45 DID YOU KNOW?

47 BRITISH TOURING CAR CHAMPIONSHIP With the Civic our engineers started with a clear vision, they wanted to build a car that balanced impressive performance levels, a unique design and flexible interior space. To bring this to life, they needed to try new ideas, learn new lessons and uncover new ways of solving problems. It took four years of experimenting and 20,000km of real-world testing to find the right solution. The results speak for themselves. A confident design, impressive performance and innovative technology solutions all add up to create our best Civic yet. An exciting journey completed. Are you ready to start yours?

Scan the code to launch the Civic app.

A unique design

From the sculpted headlights to the rear spoiler, every feature has been developed to optimise air flow over and around the car, creating a smoother, more stable ride.

The innovative suspension system assists further by creating the perfect balance between a comfortable ride and agile handling.

Not only do these features combine to improve fuel efficiency and reduce noise levels, but they also take the Civic's advanced and athletic shape and give it a distinctive character.

DAYTIME RUNNING LIGHTS

Designed for optimum visibility in daylight conditions, the Civic's high-luminance LED daytime running lights add a dynamic dash of character to its stylish exterior.

Smart, refined, intuitive. A cockpit, built around the driver.

There are no shortcuts in designing a car that feels great to drive, no matter how long or short the journey is. So our engineers spent time reshaping and remodelling the Civic's cockpit so that the dashboard is centred around the driver.

Essential information on speed, revs and fuel consumption are arranged directly in front of you making them easy and safe to read. Intuitive steering wheel mounted controls are positioned so you don't have to take your focus away from the road. High quality materials throughout complete the design, creating a refined and ergonomic cockpit.

Discover more about the refined interior with the Civic app. Just scan the code and start exploring.

Helpful technology

At Honda, we believe that every journey should be safe, comfortable and enjoyable.

That's why the Civic's innovative in-car technology is designed to help you get the most out of your drive without needing to take your focus away from the road or your hands from the wheel.

Connecting your MP3 player to your Civic couldn't be easier. Just plug in your device, select your soundtrack through the steering wheel mounted audio controls, and your choice will display through the intelligent-Multi Information Display (i-MID) screen.

SATELLITE NAVIGATION*

Make finding your destination simple and effortless with the HDD satellite navigation system which comes as a standard on the EX and EX GT grades.

BLUETOOTH HANDS FREE TELEPHONE*

Hands Free Telephone system (HFT) allows quick access to all your mobile phone contacts at the touch of a button**.

*For more information on which models these and other features are available, please refer to specification pages 41-44.

**For a list of compatible phones, please refer to www.hondahandsfree.com

Seats that are as adaptable as your lifestyle

The Civic's innovative 'Magic Seats' fold in a wide range of clever configurations, allowing you to create space that arranges around you.

In one simple motion the seats lift up or fold down, locking easily into place. They also split 60:40 creating multiple combinations that can easily accommodate various load types.

So, whatever life may throw your way, the Civic is ready to take it all on the journey with you.

SPLIT FOLDING SEATS

60:40 split creates multiple space combinations

The luxury of space

The Civic's clever seat configuration creates more space than you might expect. With the rear seats lying flat, the boot space expands to a generous 1,210 litres*, including 70 litres of space in the under-floor storage area. This creates plenty of space for shopping, luggage and everyday living.

For ultimate flexibility and practicality, the seats also feature a 60:40 split that lets you carry tall loads, long loads, or a mixture of both.

Top-class power and uncompromising performance

As the first of our new Earth Dreams Technology engines, the Civic 1.6 i-DTEC is a finely tuned balance of performance and efficiency. Delivering 120PS, with fuel efficiency of 78.5 mpg* and low emissions of 94 g/km CO₂*.

Available in SE, ES and EX grades, this innovatively designed engine has been built with reduced weight and friction, enabling the engine to deliver the economy we all desire without compromising on performance. The result: fast response, a smooth drive and sporty handling too.

