, easily.

### ?How can we make driving easier

By designing the dashboard around you, our designers have ensured that everything falls easily to hand. We've located the gear stick in the dashboard, so it's easier to reach when you want it and by creating a flat floor, gives you more space for those times when you don't. The tilt and telescopic steering wheel and fully adjustable driver's seat make driving more comfortable, for everybody.

Whilst the steering wheel mounted radio and cruise controls and illuminated dials make journeys safer. Even the controls for the all-round electric windows have been re-located to the right of the steering wheel so they're just that bit easier to use. The CD player and climate-controlled air conditioning are both integrated into the dashboard. Very cool.

### ?What if your engine adapted to meet your driving requirements

The FR-V is designed to give you options. With i-VTEC technology, your engine becomes just as versatile. You'd think even we'd be happy with a VTEC system that has a 100% reliability record after 13 million units. But then we asked, 'what if we made it more intelligent?' And so we created i-VTEC. It's an improved system that adapts instantly to minute changes in speed and load to give you better handling and more responsive acceleration. We also made it smoother, quieter, more economical and cut the emissions too. Choose either 1.7 litre fuel injected VTEC, 2.0 litre fuel injected i-VTEC or the soon to be released 2.2 i-CTDi Honda diesel engine and you'll be enjoying running around town as much as you will getting away from it.

### ?Does anyone care as much about safety as you do

We'd like to think we do. Inside you'll find dual front airbags, side airbags for the front seats and full-length curtain airbags. With three point seatbelts on all six seats everyone travels in safety.

There are big features to protect the smallest people. ISOFix mounting points for child seats are integrated into the FR-V, one each on the front centre seat and on both rear outer seats.

But even before you get inside the FR-V you'll discover that it's not just the occupants we care about, it's pedestrians as well. So the FR-V is designed to reduce the risk of head, leg and knee injuries to those outside the car.

In fact we care so much about safety we've build the largest crash test centre in the world to evaluate the car from all angles, because anything can happen in real life.

There are cup holders for all three front passengers that simply fold away into the dashboard.

Safety is always a priority. Two front and two side airbags for driver and passengers and two side curtain airbags all protect your precious cargo.

The dash-mounted gearshift gives you a flat floor for easy cabin access and even greater control for the driver.

At Honda we do everything for a good reason. Incorporating the indicators into the power folding door mirrors may look good, but they also make you easier to see.

With three ISOFix child seat mounting points, one each on the front centre seat and rear outer seats, even the smallest passengers can ride in comfort and safety.

These stylish accessory roof rails open up numerous extra loading possibilities.

The words, "Are we there yet?" need never be heard again with this accessory roof mounted DVD entertainment system.

No passenger in the front centre seat? Use it as an arm rest and extra storage.

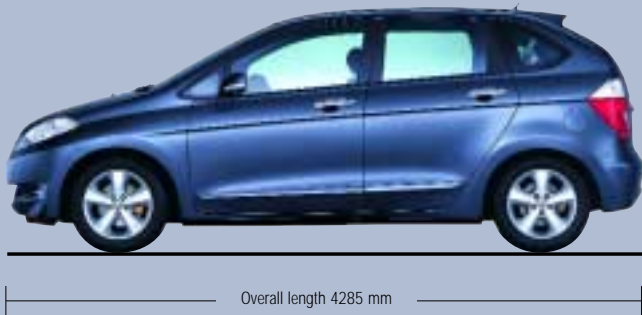

Remote radio controls make life easier and safer.

And, just when you thought you'd used up every bit of space, you'll find an easy access tray hiding under the centre seat.

Whether you're driving the new FR-V or just relaxing as a passenger, you'll soon discover a unique space that allows you to relax, socialise and be practical in equal measure.

Be the first to get to know the new Honda FR-V

Space, versatility, performance and safety all inside a compact exterior, with a turning circle that makes car parks nicer places to visit.
