SPECIFICATION	17
THE POWER OF DREAMS	19

When asked why he made cars, Soichiro Honda always replied: "I do it because it's fun."

The new CR-Z takes this philosophy and uses it to create a stylish coupé with sporty handling. And it just so happens to be a hybrid.

Low on emissions High on exhilaration

For the first time a fuel-efficient, low emission hybrid system is combined with a precise, driver focused 6-speed manual gearbox.

An innovative 1.5-litre 4-cylinder engine combined with the revolutionary IMA system gives an overall output of 124PS and 174Nm of torque which you would expect from a larger 1.8 litre engine. The added benefit of an electric motor means whenever you put your foot down, there is 78Nm of torque instantly available for excellent acceleration, CO₂ emissions are just 117g/km.

The CR-Z proves that a car can be environmentally responsible and fun to drive.

Different modes for different moods

The CR-Z has three driving modes, giving you the choice to switch between Sport - for maximum enjoyment, Econ - for optimal economy, and Normal - for a perfect balance between the two.

Sport

When you want to experience a sportier drive the sport setting changes the central dial to red, enhances throttle response, firms up the steering and gives you full power on tap.

Normal

This is the default setting, where the central dial glows blue and gives you the perfect balance between sportiness and economy.

Econ

When you're in a situation where there's no need for extra power, like sitting in traffic, Econ mode is perfect. When you push the Econ button, the engine is tuned for optimal economy, the climate control adjusts and the assistance from the IMA hybrid system gives priority to fuel efficiency. To show you're in Econ mode, the central dial will light up in green.

The image shows a left hand drive car that measures distance and speed in Kilometres. In the UK, the CR-Z comes in right hand drive and measures in miles. Model shown is CR-Z GT 1.5 i-VTEC IMA (with optional Navigation)* For information on which grades these and other features appear, please see specification pages 17-18

Style and comfort Designed with you in mind

The blend of a modern, driver-focused cockpit with high quality finishes throughout, create a dynamic interior ambience with a premium sports feel.

The low seating position of the front seats is designed to enhance the driving experience, whilst providing comfort and support.

The rear seats can be lowered with a simple one-touch motion, meaning that the 2+2 layout can adapt to increase luggage capacity.

Be seen Stand out

The CR-Z's wide and low stance gives it a confident and dynamic appearance. The flowing lines and striking looks are completed by the daytime running lights with eight LED's under each sweeping headlight.

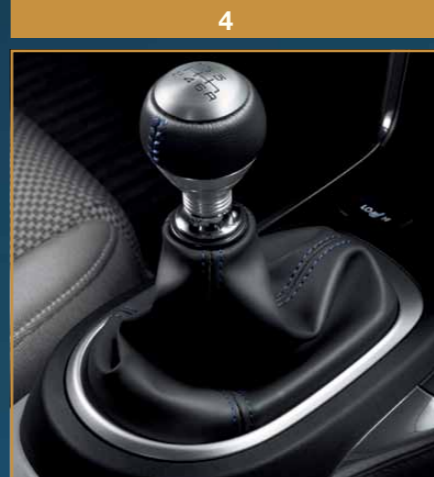

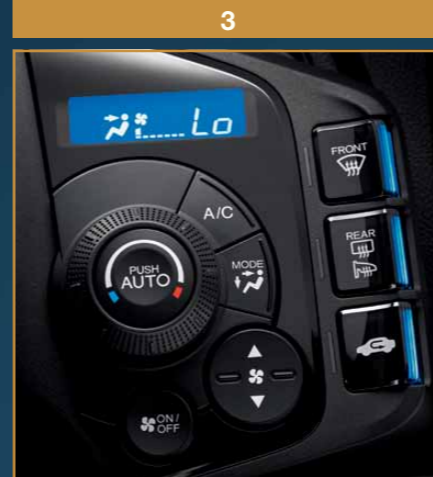

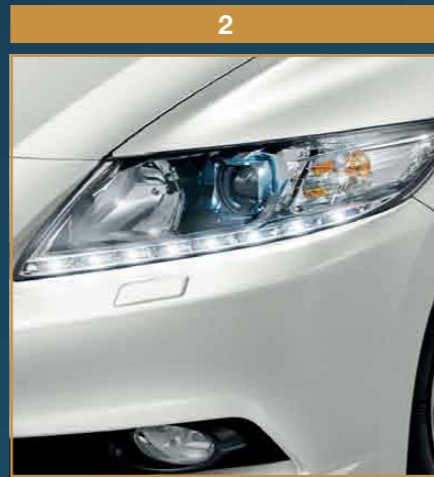

Model line-up

With a variety of features to choose from, just read down the list and pick a grade to suit you. If you think you would like something more, just flick over to our Options page and choose the pack that's good for you.

Make it yours

Individualise your CR-Z by choosing from the following option packs:

1

1. COMFORT

The Comfort pack includes the following features:

- Elegance floor carpets
- Cargo mat
- Stainless steel door step garnishes
- Centre armrest with storage

2

2. GLOW

The Glow pack includes the following features:

- Elegance floor carpets
- Cargo mat
- Illuminated door step garnishes
- Illuminated speaker rings
- Illuminated door pockets

3

3. DYNAMIC

The Dynamic pack includes the following features:

- Body coloured tailgate spoiler*
- Carbon effect rear skirt
- Carbon effect front skirt

4

4. DYNAMIC+

The Dynamic+ pack includes the following features:

- Carbon effect front skirt
- Carbon effect rear skirt
- Carbon effect side skirt
- Metallic finish front grille
- Metallic finish door mirror covers
- Body coloured tailgate spoiler

5

5. ELECTRA ALLOY WHEELS

Available as an addition to any option pack, these distinctive 17" Electra alloy wheels set your CR-Z apart.

* Image also shows metallic silver tailgate garnish

* Electric motors and petrol engines deliver their power and torque in different ways throughout the rev range. This is why the combined figures for the peak power and torque are not the same as adding the electric and petrol figures together.

† The figures for the fuel consumption and CO₂ emissions are to give you an indication of the car's performance. Following legislation by the VCA (Vehicle Certification Agency), all car manufacturers generate these statistics through the same industry standard test. This allows comparison across all manufacturers and models. The tests use a standard version of the model and do not take into account optional levels of equipment, such as different sized wheels, tyres and other factors that can affect the economy of the model. The test is on a rolling road and there is no additional weight in the car other than the driver (no passengers or cargo) and it does not account for individual driving style, which can mean a difference to the figures achievable in the real world.

**For a full listing of accessories, please visit your local Honda Dealer.

□ Always use the recommended USB flash memory device. For more information please contact your local Honda Dealer.

These specification details do not apply to any particular product which is supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice and at such times or in such a manner as deemed appropriate and may include major and minor changes. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. This publicity material applies to the UK only Trade Descriptions Act (1968) as amended. Whilst every effort has been made to ensure accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specification details with the supplying Dealer, especially if your model selection is dependent upon one of the features advertised.

Everything we do
goes into everything we do

At Honda we continuously strive to develop more intelligent, safer and better technologies. This drive for innovation has led us to create many fascinating projects, including ASIMO, the most advanced humanoid robot in the world.

Developing advanced innovations that keep ASIMO at the forefront of technology requires thinking in a different way. And thinking about things differently has helped us evolve the design of our cars, like the CR-Z.

Because everything we create today goes into everything we dream of for tomorrow.

CR-Z
Don't look back
