5 DOOR

HOW DO YOU GET THE BEST OF BOTH WORLDS?

At Honda we understand the importance of combining clever engineering solutions with great looks. The result is a car offering style, power, space and flexibility. It's a car that's designed to look great and make you feel great driving it.

The Civic has been built around 5 door practicality but with dynamic 3 door looks. With its hidden rear door handles and intelligent use of space on the inside, this car is very versatile. With a selection of different engines and transmissions it means you can choose the Civic to suit your driving style.

FEEL CONNECTED

We have always believed that the most important part of the car is the driver. The Dual Zone dashboard is designed to make it as easy as possible for the driver to view the instruments whilst driving. Essential information is shown in the upper area including speed and a row of LEDs indicating fuel economy and engine revs. The lower area shows the rev counter and the Multi-Information Display. This shows everything from mileage and fuel economy figures, to the distance until the car needs refuelling and even the outside temperature. With all the buttons close by for air conditioning, stereo and cruise control*, it feels great to have so much control at your fingertips.

A GREAT DRIVING EXPERIENCE STARTS WITH GREAT COMFORT

That's why we've designed stylish front seats with built-in spine, torso and pelvis support for a firm yet comfortable feel. But the seats aren't just supportive, they're clever. Stretch your legs out and you'll find generous leg room. It's the same in the rear. It means everyone can have a comfortable journey. Dual zone air conditioning* allows you and your passenger to set different temperatures. With the 5 Door we want everyone inside to enjoy the journey as much as the driver.

*Available on 1.8 i-VTEC and 2.2 i-CTDi models only. Please refer to specification pages 31-40 to see which models these and other features appear on.

HOW DO YOU MAKE A SPACE MORE SPACIOUS?

At Honda we love challenges. It makes us think differently and it produces innovative solutions like Magic Seats. One moment they are a set of three comfortable rear seats, but with a simple lift the two seat bases can be folded up to reveal extra space. This means even awkward objects like a bicycle can be fitted in behind the driver with a simple flip of the seats. The result is a substantial 415 litres of practical rear seat space made available. And for those occasions when you have even more items to transport, the Magic Seats reveal their other feature; with the use of a single lever, the rear seats can be folded down to reveal a flat floor and more than an enormous 1,300 litres of storage space.

Within the boot area, there's hidden under floor storage to give you a further 70 litres of space. Even if the front seat is pushed back as far as it will go, the rear seat can still fold flat with the head restraints attached. So having all this space is great, but how are you going to load it all in? How about doors that open almost 90 degrees for easy access? At Honda we understand that answers sometimes come from asking the right questions.

CIVIC 5 DOOR SI

The Si grade is the latest addition to the Civic range. Available in 1.4 i-VTEC manual and i-SHIFT, 1.8 i-VTEC manual and automatic and 2.2 i-CTDi manual, the Si offers a range of distinctive exterior and interior features.

The iconic exterior includes colour coded body mouldings and a sporty mesh front grille. The Civic Si has striking graphite colour 17" alloy wheels* and front fog lights which are complemented by dark chrome door handles and fuel filler cap. The interior also offers stylish half leather half cloth upholstery and a USB port** for MP3 players.

The Civic Si is available in Alabaster Silver Metallic, Crystal Black Pearl, Deep Sapphire Blue Pearl and Milano Red finishes.

TYPE S

REAL ROAD PRESENCE

The Type S is impressive with its distinct looks and striking lines. Its features are both powerful and modern, from the integrated indicators in the door mirrors to the triangular door handles and twin exhausts. The wire mesh grille echoes the race bred Type R and the matching coloured body kit adds a dynamic presence.

17" alloys* enhance the sporty look and improvements to the design of the rear light clusters bring an added edge to the contemporary styling.

FOCUSED ON DRIVING

Through our racing heritage, we have drawn on knowledge of how drivers absorb information whilst keeping their focus on the road. From this, we've created the Dual Zone dashboard and curved driver zone which resembles a cockpit of a racing car.

The lower zone shows the rev counter and the Multi-Information Display shows average speed, fuel consumption and outside temperature.

The climate control and steering wheel mounted controls for the audio and cruise control* are all close to hand, which means you're able to concentrate on the road whilst enjoying the drive.

*Standard on 1.8 i-VTEC and 2.2 i-CTDi Type S GT only. Please refer to specification pages 31-40 to see which models these and other features appear on.

COMPLETE COMFORT

The cockpit in the Type S features both an auxiliary socket (MP3 connection) and a Deflation Warning System. Sporty Alcantara seats hold you in the perfect position for driving, making long or short journeys a pleasure.

