Magic Seats

The unique flexibility of the Jazz is characterised in an interior that can be transformed with either a push of a button or the lift of a lever. The rear seats lift up, fold over and lock down with one easy movement and the 60:40

split folding design creates numerous amounts of configurations for your ever changing requirements.

Model shown is 1.4 i-VTEC EX with CVT in Azure Blue Metallic.

Safety

Airbags

Dual Supplemental Restraint System front, side and curtain airbags protect the cabin and intelligent SRS not only allows you to turn the passenger airbag off but also reminds you to switch it on again.

Advanced Compatibility Engineering (ACE)

The 42% high tensile steel body structure dispenses energy across the frame and away from those in and around the car.

Active front head restraints

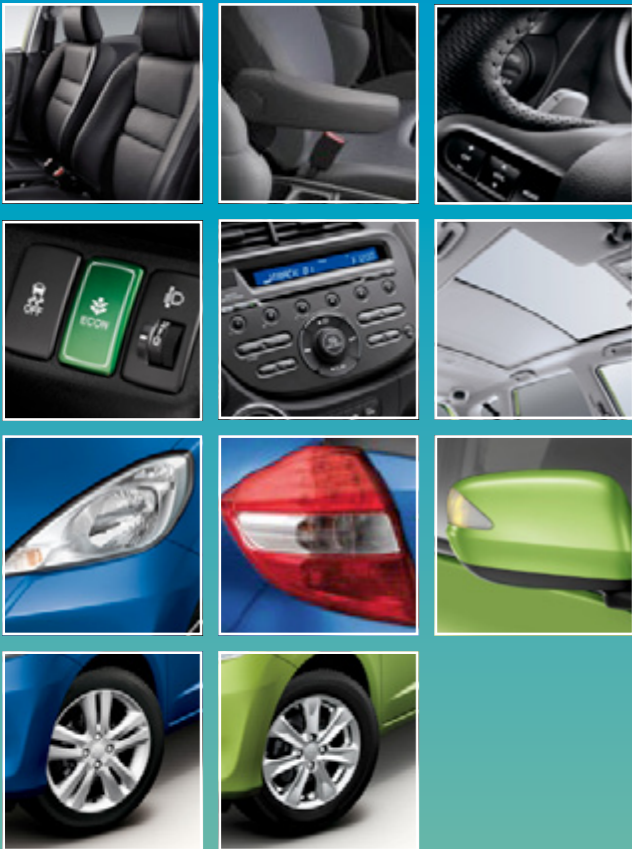

In the event of a collision, Anti-whiplash front head restraints and 3-point ELR seatbelts help keep passengers safe and secure.

Vehicle Stability Assist (VSA)

During the drive, the VSA sensors monitor grip to calculate the amount of power or braking force needed for maximum control.

Take your pick

In keeping with the Jazz's flexibility, we've provided eight distinctive colours to let you find the right choice for your personality.

From this range of colours, the Jazz Hybrid is available in six colours. This includes Azure Blue Metallic, Milano Red, Alabaster Silver Metallic, Crystal Black Pearl and also two colours which are exclusive to the Jazz Hybrid: Fresh Lime Metallic and Premium White Pearl.

Metallic and pearlescent paints are available at an additional cost. Please refer to the price list or consult your local Dealer for more details.

The following colours are available while stocks last (please check availability with your local Dealer):

Jazz Petrol: Royal Sapphire Blue Pearl and Ionized Bronze Metallic.
Jazz Hybrid: Storm Silver Metallic and Taffeta White.

The following colours are available to order from June 2012: Jazz Hybrid: Alabaster Silver Metallic and Premium White Pearl.

Make it your own

To add a personal touch to your Jazz, choose from some of the following genuine accessories:

^Δ Always use the recommended USB flash memory device. Some USB memory devices may not work in this audio unit.

[◻] For a list of compatible phones, please refer to www.honda-access.com

[◊] The T grades feature a USB port but not an auxiliary socket. On EX-T, EXL-T and HX-T grades the Jazz does not feature steering wheel mounted hands free Bluetooth[®] controls.

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. Whilst efforts are made to ensure specification accuracy, content is prepared several months in advance of circulation and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss available model line-up and specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgment and not on that of anyone else.

