Technology >

LET IMAGINATIVE IDEAS LIGHT THE WAY FOR YOU

The new Accord is fitted with advanced Active Cornering Lights (ACL)*. They use xenon technology which means both the high-beam and the dipped beam come from a single set of bulbs,

giving you high levels of illumination at both settings. The Highbeam Support System monitors the driving conditions around you and switches automatically. The Active Cornering Light* illuminates the turning

you are about to take, from the moment you indicate or turn the steering wheel. Just a few more bright ideas from Honda.

* For more information on availability of these and other features please see specification pages.

Interior Design >

Model shown is 2.2 i-DTEC EX Tourer.

Advanced
Technology >

SMOOTH? SPORTY? HOW ABOUT BOTH?

The Accord's smooth and responsive drive is all down to the clever combination of technology and engineering.

At the core of this is a redesigned double wishbone front and multi-link

rear suspension system. This creates greater stability so that your car responds sharper and more accurately to your demands. And to ensure absolute confidence in your drive, Vehicle Stability Assist (VSA)* and Trailer Stability Assist (TSA)* combine with

Electronic Brake-force Distribution (EBD) to provide extra grip and more control when braking.

*For more information on availability of these and other features please see specification pages

MAKE IT YOUR OWN

We made a lot of difficult decisions in order to build the best Accord we could. Adding a personal touch to yours shouldn't be as tough.

The main image shows the Dynamic Pack which contains a body coloured

front grille, front and rear sports bumpers, side skirts, a tailgate spoiler and 18" Delta alloy wheels. The Premium Pack includes stainless steel doorstep garnishes, elegance floor carpets, a moulded boot tray and body coloured door protectors.

Colours >

TAKE YOUR PICK

As you would no doubt expect, we've put a lot of time and passion into the Accord. However, we thought we'd leave the finishing touch to you.

* Please note that these colours are available as a special order only. Please contact your local Honda Dealer for more information.

^{ΔΔ} Maximum towing weights: These are based on the ability of the car, with two occupants of 75kg each, to restart on a 12% gradient at sea level. At altitudes in excess of 1500 metres, engine output may drop with a reduction in towing capability. Extra weight, such as additional passengers or luggage, should also be deducted from the maximum towing weight.

[■] EX grade Engine maximum Torque for 2.4 i-VTEC is 230/4200-4400.

◊ Always use the recommended USB flash memory device. For information please contact your local Honda Dealer.

◊ Please refer to www.hondahandsfree.com for a list of compatible phones.

■ Highbeam Support System (HSS), Bi-HID headlights with Active Cornering Light (ACL) and headlight washers are available as part of the optional Advanced Driver Assist System (ADAS).

*Complimentary upgrade to 17" alloy wheels on ES and ES-GT grades.

**Advanced Navigation pack includes: Voice recognition DVD Satellite Navigation, GPS dual climate control, rear parking camera, Premium Audio system with 6 CD changer and subwoofer.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer, especially if your model selection is dependent upon one of the features advertised.

† Fuel consumption: This test is designed to give an indication of on-road fuel consumption.

* Advanced Driver Assist System (ADAS) includes Lane Keeping Assist System (LKAS), Collision Mitigation Braking System (CMBS), Adaptive Cruise Control (ACC) and Bi-HID headlights with Active Cornering Lights (ACL) with headlight washers. Please note: Bi-HID headlights with Active Cornering Lights (ACL) and headlight washers are standard on the 2.2 i-DTEC Type S grade.

° Always use the recommended USB flash memory device. For information please contact your local Honda Dealer.

°° Please refer to www.hondahandsfree.com for a list of compatible phones.

■ Highbeam Support System (HSS), Bi-HID headlights with Active Cornering Light (ACL) and headlight washers are available as part of the optional Advanced Driver Assist System (ADAS).

*Complimentary upgrade to 17" alloy wheels on ES and ES-GT grades.

**Advanced Navigation pack includes: Voice recognition DVD Satellite Navigation, GPS dual climate control, rear parking camera, Premium Audio system with 6 CD changer and subwoofer.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. This publicity material applies to the UK only Trade Descriptions Act (1968). Whilst efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer, especially if your model selection is dependent upon one of the features advertised.

Glossary

01 > ADAPTIVE CRUISE CONTROL (ACC)

ACC uses information from a millimetre-wave radar mounted inside the front grille to measure the distance to the vehicle ahead, while vehicle speed and yaw rate sensors detect the vehicle's driving parameters.

In addition to maintaining a set speed, ACC is also able to automatically regulate both the vehicle speed and its distance to the vehicle ahead travelling in the same lane, thereby reducing the burden of highway (or similar road) driving and enhancing driver comfort and safety.

