CHANNEL YOUR ENERGY

CONFIDENCE WITH A CONSCIENCE.

Juke is powered by a choice of engines, with Nissan's ultra modern 1.6 direct-injection turbo-charged (DIG-T) at the top of the range fusing urban priorities; fast acceleration, ultra-responsive performance and low fuel consumption – the best of all worlds.

HIGH-PRESSURE FUEL PUMP. It works to significantly improve power output and torque.

VALVE-TIMING CONTROL. Maximum injection efficiency is ensured by a twin VTC system for higher response at low and medium speeds.

CLEANER EXHAUST. Stratified combustion during warm-up and optimised ignition timing activates the catalytic converter quickly for cleaner exhaust gas.

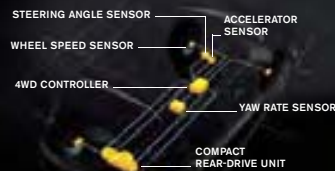

FUEL EFFICIENCY. Nissan has cut internal friction and reduced the weight of valves and moving parts to save fuel.

*Engine availability is grade dependent.

INTUITIVE MONITORING. The Torque Vectoring System splits torque sent to the rear wheels from side-to-side, increasing torque to the outer wheel to deliver responsive & agile handling. Constantly processing information and anticipating the driver's intention, it's almost as if Juke is reading your mind.

IMPROVED COMFORT. With ALL MODE 4x4-i and a sophisticated multi-link rear suspension setup that further improves the handling and ride comfort.

SMOOTH CORNERS. Super responsive; Juke provides a safe and confident driving experience. The ALL MODE 4x4-i system redistributes torque automatically – sending up to 50% to the rear wheels to maximize traction anytime and in any condition.

*Torque Vectoring System and multi-link rear suspension only available on 4WD Juke.
