

ESCALADE

Cadillac

THE SUV THAT DOMINATES.

ESCALADE CATCHES THE EYE, TURNS THE HEAD, AND COMPELS ATTENTION.

WHAT ONLOOKERS CAN ONLY GUESS AT IS THAT BEHIND EVERY MINUTE
DETAIL LIES A DEPTH OF FUNCTIONALITY, CULMINATING IN AN EXTRAORDINARY
DRIVING EXPERIENCE.

PRESENCE – IMPRESSIVE STYLING AND DETAIL

Adorned with chrome from top to bottom, Escalade has a commanding style all of its own. Its clear, distinct angular lines are inherently Cadillac. The heritage of outstanding design and quality construction shines from this car.

The new front is distinguished by the glistening chrome grille, jewel-like headlights, sculpted bumper and angled windshield. This gives Escalade a sharp, edgy, yet functional look that slices through the air with an exceptional 0.36 drag coefficient.

ESCALADE

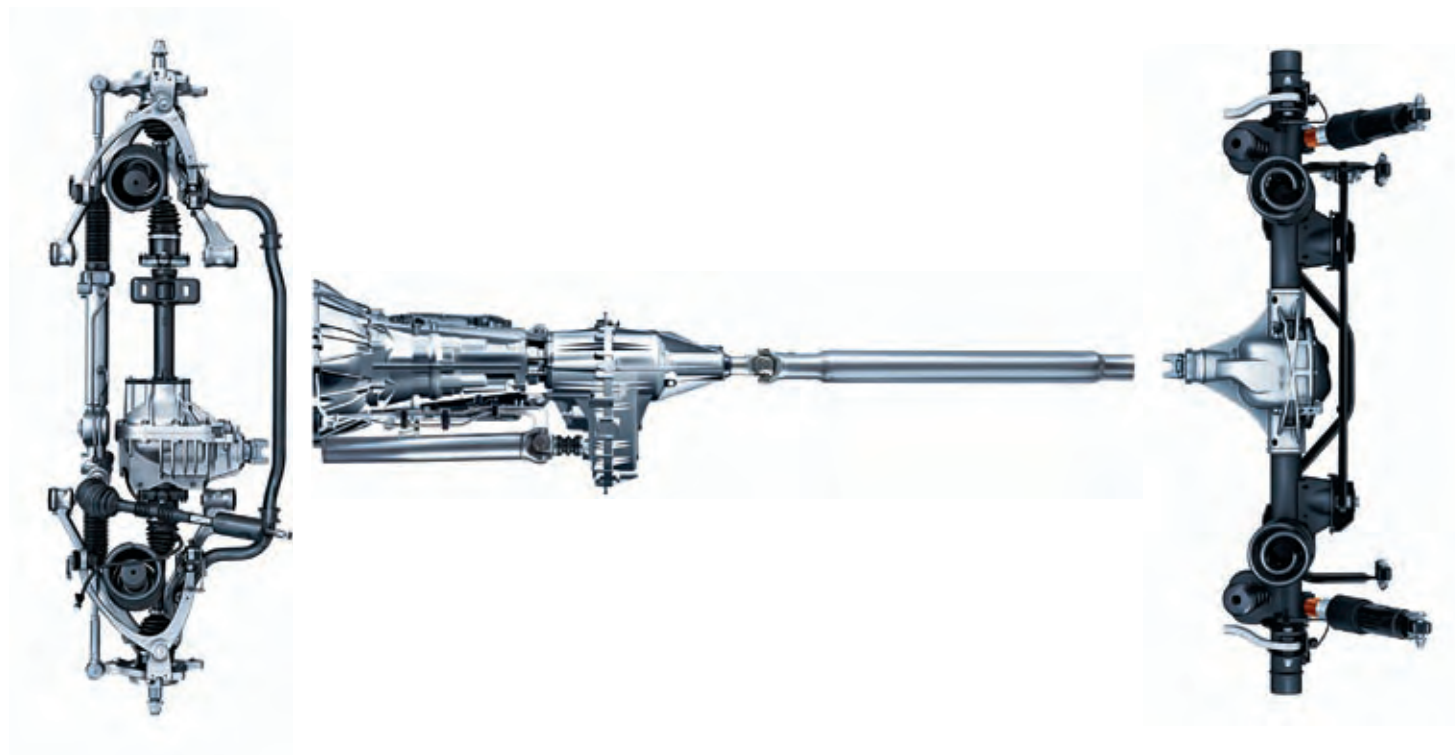

SPEAK WITH AUTHORITY – THE VORTEC 6.2 L V8

The Vortec V8 is packed with advanced features inherited from the Cadillac racing program. It generates 301 kW/409 hp (PS) at 5,700 min⁻¹ (rpm) and 565 Nm at 4,300 min⁻¹ (rpm). This next generation all-aluminum engine has high-flow cylinder heads plus VVT (Variable Valve Timing), all of which make better fuel efficiency and greater power. Put your foot down on the electronically controlled gas pedal and you instantly notice the difference. Maneuvers such as passing or changing lanes occur with gratifying immediacy; especially when Escalade goes from 0 to 100 km/h (62 mph) in 6.8 seconds and 90% of the torque is available from 2,400 to 5,600 min⁻¹ (rpm).

A SMOOTH TRANSFER OF POWER – A 6-SPEED AUTOMATIC ALL-WHEEL DRIVE (AWD)

