Hybrid

Let the Jazz lead the way

The Jazz has been refined to give you flexibility wherever your journey takes you. It's also available as a Hybrid, to give you a cleaner and more economical ride. We like to take you forward. It all depends how far you'd like to go.

Contents & Introduction >

Petrol

> Ready for anything

At Honda we believe in creating engineering solutions that have a real benefit in everyday life. With the Honda Jazz that means incredible versatility. Light and space meet strength and shape to create a car that's big on the inside and small on the outside.

A low centre of gravity ensures good handling and stability on corners and the broad stance opens up the interior so you can appreciate even more of the world around you.

Style and function working perfectly together

Improved exterior styling can also mean improved quality and function. We updated the bumper design, the matte black mesh grille and rear combination light with a red lens to accentuate the curved exterior and keep you highly visible at all times.

Model shown is 1.4 i-VTEC EX in Polished Metal Metallic

Exterior design >

Petrol

A sense of style, a feeling of space

Chrome detailing and coloured lighting illuminate audio features, meters and switches creating a carefully integrated interior. With everything at your fingertips, you can concentrate fully on the road ahead. And when you drive the Jazz there's a lot more to see; a specially designed windscreen increases all-round vision and thinned pillars allow light to flow through the cabin. The panoramic glass roof, standard on top grade models*, reveals the sky at the touch of a button.

Magic seats

The unique flexibility of the Jazz is characterised in an interior that can be transformed with either a push of a button or the lift of a lever. The rear seats lift up, fold over and lock down with one easy movement and the 60:40 split folding design creates numerous amounts of configurations for your ever changing requirements.

Model shown is 1.4 i-VTEC EX with CVT.

Magic seats >

Petrol

Give yourself a bit more room

The intelligently designed Jazz has a flexible boot space that expands when the rear seats are folded flat. This allows the easy loading and accommodation of tall, long and awkward objects.

A two-tiered design on 1.4 models gives you the adaptability to keep delicate and heavy items separate ensuring that everything travels along comfortably with plenty of space to spare.

Further everyday

With an innovative i-VTEC engine in 1.2 or 1.4 litre capacities, the Jazz promises lively performance across all engines and perfectly combines fuel economy and low emissions with driving pleasure.

A choice of conventional 5-speed manual or advanced Continuously Variable Transmission (CVT) gives you the options to suit your preferred style of driving.

The innovative CVT technology adjusts according to your driving style, seamlessly changing the final drive ratio to ensure the optimum engine output for your chosen speed, giving you a smooth and comfortable drive.

A little change makes a big difference

With excellent flexibility, an intelligently designed interior and great driveability, the new Jazz Hybrid has all the strengths of the petrol Jazz but with the added benefit of Hybrid Technology. In fact the only real difference is the petrol electric hybrid engine that gives you improved fuel efficiency and reduces CO₂ emissions.

Hybrid design >

Hybrid: how it works >

Hybrid: efficient driving >

Model shown is 1.3 Hybrid HX in Fresh Lime Metallic.

Hybrid: design >

Hybrid

Enhanced inside and out

The exterior styling of the Jazz is enhanced with fresh design touches unique to the hybrid model. The headlights and rear combination lights have a blue clear design, which adds a sharp, clean look to the exterior. For a touch of exclusivity, a Fresh Lime Metallic colour is available.

Hybrid: how it works >

Hybrid: efficient driving >

Safety >

Model shown is 1.3 Hybrid HS in Fresh Lime Metallic.

Making a little go a long way

The Jazz Hybrid uses an Integrated Motor Assist (IMA) hybrid system to combine an advanced electric motor with a conventional petrol engine. The result is improved fuel economy and low emissions.

So, whether you're accelerating, cruising or slowing to a stop, the electric motor and battery pack maintain a lively and efficient flow of power.