TAILOR YOUR DREAMS

MAKE THE MOST OF YOUR CIVIC

Enhance your Civic by choosing one of three option packs, for either 5 Door or Type S.

5 DOOR

TYPE S

1

2

3

1. PREMIUM PACK

The Premium Pack includes the following items:

- Stainless steel door step garnishes
- Front and rear mudguards
- Body coloured door protectors
- Elegance floor carpets

2. ELITE PACK

The Elite Pack contains the same items as the Premium Pack, but also comes with rear parking sensors to help you park in those awkward spaces. The Elite Pack therefore includes:

- Stainless steel door step garnishes
- Front and rear mudguards
- Body coloured door protectors
- Elegance floor carpets

Plus
Rear parking sensors

3. ELITE PLUS PACK*

In addition to the Elite Pack, this comes with a Hands Free Bluetooth® Kit, so you can stay safely in contact. Together the contents of the Elite Plus Pack are:

- Stainless steel door step garnishes
- Front and rear mudguards
- Body coloured door protectors
- Elegance floor carpets
- Rear parking sensors

Plus
Hands Free Bluetooth® Kit

1

2

3

1. STYLE PACK

The Style Pack adds the following items to your car:

- Aluminium fuel filler cap
- Elegance floor carpets
- Blue ambient front footwell lighting

2. ICON PACK

The Icon Pack contains the same three items as the Style Pack, but also comes with rear parking sensors to help you park in those awkward spaces. The Icon Pack contains:

- Aluminium fuel filler cap
- Elegance floor carpets
- Blue ambient front footwell lighting

Plus
Rear parking sensors

3. ICON PLUS PACK**

The Icon Plus Pack has all of the contents of the Icon Pack and also a Bluetooth® Kit so you can make hands free calls. This pack includes:

- Aluminium fuel filler cap
- Elegance floor carpets
- Blue ambient front footwell lighting
- Rear parking sensors

Plus
Hands Free Bluetooth® Kit

*Not available on SE-T, Si-T, ES-T and EX GT grades.

**Not available on Type S-T and Type S GT-T grades.

AN EXTRAORDINARY CAR NEEDS AN EXTRAORDINARY ENGINE

At Honda we understand that everybody has their own driving style and preferences. To give you a choice we have made a selection of different engines and transmissions available in the Civic.

The efficient 1.4 i-VTEC petrol engine uses our innovative variable valve timing and lift control, which helps it to deliver optimum fuel economy at low revs and more power at high revs. It is available in both the 5 Door and Type S, with our next generation 6-speed i-SHIFT Automated Manual Transmission. With technology that allows you to choose the way you want to drive, it's been designed to give smooth and quick changes between gears, while improving fuel economy and emissions. There's a fully automatic mode for a relaxed drive or a manual mode where you can change gear using the gear shift or the steering wheel mounted paddle shifts.

The 1.4 i-VTEC is also available with a manual gearbox with six gears for improved efficiency at high speeds.

The more powerful 1.8 i-VTEC petrol engine uses the same innovative technology as the 1.4 i-VTEC. This allows it to have the efficiency of a 1.6 litre engine at low revs, but the power of a larger engine at high revs. The 5 Door 1.8 i-VTEC is available with a refined 5-speed automatic transmission to deliver a smooth driving experience. Or if you prefer, there is the more involving 6-speed manual gearbox.