The Vortec V8 is complemented with the Hydra-Matic 6-speed automatic transmission. The awesome 301 kW/409 hp (PS) of power is smoothly transmitted to all four wheels (AWD), effortlessly propelling this vehicle forward. Escalade delivers powerful extra low-end torque in all gears and has two overdrive gears and Driver Shift Control. So whether you have a car full of passengers and baggage or are towing a hefty trailer (up to 3,100 kg braked mass), you'll relish the abundance of available pulling power.

THE FOOTPRINT – GREAT CARS ARE BUILT FROM THE GROUND UPWARDS

The Escalade looks large and impressive, yet it handles with the dexterous agility of a much smaller car. This surprising ride quality is due to a fundamentally improved chassis.

Its footprint on the road gives it deft handling ability. The front track is a full 1,732 mm, while the rear is 1,702 mm.

Enhancements made to the full-boxed frame have greatly improved the car's stiffness. All manufactured using a sophisticated hydroforming process – which uses liquids under high pressure to shape the metal sections of the frame.

THE RIDE – REAL-TIME SUSPENSION

This SUV has one of the finest ride qualities in its class. A highly refined suspension system delivers a dampened, isolated road feel. The Road Sensing Suspension system of computer-controlled monotube shock absorbers offers instant and appropriate suspension response to just about any driving condition. The system provides specific damping to enhance control during higher speed turns and while driving over uneven surfaces. This gives the Escalade excellent roadholding characteristics and a smooth, comfortable ride.

