NISSAN MURANO

# Exterior and Interior

Show the world who you are!

## INTERIOR

### Luxurious Leather Upholstery

With such an elegant exterior, you'd expect nothing less than supple leather seats and trim inside the Murano.

### 7 Speaker Bose Audio System

The Murano's Bose audio system will be music to your ears. It features an in-dash 6-CD auto-changer, seven speakers and 225 watts of precision sound. The system comes with six channels of customised equalisation and signal processing for an output to rival any home system.

### Climate control air conditioning

Whether it's summer in the city or cold in the countryside – the Murano's powerful climate control system automatically adjusts the cabin temperature to your required level. Handy rotary controls, a design already seen on the 350Z, not only keep you cool but look cool too.

### Quick-release fold-flat load area

Whatever you need to transport, the Murano makes it easy with a fold-flat floor. Simply activate one of the two levers just inside the tailgate and the back seats fold down in one swift motion.

## EXTERIOR

### Sculpture in Motion

The Murano's signature curves set it apart from the 4x4 crowd. Aerodynamically designed, its breathtaking exterior makes it a real head-turner. Get behind the wheel of a Murano, and prepare yourself for plenty of admiring glances!

### 18" Alloy Wheels

The Murano's 18" inch alloy wheels not only lend a touch of distinction and refinement, but they are practical too. Lighter than conventional wheels, the Murano's alloys are far better at dissipating heat generated from braking.

### Dual Exhaust Pipes

The Murano's dual exhaust pipes with sporty chrome tips protruding from either side of the rear leave admirers in no doubt of the vehicle's sporty performance. It's just one of the many design features which give the Murano looks to die for.

### Rear-side privacy glass

The Murano's standard rear-side privacy glass offers you several important benefits. As well as providing privacy, it also reduces harmful UV rays by up to 99%, cuts dangerous glare and lowers heat gain.

# Performance

The 4X4 with sports car spirit

## ENGINE

### 3.5 V6 Petrol Engine with 234hp

With a high-performance 3.5 V6 petrol engine delivering maximum torque of 318Nm at 3600 revs, the Murano is a wolf in sheep's clothing. The easy-breathing 24 valve double-overhead cam-design incorporates lightweight aluminium components and advanced variable valve and intake timing systems.

### Impressive Family Ties

The Murano is powered by a specially tuned version of the V6 engine that has made the 350Z an instant hit with sports car enthusiasts around the world. It provides the Murano with 234 hp for effortless performance and true driving pleasure.

## HANDLING

### Car-like Handling

Thanks to the Murano's agility and rapid reaction to steering input, you feel in total control. High torque combined with its Xtronic CVT ensures immediate responsiveness, and the Murano's ALL MODE 4x4 with ESP+ provides optimised traction control. With so many features working in perfect harmony, the Murano is a joy to drive.

### 4-Wheel Independent Suspension

When you require dexterity and manoeuvrability, the Murano's 4-wheel independent suspension provides it. Its sport-tuned front struts and rear multi-link suspension work together to ensure a consistently smooth and dynamic ride.

# Safety and Security

Safety always comes first

## PASSIVE SAFETY

### Airbags All Around

Every Murano comes equipped with a full set of airbags, including driver, passenger and curtain airbags, to ensure the highest level of protection.

### Zone Body Construction

The Murano's solid 'zone body' construction provides maximum strength in case of collision. High-strength steel and cross-members reinforce the cabin, and strategically placed front and rear crumple zones help absorb crash energy. The Murano's pipe-style steel side-door guard beams will also reduce injury in side impacts.

### Active Head Restraints

Active head restraints are an important safety feature on the Murano. They automatically slide forward to cushion your head in the event of a direct collision. This will reduce potential whiplash injuries for both front seat occupants.

## ACTIVE SAFETY

### ESP+ & Active Brake LSD

The Murano's Electronic Stability Program Plus (ESP+) is linked to an active brake Limited Slip Differential (LSD) to manage engine power and brake pressure. This will maximise traction and control at all times. Delivery of power to the wheels is also constantly monitored by a Traction Control System, which limits wheel spin during acceleration.

### Bi-Xenon Headlamps

Murano's Bi-Xenon headlamps use a single high-efficiency bulb for both high and low beams, and give a broader coverage of the road ahead as well as improved kerbside visibility. This technology also benefits the driver, as unlike traditional halogen lamps, the beam resembles daylight. Plus, to increase clarity, the Murano is fitted with flush-mounted headlamp washers.

### ABS with EBD and Brake Assist

The Murano has three braking systems to ensure you stop safely. ABS (Anti-lock Braking System) prevents the wheels from locking, making it easier to steer around obstacles. Electronic Brake Force Distribution (EBD) automatically regulates the pressure between the front and rear brakes, creating optimum braking even when carrying heavy loads and towing. And in emergency braking, Brake Assist increases the force applied to the brakes.