Glossary

01 > ADVANCED COMPATIBILITY ENGINEERING (ACE)

The Jazz has been designed with an innovative frame structure engineered to reduce the concentrated frontal force on occupants in front end impacts. The Jazz's Advanced Compatibility Engineering (ACE) design disperses and absorbs crash energy over a larger area, enhancing the preservation of the cabin space and improving safety for all occupants. Additionally, ACE also helps to reduce misalignment with vehicles of different sizes; the design of the Jazz's structure reduces impact forces acting upon other vehicles.

02 > ANTI-LOCK BRAKING SYSTEM (ABS)

ABS prevents the wheels from locking when the brakes are applied in an emergency, reducing the possibility of a skid on wet, icy or loose surfaces, and enabling the driver to retain steering control.

03 > CO₂

Carbon dioxide is one of the exhaust gases believed to be one of the causes of the Green House Effect. Therefore, the lower the CO₂ emissions, the better it is for the environment.

04 > ELECTRIC POWER STEERING (EPS)

An electric motor assists steering instead of hydraulics. It runs off the battery, not engine, so helps to reduce emissions and fuel consumption.

05 > ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)

This works in tandem with ABS, analysing weight distribution around the car and automatically adjusting the braking force applied to the front and rear wheels to help maintain directional stability.

06 > FUEL CONSUMPTION

The figures for the fuel consumption and CO₂ emissions are to give you an indication of the car's performance. Following legislation by the VCA (Vehicle Certification Agency), all car manufacturers generate these statistics through the same industry standard test. This allows comparison across all manufacturers and models. The tests use a standard version of the model and do not take into account optional levels of equipment, such as different sized wheels, tyres and other factors that can affect the economy of the model. The test is on a rolling road and there is no additional weight in the car other than the driver (no passengers or cargo) and it does not account for individual driving style, which can mean a difference to the figures achievable in the real world.

07 > CONTINUOUSLY VARIABLE TRANSMISSION (CVT)

Selects the best drive ratio to keep the engine in its most efficient power range. This delivers the optimum fuel economy and ensures that the most efficient drive ratio is always selected. This promotes better fuel economy, lower emissions and an exceptionally smooth ride.

08 > VEHICLE STABILITY ASSIST (VSA)

VSA helps keep the Jazz on course in adverse driving conditions by detecting and correcting potential understeer or oversteer. The system continually monitors vehicle speed, throttle position, individual wheel speeds, steering angle, lateral G-force and yaw rate to detect when oversteer or understeer is imminent. When necessary, VSA automatically reduces the engine's torque and uses the ABS system to apply brakes to each wheel, as needed, to help stabilise the vehicle. The response is so quick that the instability may be corrected before the driver even knows it's occurring.

09 > i-VTEC

The combination of VTEC and VTC for improved engine performance, fuel economy and emissions.

10 > VTC (VARIABLE TIMING CONTROL)

Changes the timing angle of the intake side camshaft relative to the crankshaft as engine speed and load change. This way the cylinder filling with air/fuel mixture is optimised for improved torque and performance, with 90% of torque available at just 3,000 rpm.

11 > VTEC (VARIABLE VALVE TIMING AND LIFT ELECTRONIC CONTROL)

Varies the amount of valve lift and the duration of valve opening during the intake stroke of each engine cylinder. The effect is optimised combustion over changing engine speeds, with the result of reduced fuel consumption and emissions as well as increased engine performance.

12 > IMA

IMA stands for Integrated Motor Assist, which means that an electric motor sits alongside the petrol engine it supports. The Jazz uses an electric motor to assist the petrol engine, ensuring fuel consumption and emissions are kept to a minimum.

The system uses the petrol engine as the main source of power to drive the car. The electric motor combines with the engine to provide torque and power during starts or accelerating, when engine fuel consumption is usually high.

When the vehicle comes to a halt, the petrol engine stops and the car runs only from the battery. This means no petrol is being consumed and so there are no emissions.

One small step

The biggest dreams often come in the smallest packages. Like ASIMO; our humanoid robot. ASIMO is 130 cm tall and houses sophisticated technology that allows it to run and also recognise and identify individuals in a 360 degree range. In future we believe ASIMO may become another set of eyes, ears, hands or legs for people in need of extra help.