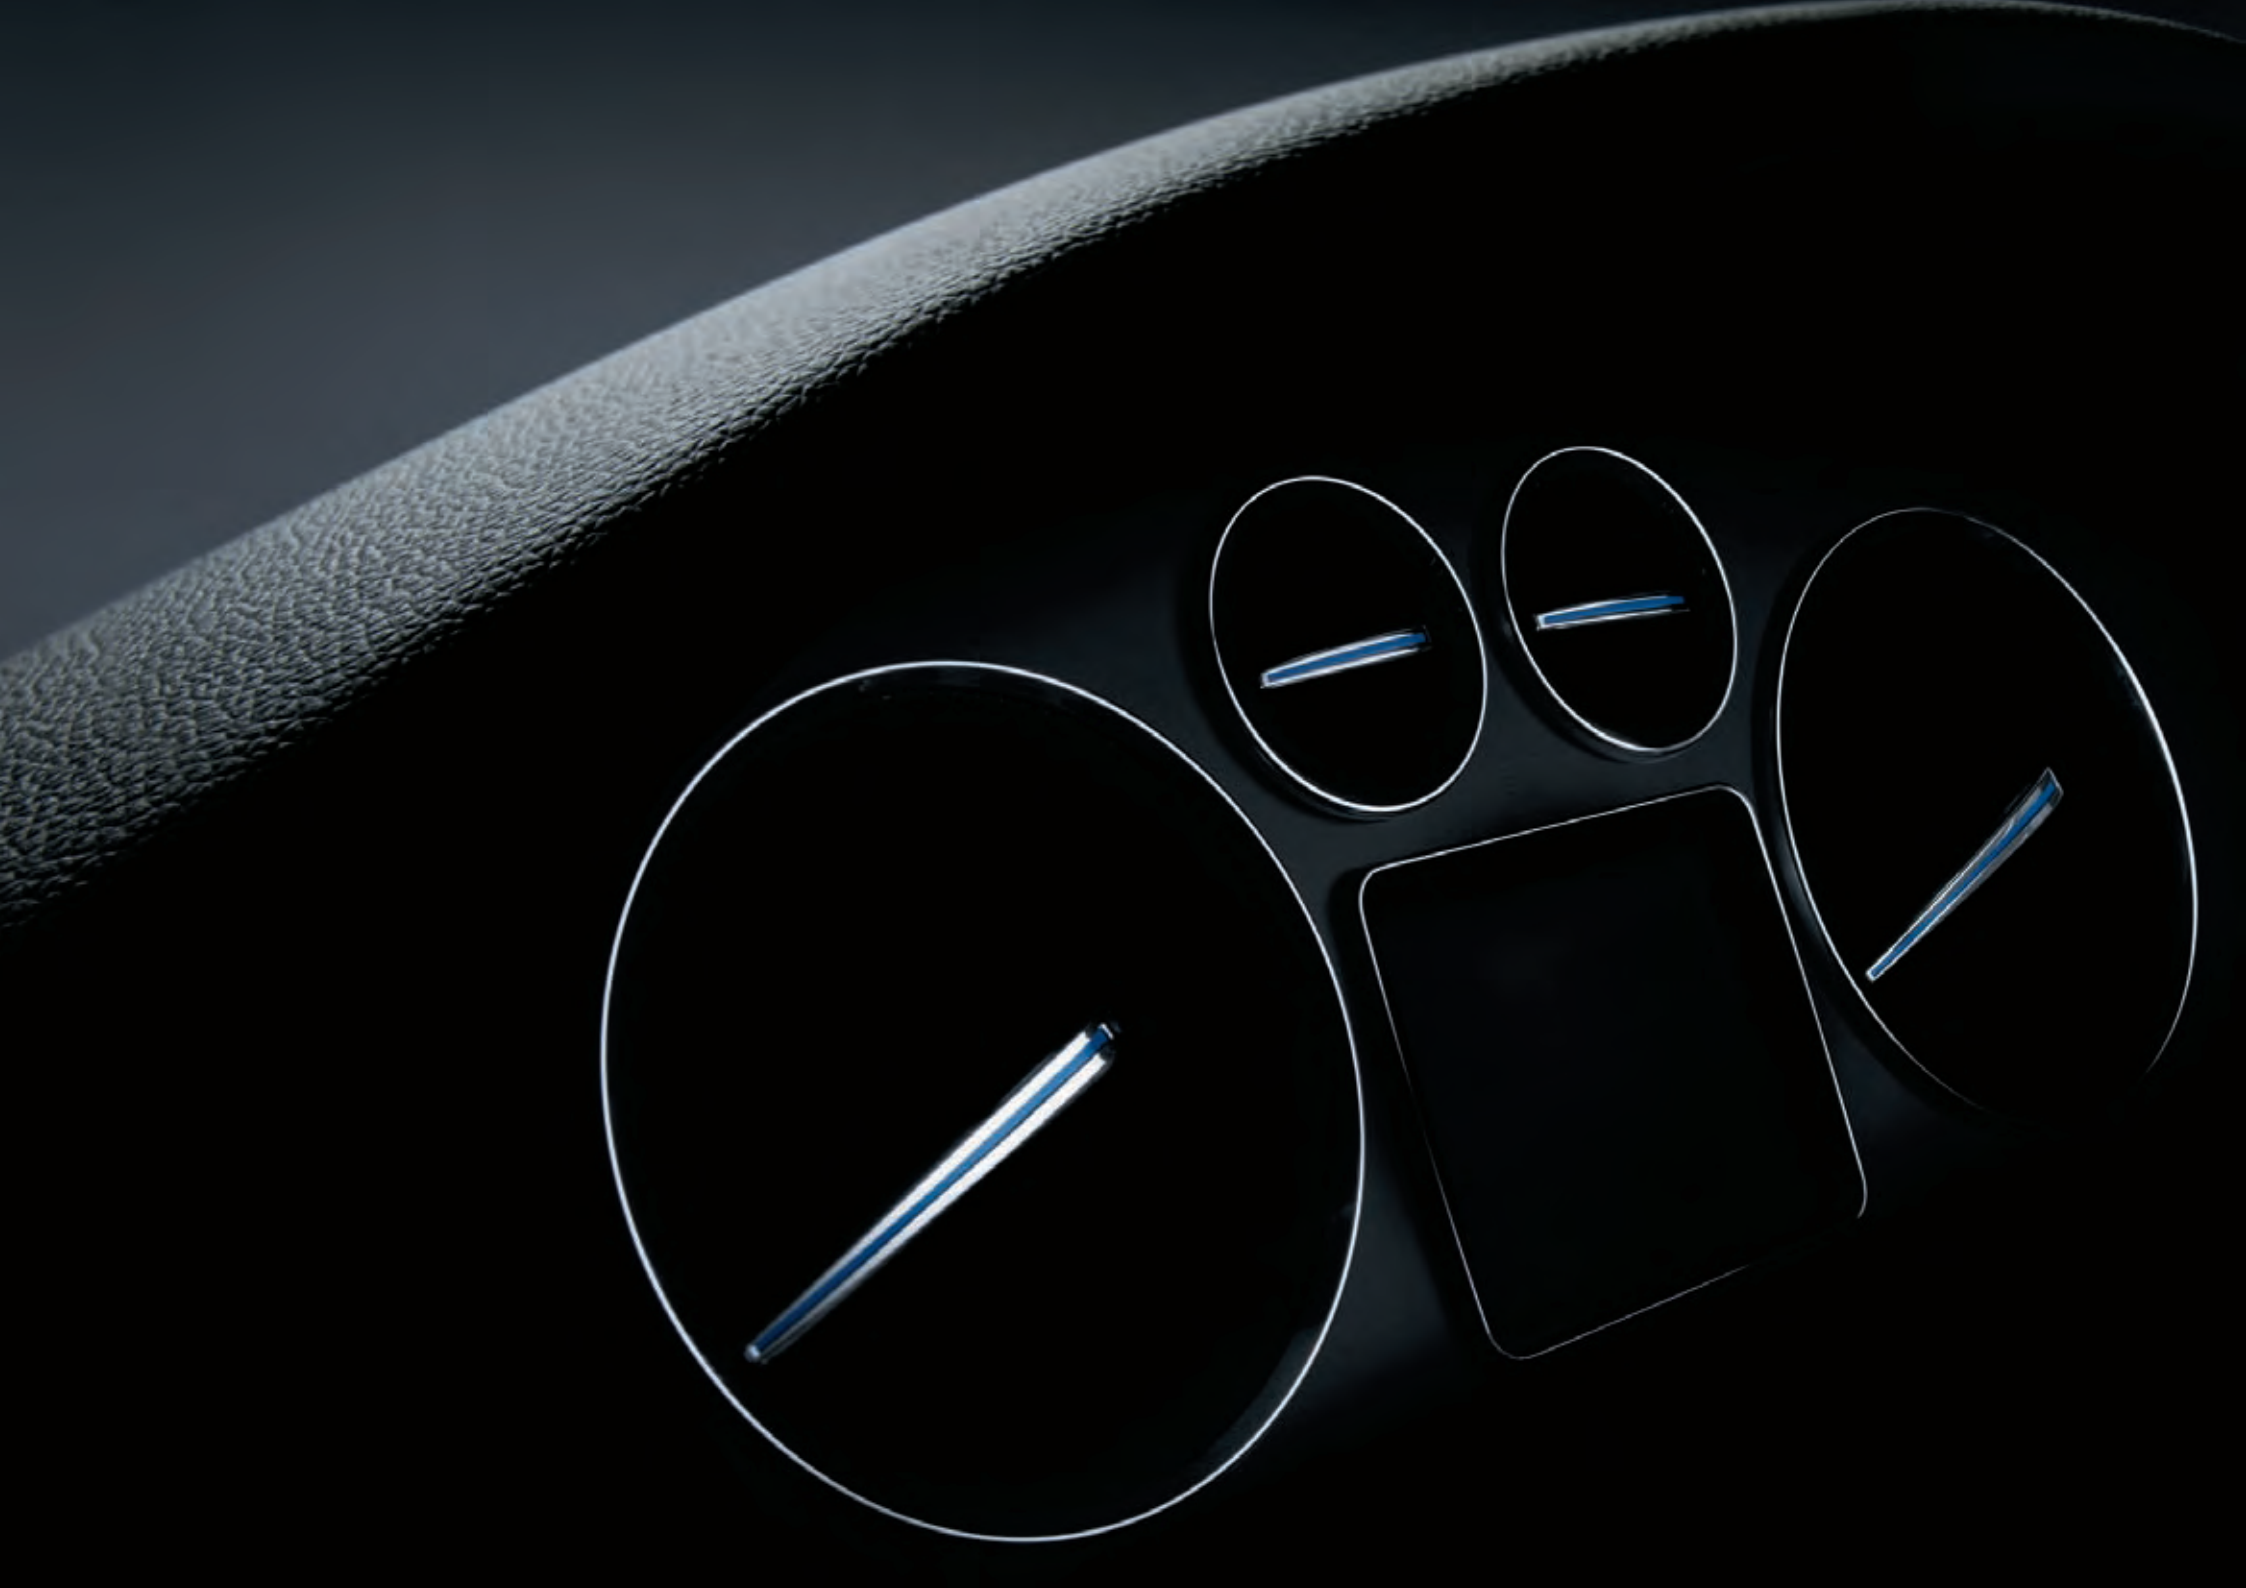

REDEFINING LUXURY – IMPRESSIVE CRAFTSMANSHIP

Step inside the Cadillac Escalade and you'll understand why it is the finest SUV around. It's a haven of refinement and luxury; three rows of tailored leather seats set in generous comfortable surroundings. Now add hints of brushed aluminum and burl wood, and you have an unparalleled atmosphere.

Beyond the multi-functional wood and leather steering wheel are an array of dials with a black background, brilliant white LED figures and chrome needles inset with a slash of luminous blue.

THE PERFECT ATMOSPHERE – MORE ROOM, MORE COMFORT

It's not just the room; it's what you do with it. The new Escalade has an awesome 3,084 liters of space with all the seats flat. With just the third row removed, an impressive 1,707.7 liters of space is available. Even with all of the seats up, you can still fit 478.6 liters of goods behind the third row seat. The power liftgate makes loading easy. It can be operated from the key fob, internal switch, or with one finger on the gate itself.