The Jazz Hybrid also comes as standard with Continuously Variable Transmission (CVT), which delivers optimum fuel economy and ensures the most efficient drive ratio is always selected. This means your Jazz consumes less fuel, releases fewer emissions and ultimately, saves you money.

Hybrid: efficient driving >

Safety >

Model line up >

Images are for illustration purposes only and show a left hand drive vehicle with kilometres per hour dials. In the UK, the Jazz will show its speed in miles per hour.

Maximum efficiency with every journey

The Jazz Hybrid is equipped with Ecological Drive Assist system (Eco Assist). The system changes the colour of the speedometer background according to the efficiency of your drive, glowing from blue to green depending on how you are driving, with green being the most fuel efficient.

The 'flower' emblem is designed to inform you of your fuel economy levels. The more economically you drive, the more trees will grow to show your progress.

The hybrid engine gives you a refined source of power; Eco Drive gives you the ability to use it to maximum effect and make even more of a difference to your journey.

Engineered for your safety

A key focus in the design of the Jazz is the safety of those inside and out. The protection of passengers and pedestrians is paramount in the engineering of the body structure, technology systems and interior features.

The Jazz has been rated one of the safest cars in Europe, according to the independent crash testing results from Euro NCAP and has been awarded the maximum 5 star rating.

In addition to the safety features seen here, the Jazz also comes with Anti-lock Braking System (ABS) brakes, Electronic Brake-force Distribution (EBD) working in conjunction with ABS to help maintain directional stability, and Brake Assist (BA) which boosts braking power in an emergency.

Advanced Compatibility Engineering (ACE)

The 42% high tensile steel body structure dispenses energy across the frame and away from those in and around the car.

Active front head restraints

In the event of a collision, anti-whiplash front head restraints and 3-point ELR seatbelts help keep passengers safe and secure.

Vehicle Stability Assist (VSA)

During the drive, the VSA sensors monitor grip to calculate the amount of power or braking force needed for maximum control.

Airbags

Dual Supplemental Restraint System front, side and curtain airbags protect the cabin. The intelligent SRS not only allows you to turn the passenger airbag off but also reminds you to switch it on again.

Model shown is 1.2 i-VTEC S.

S 1.2 i-VTEC Manual

1.2 i-VTEC S features include:

- Electric front windows
- Electric heated and adjustable mirrors
- Height adjustable drivers' seat
- Drivers' vanity mirror
- Tilt and telescopic steering wheel adjustment
- 15" steel wheels
- Auxiliary socket
- Stereo CD tuner with RDS and MP3 compatibility
- Reclining rear seats

Stereo CD with RDS and MP3

S A/C 1.2 i-VTEC Manual

In addition to the features of the 1.2 i-VTEC S, the 1.2 i-VTEC S A/C also includes:

- Manual air conditioning

Airbags

Vanity mirror

Model shown is 1.2 i-VTEC SE.

SE 1.2 i-VTEC Manual

In addition to 1.2 i-VTEC S A/C, the 1.2 i-VTEC SE includes:

- Idle Stop*
- Body coloured door mirrors
- Body coloured door handles
- Automatic Climate Control

Automatic air conditioning

ES 1.4 i-VTEC Manual / CVT

In addition to 1.2 i-VTEC SE, the 1.4 i-VTEC ES includes:

- Electric retractable mirrors
- 15" alloy wheels
- Steering wheel audio controls
- Perimeter alarm
- Rear electric windows
- Rear speakers
- USB connector**

USB connector

15" Alloy wheels

* Idle Stop is exclusively available on SE grade only.

