## THE SPORTS SALOON

Sleek, dynamic, daring, XF is a fusion of sports car styling with outstanding luxury saloon comfort. XF's inspired engineering has won over one hundred international awards including WhatCar? JD Power Executive Car of the year 2012. It has proved itself the game-changer in the world of automotive design. More than a machine, XF combines Jaguar's renowned flair for style and luxury with a genius for technological innovation, setting the standard that other sports saloons can only aspire to.

## MOVING DESIGN

With its glowing Bi-function HID headlamps, outlined with crystal white daytime running LEDs, and its toned bodyshape, XF always looks ready for action. Its primed, nose-down, attitude, power vents and aerodynamic lines are more than an athletic pose, they've been precision-honed through exhaustive design testing to perfect XF's air flow efficiency. Each curve and contour has been refined to produce top aerodynamic performance, helping to reduce fuel consumption and emissions. Beautiful, intense, potent; first XF captures your imagination and then your heart.

## THE XF COLLECTION

For modern sporting elegance and refined power, XF has the style, the attitude and the engine.

Jaguar's Diesel S and Sport models, incorporate a unique lower front bumper profile and a black grille, as well as a specialised spoiler, rear valance and streamlined side sills for a more assertive look. XF's Black Pack offers a pure Gloss Black finish for the front grille and surround. The front bumper blades and body-coloured signature blade complete the distinctive look.

For the optimum combination of stunning appearance and performance, choose the XFR. Sculpted front air intakes, Gloss Black lower valance and quad exhausts give the XFR an aggressive bearing that reflects its position as the ultimate sports saloon. XFR's optional speed pack includes a unique front bumper aero splitter and rear bootlid spoiler.

## COMBINING TECHNOLOGIES FOR EFFICIENCY

XF is renowned for its performance, refined drive and effortless power and offers a choice of engines to suit the needs of every driver and driving style, whether improved fuel economy or power and performance are the priority. The range includes a selection of the latest petrol and diesel units.

Intelligent Stop/Start technology features on all engines delivering improvements in fuel efficiency, depending on conditions. The 8-speed electronic automatic transmission achieves almost imperceptible, superfast gear shifts.

## DRIVING DYNAMICS

Responsive, powerful, driver-focused, XF utilises a range of technologies to assist, improve and enhance the driving experience. XF's acclaimed handling is produced through combining exceptionally stiff body architecture, aerodynamic form and innovative suspension systems.

XF's **Adaptive Dynamics** system, standard on the Diesel S, continuously monitors the suspension, varying the damping to suit the conditions, whether cornering, navigating potholes or accelerating on the motorway. The system calculates the appropriate suspension settings 500 times per second, adjusting the dampers to help keep the car as flat, stable and secure as possible.

With the **Servotronic steering system**, XF delivers pinpoint manoeuvrability at low speeds then reduces assistance at higher speeds for confident handling.

VEHICLE SHOWN: XF 3.0 LITRE DIESEL S PORTFOLIO IN INDIGO

## EXCEPTIONAL HANDLING

Using Jaguar's ride and handling technology, XF is ready for almost all road situations. For an exceptional driving experience, different modes are available to suit the driver's preferences or the prevailing conditions.

Sport Mode adjusts throttle and steering response for a more involving drive. Dynamic Mode (not available on 2.2 Diesel) co-ordinates the vehicle's control systems and sharpens responses to input from the driver, delivering even more responsive acceleration for a thrilling, sporting driving experience. Winter Mode is designed to automatically dampen acceleration to achieve more gradual traction on ice, so tyre grip is increased and skid risk reduced.

XF's **Dynamic Stability Control (DSC)** has two settings. The default setting comes into play as soon as it detects the wheels slipping, applying braking to individual wheels and reducing engine torque. The Trac DSC setting allows some slipping and overspin before it intervenes - this allows for a sportier drive and is also essential with snow chains.

Wherever you are, wherever you go, XF delivers supreme handling and performance.

VEHICLES SHOWN: XF 3.0 LITRE DIESEL LUXURY IN INDIGO

## XFR

For the ultimate in performance XFR takes XF to another dimension. With an acceleration of **0-60mph in 4.7 seconds** XFR intensifies the sporting experience without compromising any of the comfort.

Beneath the bonnet with enlarged air intakes is Jaguar's 5.0 litre V8 Supercharged Petrol engine. This all-aluminium quad-cam powerplant delivers performance and efficiency. Its Intelligent Stop/Start technology and 8-speed electronic automatic transmission is designed to help reduce CO<sub>2</sub> emissions, yet it's powerful enough to produce an impressive 510PS and 625Nm of torque.

XFR's optional Speed Pack recalibrates the engine and transmission to take XFR's top speed (Vmax) from 155mph to 174mph.

VEHICLE SHOWN LEFT: XFR IN ITALIAN RACING RED

## INTELLIGENT SAFETY

XF's safety systems are designed to be anticipatory, utilising an array of technological features to be ready for almost anything and assist the driver in dealing with the unexpected. Dynamic Stability Control (DSC) maximises XF stability when it detects the wheels slipping. Electronic Brake Force Distribution measures load weight and distributes braking force to front and back wheels accordingly.

The optional **Adaptive Cruise Control (ACC)** uses a radar in the front bumper to monitor the vehicle in front, automatically adjusting XF's speed to maintain a constant distance.

**Emergency Brake Assist (EBA)** is designed to work with Adaptive Cruise Control to detect the severity of a stopping situation and applies optimum crisis braking forces as necessary.

The optional **Adaptive Front Lighting** enhances night-time driving. Sensors react to the car's speed and steering input to deflect the headlamp beams casting light deeper and wider to help give added confidence at night.