Inside are a host of ingenious storage spaces, like the front seat center console. Under its dual-opening lid are 14 liters of multilevel storage plus one of the vehicle's four 12-volt power sources. The expansive and flexible nature of the Escalade is enhanced by the available exclusive second row "power release fold-and-tumble seats". With the push of a single button, the second row automatically folds and rotates, providing added convenience when loading packages and making third-row access even easier. For individual comfort, the Escalade features a tri-zone climate control system, which allows the driver, front and rear passengers to set the heating or air conditioning as they wish to their specific comfort level.

THE LAP OF LUXURY IS ASSURED THANKS TO POWER-ADJUSTABLE PEDALS AND HEATED SEATS IN BOTH THE FIRST AND SECOND ROW. ALSO AVAILABLE ARE HEATED AND VENTILATED FRONT SEATS WITH PERFORATED LEATHER AND A HEATED STEERING WHEEL.

ENTERTAINING – THE 10 SPEAKER BOSE® 5.1 DISCRETE SURROUND™ SOUND SYSTEM

Play your favorite track in the Escalade and you'll hear a crispness and instrumental detail that is delightful; it can come from a CD (six in fact), DVD, MP3, or the radio. Music is perfectly reproduced thanks to a superlative Bose® system with 10 speakers strategically placed and tuned to optimize the interior soundscape and acoustics, resulting in a brilliant timbre. And it stays like that thanks to "AudioPilot®", which assesses ambient noise levels and adjusts the sound accordingly. With a large eight-inch widescreen display, the available Rear Seat Entertainment System offers state-of-the-art video and audio to both second and third-row passengers. An auxiliary input jack in the center console provides plug-and-play capability through the sound system for external devices. Dual channel wireless headphones and rear seat audio controls allow rear passengers to watch DVDs or listen to their own music.

INFORMATION AT YOUR FINGERTIPS

Part of the available Information Package, Escalade's DVD-based navigation radio adds a large eight-inch touch screen display to the standard dual play radio. It also adds a separate slot for the unit's map disc, so drivers can listen to their favorite music while using the navigation system's detailed route guidance. Using the vehicle's GPS unit to pinpoint your location, the navigation instantly maps your route on either a 2-D or 3-D full-color map view for effortless navigating on highways and streets. The system also supports a mode for driving on uncharted roads, handy for retracing your way if you go off the beaten path. In addition, the system's verbal commands give drivers turn-by-turn directions (limited detail routing). Supplementing the touch screen controls, the system's voice recognition capability allows the user to access voice-tagged destinations, change stations or bands on the radio, even move from track to track when listening to CDs. When you shift into reverse, the screen displays the image provided by the rear-view camera (included in the available Information Package).

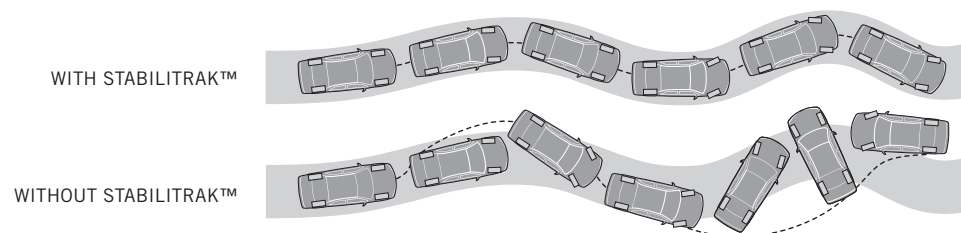

BEING IN CHARGE – ACTIVE SAFETY

The Escalade is equipped with the most advanced enhancements to make driving easier and safer. It's impeccable ride and handling behavior is assured due to the StabiliTrak™ stability system and the latest in Anti-lock Braking Systems.