Engines designed for the real world

Our i-VTEC petrol engines and i-DTEC diesel engines are designed to deliver strong fuel economy, exhilarating performance and cleaner emissions.

The 1.4 i-VTEC delivers great performance with 100PS and achieves an impressive fuel economy of 52.3 mpg* and emissions of 129 g/km*. The 1.8 i-VTEC delivers a powerful 142PS but with the fuel efficiency of a smaller engine.

The new 1.6 i-DTEC delivers 120PS, with excellent fuel economy of 78.5 mpg* and emissions of 94 g/km* CO₂. The 2.2 i-DTEC delivers 150PS, fuel economy of 67.3 mpg^Δ while still managing to reduce emissions to 110 g/km^Δ.

All engines have a 6-speed manual transmission while all four feature a shift indicator that informs you of the best time to change gear in order to maximise fuel economy.

For those who prefer an automatic transmission, our 1.8 i-VTEC comes in 5-speed automatic transmission, with fuel economy of 44.8 mpg[†] and emissions of 148 g/km[†].

*1.4 i-VTEC manual transmission combined figure.

*1.6 i-DTEC manual transmission combined figure.

*2.2 i-DTEC manual transmission combined figure for ES and EX.

*1.8 i-VTEC automatic transmission combined figure on SE, ES and EX.

Fuel consumption CO₂ and weight figures are measured according to EC directive procedures. As a result of driving behaviour, road, traffic and weather conditions, general state and equipment level of the vehicle, real life fuel consumption and CO₂ figures may differ from these official values. In case of weight (defined as mass in running order), it applies to vehicles with standard equipment. Optional equipment may increase this figure and decrease the payload.

Feel genuinely < excited, by feeling genuinely safe

Honda are committed to building the very best safety features into every Civic. It all starts with the shell. Our Advanced Compatibility Engineering (ACE) body structure absorbs and deflects impact away from you and your passengers, keeping everyone protected.

Multiple airbags, Electronic Brakeforce Distribution (EBD) and Vehicle Stability Assist (VSA) all come as standard. The Civic also comes with Anti-lock Braking System (ABS) to help maintain directional stability and Brake Assist (BA) which boosts braking power in an emergency. There's a lot of complex engineering and computing involved, but it's all about doing something very simple - keeping you and your passengers safe.

Please see Handbook for full operational details.

EMERGENCY STOP SIGNAL

If an emergency situation forces you to brake heavily, drivers behind you need as much warning as possible. Emergency Stop Signal does just that, automatically flashing the hazard lights in the event of hard breaking to reduce the chance of a rear-end collision.

WHIPLASH LESSENING FRONT **HEAD RESTRAINTS**

In the event of a collision, these front head restraints and 3-point ELR seatbelts help keep passengers safe and secure.

•••••

VEHICLE STABILITY ASSIST (VSA)

Whilst driving, the VSA sensors monitor grip to calculate the amount of power or braking force needed for maximum control.

DEFLATION WARNING SYSTEM (DWS)

The Deflation Warning System monitors tyre pressure and lets you know if you might have a puncture.

•••••

IDLE STOP

AIRBAGS

complete protection.

The Civic has been fitted with airbags all

around, including curtain airbags. The dual

Supplemental Restraint System (SRS) gives

COMING HOME / LEAVING

Your convenience is always a top

priority for us at Honda. So when

automatically leaves the headlights

on for 15 seconds, illuminating your surroundings. And when you return

you park your Civic at night, it

to unlock the car, it repeats the action, to assist you quickly and

HOME LIGHTS

safely in the dark.

A stop-start system which automatically shuts down and restarts the internal combustion engine to reduce the amount of time the engine spends idling, thereby improving fuel economy and reducing emissions.

Technology designed to make life easy

At Honda we believe that advanced technology should be used to provide a valuable benefit. So we've developed the Advanced Safety Pack which is a combination of Adaptive Cruise Control (ACC) and Collision Mitigation Braking System (CMBS) to assist you on your journey.