The optional **Blind Spot Monitor** uses radar sensors to remotely cover areas that cannot be seen either directly or in the mirror, and is designed to alert the driver to cars overtaking with an amber warning icon in the external mirrors.

XF's body structure uses 25 different grades of steel. Boron, an element 900 percent stronger than regular mild steel, is used to help create a vertical ring of safety around XF's occupants. A total of eight airbags help to add further protection.

VEHICLE SHOWN LEFT: XFR IN ITALIAN RACING RED

## CONNECT WITH XF

XF brings complete control to your fingertips using an innovative **7 inch colour Touch-screen**. Simple and intuitive, it ensures you are never more than a few selections from any control: satellite navigation, climate control, Bluetooth® telephone connectivity or in-car audio.

At the heart of XF's multimedia functions is a **30GB Hard Disk Drive**. As well as holding the car's navigation system, it can store up to ten CDs of uploaded music in uncompressed format for enhanced audio quality.

XF's **global navigation system** provides easy updating and lightning fast access to maps and data. It even learns your favourite journeys. Deviate from a proposed route three times and the system will offer your favoured route as an option. Eco route helps you choose the most fuel efficient route by analysing the proposed journey to display three routes, suggesting the most economical one.

To make things even easier, the optional **Interactive Voice** system – Say What You See – helps the driver to use and interact more easily with XF. It displays voice prompts on the Touch-screen for you to vocally control phone calls, navigation or audio.

## SOUNDS ALIVE

Turn on XF's superb audio system and the cabin comes alive. Ten strategically placed speakers deliver 250W of pure audio fidelity, surrounding you with exceptional sound quality.

Also available are two systems engineered by Meridian, the ultimate audio specialists. Both are designed and created specifically for XF's unique interior space. Meridian's 380 watt Sound System with 11 loudspeakers produces a seminal audio experience while the incredible 825 watt Surround Sound System uses no less than 17 loudspeakers (including subwoofer) to create sound that is just as the artist intended. Meridian achieves this by benchmarking acoustic performance against real musical instruments.

Pioneered by Meridian, Trifield™ technology ensures a perfect central image for each occupant and produces an holistic sound within the cabin to deliver a concert-like experience. Within the XF Meridian Audio System everyone can hear the difference.

INTERIOR SHOWN: XF PREMIUM LUXURY WITH UPPER FACIA IN WARM CHARCOAL AND KNURLED ALUMINIUM WITH GLOSS RICH OAK VENEER

## ALIVE INSIDE

Settle in to XF and the softly pulsing 'start' button greets you. Push and the engine engages, XF wakes. Even as you lift your finger, the precision-milled aluminium **JaguarDrive Selector™** rises snugly into the palm of your hand. The engine gently throbs as the air vents, invisible until needed, roll open in unison and cool **Phosphor blue halo lighting** ignites to pick out the interior controls. Let the excitement begin.

Ergonomically optimised, XF's cabin is a space both contemporary and luxurious, created to focus on driver and passenger needs and to excite the senses. Comfort and quality reign supreme with form-hugging seats, premium wood veneers and aluminium surfaces.

From the premium floor carpet and side trims to the polished stainless steel finishers, there is luxuriousness throughout XF. Thoughtful design encompasses every feature. The steering wheel position adjusts at the touch of a button, along with the seat and mirror. These settings can be memorised for different drivers. XF welcomes you to the drive ahead.

## A SPORTIER XF

XF Diesel S represents the pinnacle of the Jaguar diesel range with a power of 275PS and 0-60mph in 5.9 seconds. Improved aerodynamics from the exclusive Diesel S aerodynamic pack and standard Adaptive Dynamics ensure the Diesel S has exceptional handling. Its outstanding luxury cabin features double stitched soft grain leather Sports seats which reshape and adjust to create a perfect fit (only available on Diesel S Premium Luxury and Diesel S Portfolio). From individually fine-tuned lumbar support, to powerfully sculpted side bolsters, they deliver exceptional lateral support during hard cornering. With polished metal sports pedals and Piano Black finishing the XF Diesel S interior is simply stunning.

# BRING YOUR XF TO LIFE

XF is the ultimate sports saloon. Beautiful yet powerful, XF exploits cutting-edge technology to make handling effortless and driving, an unforgettable experience. Sleek outside, sensuous inside, every feature has been tailored to look after you and think ahead for you.

Visit [www.jaguar.co.uk](http://www.jaguar.co.uk) to find out more.

Experience XF for yourself – visit your local Jaguar dealer.

### IMPORTANT NOTICE

Jaguar Cars Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Cars Limited by any express or implied undertaking or representation.

Comparisons are based on manufacturer's own data and testing.

### ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO 14040, the international standard for vehicle 'whole life cycle' assessment. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through its driven life time, to final disposal. But that's not all. Every new Jaguar vehicle is designed to be 85% recyclable and reusable, in addition to 95% recoverable and reusable with 10% for energy generation.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste. Already the manufacturing assembly CO<sub>2</sub> emissions of each Jaguar built in the UK since 2009 is offset. For every tonne of CO<sub>2</sub> emitted in the assembly process, Jaguar invests in carbon reduction projects that reduce an equivalent tonne of CO<sub>2</sub> elsewhere. Offsetting allows Jaguar to take action now, to reduce its impact on the environment, as part of an integrated carbon management plan. This company plan includes targets to reduce operating CO<sub>2</sub> emissions and waste to landfill by 25% by 2012, water consumption by 10% by 2012 and fleet average tailpipe CO<sub>2</sub> emissions by 25% by 2015, based on 2007 levels.

But it doesn't stop there. World class manufacturing facilities certified to ISO 14001 since 1998, transport miles have been cut from delivery routes and new ways are being introduced to produce energy from food waste at our Gaydon site in the UK. That's Environmental Innovation at Jaguar.