**Always use the recommended USB flash memory device. Some USB memory devices may not work in this audio unit.

EX 1.4 i-VTEC Manual / CVT

In addition to 1.4 i-VTEC ES, the 1.4 i-VTEC EX includes:

- 16" alloy wheels
- Front fog lights
- Cruise control
- Panoramic glass roof
- Automatic headlights with dusk sensor
- Rain-sensing windscreen wipers
- Privacy glass
- Bluetooth® Hands Free Telephone (HFT) system†

Panoramic glass roof

EXL 1.4 i-VTEC Manual / CVT

In addition to the features of the 1.4 i-VTEC EX, the 1.4 i-VTEC EXL also includes:

- Leather upholstery
- Heated front seats

Cruise control

Rain sensor

†For a list of compatible phones, please refer to www.hondahandsfree.com

Unique Si upholstery

Leather steering wheel

Si 1.4 i-VTEC

When we designed the Si, we took the Jazz and pushed the boundaries with some unique and dynamic features. Engineered to inject adventure into every journey you make, the stylish Jazz Si is exclusive to our 1.4 i-VTEC engine.

5-speed manual transmission

The 1.4 i-VTEC Si includes:

- 16" diamond cut alloy wheels
- Exclusive Si front and rear bumpers and side skirts
- Fog lights
- Privacy glass
- Si boot emblem
- Leather wrapped steering wheel
- Cruise control
- Unique Si upholstery
- Unique Si gear knob

Make it your own

To add a personal touch to your Jazz Si, choose from some of the following genuine accessories:

Si Pack 1 includes:

Si Embroidered Floor Carpets, Si Stainless Steel Doorstep Garnishes, Leather and Alloy Gear Knob.

Si Pack 2 includes:

The same items as the Si option pack 1 plus Body Coloured Tailgate Spoiler.

Si Pack 3 includes:

The same items as the Si option pack 2 plus Bluetooth® Hands Free Telephone (HFT) system*.

Si Stainless Steel Doorstep Garnish

Leather and Alloy Gear Knob

Si Embroidered Floor Carpets

* For a list of compatible phones, please refer to www.hondahandsfree.com

PREMIUM

The Premium Pack includes the following four items:

- Side body trims
- Stainless steel doorstep garnishes
- Front and rear mud guards
- Elegance floor mats

ELITE

The Elite Pack contains the same four items as the Premium Pack but also comes with rear parking sensors to help you park in those awkward spaces. Fitting your Jazz with the Elite Pack therefore includes:

- Side body trims
- Stainless steel doorstep garnishes
- Front and rear mud guards
- Elegance floor mats

Plus:
Rear parking sensors

ELITE +

In addition to the Elite Pack, this comes with front parking sensors. Together the contents of the Elite+ Pack are:

- Side body trims
- Stainless steel doorstep garnishes
- Front and rear mud guards
- Elegance floor mats
- Rear parking sensors

Plus:
Front parking sensors

SD Navigation system with integrated Bluetooth® Hands Free Telephone (HFT) [†]	•	•	•	•	•	•	•	•	•

• Standard ○ Optional – Not available

^Δ Always use the recommended USB flash memory device. Some USB memory devices may not work in this audio unit.

[□] For a list of compatible phones, please refer to www.hondahandsfree.com

[†] The T grades feature a USB port but not an auxiliary socket. Steering wheel mounted hands free Bluetooth® controls are not available on T grades.

Images are shown for illustration purposes only and show a left hand drive vehicle. In the UK, the Jazz will be a right hand drive vehicle. These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturers reserve the right to vary their specifications, including colours, with or without notice and at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor or Dealer, copies of which may be obtained from them on request. Whilst efforts are made to ensure specification accuracy, content is prepared several months in advance of circulation and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss available model line-up and specification details with the supplying Dealer especially if your model selection is dependent upon one of the features advertised. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own judgment and not in reliance on any verbal or written representations.

01 > ADVANCED COMPATIBILITY ENGINEERING (ACE)

The Jazz has been designed with an innovative frame structure engineered to reduce the concentrated frontal force on occupants in front end impacts. The Jazz's Advanced Compatibility Engineering (ACE) design disperses and absorbs crash energy over a larger area, enhancing the preservation of the cabin space and improving safety for all occupants. Additionally, ACE also helps to reduce misalignment with vehicles of different sizes; the design of the Jazz's structure reduces impact forces acting upon other vehicles.

