BOSE 240W Audio

You won't find a sound system like this anywhere else. BOSE engineers have custom designed the 350Z's audio for the car's unique acoustics. Available on the 350Z with GT Pack, the BOSE audio features the Audiopilot system that monitors noise inside the cabin and adapts the bass and treble accordingly. Seven speakers are strategically placed, including the 10" subwoofer behind the driver's seat. Sounds good.

Navigation system and trip computer

Available as an option, the Navteq navigation system helps you get there faster with information like traffic jams and alternate routes. And the trip computer takes the guesswork out of travel, showing you drive hours, average speed and fuel consumption -- even what the temperature is outside.

Improved ergonomics

The new 350Z is more user friendly than ever. Its redesigned centre console is easier to use. And there is much more driver- and passenger-seat storage, better instrument illumination and newly improved meter display. Our goal? To make driving the 350Z, as pleasurable as it is exhilarating.

Seat heater

If you live in place with cold winters, the luxury of seat warmer is a technological blessing. Once you've experienced the 350Z's heated cushion and backrest on an icy December morn, you'll wonder how you ever lived without it.

Real boot space

A no compromise sports car with boot space? The 350Z offers the largest boot capacity of all its close 2 seater rivals - 235 litres. There is space for two 9-inch golf bags, a suitcase or two day bags. Forget the compromise between style and function - with the 350Z, form follows function.

EXTERIOR

Words fail

You can see the design thinking that went into every detail. From the shape of the headlamps to the door handles. The twin stainless steel exhaust pipes. The wing mirrors. With only high quality parts using the best materials, the 350Z has style written all over it.

Aluminium components

The lightweight components used in the 350Z enhance performance by increasing the power to weight ratio, contributing to nimble handling. The strong but light aluminium bonnet and suspension take kilos off the 350Z's weight.

Exterior and Interior

More style

18" RAYS Alloy wheels

Six-spoke 18" RAYS alloy wheels are standard. Each RAYS wheel is 4kg lighter than the standard wheels featured on 2005 models. The simple six-spoke styling adds more to the 350Z's promise of high performance.

Stainless steel twin exhaust pipes

The twin exhaust finishers signal the 350Z's genuine sports car credentials. The two stainless steel pipes are positioned on the back two corners of the car.

Race car pedigree

ENGINE

3.5-litre V6 engine

300PS of pure power. And this means pure; no turbos, no superchargers, no gimmicks. This award winning, normally aspirated, all-alloy double overhead cam, four valve per cylinder V6 engine provides powerful acceleration at any engine speed thanks to its flat torque characteristics. Factor in an intake system that improves volumetric efficiency, a state-of-the-art exhaust manifold and variable valve timing; and you've got an engine that delivers pure exhilaration.

0-62mph in 5.9 seconds

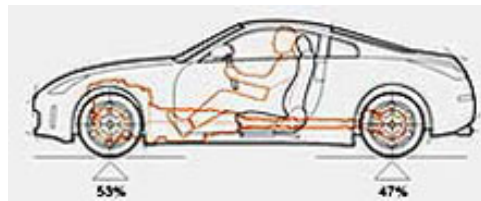

Acceleration begins with calculated gulps of air. The large displacement engine manages this tremendous air intake to provide a wide torque range. Maximum 353 Nm is reached at just 4,800rpm. This means you can accelerate smoothly in any gear, building up speed quickly from low revs. So powerful acceleration is available at any engine speed.

Euro IV compliant

The 350Z's motor isn't just powerful. It also meets Euro IV standards for petrol cars, which calls for extremely low emissions of carbon monoxide, hydrocarbons and other pollutants.

HANDLING & BRAKING

Perfect balance

The ideal 53/47 front to rear weight distribution gives you superb control through corners. As you approach the turn, breaking hard, weight shifts to the front of the car. This means improved traction on the front wheels for turning in. As you exit the turn, weight shifts toward the rear, achieving an almost 50/50 balance and maximising traction for all four wheels when needed most.

Long wheelbase

You can see the sports car pedigree in the design. Like a formula one car, the 350Z is built around the wheels placed at the far corners. The centre of gravity is midway between the axles, by way of the engine being pushed back, the fuel tank forward, and the driver's seat towards the middle. The result is a long wheelbase with weight centred for greater stability.

Brembo brakes

The Nissan 350Z stops as well as it goes, thanks to the brakes made by Brembo - world renowned in motorsport. Huge lightweight aluminium callipers use four pistons on the front wheels and two at the rear. High-friction brake pads and large diameter ventilated discs dissipate heat and resist fade - so you can always feel confident in the 350Z's stopping power.

Performance

Race car pedigree

Braking system

Three braking systems work together to help you stop quickly and safely. Electronic Brake force Distribution (EBD) distributes maximum braking effort onto the wheels with most grip available. Nissan Brake Assist (NBA) helps you apply additional braking pressure in an emergency braking situation. The Anti-lock Braking System (ABS) prevents the wheels from locking under braking, keeping you in control of steering.

Confidence inspiring safety

ACTIVE SAFETY

Braking systems

Three braking systems work together to help you stop quickly and safely. Electronic Brake force Distribution (EBD) distributes maximum braking effort onto the wheels with most grip available. Nissan Brake Assist (NBA) helps you apply additional braking pressure in an emergency braking situation. The Anti-lock Braking System (ABS) prevents the wheels from locking under braking, keeping you in control of steering.

Electronic Stability Program (ESP)

During high speed cornering, ESP helps the 350Z stay on track. A range of electronic sensors monitor wheel speed and steering angle. The ESP limits engine revs and applies braking to individual wheels to correct under and over-steer. The ESP includes a Traction Control System (TCS), which reduces wheelspin under acceleration.

Limited slip differential

When you take a corner at high speed, the limited slip differential keeps the 350Z stable by directing more power to the rear wheel with the most grip.

PASSIVE SAFETY

All round airbags

The 350Z has front, side and curtain airbags. That means the driver and passenger are well protected in any impact.

Load limiters and pre-tensioners

In the event of an accident, monitors measure the load on the seatbelt and stop it from over-tightening – this helps to prevent injuries caused by the seatbelt. Pre-tensioners in the seatbelts take up the slack at all times.