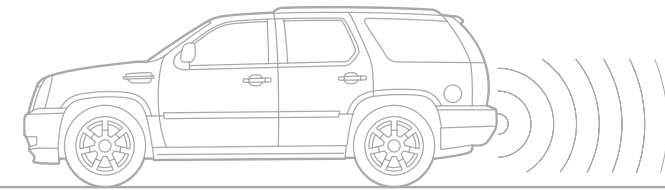

StabiliTrak™ is the ultimate in electronic vehicle stability, and now incorporates vehicle rollover mitigation. The system senses conditions that might result in loss of control and makes adjustments in braking and power delivery to keep you safely on the road.

The latest ABS works seamlessly with the other vehicle systems to give the Escalade unprecedented traction and stability during braking. The Escalade might look large, but when it comes to stopping it performs like a much smaller vehicle.

GENEROUSLY APPOINTED – TECHNOLOGY AND PROGRESS

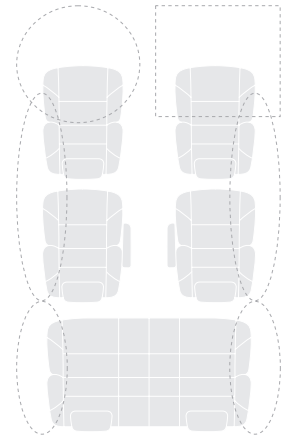

Rain sensing wipers automatically keep forward vision clear, adjusting the wiper speed to the amount of rainfall. Super heated washer fluid (60 °C) rapidly clears ice, frost, or other debris from the windshield. Ultrasonic rear parking assist detects objects up to 2.5 meters away and warns you visually and audibly as you reverse, making the Escalade easy to park. Plus, the Escalade features auto leveling, which keeps the car level no matter what it is carrying or towing. This maintains the car's precise handling and keeps the headlights focused on the road.

SECURE – 360 DEGREES OF SAFETY

Escalade's 360-degree perimeter safety system sensors are on the alert for front, side, and rear impacts, as well as for rollovers, sending the appropriate commands to the vehicle's airbags. There are dual-stage frontal airbags for driver and front passenger, and side curtain airbags for first, second, and third row occupants. In case of a rollover, the side airbags remain inflated for 6 seconds for added protection.

The system also has the ability to deploy front seat safety belt pretensioners during certain front, side, and rear collisions, enhancing the belt system's ability to hold the occupants firmly in place. All of this supplements a rigid high-strength steel safety cage with energy absorbing body panels.

PERSONAL EXPRESSION – ACCESSORIES FOR YOUR ESCALADE

With a range of accessories exclusively designed for the Cadillac Escalade, you can make your car as individual as you are.

If you are interested in accessories for your Escalade or have any queries, please contact your local distributor or visit our website at www.cadillac-accessories.eu

CELEBRITY STATUS

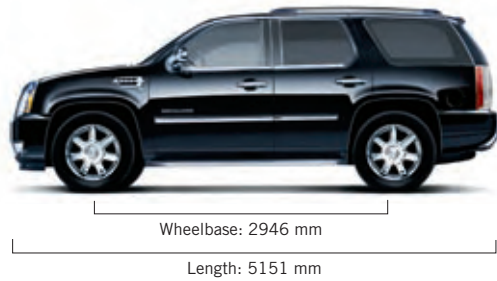

Cadillac has always been synonymous with the rich and famous. Presidents, kings, and movie stars have all appreciated the exceptional qualities of our cars. In this world of glamor and luxury, the current rising stars of music and film wanted a car that had all the qualities of a limousine, but with a style that reflects their own generation. This need was met by the Cadillac Escalade.

The reputation and desirability of the Escalade soon spread as the car began to feature in music videos, TV shows and feature films. Its attraction has now spread to sport stars in Europe and beyond.

Yet for all its fame, performance and style are qualities that everyone appreciates.

Height: 1927 mm

ENGINE AND TRANSMISSION