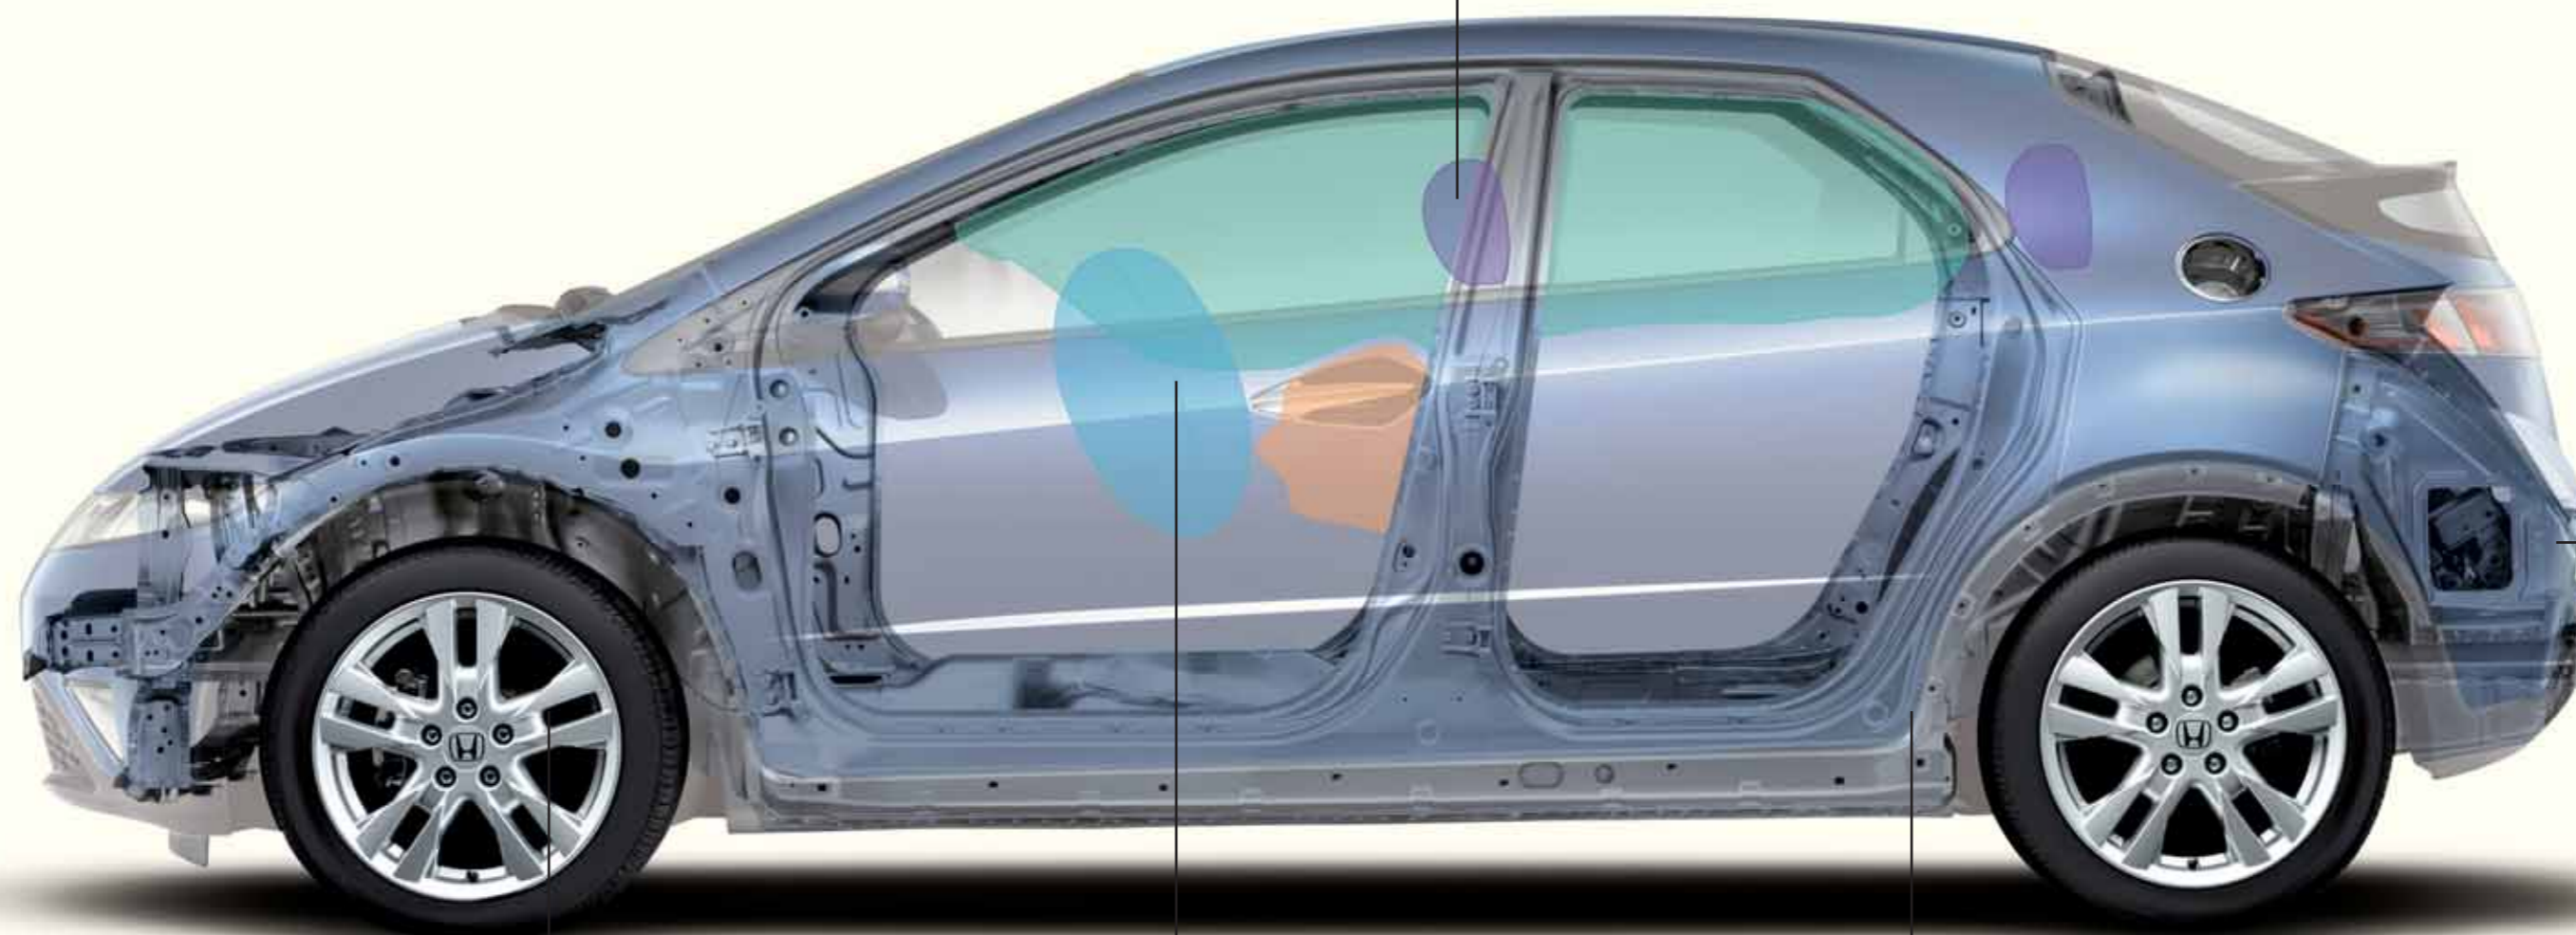

The Type S engine is available with either a 6-speed manual gearbox or our new next-generation 6-speed i-SHIFT Automated Manual Transmission. For an even more engaging drive, the 1.8 i-VTEC engine i-SHIFT has a sports button, which when pressed makes the engine rev higher before shifting up to the next gear.

The 5 Door and Type S are also available with the powerful 2.2 i-CTDi diesel engine that combines 340Nm of torque and 140PS. Made from aluminium, it is lightweight, which also helps it to deliver excellent fuel economy and maintain low CO₂ emissions, and is available with a 6-speed manual gearbox.

SAFETY AS STANDARD

Safety is one of the key considerations in every car we make. The Civic family has been awarded the maximum five star rating after independent crash testing from Euro NCAP, making it one of the UK's safest cars.

Engineered around an innovative Advanced Compatibility Engineering (ACE) body structure, which helps disperse energy across the body frame in the event of a collision. This helps protect everyone inside from frontal impacts, absorbing the energy and keeping you safe. Multiple airbags, Anti-lock Braking System (ABS), Electronic Brake-force Distribution (EBD) and Vehicle Stability Assist (VSA) all come as standard for additional peace of mind.

Active Front Head Restraints

Active front head restraints respond to impact from behind, moving forward with the seat to cushion the head and help to prevent whiplash.

Rear Parking Sensors*

Rear parking sensors make it easier to park in awkward spaces. A beep alerts you as you get closer to other objects to help avoid unwanted bumps.

Deflation Warning System (DWS)

The Deflation Warning System monitors tyre pressure and lets you know if you need to check your tyres.

Airbags

The Civic has been fitted with Dual Supplemental Restraint System (SRS) airbags all around the cabin. This helps protect everyone inside in the event of a collision.

ISOFix

Rear outer seats feature ISOFix mounting and tether points. This allows you to fix an ISOFix child car seat securely.

*Standard on 5 Door EX GT grades only. Please refer to specification pages 31-40 to see which models these and other features appear on.

TAKE YOUR PICK

Seven colours, seven different impressions. Hot blooded red, or deep and mysterious black. Or how about a distinguished bold blue?

Whichever colour you choose, there is one to match your own personality. Which one are you?