02 > ANTI-LOCK BRAKING SYSTEM (ABS)

ABS prevents the wheels from locking when the brakes are applied in an emergency, reducing the possibility of a skid on wet, icy or loose surfaces, and enabling the driver to retain steering control.

03 > CO₂

Carbon dioxide is one of the exhaust gases believed to be one of the causes of the Green House Effect. Therefore, the lower the CO₂ emissions, the better it is for the environment.

04 > ELECTRIC POWER STEERING (EPS)

An electric motor assists steering instead of hydraulics. It runs off the battery, not engine, so helps to reduce emissions and fuel consumption.

05 > ELECTRONIC BRAKE-FORCE DISTRIBUTION (EBD)

This works in tandem with ABS, analysing weight distribution around the car and automatically adjusting the braking force applied to the front and rear wheels to help maintain directional stability.

06 > FUEL CONSUMPTION

The figures for the fuel consumption and CO₂ emissions are to give you an indication of the car's performance. Following legislation by the VCA (Vehicle Certification Agency), all car manufacturers generate these statistics through the same industry standard test. This allows comparison across all manufacturers and models. The tests use a standard version of the model and do not take into account optional levels of equipment, such as different sized wheels, tyres and other factors that can affect the economy of the model. The test is on a rolling road and there is no additional weight in the car other than the driver (no passengers or cargo) and it does not account for individual driving style, which can mean a difference to the figures achievable in the real world.

07 > CONTINUOUSLY VARIABLE TRANSMISSION (CVT)

Selects the best drive ratio to keep the engine in its most efficient power range. This delivers the optimum fuel economy and ensures that the most efficient drive ratio is always selected. This promotes better fuel economy, lower emissions and an exceptionally smooth ride.

08 > VEHICLE STABILITY ASSIST (VSA)

VSA helps keep the Jazz on course in adverse driving conditions by detecting and correcting potential understeer or oversteer. The system continually monitors vehicle speed, throttle position, individual wheel speeds, steering angle, lateral G-force and yaw rate to detect when oversteer or understeer is imminent. When necessary, VSA automatically reduces the engine's torque and uses the ABS system to apply brakes to each wheel, as needed, to help stabilise the vehicle. The response is so quick that the instability may be corrected before the driver even knows it's occurring.

09 > i-VTEC

The combination of VTEC and VTC for improved engine performance, fuel economy and emissions.

10 > VTC (VARIABLE TIMING CONTROL)

Changes the timing angle of the intake side camshaft relative to the crankshaft as engine speed and load change. This way the cylinder filling with air/fuel mixture is optimised for improved torque and performance, with 90% of torque available at just 3,000 rpm.

11 > VTEC (VARIABLE VALVE TIMING AND LIFT ELECTRONIC CONTROL)

Varies the amount of valve lift and the duration of valve opening during the intake stroke of each engine cylinder. The effect is optimised combustion over changing engine speeds, with the result of reduced fuel consumption and emissions as well as increased engine performance.

12 > IMA

IMA stands for Integrated Motor Assist, which means that an electric motor sits alongside the petrol engine it supports. The Jazz uses an electric motor to assist the petrol engine, ensuring fuel consumption and emissions are kept to a minimum.

The system uses the petrol engine as the main source of power to drive the car. The electric motor combines with the engine to provide torque and power during starts or accelerating, when engine fuel consumption is usually high.

When the vehicle comes to a halt, the petrol engine stops and the car runs only from the battery. This means no petrol is being consumed and so there are no emissions.

One small step

The biggest dreams often come in the smallest packages. Like ASIMO; our humanoid robot. ASIMO is 130 cm tall and houses sophisticated technology that allows it to run and also recognise and identify individuals in a 360 degree range. In future we believe ASIMO may become another set of eyes, ears, hands or legs for people in need of extra help.