ACC only operates if all the following conditions are fully fulfilled:

- The vehicle speed is set between 30-180km/h
- Main switch is activated

02 > ADVANCED COMPATIBILITY ENGINEERING (ACE)

Accord has been designed with an innovative frame structure engineered to reduce the concentrated frontal force on occupants in front end impacts. Accord's Advanced Compatibility Engineering (ACE) design disperses and absorbs crash energy over a larger area enhancing the preservation of the cabin space, improving safety for all occupants. Additionally, ACE also helps to reduce misalignment with vehicles of different sizes. The design of Accord's structure reduces impact forces acting upon other vehicles including the smallest of super-minis.

03 > ANTI-LOCK BRAKING SYSTEM (ABS)

ABS prevents the wheels from locking when the brakes are applied in an emergency, reducing the possibility of a skid on wet, icy or loose surfaces and enabling the driver to retain steering control.

04 > BLUETOOTH®

The Bluetooth® Hands Free Telephone System (HFT) enables drivers to make and receive calls without taking hands off the wheel. An in-car speaker and microphone system operated via steering wheel controls allows calls to be made safely whilst driving.

05 > CO₂

Carbon dioxide is one of the exhaust gases believed to be one of the causes of the greenhouse effect. The lower the CO₂ emissions, the better for the environment.

06 > COLLISION MITIGATION BRAKING SYSTEM (CMBS)

CMBS has been specifically designed to help alert the driver of an impending collision or - if it's unavoidable - to reduce the severity of impact by automatically applying the brakes if a collision is detected. The "eye" of the system is a radar transmitter mounted behind Accord's grille. A radar signal is constantly transmitted and the return echo evaluated. If the system detects a vehicle or obstruction in the road, it determines the distance and closing speed. If the closing speed goes above the threshold, the system immediately alerts the driver with a flashing indicator on the instrument panel and an audible alarm. If the driver takes no action to reduce speed, the system will automatically vibrate the driver's seatbelt and lightly apply the brakes. At the point when the system senses that a frontal collision is inevitable and the driver has still taken no avoidance action, both of the front seatbelts are retracted tightly and strong braking is applied automatically. This automatic action is designed to lower impact speed and help reduce vehicle damage and the severity of personal injury.

07 > i-DTEC

The Honda i-DTEC engine - the 'i' stands for 'intelligent' - is a new-generation direct injection engine that uses both the latest common rail and variable turbocharger technology. As a result, it's significantly quieter, smoother, more powerful and returns greater fuel economy than conventional diesels.

08 > FUEL CONSUMPTION

The figures for the fuel consumption and CO₂ emissions are to give you an indication of the car's performance. Following legislation by the VCA (Vehicle Certification Agency), all car manufacturers generate these statistics through the same industry standard test. This allows comparison across all manufacturers and models. The tests use a base grade version of the model and do not take into account optional levels of equipment, such as different sized wheels, tyres and other factors that can affect the economy of the model. The test is on a rolling road and there is no additional weight in the car other than the driver (no passengers or cargo) and it does not account for individual driving style, which can mean a difference to the figures achievable in the real world.

09 > HIGHBEAM SUPPORT SYSTEM

The Highbeam Support System assesses the driving conditions around you and switches automatically, if required. The Active Cornering Light means that the cornering light will illuminate the turning you are about to take, from the moment you indicate or turn the steering wheel.

10 > LANE KEEPING ASSIST SYSTEM (LKAS)

Identifies the boundaries of the vehicle's lane by processing images from a C-MOS camera mounted behind the windscreen. It then calculates the optimum steering torque to keep the vehicle in the centre of the lane and provides steering torque to the wheel to keep the vehicle in the centre of the lane.

- On roads with left and right boundary markings (where markings are clear and visible)
- On motorways or roads that are equivalent to motorways
- Driver has to keep contact with the steering wheel; if the system fails to recognise the driver's input on the steering, it switches itself off
- Side indicators are not activated
- Steering torque generated by the driver does not indicate imminent lane change manoeuvre.

11 > SATELLITE NAVIGATION SYSTEM WITH VOICE RECOGNITION

The satellite linked, DVD-based navigation system delivers turn-by-turn directions by voice and moving map display all the way to your destination. The DVD also contains points of interest such as service stations if you should require them in an unfamiliar area. The system can recognise over 550 voice commands - including many operations for the audio and climate control systems - so the driver can make adjustments without taking their hands off the steering wheel.

12 > TRAILER STABILITY ASSIST (TSA)

TSA works in conjunction with VSA and has been designed to enhance safety when towing a trailer. Through various sensors normally attributed just to the vehicle's VSA, TSA will initiate the appropriate brake applications to the wheels which will then stabilise Accord and trailer.

ONE SMALL STEP

The biggest dreams often come in the smallest packages. Like ASIMO; seen as the world's most advanced humanoid robot. ASIMO is 130cm tall and houses sophisticated technology that allows it to run and also recognise and identify individuals in a 360 degree range. In future we believe ASIMO may become another set of eyes, ears, hands or legs for people in need of extra help.