The following tables show which upholstery is available with the grade of your choice.

The 5 door Si comes as standard with half leather half cloth upholstery and is available in Alabaster Silver Metallic, Crystal Black Pearl, Deep Sapphire Blue Pearl and Milano Red finishes.

†**Fuel economy:** This test is designed to give an indication of on road fuel consumption. For a detailed explanation, please refer to the glossary on page 41.

***Maximum towing weights** are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient at sea level. At altitudes in excess of 1500 metres, engine output may drop with a reduction in towing capability. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturer reserves the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Honda Dealer, especially if your model selection is dependent upon one of the features advertised.

ADVANCED COMPATIBILITY

ENGINEERING (ACE) The Civic has been designed with an innovative frame structure engineered to reduce the concentrated frontal force on occupants in front end impacts. The Advanced Compatibility Engineering (ACE) design disperses and absorbs crash energy over a larger area, enhancing the preservation of the cabin space and improving safety for all occupants. Additionally, ACE also helps to reduce misalignment with vehicles of different sizes; the design of Civic's structure reduces impact forces acting upon other vehicles.

ANTI-LOCK BRAKING SYSTEM (ABS)

ABS prevents the wheels from locking when the brakes are applied in an emergency, reducing the possibility of a skid on wet, icy or loose surfaces, and enabling the driver to retain steering control.

CO₂ Carbon dioxide is one of the exhaust gases believed to be one of the causes of the Green House Effect. Therefore, the lower the CO₂ emissions, the better it is for the environment.

ELECTRIC POWER STEERING (EPS)

An electric motor assists steering instead of hydraulics. It runs off the battery, not engine, so helps to reduce emissions and fuel consumption.

ELECTRONIC BRAKE-FORCE

DISTRIBUTION (EBD) This works in tandem with ABS, analysing weight distribution around the car and automatically adjusting the braking force applied to front and rear wheels to help maintain directional stability.

FUEL CONSUMPTION The figures for the fuel consumption and CO₂ emissions are to give you an indication of the car's performance. Following legislation by the VCA (Vehicle Certification Agency), all car manufacturers generate these statistics through the same industry standard test. This allows comparison across all manufacturers and models. The tests use a standard version of the model and do not take into account optional levels of equipment, such as different sized wheels, tyres and other factors that can affect the economy of the model. The test is on a rolling road and there is no additional weight in the car other than the driver (no passengers or cargo) and it does not account for individual driving style, which can mean a difference to the figures achievable in the real world.

HILL START ASSIST (HSA) This system helps to prevent roll back whilst changing from brake to accelerator pedal on hills, holding the car steady for up to a second.

i-SHIFT Intelligent Shift is Honda's automated control of the car's clutch. Different to an automatic in that i-SHIFT does not have a torque converter, it has the same clutch as the 1.4 manual, but the gear changes are made automatically when in auto mode or manually using steering wheel mounted paddle shifts or the sequential shift lever.

VEHICLE STABILITY ASSIST (VSA)

VSA helps keep the Civic on course in adverse driving conditions by detecting and correcting potential understeer or oversteer. The system continually monitors vehicle speed, throttle position, individual wheel speeds, steering angle, lateral G-force and yaw rate to detect when oversteer or understeer is imminent. When necessary, VSA automatically reduces the engine's torque and uses the ABS system to apply brakes to each wheel, as needed, to help stabilise the vehicle. The response is so quick that the instability may be corrected before the driver even knows it's occurring.

i-VTEC The combination of VTEC and VTC for improved engine performance, fuel economy and emissions.

VTC (VARIABLE TIMING CONTROL)

Changes the timing angle of the intake side camshaft relative to the crankshaft as engine speed and load change. This way the cylinder filling with air/fuel mixture is optimised for improved torque and performance, with 90% of torque available at just 3,000 rpm.

VTEC (VARIABLE VALVE TIMING AND LIFT ELECTRONIC CONTROL)

Varies the amount of valve lift and the duration of valve opening during the intake stroke of each engine cylinder. The effect is optimised combustion over changing engine speeds, with the result of reduced fuel consumption and emissions as well as increased engine performance.

**THE POWER OF DREAMS**

We've always done things differently. Not just because we can, but because it can lead us into areas of development and discovery that we didn't know existed. Because it can help make people, machines and the world a better place. This though, is only part of the story, as it's how we apply this alternative thinking that matters the most. As our founder, Soichiro Honda once said:

"We only have one future, and it will be made of our dreams, if we have the courage to challenge convention."