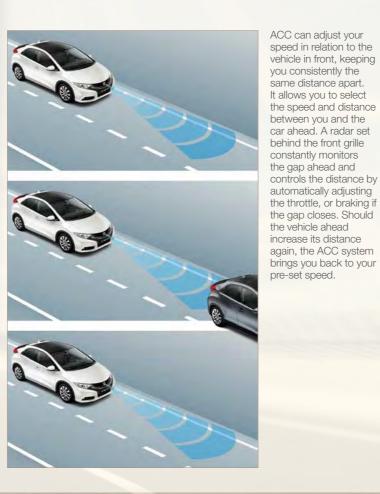

Another piece of convenient technology is the Smart Keyless Entry System. It locks and unlocks the doors, and even starts the engine without you needing to reach into your pocket.

> SMART KEYLESS ENTRY AND START*

......

ADAPTIVE CRUISE CONTROL (ACC)*

COLLISION MITIGATION BRAKING SYSTEM (CMBS)*

CMBS assists your braking by automatically applying an appropriate amount of braking force to help you avoid or minimise the chances of hitting a vehicle ahead of you in traffic. By using a radar transmitter mounted behind the front grille, the radar system helps to detect when a frontal collision is imminent. CMBS works in conjunction with the seatbelt, providing visual and audio warnings for the driver to take preventative action. It can also initiate braking to reduce vehicle speed.

Primary warning: When there's a risk of collision ahead, or the distance between the two vehicles is too short, the alarm sounds and the word BRAKE appears on the i-MID (intelligent-Multi Information Display). This alerts the driver to take action in order to avoid collision.

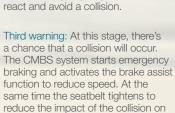

the driver and front passenger.

4300 mm

(2065 mm including door mirrors)

Vehicle versions and equipment levels presented in this brochure may not be available in all countries. For precise information, please contact your local Honda dealer.

The Civic is covered by several different warranties as follows:

³⁻year or 90,000 miles Standard warranty
3-year Surface corrosion warranty

⁵⁻year Exhaust corrosion warranty

¹⁰⁻year Chassis corrosion warranty

¹²⁻year Structural corrosion warranty

Please see the Service book for full warranty information.

> Future thinking

Our next generation technological advances not only maximise economy, but enhance driving performance.

At Honda, our dreams may be ambitious, but they're always firmly rooted in reality. Honda's Earth Dreams Technology is a new generation series of engines and transmissions delivering an excellent combination of strong performance with low emissions. The first engine from Honda's ground breaking new Earth Dreams Technology range is the 1.6 i-DTEC diesel engine.

This innovative engine is clean and quiet, with a lighter, more compact design for fast response and smooth acceleration.

DREAMS NOLOGY

Civic Racing DNA

Could a car designed for the road really succeed on the track?

Our R&D team thought so. After all, they have always tested the Civic's engine to the absolute limits in the lab so why not out on the track? Well, it seems their intuition was right. In its first year of racing in the acclaimed 2012 British Touring Car Championship (BTCC), the new Civic not only won in its first race weekend but, we are proud to say, took a clean sweep of titles, winning the drivers', teams' and manufacturers' championships.

Quite an achievement, but racing has always been in our DNA. It's defined who we are and has consistently provided the ultimate test for our technological innovations and engineering.

The latest Civic BTCC car is built around the European Civic 5 door hatchback and is powered by a newly designed, 300 BHP, 2.0-litre turbocharged engine, modified by our racing partners Team Dynamics in conjunction with Neil Brown Engineering. Its adaptable chassis and exceptional aerodynamics have helped transform a car designed to excel on the road, excel on the track too.

It's the success we can all share, because every lesson we learn from this new generation of high-performance Honda engines will help us enhance our road cars with better design, a smoother drive, stronger performance and improved fuel efficiency.
